PREFACE

THIS book owes its existence to the Boden Professor of Sanskrit, Dr A. A. Macdonell, who suggested to me the writing of it, and who secured its acceptance for publication by the Delegates of the Clarendon Press. Professor Macdonell was also so good as to read the proofs of the first three sheets before he left England in 1907 for his tour in India, and for this and all the other help he has given me in the course of my Sanskrit studies I desire to express my most sincere thanks.

The editing of the text has been rendered possible for me by the liberality of the India Office and of the Royal Asiatic Society, which lent to me the manuscripts on which the text is based. To the Secretary of the Society, Miss Hughes, and to the Librarian of the India Office, Mr F. W. Thomas, I owe grateful acknowledgements of the assistance afforded me in this and other ways.

I have tried by the translation and commentary to extract as much as possible from the Aitareya Āranyaka, as I recognize that a text of this class should as far as practicable be made by its editor to yield all that can be derived from it for the knowledge of the period when it was produced. With this end in view I have added a series of Indexes which contain in great fullness the lexical material of the work, while the material will also serve for grammatical purposes, as in each case the precise form which occurs is specified. I need make no apology for the distinction made between the Mantra, the Aranyaka, and Sutra forms; not to distinguish the different strata of the text would be merely misleading.

In the commentary I have tried to avoid repeating what can easily be found in such standard works as the *St Petersburg Dictionaries*, Colonel Jacob's *Concordance* to the Upanisads and Deussen's treatise on the *Philosophy of the Upanishads*. Nor have I thought it worth while to note in detail the verbal coincidences between the Aitareya Brahmana and the Aranyaka. As might be expected they are constant and show unmistakeably the connexion of the two works. Some other points arising out of the book I hope to deal with elsewhere.

I had not originally any intention of including in the book the text of a portion of the Sānkhayana Aranyaka which now forms the appendix I hoped that Dr Friedlander would complete his projected edition of that text, and it was only after a considerable portion of the book was in type that I learned that there was little or no prospect of the appearance of an edition at any early date I then obtained the permission of the Delegates to print so much of the text of the Śankhayana as was unpublished, and the Royal Asiatic Society were so good as to include a translation of the whole Aranyaka in their series of Oriental Translations, and to publish an article of mine on the Śankhāyana Aranyaka in the Journal of the Society for 1908 The translation and the article will be found to supplement in some important points the information as to the Sānkhayana contained in this book

The printing of the work has occupied over two years, and has entailed a good deal of trouble on all those concerned with it I desire to express my thanks to Mr R W Chapman, of the Clarendon Press, for the interest which he has taken in it and for valuable suggestions which he has made from time to time on points of form It gives me also much pleasure to acknowledge the great pains taken by the Oriental Reader of the Clarendon Press, *Mr J C Pembrey, Hon MA of Oxford*, in dealing with the proofs. For such errors as remain I must accept responsibility This is the fourth book of mine which has had the advantage of Mr Pembrey's care and skill, and I feel that it would be difficult to exaggerate the value of his assistance

THE AITAREYA ĀRANYAKA

INTRODUCTION

I The Text

When, in June 1905 I commenced preparations for the production of an edition of the Aitareya Āranyaka, I was mainly influenced by the expectation raised in part by the reference in Prof Buhler s Report[1] on his Kashmir journey to differences in the text in a birch bark MS, that it might be possible to amend considerably the text of Rajendralala Mitra's edition Rajendralala used only two complete MSS of the text, and three of Sayana s commentary, besides three other MSS of parts of the text or commentary and it seemed reasonable to suppose that the employment of additional MS material would add to the correctness of the text This expectation has not been justified The use of additional MSS enables me to correct a good many slips and one or two serious omissions in Rajendralala s text but it establishes the fact that the tradition as to the text seems unbroken Variant readings occur here and there but none of sufficient importance to justify the idea that any different recensions of the text ever existed and it is hardly ever possible to feel serious doubt as to the correct reading What is especially important is that MSS from both the extreme north—as Buhler s MS from Kashmir—and the south agree in presenting the same text Further the commentary of Sayana presents the same text as the commentaries of Sankara on Books II and III, and of Ānandatirtha and *Viśveśvara on the same books*

The MS Material

The MSS which directly or indirectly have been used for this edition are as follows —

1 A This MS is dated *saṃvat* 1854 (= A D 1797) and contains the text of the Āranyaka complete It belonged to Colebrooke, who annotated it, and used it when writing his *Essays* The substance of his note on the authorship, *Essays*, I, 46, occurs on fol 60ᵛ of the MS The MS is No 76 in Eggeling's *Catalogue of the Sanskrit MSS in the Library of the India Office*, Part I Written on paper in Devanagari

---

[1] *Journal Bombay Branch Royal Asiatic Society* 1877 Extra No p 34

2. B This MS is on birch-bark and in Sārada characters It contains the Rgveda Samhita the Khilakanda, and on ff 188ᵛ–191, the Aitareya Āranyaka, Book III, only It was discovered by Prof Buhler, and the information it offers regarding the Khilas is discussed by Prof Macdonell, *Brhaddevatā*, I, xxxi See also Max Muller, *S B E*, I, lxxviii, lxxix, who used it in preparing his translation of the Upanisad, and Dr Scheftelowitz, *Die Apokryphen des Rgveda*, pp 32 sq, 167, 168 It probably dates about A D 1575[1]

The variants of this MS have been referred to as important, both by Buhler and Dr Scheftelowitz. This view appears to me erroneous Whatever may be the value of the MS for the criticism of the text of the Rgveda[2] it contributes, in my opinion not a single correction to the text of Āranyaka III It contains many errors e g *prajaya*, *prajayah* for *prajayā*, *samhitya* for *samhitaya*, *sandhim* for *sandhin*, *abhyasam* for *abhyasam*, &c Most of its variants can be proved incorrect from the context In III, 1, 4, *cen* is omitted in the first clause, but in the second *cen* occurs and it is most improbable that the word should be omitted in the first of two precisely parallel clauses. Then also *chakshuvantam* is read without the negative, which reduces the passage to nonsense In III, 1 5, *purva* is omitted before *rupam* but the context urgently requires its presence, the words *putra aha* are also omitted, but leave *madhyamah* unintelligible, and *ekikurvan* for *anekikurvan* is contradicted by the next clause In III, 1, 6, a whole clause is omitted because it begins and ends with the same words as the preceding clause, *tam* is omitted in a Rgvedic quotation while by diplography *sa samsaditih* stands for *samsaditih* In III, 2, 1, an unnecessary *iti* is inserted before *etat proktam*, presumably because an *iti* is expected with the form *proktam*, and the whole phrase *trayam tv eva na ity etat proktam* is repeated in III, 2, 2, where it is not in place In III, 2, 1, it is required because it contradicts a view of Hrasva Mandukeya that there was a fourth class In III, 2, 2, the threefold division is accepted The same tendency to diplography is seen in the double *akar* in the same section In III, 2, 3, the obvious *brahmanam* appears for *brahmānam*, but just before we have *brahmā rasah* In the list in III, 2, 2, *manomayah* is wanting, but it appears in the precisely similar list in III, 2, 3 Another omission is seen in *nasyanukte*, III, 2, 4, for *na tasyanūkte*, and *'mato* has fallen out between *'gato* and *'nato* The defective *āskandati* is balanced by *jīvamsyati*

---

[1] See my note, *J R A S*, 1907, p 275

[2] Cf Oldenberg *Gott gel Anz*, 1907, pp 235 sq

Other alterations are inferior in sense In III, 2, 4 *vāśarīram* for *vāsirasam* after *jihmaśirasam* postulates the possibility of perceiving a disembodied spirit, which is difficult, *candrama evādityo*, ibid, is inferior to *ivādityo*, *apagirati* is required rather than *avagirati*, &c

The only passage in which B offers at first sight a better text is III, 2, 6 *Prajapatih prajah srstva vyasramsad a samvatsaram*, where it may be suggested to take *a samvatsaram* as = over a year This is not quite impossible but it is not likely, and then the proper form is undoubtedly the middle, cf *vyasramsata*, Aitareya Brahmana, III, 27, &c Further, it is very difficult to see how the standard text could ever have been altered from this reading But palaeographically the corruption found here is quite easy *d* and *t* are not very different in Saradā MSS, and *t* actually appears for *dh* in III, 2 3 *anuvitan* for *anuvidham*, a much less easy mistake Then *a* and *ā* are often interchanged, as in *anuvitan* just cited, and in *anjani*, III, 2, 3, for *anjani*, *anusamhitam*, III, 2 6, for *anusamhitam samvatsaram* may have followed when *a* became *a*, or have been an independent attempt at an easier reading

Other errors are the interchange of *a* and *i*, °*samhitah*, III, 1, 1, for °*samhatah*, *baturakam*, III, 2, 4, for *batarakam*, of *a* and *e* the characteristic stroke for the latter being omitted *agnar* and *ratrisuktana*, III, 2 4 *r* is treated like *ri* and so written in *rite*, III, 2, 2, so in the Khilas, V, 3 *tayrin rñjase* is written for *tayrnn*, cf Scheftelowitz, p 175 i and ī are also confused

In some points the MS is accurate Before gutturals and labials the appropriate sign for *h* is used For *h s* or *h s*, *sś* or *ss* always occur, and anusvara is practically never misused After *r* and *m* duplication of consonants is regular, and for *d ha* is always written *d dha*

But on the whole, I consider the MS, though in many ways valuable, yet to contain many corruptions due in part to the errors inevitable in transcription and copying of Saradā MSS and in part to attempted correction of the text The result of the comparison with the text of the

Āranyaka and with the Śankhāyana Āranyaka leads me to look with doubt on the readings of the MS *where they differ from other sources*

3 **C** This MS was written in *śake* 1585 (= A D 1663), *śobha asadhat adi 7 bhrgau* by Saradanandavamsodbhava Mahadeva The first sixteen leaves, however, are in a different hand and originally formed part of another MS They contain part of Book II, while the rest of the MS contains part of Book III (ff 17–103) and the last Khanda of the third Adhyaya of Book V, in each case with Sayana's commentary See Eggeling No 83 Written on paper in Devanagari

4 **D** This MS is one of the Whish collection in the Library of the Royal Asiatic Society It is on palm leaves and in Grantha characters, legible and not very incorrect. See Thomas in Winternitz *Catalogue of South Indian Sanskrit Manuscripts*, No 191 It contains the Āranyaka complete Its probable date is A D 1700

5 **E** This MS was presented by Dr Burnell to the India Office It is fairly well written in Grantha characters on palm leaves It is No 84 of Dr Burnell s collection, see *Catalogue of a Collection of Sanskrit Manuscripts*, Part I *Vedic Manuscripts* It contains the Āranyaka complete It probably dates from the eighteenth century

6 **F** This MS belonged to Colonel Claud Martin and like G appears to have been presented to the India Office by Colebrooke It forms part of a corpus consisting of the Āśvalayana Srauta Sutra Purvasatka (ff 1–20) Uttarasatka (ff 1–11) Grhya Sūtra (ff 1–17) Sarvanukramani (ff 17^v–24) and Āranyaka (ff 25 35) It contains the Āranyaka complete See Eggeling No 80 Written on paper in Devanagari about the end of the eighteenth century

7. **G** Like F this MS belonged to Col Claud Martin, and was presented to the India Office by Colebrooke It also contains a corpus consisting of Āśvalayana Srauta Sutra, Purvasatka (ff 1–64), Uttarasatka (ff 1–40), Grhya Sutra (ff 1–26) Sarvanukramani (ff 1–28) and Āranyaka (ff 1–45), complete See Eggeling No 79 Written on paper in Devanagari about the end of the eighteenth century This MS is closely connected with F

8 **H** This MS contains the commentary of Visveśvaratirtha on a commentary by Anandatirtha on Books II and III of the Aranyaka. The text is not cited in full but the commentary shows that it was identical with the text of Sayana See Eggeling No 84 Written on paper in Devanagari in the seventeenth century

See Eggeling No 87 Written on paper in Devanāgari in *samvat* 1853 (= A D 1796)

18 25 R^{1-8} are the MSS used by Rajendralala Mitra for his edition, *Aitareya Aranyaka with the Commentary of Sayana Acarya Bibl Ind*, Nos 325 329 335 337, and 345 Calcutta, 1875-1876 Their description is (Introd, pp 20, 21) as follows —

Ka (= R^1), lent by Pandit Vamana, of the Benares Sanskrit College dated *samvat* 1816 (= A D 1759) *virodhisamvatsare karttikaśukla-saptamyam Viśveśvararajadhanyam* It contained the commentary of Sayana on the whole Āranyaka

Kha (= R^2), from the Sanskrit College at Calcutta, containing Sayana's commentary on Books I and II Apparently old

Ga (= R^3) from Dr G Buhler of Bombay, dated *śravanavadi* 30 *śanivare sake* 1788 (= A D 1866) *kṣayanamasamvatsare*, containing the commentary complete

Gha (= R^4) copied for Rajendralala under the superintendence of Babu Amrtalala of Benares and collated with two different codices the codex copied being dated *samvat* 1828 (= A D 1771) *śravanavadi* 3 It contained the commentary complete

Ka (= R^5) copied for Rajendralala under Amrtalala s superintendence and collated with a MS dated *samvat* 1775 (= A D 1718) *kilakanama samvatsare dakṣinayane varsa rtau bhadrapade masi krsnapakse bhrguvasare taddine pustakam samaptam* It contained the text complete

Kha (= R^6) copied for Dr Burnell of Mangalore and lent to Rajendralala The original belonged to a pandit in Tanjore It contained the text complete Cf E

Ga (= R^7) from the Library of the Asiatic Society of Bengal containing Book II only of the text, written in the saka year named Vyaya by Narayana of Candrapura for his master Śivarama

Gha (= R^8) from the Library of the Sanskrit College, Calcutta, containing Book IV, with Sayana s commentary

Of these *ka* and *kha* (presumably R^5 and R^6) are said to belong to the same class But it is clear that Rajendralala merely compiled an eclectic text from the various MSS and that he did not contemplate a critical text R *denotes the reading of the edition when it appears to rest on all the MSS available*

26-34 S^{1-9} are the MSS used in the edition in the Anandasrama series, 1898, No. 38, with Sāyana's commentary by Bābāśāstri Phadake. They are as follows —

Ka (= $\mathbf{S}^1$), containing text and commentary complete, belonging to Srīmat Gurumahārāja, of Karavirapura.

Kha (= $\mathbf{S}^2$), containing text and commentary complete, belonging to Gangādhara Sāstri Dātāra, of Punyapattana.

Ga (= $\mathbf{S}^3$) and *Gha* (= $\mathbf{S}^4$), containing text and commentary complete, from the Anandāsrama library.

Na (= $\mathbf{S}^5$), containing text and commentary of Books II-IV, belonging to Bhāusāheba Bālāsāheba Kibe, of Indūrapura.

Ca (= $\mathbf{S}^6$) and *Cha* (= $\mathbf{S}^7$), containing text only, from the Ānandāsrama library.

Ja (= $\mathbf{S}^8$), containing text only, belonging to Bhāūsāheba Bālāsāheba Kibe, of Indūrapura.

Jha (= $\mathbf{S}^9$), containing text only, belonging to Śankararāva Bhāgavata, of Thāne.

There is no doubt that some care has been taken in giving the variant readings which are practically confined to the commentary. Where the MSS appear to agree, S is used to denote the reading of the edition. The text of the Āranyaka in this edition contains some errors and omissions, but is superior to that of Rājendralāla.

35. T. This is the version found in the collection of 108 Upanisads published in Telugu character at Madras in 1883. It contains no important variants, and seems conclusively to prove that the South had no separate recension. See Deussen, *Sechzig Upanishad's des Veda*, p. 534. In view of Sankara's influence in Southern India, this was only to be expected.

36. U. This symbol is used to denote the text of the Upanisad with Sankara's commentary, Ānandatīrtha's super-commentary, and with Vidyāranya's (Sāyana's) Dīpikā, published in the Ānandāsrama series, 1889, No. 11. For this edition were used five MSS (*ka, kha, ga, gha, na*) of the text, commentary, and super-commentary, six MSS (*ca, cha, ja, jha, tha, da*) of the commentary, two MSS (*ka, kha*) of the text alone, and four MSS (*ka, kha, ga, gha*) of the Dīpikā, besides two editions (*ña, ta*). The variants are, however, almost confined to the commentary.

37. W. This MS. contains Sayana's commentary on Book I of the Āranyaka. It is on palm-leaves and in Malayālam characters, and is very inaccurate It is one of the Whish MSS in the Library of the Royal Asiatic Society See Winternitz, No 1 (b), who assigns it to the eighteenth *or nineteenth century*

38 X This MS contains Sankara's commentary on Books II and III of the Āranyaka It is written on palm leaves in Malayālam characters The MS is much damaged It is No 158 in Winternitz s *Catalogue*, and may be assigned to the seventeenth century

Of these MSS I have collated all save R^{1-3}, S^{1-8}, and those used in U There are many other MSS and editions of the Upanisad in existence *and several* MSS *of the Āranyaka (see Aufrecht Catalogus Catalogorum*, s vv) but there is no reason to suppose that any of them would add anything new to the text Max Muller used (cf *S B E*, I, xcvii) a MS of the text with Sankara and Ānandatirtha's commentaries, and also a commentary by Sankara[1] on Book III, Adhyaya 1, but he states that the MSS he used gave little aid It appears from Weber s Catalogue that the Berlin MSS have no independent value

The MSS used are on the whole decidedly inferior They are modern copies and contain many clerical errors No useful purpose would be served by recording all the blunders of the scribes I have therefore printed only those which seemed of more importance, either textually or palaeographically, save in the case of B, in view of the special—if somewhat artificial—interest of that MS

In Rājendralala s edition, and in Max Muller's translation of the first three books of the Āranyaka (*S B E* I) the text besides the division into Adhyayas and Khandas shown in all the MSS, is divided into short sections which are numbered These numbers seem to be attributable to Rajendralala himself, as there is no trace of them in any of the MSS I have used or in the Ānandaśrama edition The divisions follow the treatment by Sayana of the text in his commentary, but they cannot be said to be always satisfactory, consistent or convenient, and I have not felt bound to adopt them None of the MSS show any satisfactory or consistent punctuation—such a punctuation being practically unknown in Sanskrit MSS of prose works—and I have therefore adopted what seemed to me the most convenient punctuation

---

[1] That this is the correct description of the work follows from a comparison with X though the MS does not name the author (Wickremasinghe *J R A S*, 1902 p 632)

In the Upanisad (II 4-6) within the Khandas there is a division into sections in accordance with Sankara's commentary which differs greatly from that of Sayana, and which has been adopted in the editions of the Upanisad This enumeration might have been retained for convenience of reference, but for the sake of consistency I have preferred to omit it

With regard to the text of Sāyana's commentary it may be observed that neither Rājendralala nor the Ānandaśrama edition gives a very correct version It is clear that Rajendralala freely corrected his MSS, and that even the numerous variants given in the Ānandaśrama do not exhaust the variations of reading Curiously enough the editors of the latter cannot have consulted the former For example the commentary on *madhumati* in V, 2 2, reads *saraso* (*casau* is suggested as a correction) *madhvadimadhuryarasopetatvan madhuman* Rajendralāla has *sa ca somajyādimadhuryarasopetatvan madhuman* which, as the noun is (*upa*) *prakse* glossed as *yagapradeśe*, is neat and convincing Or again V, 2, 1, where Rajendralala has the obvious *savah satrunam balam*, while the Ānandaśrama has [*satri*] *nam* [*śavo?*] *balam* while just after *im ativyathir* is rendered according to Rajendralala *evam śatrum atisayena calitavan*, and according to the Ānandāśrama *imam sattum* &c One MS, S³, has *santum*, and of course there is no easier mistake in MSS than that of *tr*, *tt*, and *nt*, while interchange of sibilants is constant Or again in the quotations at the end of V, 1 5, both editions present bad texts but Rājendralāla has *etac carma* while the Anandaśrama has *etac ca karma*, which in view of the context is absurd Many other instances could be quoted, and undoubtedly either in many places Rajendralala's MSS were superior or his critical judgement was better, probably the former Further, there are repeated,—sometimes very serious, e g I 5, 2,—omissions in the Ānandaśrama text, and in places, e g I, 5, 1, the text has been badly confused

On the other hand, there are many instances where the Ānandaśrama text is superior to that of Rajendralāla For example the note in the latter edition on II, 3, 4, p 226, line 3 from foot *dhyanayapyam*[1] *anenaikapaksah* is meaningless, but a perfectly good sense is given by the Ānandaśrama reading (see note on p 135) *Dhanamjayyam*

---

[1] Cf the absurd reading in the ed of Latyayana Srauta Sutra III, 10, 11, *Dhanamjayapyah*

The comparison of the two editions would give a satisfactory text in all respects save in quotations from unknown works In these Rajendralāla is usually superior to the Ānandaśrama but neither is very accurate, and further MS authority would be requisite

From a comparison of the recorded readings the MSS of the commentary appear to be divisible into the following classes (1) R^1, and R^3, with which may be classed C, and so far as it goes I, (2) S^1, S^2, S^4, S^5, which approach closely to class (1)—in this class S^1 and S^2, and S^4 and S^5 are closely related, (3) S^3 which falls into a distinct class of its own, (4) R^2 and R^4 which again form a distinct class, and (5) W

The MS material available would not suffice to form a text either of Śankara's commentary on the Āranyakas II and III, or of Viśveśvara's super commentary on Ānandatīrtha s commentary on those Āranyakas the more so in the latter case that no MSS of the commentary itself have yet come to light

In the edition of Rajendralala and in the MSS A and E only are accents used These accents are clearly confined to those verses not occurring in the Rgveda Samhita which are quoted in full in the Āranyaka V Unfortunately in the edition the accents are often obviously incorrect, one word having two accents, or a series of words being incorrectly accented so as to show that an error in printing must have taken place The MSS also, as often are carelessly and inaccurately accented, and it is therefore not possible to lay stress on the accentuation of any rare words, especially compounds The matter is of little consequence, however, as the total number of accented words is small and nearly all, save a few compound words are recorded in well accented texts

It may here be mentioned that I have, wherever necessary, restored correct spellings, e g *pattram* not *patram*, and have in accordance with the normal practice of the MSS,[1] omitted visarga before a sibilant followed by a hard consonant In the case of *ch* I have never inserted the *c*[2] but in deference to the ordinary practice I have always written *tad dhi*, not *tad hi*, and of course *uddhṛtya* for *ud hṛtya* On the other hand, duplication after *r* has been omitted, though it is usual in all the MSS, while the avagraha is inserted wherever it is properly required despite its omission in the MSS The nasal in Plutı is represented by the ardhacandra mark In R the ordinary anusvāra is used as is done in the MSS, but not in S

---

[1] Cf Macdonell *Bṛhaddevatā* I xxvi, n 4 Allowed by Vārttika on Pāṇini, VIII 3, 36.

[2] Cf Whitney, *Sanskrit Grammar* § 227 In Lanman s edition of Whitney s translation of the Atharvaveda *ch* is written everywhere even when *cch* represents an assimilated letter + *ch*, e g *brhacl anti*, in which case *cch* is used in this edition Cf, however, Wackernagel *Altindische Grammatik* I, 154 sq, Macdonell *Vedic Grammar*, p 31

II The Commentaries

The commentaries on the Āraṇyaka which I have used are the following —

1 Sankara's commentary on the Upanisad (II, 4-6) Sankara's date has now through the evidence of the Āryavidyāsudhākara and Pathak's researches (*Journal Bombay Branch Royal Asiatic Society*, XVIII, 88, 218 sq), been definitely fixed from A D 788 to the middle of the ninth century The date A D 820 formerly assigned to his death, must refer to the commencement of his labours This commentary has been repeatedly printed, best in the Anandāśrama series Poona, 1889

2 Śankara's commentary on Book II, the first part of the Mahaitareyopanisad This is only available in the MSS P and X, neither of which presents an accurate text In the Adhyayas 4-6, it is of course identical with (1) Fortunately the analogy of Sayana's commentary on Adhyāyas 4-6 and comparison of the two commentaries on Adhyāyas 1-3 establish the fact that Sayana followed Śankara with considerable fidelity

3 Śankara's commentary on Book III, the Samhitopanisad This is only available in the MS X but is followed by Sayana

4 Ānandatirtha's super commentary on Śankara's commentary on the Upanisad Anandatirtha is said to have died in A D 1198 and to have been a pontiff of the Madhva sect (Bhandarkar, *Report on the Search for Sanskrit Manuscripts*, 1882 1883 pp 18 103) The date has recently been questioned by Harikrsna Śastrin (*Epigr Ind*, VI, 261) who prefers to date him from A D 1238-1317, on epigraphic evidence of considerable weight This commentary has frequently been printed, best in the Anandaśrama series As has been mentioned above in several MSS the commentary is attributed to Abhinavanārāyanendra, who in one of the MSS in the Bodleian Library (*Catalogue*, No 977) is thus described *iti śrimatkai alyendrasarasvatipūjyapadaśiṣyaśrīmajjñānendrasarasvatipūjyapadaśiṣyaśrīmadabhinavanārāyanendrasarasvatīviracitāyām Aitareyabhāṣyaṭīkāyām* | There can be little doubt but that we must assume Ānandatīrtha's real name to have been Abhinavanārayanendra Sarasvati, especially as he is indifferently called Ānandatīrtha, Ānandagiri, or Ānandajñāna, the name he probably took as pontiff[1] Cf also No 1010 (3) in the *Catalogue*, where he is called Narayanendra Sarasvatī

5 Viśveśvaratīrtha's super commentary on Ānandatīrtha's commentary on Books II and III This is only available in the MSS H and O, and no MSS of the commentary itself appear to be extant Ānandatīrtha, who is called *bhagavatpadacarya*, must, I think, be identical with the Ānandatīrtha above mentioned, and must have written two different works in connexion with the Aranyaka, first the super-commentary on Śankara's commentary, and second an independent commentary on the Āranyaka, in which he interprets it in a Vaisnava sense Max Müller (*S B E*, I, xcviii) appears to doubt this identity, but it must be remembered that Ānandatīrtha was a Madhva and so not unlikely to be disposed to adopt a Vaisnava interpretation and that there is nothing rare in Indian literary history in finding an author ready to comment on both sides of a question Compare the case of Vacaspatimiśra,[2] who wrote commentaries on the works of all the philosophical schools save one Further the interpretation of Sankara had always to contend against that of Ramanuja,[3] and it was by no means unnatural for a scholar like Ānandatīrtha to set forth both views, the Vaisnava interpretation representing his own

Viśveśvaratīrtha appears to have been the pupil of Ānandatīrtha, and to have written this work in the lifetime of his master, as is indicated by verse 3 of the introduction *Aitareyopanisado vyakhyano bhasyam uttamam | śrimadanandatirtharyan natva tatpritikamukah* ‖ 3 ‖ It is worth noting that Jayatīrtha, the successor of Ānandatīrtha similarly wrote a super commentary on Anandatīrtha's commentary on the Praśna Upanisad, and that that commentary is distinct from Ānandatīrtha's super commentary on the commentary of Śankara on that Upanisad[4] The same remark[5] applies to Ānandatīrtha's commentary on the Īśavasya Upanisad and to his super commentary on the commentary of Sankara on that Upanisad Visvesvara was evidently closely connected with Anandatirtha, as a MS of Anandatirtha's super commentary on Sankara s commentary on the Brhadaranyaka Upanisad of the seventeenth century is described by a later hand as *Visveśvaranandatirthamathastham* (Bendall, *Catalogue of Sanskrit Manuscripts in the British Museum*, p 15) Bendall l c, refers to a commentary by Viśveśvaratirtha on the super commentary of Anandatirtha on the Brhadaranyaka Upanisad, but the evidence cited above leaves little doubt but that the commentary of Viśvesvaratirtha is on an independent commentary by Ānandatirtha and not on his super commentary The exact locality of this Math is unknown but Jayatirtha it may be noted, was a native of Mangalavedhem near Pandharpur

6, Sāyana's commentary on the whole Āranyaka Besides the edition of Rajendralala Mitra and that in the Ānandaśrama series I have used MSS C, I and W There are many minor variants in the text but there is no trace of any double recension In the Ānandaśrama edition of the Upanisad the commentary is attributed to *srimatparamahamsaparivrajakacaryavidyaranyamuni* This as Klemm has shown in the *Gurupujakaumudi*, is the title of Madhava the brother of Sayana, and not of Sayana This attribution to Madhava is an error, Sayana in the preface tells us distinctly that the work is his *tatkataksena tadrupam dadhad Bukkamahipatih* | *adiśat Sayanacaryam vedarthasya prakasane* ‖ 3 ‖ In all probability it was genuinely composed by Sayana himself, it agrees with his Rgveda commentary in general and was written after the commentary on the Aitareya Brahmana It was written probably under Bukka I, who was certainly reigning in A D 1354 That Sayana died in A D 1387 is probably an error, though that may be the year of Madhava s death His commentary throughout is dependent on that of Sankara on Books II and III, as he admits in the introduction to Book II

Sankara, Ānandatirtha in his super commentary, and Sayana all interpret the Upanisads in II and III in the light of the Vedanta On the other hand Viśvesvara in the super commentary follows Ānandatirtha in giving a Vaisnava interpretation I have not followed either view The Upanisads can only be satisfactorily explained by regarding them as what they are, early attempts at philosophy, and by refraining from reading later ideas into them The interpretations given by the commentators have, however, a value as showing the development of philosophical ideas, and I have therefore whenever desirable referred to them In several cases too they afford great assistance in the interpretation of the text

It may here be mentioned[1] that most of Book II, that is, Adhyāyas 1–3, 4, and Adhyayas 4–6, are translated by the author of the Persian translation which was made for Dara Shukoh between A D 1656–1657, and retranslated into Latin in 1801, 1802, by Anquetil Duperron This translation, besides being much less intelligible than the original, adds, as far as I can see, nothing substantial to our knowledge

The commentary of Śankara establishes for the ninth century the text of the second and third books of the Aranyaka as we now have them Whether there were variants in his time we cannot determine with certainty, as his text has clearly alone formed the subject of study The other commentators all depend to some degree on him Ānandatirtha, in his own work, uses him, and Sayana uses both him and Ānandatirtha The evidence for the time before Sankara is wanting The later Upanisads borrowed their doctrines and phrases from works which were more developed and displayed more literary pretensions than the Aitareya, while the secular literature makes no direct quotations All we can say is that the Moksadharma of the Mahabharata and Badarayana in his Brahma Sutra (III, 3, 16, 17) probably used the Aitareya Upanisad,[2] but the next evidence is again Śankara's commentary on those Sutras

Though strict proof beyond Sankara cannot be attempted, there is no reason to doubt the integrity of the text of these books They are not, in subject-matter, open to easy interpolation, and in all probability in their present form they fairly represent their original shape in the time of Saunaka

Nor is there any special reason to assume alteration in the verses which make up Book IV for which there is considerable independent evidence.

For Books I and V we have no earlier authority than Sayana But he appears to have had before him a fixed text, and the various readings which he gives are practically limited to the last chapter of V, 3, the contents of which certainly lay it open to interpolation yet Sayana of course was not the first to write a commentary on the Āranyaka He expressly refers, on V, 1, 1, to differences of interpretation, as to whether *tivrasyabhivayasah* (RV, X, 160, 1) meant four verses or one only according to rule, and on V, 3 3, he refers to differences both of reading and of opinion We are therefore justified in regarding the text he gives as practically a textus receptus by the fourteenth century A D

[1] Cf Max Muller, *S B E*, *I*, lvii sq , Deussen, *Sechzig Upanishad's*, pp 535 sq

[2] Cf Deussen, *Philosophie der Upanishad's*, p 28 English Translation, p 29, and, for the Mokṣadharma, note on *II* 5

Whether or not it is original cannot be answered with certainty Amongst others, Hillebrandt (*Sankhayana Śrauta Sutra*, pp x–xv) considers that the text of the Sūtras is much altered from the original, but in the case of the Āranyaka I, or V, it would be difficult to prove this doctrine, inasmuch as the Āranyaka seldom presents the truly remarkable variety of rules and exceptions shown by the present text of Sankhāyana Further the text of the first book assists in checking the fifth book, and appears throughout to agree with it Again in the former case, where the work is a true Āranyaka, the idea of later alteration is less probable than in a formless work like the fifth book, which is practically a Sutra itself Moreover, although a certain fluidity of text may be admitted in the Sutras, the extent of such fluidity appears to be greatly exaggerated by Hillebrandt

III The divisions of the Āranyaka and their date

There is some uncertainty as to the exact meaning of the word Āranyaka Sāyana gives two somewhat different interpretations of it In the preface to the Aitareya Brāhmana (Aufrecht's edition, p iii) he describes it as *Aranyavratarupam brahmanam* in the preface to the Āranyaka itself he says *Aitareyabrahmane 'sti kandam Aranyakabhidham | aranya eva pathyatvad aranyakam itiryate* ‖ 5 ‖ and *sattra prakarane nuktir aranyadhyayanaya hi | mahavratasya tasyatra hautram karma vivicyate* ‖ 8 ‖ The latter view is energetically supported by Oldenberg[1] and is adopted by Macdonell[2] The former has the support of Weber[3] and Deussen[4] argues in favour of it on the ground that the aim of the Āranyakas was to supply a substitute for the sacrificial rites to be used by Vānaprasthas This view, however, is rather far fetched The Āranyaka seems originally to have existed to give secret explanations of the ritual, and to have presupposed that the ritual was still in use and was known No doubt the tendency was for the secret explanation to grow independent of the ritual until the stage is reached where the Āranyaka passes into the Upanisad, and contemporaneously the life of the Hindu is differentiated into the four Āśramas But originally an Āranyaka must have merely meant a book of instruction to be given in the forest

It is not now possible to decide exactly why the Aitareya Brahmana does not deal with the Mahāvrata rite In Sayana's time it was already held that the author of the Aitareya Brahmana was also the author of the Aitareya Āranyaka, Books I III,[1] and Sankara may conceivably have held the same view, as he calls the Upanisad the Bahvrcabrahmana Upanisad[2] It is however, impossible to accept this version as correct It is probable enough that Mahidasa Aitareya is the editor or arranger of the Aitareya Brahmana, as Aufrecht thought, It is true that the Aitareya Brahmana is not in all probability the work of one hand or period,[3] but it must have been at some early date welded into one work, and tradition may fairly be considered to have given us the name of the man who did it We know from Panini V 1, 62, that in his day Brahmanas of thirty and forty Adhyāyas existed and Weber's[4] conjecture that the reference is to the Sankhayana and Aitareya Brahmanas is almost certainly correct But though we can fairly ascribe to Mahidasa the arrangement of the Brahmana it would be incorrect to ascribe to him even the first three books of the Āranyaka since in them he is cited as a teacher He is named expressly in II, 1, 8 and 3 7, and is clearly referred to in I 1, 1 This must be taken as decisive[5] against his authorship of these books of the Aitareya Āranyaka though it is clear that some of his views are expressed in them We may perhaps suppose that Mahidasa besides editing the Brahmana was a philosopher of some distinction since otherwise his name would hardly have come down to us. Of his life we know nothing Sayana tells us a legend of his being the son of

[4] *Indian Literature* p 45

[5] So Rajendralala Introduction p 8 Weber, *Indian Literature* p. 48 and cf Macdonell *Brhaddevatā* I xxi for a similar case See also however Weber *Ind Stud*, XIII 322 sq according to whom Patanjali appears to allude to himself in the third person This however is less likely to be the case at so early a date as that of Mahidasa though later it is not rare

Itara; Ānandatīrtha, in his original commentary, describes him as the son of Viśala and an incarnation of Nārāyana. Perhaps there is some truth in the reference to him in the Chāndogya Upaniṣad, III, 16, 7, and the Jaiminiya Upanisad Brāhmaṇa, IV, 2, where he is said to have lived for 116 years, at any rate it shows that he was a famous sage and probably a real person.[1]

The three books attributed to him can on internal evidence be divided into four parts. The **first book** consists of an explanation of the Mahāvrata from a ritualistic and allegorical point of view. It describes the different Śastras of the morning, midday and evening libations of the Mahāvrata day of the Gavāmayana, a theme touched on in the Aitareya Brāhmana, III, 1–38, IV, 14, but indulges in further allegorical play of ideas On the whole it bears a close resemblance in contents and style to the Brāhmana, but it is doubtless more recent in date, or it would have been included in the Brāhmana. Sāyana in his introduction to Book V calls it an *apauruseyaṃ brāhmaṇam*, and Śankara calls the Upaniṣad similarly Bahvrcabrāhmana Upaniṣad.

The **second book** consists of two distinct parts. The first, comprising Adhyāyas 1–3, deals with the allegorical signification of the Uktha, that is the Niṣkevalya Śastra, three sets of eighty verses, which was the midday Śastra of the Mahāvrata, as being Prāṇa or Puruṣa. It is not directly connected with Book I, and it is doubtless later than it. The second part comprises Adhyāyas 4–6, and is the Upaniṣad *par excellence*. It is probably later than part one.

The **third book** treats of the mystic meaning of the various forms of the text of the Saṃhitā, the *nirbhuja*, *pratṛṇṇa* and *ubhayamantareṇa*, and of the vowels, semivowels and consonants. It quotes Māndūkeya and Śākalya among others, and makes use of the above terms to describe the *saṃhitā*, *pada*, and *krama pāthas* of the Saṃhitā. These are so far signs of late origin, but at the same time the treatment of the subject-matter is at a much earlier stage than that reached by Yāska or the authors of the Prātiśākhyas. It will be seen later that its philosophical view is more advanced than that of the Upaniṣad proper, and it can probably be dated about the sixth cent. B C. This result is important, as it gives us a lower date for the rest of the earlier books of the *Upanisad*

---

[1] The references to Aitareya and Mahaitareya in Śānkhāyana Gṛhya Sūtra, IV, 10, 3, and Āśvalāyana Gṛhya Sūtra, III, 4, 4, throw no light on him, and are probably late; cf. Hopkins, *Great Epic of India*, p 390.

The **fourth book** consists solely of the Mahanamnī verses The presence of these verses is explained by Sayana on the ground that they must be studied in the forest Their use is set forth by Āśvalayana in his Srauta Sutra, VII 12 10, where he says that on the fifth day of the six day Prsthya rite after the Marutvatiya Sastra, when the Niskevalya Śastra is being performed 'if the Udgatrs make the Sakvarasaman the Prstha Stotra then the nine verses called the Mahanamnis and certain *purisa padas* to fill up the lines, are to be used' Tradition ascribes this Āranyaka to Āsvalayana Sadgurusisya in his account of the works of Āsvalayana, says[1] *dvadasādhyayakam sutram catuskam grhyam eva ca caturtharanyakam eeti hy Asvalayanasutrakam* । This view, however has been questioned in connexion with the authorship of the fifth book

The **fifth book** consists mainly of a description in a Sutra style of the Niskevalya Sastra the great Sastra of the midday libation of the Mahavrata It forms a sort of complement to Book I, which is the Brahmana as contrasted with the Sutra The natural conclusion is, therefore, that *Āśvalayana wrote Book V The arguments*[2] in favour of this view are (1) Book IV contains merely a collection of Mahanamni verses, it is not a Sutra at all and therefore Āśvalayana cannot have been its author The reply is perhaps that the verses may have been collected by Āśvalayana and put into the Āranyaka in order that they might be available for being commented on in the Sutra and that it would therefore be natural to ascribe the Aranyaka to Āśvalayana It is a sort of Āśvalayana Samhitā like the Sakala Samhitā (2) It is argued[3] that Sayana in the introduction to Aranyaka V, where he expressly ascribes that Aranyaka as contrasted with I to a Rsi uses the words *tasmad athatasya*[4] *samamnayasyetyadid adasadhyayiran maha vratasya pañcavimsatim styadi pañcamaranyakam sutram eva* । This would no doubt be quite natural if Āśvalayana were the author of the Aranyaka but it is at least equally natural if Śaunaka was (3) Colebrooke (*Essays*, I, 307) says, with reference to a Sutra of the Purva

[3] Cf Rājendralala Introduction p. 10.

[4] i e Śrauta Sutra I, 1 1

Mīmāmsā 'It is, however acknowledged that a mistake may be made, and the work of a human author may be erroneously received as a part of the sacred book by those who are unacquainted with its true origin An instance occurs among those who use the *Bahvrich* a *śākha* of the *Rigveda*, by whom a ritual of Āśvalayana has been admitted, under the title of a fifth *Āranyaka*, as a part of the *Rigveda*' Rajendralala was unable to discover the source of this statement, and it seems probably to be a confusion of Āśvalayana with Saunaka, or it may rather confirm the view of Sadguruśisya since IV could be confused with the Rgveda but not V (4) The MSS I and G end *iti Āśvalāyanoktam Āranyakam samāptam* | This however, is a matter of no moment, and probably does not even preserve a tradition of Aśvalayana s authorship of Aranyaka IV These two MSS, which are recent and inaccurate copies, and are probably ultimately derived from one original, contain collections of works attributed to Aśvalāyana and there is nothing surprising in the fact that they attribute the authorship of the Aranyaka to him (5) Much more important is the fact which forms Oldenberg s second argument, that in his commentary on the Samaveda Sayana refers (I, p 19) the authorship to Āśvalayana But against this solitary reference[1] must be set the facts noted below (6) There is undoubtedly great similarity between the two works Aranyaka V, and the Srauta Sutra I think it certain that the author of the Aranyaka knew the Sutra For example, in V 2 2 *eṣa brahmeti tisrah* stands without explanation, but as Sayana points out the verses referred to are given in Aśvalayana Srauta Sutra, VI 2 6 Again in V, 3 2, occurs *uktam vasatkaranuman tranam*, which is not only a phrase used by Aśvalayana himself but is a clear reference to Aśvalāyana Srauta Sutra I 5 17[2] Further the vocabulary and syntax of the works is identical e g the use of *na va* in Āranyaka V, 3 1, as often in the Sutra e g VI 5 22, or the phrase *api nidarsanayodaharisyamah*, or the word *ekapatinyah* These facts, however, which were not known to Oldenberg merely prove that

---

[1] But I do not feel sure as to the reference The words are *bahvrcas adhyāpaka mahāvratayogapratipādaka u Aśvalayananirmitam kalpasutram ca aranye dhiyamanāh pañcamam aranyakam iti vedatvena vyavaharanti*, and there is clearly some confusion between the Sutra and Āranyaka which discredits the evidence

[2] Cf also V, 1 5 *uktāv ṛcau* is not explained but is in the Sutra

Saunaka knew and used Aśvalayana s work which indeed was only natural since the Sutra deals with the Agnistoma the *prakrti* of the Mahavrata It will be seen that this agrees perfectly with the native tradition handed down by Sadguruśisya

There is therefore no sound evidence to ascribe the fifth Aranyaka to Āśvalayana, and Sadguruśisya s attribution to him of the fourth Aranyaka remains the most probable[1] For **Saunaka's authorship of the fifth Aranyaka** we have the distinct and repeated authority of Sayana Colebrooke (*Essays* I 46) first pointed out that Aranyaka V, 2, 5 is cited by Sayana on the Rgveda I, 8, 1, as Saunaka s and Max Muller (*S B E*, I, xcv) says that 'Sayana when quoting in his commentary on the Rig veda from the last books,[2] constantly calls it a Sutra of Saunaka' Further, in his commentary on the Aitareya Aranyaka he repeatedly refers to Saunaka as the author of the fifth book E g on I, 4 1, he says *ata eva pañcame Śaunakenoddhrtah* | and again *taś ca pañcame Śaunakena śakhantaram aśrtya pathitah* | See also Sayana[3] on I, 4, 2 (ter), 3 (bis), I, 5, 2 (quater), 3 (bis) These references beyond question show that to Sayana Saunaka was the author of the fifth Aranyaka There is no conceivable reason why this work should have been ascribed to him unless it was his Similar as the book is in language to the Srauta Sutra, yet it is in style less compressed and more intelligible than that work We have certain evidence that Saunaka did compose similar works for, in the introduction to his commentary on the Sarvanukramani of Katyayana Sadguruśisya expressly records that he composed a Śrauta Sutra which he destroyed when his pupil Aśvalayana had written his Sutra This tradition would explain the close knowledge of Aśvalayana s Śrauta Sutra, which as we have seen above, the writer of this book undoubtedly possessed No doubt it is possible that he may eventually have been credited with the authorship of one of the works of his pupil, as has been shown to be the case by Professor Macdonell in the matter of the Brhaddevatā, but that is a mere possibility against which tradition is certainly strong It is impossible to argue that in Sadguruśisya's eyes the term *caturthaś anyakam* covered the fifth book also, for the two are quite distinct and cannot ever have been combined into one book Moreover it must be remembered that a Grhya Sutra by Saunaka is referred to by Sadguruśisya, and appears to have been known to Hemādri in the thirteenth century[1] So there is nothing at all improbable in the ascription of the Aranyaka V to Śaunaka

---

[1] With reference to Oldenberg s remark (p 157) that *Āśvalāyanasūtrakam* cannot refer to the Mahanamnis I would observe that the expression refers to the Śrauta and Grhya Sutras with the Āranyaka IV thrown in

[2] Book must be meant Āranyaka IV cannot be quoted

[3] It may be noted that the reference in the Sāmaveda commentary is probably not the work of Sāyana His pupils no doubt did much of his so-called work Cf the case of the Atharvaveda Whitney, p lxvi The fact that passages in the Sāmaveda commentary are identical with those in the Rgveda commentary is of course quite consistent with this view

Now it is possible to throw some light on **Śaunaka's date** The Brhaddevatā which is attributed to him, but is certainly not his but the work of a pupil—probably not far removed in date—is posterior to Yaska and anterior to the Sarvanukramani of Kātyāyana Katyayana, who is in all probability the author of the Śrauta Sutra and the Vajasaneyi Anukramani, is most probably anterior to Pānini, since the Sarvānukramani shows forms earlier than Panini's grammar approves (see Macdonell, *Sarvanukramani*, p viii, *Brhaddevata*, I, xxii, xxiii) The argument from the use of Vedic forms is no doubt not certain but the balance of probability is in its favour, and it has been maintained by Buhler (*S B E*, II, xl, *Z D M G*, XL, 527 sq) and Winternitz (*Hochzeitsrituell* pp 13 sq) against the objections of Bohtlingk (*Z D M G*, XXXIX, 517, XLI, 669, XLIII, 598 sq)[2] Thus it appears that Saunaka[3] must be considerably older than Panini On the other hand, we must not push him too far back or else it would be difficult to explain how Śaunaka is not cited in Panini Further, B Liebich in his *Panini*, ch iii has shown grounds for the belief that the Aśvalayana and Sankhayana Grhya Sutras are in point of language closely connected in time with Panini It does not, therefore, seem necessary to allow more than 100-150 years between Panini and Saunaka, and the time may perhaps be shorter

Panini's date unfortunately is not yet certainly fixed. There lie between him and Patañjali not only the Varttikas of Kātyayana, but also emendations of those Vārttikas by the Bhāradvājīyas, Saunāgas, and others and perhaps a Slokavarttika, which certainly presupposes a considerable interval of time Bhandarkar[1] has further adduced evidence of changes in the language and extension of geographical knowledge especially as regards the peoples and places of the south between Pāṇini, Kātyāyana, and Patañjali Goldstucker[2] and Bhandarkar[3] have adduced evidence to prove that Patañjali was a contemporary of Pusyamitra (B C 178–142) and Menander (B C 144–120) and wrote his Mahabhāsya in or about B C 144–142 This result is by no means certain because even accepting as fixed Pusyamitra and Menander's dates,[4] still in the first place the MSS of the Mahabhasya do not all contain the passages in which the statements relied on occur, and in the second place it is always possible that the examples occurred in the Slokavarttika or in some other earlier source whence they were taken over bodily[5] by Patañjali It may even be argued that Patañjali is not earlier than the second century A D inasmuch as he seems to know the r vowel sign, and according to Chinese tradition this vowel sign was a discovery of Nagarjuna's, and Nāgarjuna's date is possibly in the second century A D under Kaniska[6] The latter, however, is probably to be referred to the first century B C, and it would be a mistake to lay much stress on this argument The r vowel-sign may have existed in grammatical circles long ere Sanskrit inscriptions become usual Further the Rajatarangini, I, 174, is an authority for the existence of the Mahabhāsya in the reign of Abhimanyu of Kashmir, whose date is however now quite uncertain But whatever be Patañjali's date, there seems little doubt that the examples which point to the time of Pusyamitra and Menander must be genuine and that they prove the existence of some commentary on Panini in the middle of the second century B C Katyayana is assigned by Hiuen Tsang to 300 years after the death of Buddha, which taking the Chinese reckoning of the Nirvāna gives the middle of the third century B C as his date. This evidence is not of great weight, but it is not improbably nearly correct.[1] Pānini cannot therefore be less than fifty years older than Kātyāyana and must at latest belong to about B. C. 300. The question arises whether this date cannot be put further back. The chief argument against doing so is the use of the word *Yavanānī* in Pānini, IV, 1, 49. Doubtless this means Greek (Ionian) writing, but it does not necessarily follow that the word dates from after the invasion of Alexander.[2] Indeed the probability seems to me against this being the case. For it is certainly remarkable that Ionian should be the name given to the Greeks if first made known to India through the invasion of Alexander, whose army was certainly in no conceivable sense Ionian.[3] On the other hand, the Ionian name[4] was evidently the great name in the ears of Persians, and of those subjects who were led into Greece on the expedition of Xerxes, and[5] it must be remembered that the Gandarians were part of Dareios' empire and a contingent from Gandhāra, accompanied Xerxes on the Grecian expedition. If it is borne in mind that Pānini was a native of Gandhāra according to Hiuen Tsang, a view confirmed by the references in his grammar,[6] it will not seem far fetched to consider that it was most probably from the older tradition that the name *Yavanānī* was derived. In this connexion reference may be made to the theory of Burnell[7] that the word *lipi* which occurs in Pānini, III, 2, 21, is borrowed from the Achaemenidean *dipi*, meaning an edict, a view not at all improbable, and one which supports the view here maintained that it was through the Persian conquest of Gandhāra that the word *Yavanānī* became familiar to India. Goldstucker[8] argued, indeed, that *Yavanānī* referred to

[8] *Bombay Gazetteer*, I i 140 sq The legend cannot be relied upon in any particular though accepted by V Smith *Hist of India* p 337 n, 2

[9] *Ind. Alt.* II, 477; Rapson *J.R.A.S.*,

If this date is accepted for Pānini it is necessary to throw the older Kātyāyana, and therefore Śaunaka, a little further back. Śaunaka may perhaps be assigned to about 450 B.C. or possibly even to 500 B C., which would then represent the probable date of Book V of the Āranyaka, while the collection of Book IV would be a product of the same period, since the evidence goes to show that Āśvalāyana and he worked contemporaneously.

Now it will hardly be doubted that **Books I–III** are decidedly **older than Books IV, V.** This is clearly reflected in the native tradition preserved in Sāyana's distinction between the *apauruṣeyam* character of the first three books and their attribution to the author of the Brāhmana. It is not possible to say how much this means. But it is at least probable that the latest part of the first three books, Āranyaka III, belongs to not later than 550 B. C and the earlier parts may be dated between 700 B. C. and 550 B. C. It will be seen that there is probably a considerable difference in time between the first book, and the two sections of the second, so that 700 B C. is not too early a date for Book I.

I do not think that these results need be regarded as in any way surprising. The Brāhmana period, according to Max Muller, probably extended from about 800–600 B. C, and this view has the weighty support of Prof. Macdonell.[1] The Aitareya Brāhmana cannot be far removed in date from the first book of the Āranyaka, but the Gopatha Brāhmana, which contains many borrowings from it, is in the opinion of Aufrecht[2] known to Yāska Now Yāska is certainly anterior to Saunaka and Pānini, for he is cited in the Ṛgvedaprātiśākhya,[3] the Brhaddevatā, and is apparently known to the Aṣṭādhyāyī. His date cannot, therefore, be reasonably placed later than 500 B C. and it may go back to 550 B C. ?
This date is confirmed by the character of the Nirukta which certainly is anterior to either the Prātiśākhyas or Pānini. If, therefore, the Gopatha Brāhmana was known to him,[4] even that late work must be dated about

---

1904, p 442) adopts 350 B C If a late date is adopted, then the question of finding a place for the Bhāṣā becomes more and more difficult, cf. *J. R A. S*, 1904, pp 435 sq, 457 sq, and (for the date of the Epic) ibid, 1906, p 3; 1907, p 682.

1904 p 442) adopts 350 B C If a late date is adopted then the question of finding a place for the Bhāṣya becomes more and more difficult cf *J R A S* 1904 pp 435 sq 457 sq and (for the date of the Epic) ibid 1906 p 2 1907 p 68

[1] *Sanskrit Literature* pp 12 202 sq

[2] *Aitareya Brāhmana* p vi

[3] Weber *Indian Literature* p 41

[4] The argument is not certain It is based on the fact that Yaska Nirukta VIII ? quotes Aitareya Brahmana III,

600 B C, and the Aitareya Brahmana must be earlier, even apparently including the last ten chapters which are later than the earliest portions of the Brahmana Thus the Brāhmana cannot well be placed later than 600–700 B C. and the Āranyaka I is not to be dated much later

Further the early date of even the Upanisad portions in Books II and III appears to be only what is to be expected from the history of philosophy The Upanisad doctrines there set forth are essentially earlier than the doctrines of the earliest Buddhism, which belong to the fifth century B C, and we shall see that the Upanisads probably belong to the earliest of the extant works (Sect V) Moreover, Bühler (*S B E*, II, xxvii) has pointed out that Apastamba (? 300 B C) knows the Vedanta school, which presupposes the full development of the Upanisad, while Gautama (before 400 B C.) knows even the Atharvasiras Upanisad, which is cited also in the Moksadharma (*MBh*, *XII* 12864)

IV. The Mahāvrata ceremony, and the relation of Aitareya Āranyaka I and V to the Śāṅkhāyana Āranyaka

Sāyana in his commentary on V 1, 1, tells us that there are three forms of the Mahavrata ceremony, according as it is a one day rite, or a part of an *ahina*, or the second last day of a Sattra[1] But he says that the Sattra form is the original or *prakrti* of the others which are *vikrtis* The Sattra differs from the *ahina* in that it requires that all engaged

---

8, as *yasyai devatāyai havir grhitam syat tam manasa dhyayed vasatkarisyan* Now the *manasa* here does not appear in the original but only in Gopatha Brahmana VIII, 4 *tam manasā dhyayan vasatkuryad* It is hardly open to doubt that the form found in the Gopatha passage must have been before Yaska s mind For though it is not unnatural for the author of the Gopatha, or some other Brahmana, who borrowed the main body of his work from other sources, to alter his original by inserting *manasā*, yet it is improbable that Yaska would have made the quotation incorrectly, but for the existence of the alternative version The instance does not amount to proof, and on the other hand it may be argued, with Bloomfield (*J A O S*, XI, 375 sq, XIX, ii, I 11), that the Gopatha borrows from the Vaitana Sutra and so is very late But even assuming that the borrowing from the Vaitana is real, yet it is more than possible that the text of the Gopatha, a very unimportant work, has suffered interpolation, or perhaps the Gopatha Brahmana as we now have it is a working over of an earlier Brahmana which itself borrowed from the Aitareya But in any case the Aitareya Brahmana is unquestionably much older than Yaska

[1] For the characteristics of Sattras see Hillebrandt, *Ritual Litteratur*, p 154, Weber, *Ind Stud*, X, 17, 92 355

should be *dīkṣita*, the Hotr being also the *yajamana*, and in that it extends even to a year. In the *ahīna* the Mahāvrata is the tenth day of the Paundarika ceremony, but neither the *ekaha* or *ahina* form is of importance.

In the Sattra form the Mahāvrata is the last day but one of the Gavamayana Sattra which lasts the whole year, and no doubt represents in some way the year Hillebrandt,[1] who has most carefully examined this question, concludes that considerable alterations in course of time took place in this ceremony As it stood later and as it is represented in most of our texts, the two important days were the middle day, the Visuvat, and the last day but one, the Mahāvrata, corresponding to the Summer and Winter solstices respectively But the Tandya Brahmana,[2] certainly an old work, refers to a view, which it disputes, that the Mahāvrata belongs to the middle of the year, and it is clear that Indra is the god *par excellence* of the Mahavrata It may be argued with some plausibility that Indra belongs to the beginning of the rainy season, or the middle of June, and certainly the rites of the Mahāvrata show traces of a popular origin, like the celebrations of the Johannistag in Germany[3] It is not impossible that at one time the Mahāvrata was the first day of the year, when, as the Aitareya Aranyaka, I, 1, 1, has it, Indra slew Vrtra and became great, and Hillebrandt adduces as evidence of this the month Tisya as compared with the Avestan Tistrya, Sirius

Once then, in any case, the Mahavrata may well have been a day of popular festival and worship The Visuvat day receives scant treatment in the texts, possibly, as Dr Friedlander[4] suggests, because the ceremonies connected with that day were transferred[5] to the Mahāvrata to help to wipe out the popular character of that rite It is, however, simple to suppose that in the usual manner the Brahmanas seized upon the popular Mahavrata and made it their own by an accumulation of purely technical ritual At any rate they have left clear traces of the original nature of the ceremony Warriors, fully armed, pierce with arrows the outstretched skin of a barren cow which is probably a rain spell[1] An Arya and a Sudra strive on a round hide the Aryan proving victorious, which may be interpreted as a spell to produce sunshine Servant maids encircle the Marjaliya fire with jugs of water on their heads either thrice or until the Mahavrata Stotra is finished evidently as a magic rite to procure sunlight and rain for the crops Sympathetic magic is shown in the effort to produce fertility by *maithuna* Music is played and obscene language used, both possibly with the same object to terrify away hostile demons, especially as the form of music affected is drumming

---

[1] *Die Sonnwendfeste in Alt Indien*, Erlangen, 1889 Cf also Weber, *Die vedischen Nachrichten von den Naksatra*, Berlin, 1862, II, 282 sq

[2] IV, 10, 3

[3] Many examples of such ceremonies are collected in Frazer *Golden Bough*, 2nd ed Oldenberg, *Religion des Veda*, p 444, n 1 does not accept this part of Hillebrandt s theory and it may be pointed out that the Winter solstice is more naturally the time for rites intended in part to increase the sun's heat, cf Frazer, *Adonis, Attis, Osiris*, pp 196, 241 sq

[4] *Der Mahā rata Abschnitt des Śānkhāyana Aranyaka*, p 2, n 5

[5] Liturgically the Visuvat is the *prakrti* of the Mahavrata

But from the point of view of the Aranyaka these old customs are meaningless survivals The importance of the sacrifice is purely in the ritual as regards the use of the hymns The Mahavrata is one of the forms of the Agnistoma[2] and is therefore divided into three parts the morning midday and evening pressing of the Soma Each pressing has an equal number of Stotras and Śastras The morning pressing has the Bahispavamana and four Ajya Stotras and the Ajya and Prauga Sastras of the Hotr and three Ajya Sastras of the Hotrakas The midday pressing has the Madhyandinapavamana and four Prstha Stotras and the Marutvatiya and Niskevalya Śastras of the Hotr and three Niskevalya Sastras of the Hotrakas The evening pressing has the Arbhavapavamana Stotra and the Agnistoma Saman together with the Vaiśvadeva and Agnimaruta Śastras of the Hotr[3] But in the Mahavrata the morning and evening ritual is mainly derived[4] from the *prakrti* that is ultimately the Agnistoma and it is the Prstha Stotra called the Mahavrata Saman and the corresponding Niskevalaya Sastra or Mahaduktha which form the important part of the liturgy

---

[1] Cf the account in Oldenberg *Religion des Veda*, pp 444 445 506 whose explanations are slightly different and my note on V 1 5

[2] See for it Hillebrandt op cit pp 124 sq It is a *prakrti* of all the more elaborate forms and these again are related as *prakrti* and *vikrti* in order So the Visuvat is a *prakrti* of the Mahavrata as is the Visvajit

[3] Eggeling *S B E* XXVI 325 gives a comparative table cf Weber *Ind Stud* X 535

[4] This is the explanation of such passages as I 1 3 *ad fin* [illegible]

Śāṅkhāyana Āraṇyaka[1] When as time went on there was felt the need of a formal exposition of the rite as a whole since in neither the Aitareya nor the Sāṅkhāyana Āraṇyaka is the account of the rite intelligible as it stands in the case of the Aitareya, as we have seen, a Sutra like book[2] was added by Śaunaka but in that very book[3] the secret nature of the doctrine is reiterated with the greatest force The case of the Sankhayana Aranyaka is different No addition was made to the Āraṇyaka, so far as we now know it,[4] but two books, XVII and XVIII, were added to the Śāṅkhāyana Srauta Sutra These books were not commented on by Anartiya but by Govinda, and they cannot be regarded as forming part of the Sutra at his date In fact we have conclusive proof that to Anartiya the eighteenth, and doubtless also the seventeenth book, was an Aranyaka For in commenting on Śrauta Sutra, XIII, 14, 7, he quotes XVIII, 24 30 as an Araṇyaka This fact, the full significance of which does not seem to have been realized by Hillebrandt, supports his view, which was based on other considerations, that the two books are not more recent[5] than the rest of the Sutra On the contrary it is at least as probable that they are older[6] but the important consideration is that the Sutra treatment of the material was still considered too secret for insertion in the Sutra We must therefore recognize that at one time the Sankhayana Araṇyaka, in addition to the Brahmana treatment in Books I and II, contained a Sutra treatment like Book V of the Aitareya As Books III–VI of the Sankhayana contain the Kausitaki Upanisad and correspond to Book II of the Aitareya, and Books VII and VIII of the Śāṅkhāyana correspond in some measure to Book III[7] of the Aitareya, it is not surprising that the Śrauta Sutra treatment of the so called Books XVII and XVIII should have formed part of the Araṇyaka

On the other hand it was not felt that any special sanctity or mystery attached to the Udgatr or Adhvaryu's functions These are described in the Samhitās and Brāhmanas of the other schools[1] (see the Tandya Brahmana, IV, 10, V, 1-6, Latyāyana Srauta Sutra, III, 9-12, IV, 1 3, for the Udgātr, and for the Adhvaryu, Taittirīya Samhitā, VII, 5 8-12, Taittirīya Brāhmana, I, 2, 6, 1-7, Kāthaka Samhita, XXXIV, 5, Satapatha Brahmana, IV, 6, 4, 1, VIII, 6, 2 3, X, 1, 2, 1, Kātyayana Srauta Sutra, XIII, 2, 17-4, 2, and scattered notices in Apastamba Srauta Sutra, XXII, XXIII) It is worthy of note that in his explanation of the ritual Sayana freely quotes and follows Apastamba, as he does sometimes in his commentary on the Aitareya Brahmana

[4] Our acquaintance with the exact form of the Āraṇyaka is comparatively limited Few MSS are extant Cf Weber, *Indian Literature* pp 50, 132 Cowell *Kausitaki Upanisad, Preface p xii Bodleian Catalogue*, No 976

[5] Hillebrandt *Ritual Litteratur*, p 25

[6] Or of the same date see my note, *J R A S* 1907, pp 410 sq

[7] Weber, *Verzeichniss der Sanskrit Handschriften der Koniglichen Bibliothek zu Berlin*, II, 5 Friedlander op cit., p 24 Book VII=III 1, Book VIII=III 2

The **date of the Sānkhāyana Āranyaka**, like that of the Aitareya, presents considerable difficulty As the Aitareya Aranyaka with the Aitareya Brāhmana, the Sankhāyana is closely connected with the Kausitaki Brahmana Vināyaka, the commentator on the Brahmana actually, in one place,[2] reckons the Books I and II as XXXI and XXXII of the Brahmana, and there are clear references to the Brahmana in the Āranyaka, while several passages agree even verbally[3] But though these signs are so far clear evidence that the connexion is close, they tend also to show that the Aranyaka is dependent on the Brahmana, and this conclusion is strengthened by the fact that at the time of Panini (about 350 B C), there seems to have been known to him[4] a Brahmana of thirty chapters, which Weber[5] must be right in considering to be the Kausitaki Therefore the Aranyaka must stand to the Kausitaki in precisely the same relation as the Aitareya Aranyaka to its Brahmana

Now the **relation in time of the Aitareya and Kausitaki Brāhmanas**[6] is still open to discussion The evidence seems to me, however, decidedly in favour of the priority of the Aitareya though that priority is not in all probability a great one (1) The Sankhayana is a more elaborate work than the Aitareya, it is completed by treating of the Haviryajña as well as of the Soma sacrifice proper, giving the Agnyadhana the Darsapurnamasa, and the Caturmasyani It is more probable that the less systematic Aitareya is the earlier (2) The Sankhayana seems, as Weber[1] points out, to represent a fusion of the views of Paingya and Kausitaki, whereas these names are unknown to the Aitareya,[2] which appears to represent a less dependent point of view and to show more originality (3) In point of view of style the Śāṅkhāyana is much more condensed than the Aitareya This fact is open to various interpretations, but on the whole the most probable theory is that the older a work, the less condensed its style, though later again the style becomes freer This argument, which is applied to the Sarvanukramani and Katyāyana Srauta Sutra by Prof Macdonell[3] appears to me to hold equally well in the case of the Brahmanas (4) The use of unaugmented tenses is more frequent in the Aitareya than in the Sankhayana[4] In favour of the priority of the Sankhayana the only prima facie piece of evidence[5] appears to be the argument from the use of the perfect as a narrative tense Now I do not dispute the value of this criterion, as the evidence appears to me adequate that so far as Vedic is concerned, the history of the perfect is that of an originally present force, such as persisted in words like *aha* or *veda*, to a narrative use The perfect in narrative is indeed known to the oldest language, but the growth of the narrative use is decidedly a mark of lateness, and is accepted as such by Wackernagel[6] But the facts of the case are that in the first thirty Adhyayas of the Aitareya the use of the perfect is usually that of a present and that it is only in the last ten that the perfect is used for narrative, whereas in the Kausitaki Brahmana there are nearly three perfects for every five imperfects The narrative of Śunaḥśepa in Book XXXIII is carried on in perfects but it is universally admitted that the last ten Adhyayas are a later addition, since (1) they have no corresponding matter in the Śankhāyana, while the Sankhayana Srauta Sutra has a version of the Sunahsepa legend and (2) their subject matter is quite unconnected[1] with the functions of the Hotr at the Jyotistoma rite which is the main topic of the Aitareya Deductions from the style of the Aitareya Brahmana taken as a whole are therefore very risky, and Aufrecht[2] has conclusively it seems to me, shown that the Taittiriya Samhita in Book VI, which deals with the Soma sacrifice, follows the Aitareya Brahmana, which has thus a just claim to rank as one of the earliest Brahmanas as it is of course indisputably older than the Satapatha Brahmana and the Taittiriya Brāhmana, the latter being admittedly later than the Samhita, which it was clearly composed in order to complete It is worth noticing that that Brahmaṇa contains in Book III the description of the new and full moon sacrifices which is omitted in the Samhita[3] and it may be considered that this helps to show that the Sankhayana Brahmana in which these rites are treated is later than the Aitareya.

[5] On the use of *at un °yita asi* in the late Book VII with periphrastic perfect &c. cf Whitney, l c. The Jaiminiya Brahmana has no claim to be deemed early, cf Oertel, *J A O S* XVIII, i, 25, XIX ii, 103

[6] *Altindische Grammatik*, I xxx Cf. Whitney, *Transactions Am Phil Ass*, 1892, pp 5 34 *Grammar*, p 296, *P A O S*, May, 1891, pp lxxxv xcii Wackernagel is wrong in thinking that Whitney does not accept the use as a chronological criterion

On the other hand no argument either way can be drawn from the prominence of Siva in the Śankhayana[4] since Aufrecht has proved that even the Aitareya Śiva is the great god in his form of Rudra, just as he is in the Satapatha the later books of the Vajasaneyi Samhita and portions of the Atharvaveda It must be recognized that the deity later known as Siva came at an early period to be the most prominent member of the Hindu pantheon and to represent that striving at pantheistic monotheism which in one or other of its forms is so characteristic of all the developments of Indian religious thought It is probable that several conceptions have merged in the idea of the later Siva Originally a god of the storm which destroys[5] he later amalgamated with a god of the forest or wood[6] or rather perhaps with the vegetation spirit which has been rendered so familiar by the studies of Frazer following Mannhardt Possibly, too, traits of his character are derived from the idea of the evil powers of the spirits of the dead, as suggested by v Schroeder,[1] who regards him as chief of the spirits of the dead But at any rate he cannot be regarded as a late deity, just as Visnu also belongs to an early period Another sign of the fact that no very great distance in time separates the two Brāhmanas may be seen in the fact that both employ in essentials the same style and language It is worthy of note that in both the base *enad* occurs in the nominative[2]

It seems, therefore, practically certain that at least the first thirty Adhyayas of the Aitareya are earlier than the Kausitaki and the temptation is strong to assume that the fact that the Kausitaki has precisely thirty Adhyayas is due to an imitation of the Aitareya If this is so then we would be sure that the last ten Adhyayas were later than the Kausitaki a view itself extremely probable on the ground of contents and of the use of the perfect as a narrative tense But even so the Brahmana as a whole of forty Adhyayas is older than Panini[3] Further the Paingya, who is cited as an authority in the Kausitaki is, according to the Kaśika on Panini IV, 3, 105, a *cirantana*, so that the Kausitaki, like the Aitareya, can claim considerable antiquity[4]

If the Aitareya Brahmana is older than the Sankhayana, it is not unreasonable to expect the same relation to exist in the case of the Aranyakas This certainly is borne out by comparison of the ritual described It at least appears to have been deliberately modified to differentiate it from the ritual of the Aitareya It is not of course conclusive that the Aranyaka itself is necessarily later, since the description of the earlier ritual may be the later, but there is nothing to suggest that this is the case, and the condensed style of the Sankhayana appears more modern than that of the Aitareya

Even in the Brahmanas the ritual differences begin to appear The Prauga Sastra at the Pratahsavana of the Agnistoma and of the Visuvat, following the model of the Agnistoma consists of Rgveda I, 2 and 3, in *gayatri* metre[5] In the Visuvat, according to the Kausitaki Brahmana,[6] the Sastra is in *tristubh* metre, though the other form is mentioned as more correct, and consists of verses from different hymns on the model of the Aitareya form But most of the differences[1] occur in connexion with the most important part of the Āranyaka, the Mahaduktha Govinda, the commentator on the Śānkhāyana Srauta Sutra, tells us[2] that the parts of the Mahaduktha are the parts of the human form and not of the bird form This is borne out by the words used, *aksā*, *bāhū*, *prahastakam*, and the omission of the *vijarah* and *pucham* The bird form is the older, it is that of the fire altar and of the Mahavrata Sāman, and probably it is to the change of form that the confusion in the Sānkhāyana Āranyaka is due

[5] Bergaigne, *Journal Asiatique* VIII, 13 Aitareya Brāhmana, IV, 29 Kausitaki Brahmana XIV, 5

[6] XXV, 3

In the Aitareya the Mahaduktha is divided into parts corresponding to the body, neck, head, vertebrae, wings, stomach, then comes the food of the bird in the form of the three *asitis*, the *vaśa* hymn, and ten miscellaneous hymns called the *uru* The Sankhāyana divides the Uktha into the body, head with neck, the two sides, divided into shoulder, arm, and hand, the back, consisting of the *caturuttaram* the food in the form of the three *asitis*, together with the *udara* Then, as the beginning of the end, come the *dvipadas*, which in the Aitareya form the tail, the *Aindragna sukta*, the beginning of the *uru* in the Aitareya and a collection of disconnected groups of verses, *avapana*, *tristupchata*, &c The explanation of this confusion seems to be[3] that the human form had no *pucha* and required fewer verses for the *paksa*, and so the verses necessary to make up the total of 1,000 *brhati* verses, required by the rite, were appended at the end To the alteration in form is probably to be attributed the fact that the sides are composed of equal numbers of verses whereas in the corresponding Sāman one side has the Pañcadaśa, the other the Saptadaśa Stoma, and in the Aitareya one side has 101, the other 102 verses,[4] probably, as Dr Friedlander suggests, because in flight one wing of a bird appears longer than the other

A similar complication is made in the case of the three *asitis*[5] In the Aitareya the *gāyatri* and *usnih asitis* are composed of eighty *gayatrī* and (with a slight exception) *usnih trcas* respectively, while the *brhati asiti* contains eighty *satobrhatī* verses In the Sānkhāyana the *brhati asiti* consists of eighty *brhatis* and eighty *pragāthas* (*brhati* and *sato-*

[5] For the details see notes on V, 2, 3 5

brhati) The additional syllables are added to the *usnih asiti* which is composed of *gayatris*, *brhatis*, and *pragathas*[1] The priority of the Aitareya is quite clear Again in the Aitareya the hymns corresponding to the Brhat and Rathantara Samans stand on the right and left wings of the bird in the Śankhayana they no longer correspond to the Sāmans in position, but are grouped at the end[2]

The apparently deliberate divergence from the Aitareya appears also in the treatment of the verses from the Rgveda used in the litanies For example, the *usnih asiti* in the Aitareya commences with Rgveda VIII, 12 and 13, in the Śankhāyana the order is simply reversed Again in the *vasa* hymn, VIII, 46, in the Aitareya only vv 1–20 are prescribed, since they alone are addressed to Indra, in the Sankhayana[3] the whole hymn, though vv 21–24 are a *dānastuti*, and vv 25–28, and 32 are addressed to Vayu Similarly at the evening Soma pressing the Aitareya used the Viśvedeva verses, 1–41, of Rgveda, I, 164, only, while the Sankhayana improperly uses all the verses

There is yet another sign of the earlier character of the Aitareya, so far as its Sutra part at least is concerned The Sutra part of the Sankhayana the so called Srauta Sutra when mentioning[4] the various improper rites, says *tad etat puranam utsannam na karyam* | There can be no doubt that this is a clear sign of a more reflective and refined age

Further, the language of the Sankhayana suggests a close relation with the Aitareya, which must either be due to a common source, or perhaps more probably to borrowing For example, in the Aitareya[5] occurs *brahmaitad ahar brahmanaiva tad brahma pratipadyate*, in the Sankhayana,[6] *brahmaitad ahar brahmanaiva tad brahma samardhayati* On the whole the priority probably lies with the Aitareya

If, as seems clearly the case the ritual of the Śāṅkhayana is more recent than that of the Aitareya an interesting question arises as to the relation of the Aitareya I to the Satapatha Brahmana VIII and IX in which the Mahavrata is treated The evidence[7] available on this point is not decisive (1) In IX, 3, 3 19, occurs the expression *yany astacatvarimsat tau caturvimsau paksau* which certainly points to the equality of the *paksas*, and, possibly, to the human form as the object of comparison as contrasted with the unequal and longer wings of the bird (2) In the same passage it is said *yam trayastrimśat sa vasah*, and, as we have seen above the thirty three verses of Rgveda, VIII, 64, are employed in the Sankhayana only, the Aitareya using but twenty (3) In the third verse of Rgveda, X, 120, corresponding to the body, the Aitareya, V, 1, 6,[1] omits the second half and fills up the gap with a pada from the verses for the right and left wings The Sankhayana Srauta Sutra, XVIII, 14 7, omits the half verse, and puts nothing in its place, but puts the half-verse together with the second half of the verse called *nada*, Rgveda, VIII 69, 2, before the *dvipadas* Now the Satapatha, VIII, 6, 2, 3, refers to *ardharcau*, which name fits better the case of the Sankhāyana, with its two half verses existing independently, than that of the Aitareya, where two separate pādas (not half verses) are interpolated to make up one missing half-verse Dr Friedlander holds that the other points[2] in the account of the Satapatha, which is far from being a clear one, seem to throw little or no further light on the matter, and it is quite possible that the Satapatha represents a version older than the Sankhayana But he appears to have overlooked one or two indications which tell strongly against this theory It is clear from Śatapatha Brahmana, VIII, 6, 2, 3, that the general arrangement of the Sastra in the Mahavrata was similar to that of the Śānkhayana, the *vasa* hymn being followed by the *dvipadas*, the *Aindragna sukta*, and the *avapana* What is still more significant is that the *asitis* are clearly composed in the same way as in the Śankhāyana, for the direction in Sankhayana Aranyaka, II, 10, to take twenty four sets of four syllables from the *kakubh pragathas* has a parallel in VIII, 6, 2, 9 Finally, the priority of the Sankhayana appears definitely established by the fact that in X, 4, 2, 19, the Satapatha distinctly condemns the use of seventeen priests, which, as Eggeling (*S B E*, XLIII, 348, n 1) points out, is laid down by the Sankhayana Book X is undoubtedly of the same period as or at least not earlier than Books VIII and IX, and to argue from it to the date of these Books is perfectly fair It would probably therefore be best to regard the Satapatha as exhibiting a version which is later than, but which does not necessarily follow throughout the Sankhayana version, I do not think even that version would satisfactorily explain all the details of the Śatapatha

[1] Not, however, in I

[2] Eggeling, in his translation, *S B E*, XLIII, naturally followed the Aitareya, the only source then available, but save in the points above noted, the Śankhāyana does not help

It does not of course necessarily follow that the Śatapatha is later than the Aitareya Aranyaka I, but on the other hand this result is by no means impossible For by common consent[1] the Satapatha is one of the youngest of the great Brahmanas It is no doubt anterior to Panini, and as far as the controversy[2] over the Sutra, IV, 3, 105 yields any results it is that Katyayana considered that Yajñavalkya was a *purana*, as opposed to a recent author though therein it seems he disagreed with Panini It is abundantly clear[3] that the name Satapatha was well known to Katyayana But there is nothing inconsistent in this with the view that the Śatapatha in its present form may be younger than the Aitareya Aranyaka I It will be seen in Section VI that grammatically the Aranyaka I–III is older than Śatapatha Brahmana, I–V, X, XII–XIV

It is perhaps well here to mention a theory recently put forward by Dr Hoernle[4] He points out that in Satapatha Brahmana XII, 2, 4 10, the word *grivah* which occurs in Aitareya Aranyaka I, 3 4, is used to denote the seven cervical vertebrae, whereas in the Ṛgveda and Atharvaveda it seems to denote the throat or windpipe This view must he argues have been derived from the medical school of Yajña valkya s day that of Atreya and he refers to the fact that Indian tradition assigns both Yajnavalkya and Atreya to the time of Buddha, the sixth century B C[5] Clearly much stress cannot be laid on this argument as far as it might be applied to fixing the date of either the Aitareya Aranyaka or the Satapatha Brahmana XII For though

[1] Cf Macdonell *Sanskrit Literature*, pp 203 217 The Jaiminiya may be younger cf its use of *dadi* Whitney, *P A O S*, May 1883 p xii

[2] Vārttika on IV 2 60.

[3] Weber *Ind Stud* XIII 443 444 *Indian Literature*, p 130 Buhler *S B E*, II, xxxix n, XII xxxv It seems usually to be considered that Kātyāyana was right But the evidence seems rather the other way as Āpastamba calls Yajnavalkya s contemporary Śvetaketu an *avara* and this agrees well with the theory here maintained.

[4] *J R A S*, 1906, pp 918 919. It is hardly accurate to regard Yajnavalkya as the author of the Brāhmana. His opinions are represented—with what fidelity we know not—in part only of it and even that part must have been written by his pupils cf Weber *Indian Literature* pp 120 sq

[5] For Buddha s date see Duff *Chronol of India* p 6, and especially Fleet *J R A S*, 1904 pp 1 sq 355

grivah in the former work no doubt refers to cervical vertebrae, as the context shows, yet the passage shows none of the detailed knowledge of the Satapatha (*grivah pañcadasa | caturdasa va etasam karukarani viryam pañcadasam*), to which it is certainly prior, as we have seen on other grounds But the tradition connecting Yajñavalkya with Buddha s date is probably inaccurate, for the Brhadaranyaka Upanisad must, I think, be counted as earlier than Buddha and yet it is later than the mass of the Brahmana, and Yajñavalkya is to it a figure of ancient fame while we are hardly yet in a position to decide the date or opinions of Atreya, since we can scarcely assume that Caraka represents him, through Agniveśa, with much accuracy But it may be noted that the later date of the Satapatha is distinctly indicated by the fact that Apastamba[1] calls Svetaketu a contemporary of Yajñavalkya modern, while the Kausitaki Brahmana which also[2] cites Śvetaketu shows again a connexion with the Śatapatha which denotes its posteriority to the Aitareya

V **The three Upanisads of the Aitareya Aranyaka**

There is some doubt as to the exact designations borne in early days by the Upanisads contained in the Aranyaka According to Max Muller,[3] the distinction is between the Aitareya Upanisad properly so called which fills the fourth, fifth and sixth Adhyayas of the second Aranyaka and the Mahaitareya Upanisad also called by a more general name Bahvrca Upanisad which comprises the whole of the second and third Aranyakas There is no doubt that the term Aitareya Upanisad especially belongs to II 4 6 but the term Mahaitareya or Bahvrca brahmana Upanisad, though it sometimes[4] applies to both Aranyaka II and III, sometimes[5] is confined to Aranyaka II Further the form, Bahvrcabrahmana Upanisad is in the Anandasrama edition given to the Upanisad itself, while on the other hand, in one of the MSS in the Bodleian[6] the second book is described simply as Aitareya Upanisad Clearly the nomenclature was not definitely fixed Book III bore the special title of Samhitā Upanisad which is given to it in Śankara's commentary and which it claims for itself by its opening words The term Mahaitareya may have been applied at an early date since it appears to have given rise to the fiction of a Rsi, Mahaitareya, by the date of the composition of Aśvalayana Grhya Sutra, III, 4 but the text of these Sutras is not very certain

[4] e g in Winternitz and Keith *Catalogue of the Sanskrit Manuscripts in the Bodleian Library* No 1011

[5] Winternitz *Royal Asiatic Society Catalogue* p 216

[6] *Catalogue* No 1014 Deussen *Sechzig Upanishad's*, p 13 is incorrect as to Sankara s view

It must be recognized that the interpretation of these Upanisads is far from certain or easy They were no doubt originally accompanied in the Vedic schools by explanations which might, had they been preserved, have shown how much we now misinterpret them But it is impossible to regard Sankara's explanations as traditional There must have been somewhere a gap in the tradition This is shown clearly by the fact that Sankara explains all the Upanisads as exhibiting one doctrine, an impossible view, and that Badarayana[1] who in his Brahmasutra does precisely the same thing adopted a different doctrine as the fundamental key to the system All that can now be done is to take the Upanisads and endeavour to extract what seems the most natural meaning from the actual words

In the eyes of Sankara and Sāyana there is no difference in time nor in essential doctrines between the three Upanisads which they regard as one (There are three classes of men says Sayana[2] in the Introduction to Book III, those who desire immediate freedom through the knowledge of Brahman, and accordingly find it by aid of Book II 4-6, those who desire to become free gradually by attaining to the world of Hiranyagarbha for whom II 1-3 is intended, and those who care only for prosperity, for whom the third Aranyaka serves In the Introduction to II, 1, 2, he adds that it lays down aids to the concentration of thought in the shape of the performance of certain upasanas or meditations Such meditation may be of two kinds, Brahmopāsana, or Pratikopasana, the former consists in contemplation of Brahman as endowed with qualities, the latter in considering worldly objects as Brahman whether, as in the second Book they are sacrificial objects or non sacrificial)

It is undoubtedly the case that the Upanisad, II, 1-3 is intended in some degree to supersede sacrifice or rather while assuming sacrifice to explain it mystically the mystic meaning being the essential part The path *par excellence* is knowledge of the real meaning of the Uktha Uktha is earth, sky and heaven, its objects are Agni, Vayu and Aditya its *asitis* are food, whereby all is obtained It is also the body, mouth nostrils, and forehead of Prajapati The breath is Uktha and *sattya* and as *brhati* supports all things Purusa II, 1, 7, again creates the earth, fire, the sky, the air, heaven and the sun

---

[1] See Thibaut, *S B E*, XLVIII, Keith *J R A S*, 1906 pp 490 sq

[2] Sankara, according to Max Muller, *S B E* I, 200 It is true he follows Śankara, but they are not Sankara's actual words

In Adhyaya 2, Prana is identified with the authors of the hymns of the Rgveda, the *rcs*, the *ardharcas*, and Indra declares himself to be Prana, and, II, 2, 4, the worshipper is identified with the sun

In Adhyaya 3 the identity of the individual and the Uktha or Prana is insisted upon The growth of self is traced from the sap of herbs and trees through animals which show hunger and thirst, to knowledge in man and after the identification of Uktha and Prana the Adhyaya ends with some obscure verses alleged to treat of the winning of Hiranyagarbha

The precise meaning of the doctrine is hard to decide It appears however, to amount to a vague pantheism, which recognizes the unity of all existence physical or otherwise, and at the same time tends, as pantheistic views naturally do tend, to become a cosmogonism, especially in the account of the powers of Purusa (II, 1, 7) It is too early yet to speak of a clear differentiation of mind and body, though distinct signs appear in II, 3 2 where men, animals and trees are regarded as showing in inverse order the growth of intelligence But the Prana or Purusa does not consist in mind as opposed to body all things exist in him and both mind and body seem equally essential elements

Deussen in *Die Philosophie der Upanishad's*[1] argues that the oldest Upanisads are dominated by a doctrine derived from Yajñavalkya which may be styled 'Idealism' and which may be summed up in the propositions (1) the Atman is the knowing subject within us, (2) the Atman is itself as subject unknown, (3) the Ātman is the sole reality These propositions undoubtedly are found in the Brhadaranyaka Upanisad I–IV, and I agree with Deussen in thinking that they were taken over and partly misunderstood by the Chandogya Upanisad and that the Taittiriya and Kausitaki Upanisads are probably later still[2] Nor as other three doctrines, which naturally lead to the recognition that no such thing as transmigration can exist, and that mere knowledge is freedom and there is no consciousness after death

---

[1] Pp 209 sq, 357, E T, pp 231 sq, 397 sq

[2] *Ibid*, pp 23 24 E T pp 23 24 The Kausitaki Upanisad, it may be noted, stands in no organic relation to the Kausitaki Brahmana unlike the Aitareya Upanisad see Lindner, *Kausitaki Brahmana*, p ix This goes to prove its later date

The question arises how far these doctrines have any counterpart in II, 1–3 The answer seems that the Upanisad stands in regard to them all on an earlier plane of development (1) The Ātman is not yet recognized as the unity That is designated as Prana or Purusa, and in II, 3, 2, the Purusa has an Atman which is developed in various degrees in the Purusa according to the diverse forms which Purusa adopts as man, beast, plant, &c There is a pantheistic conception, but it is not one of consciousness as the sole reality (2) There is naturally no trace of the doctrine of the unknowableness of the Ātman (3) What is more important, there is no trace of the doctrine of the unreality of things *Purusa exists in them all, but either he is identical with, or creates* (II, 1, 7) them, and he does not exist outside them The nearest approach to a hint of the later idea is found in II, 1 5, where it is said that if one knows what is Sattya, then even if falsehood is spoken by him, yet he says what is true But it is only a vague hint (4) The doctrine of transmigration cannot be proved to be known to this Upanisad Sankara and Sayana of course assume its existence but the passages can be explained otherwise They are II, 1, 3, *tad idam karma krtam ayam purusah* which most probably means that action is the man, a man is what he does, not a man is what he did in a former birth, which is not really suitable in the context, and 3, 2, *yathaprajñam hi sambhavah*, which I take to signify 'for their experiences are according to their intelligence, a meaning which avoids dragging in a doctrine by no means needed or even intelligible in the context The doctrine of the Upanisad is immortality in another world with the gods, II 2 4, &c

There appears therefore no legitimate room for doubt that the Upanisad, II, 1–3, is anterior to the spread of the Yajñavalkya doctrine and to all subsequent Upanisads which contain that doctrine Parts of the Brhadāranyaka and Chandogya Upanisads may be equally early, for some of their texts contain no reference to transmigration, but it would seem that **Aitareya Aranyaka II, 1–3,** which forms a unity, **is the** 193
oldest long Upanisad extant

In the Upanisad proper, II, 4–6, there is clear evidence of a further development of doctrine In Adhyaya 4 the idea is that the Atman produces everything, cosmogonism in fact In Adhyaya 6 we reach the identifications of Prajñana with Brahman and these two with Ātman We thus have clearly the doctrine that the Ātman is consciousness, for it is intended evidently not to identify reality with the Atman, but, as in Adhyaya 4, in a rough way, to show that all things the gods, the elements men, animals, &c, are dependent on knowledge that is the Atman But there is still no statement that the self is unknowable, that is, the conception of subject as contrasted with object is not yet clear On the other hand the sole existence of the Atman appears in II, 4, 3 where it is asserted that there is no other self But this view carries with it no denial of the reality of things which depend on Atman The Māyā conception is not even implicit Nor is the doctrine of transmigration apparently present It is true that Śankara and Sayana found it in II, 5 *athasyayam itara atma krtakrtyo vayogatah praiti sa itah prayann eva punar jayate tad asya trtiyam janma* | But *itah* must mean 'hence' and the third birth must be in the heaven, an idea of course familiar to the Brahmanas[1] which know nothing of transmigration

There is not, therefore, anything in my opinion in this Upanisad to justify us in assigning it to a later date than the period anterior to the main doctrines of the Brhadaranyaka

In the third Upanisad, III, 1–2 there is little of philosophical interest There is a repeated identification of the incorporeal conscious self and the sun, and there is a distinct assertion that the self is that which hears, thinks, sees, &c, but is not heard or thought, and which is within all beings This gives us (1) the conscious Ātman which (2) is not knowable and (3) probably is all that is real But there is no sign of the doctrine of Maya, nor of transmigration nor of freedom in knowledge On the contrary the fate of the good is repeatedly stated to be prosperity in this world and Svarga in the next So even this Upanisad may be earlier than the Brhadaranyaka Upanisad

External evidence for the dates of the Upanisads is not forthcoming It is true that the first Upanisad presupposes that the Rgveda was already arranged as we have it at the time when the Upanisad was composed but Oldenberg[2] has shown that the Rgveda assumed its present in II 6, in comparison with the Aitareya account in II 4, 3, is quite inconclusive Further, the Taittirīya Upaniṣad[1] sets a high value on asceticism, and thus differs from the Aitareya and even the Bṛhadaraṇyaka and Chandogya Historically the earliest view appears to have been opposed to asceticism, which only later was regarded as an aid to knowledge Again in the Śikṣavallī the knowledge of grammar shown is at least as great as that of the Samhita Upaniṣad. Another sign of the comparative lateness of the Taittirīya[2] is the addition of *mahas* to the triad, *bhur, bhuvah svar*

---

[1] Deussen op. cit, pp 294–95, E T, pp 326 327, Macdonell *Vedic Mythology*, p 169

[2] In his *Prolegomena* and cf his review of Scheftelowitz's *Die Apokryphen des Rgveda* in *Gött Gel Anzeig*, 1907, pp

There can, in any case, be no question of the priority of the Aitareya to the Kausitaki Upaniṣad The Kausitaki is decidedly late[3] Adhyaya I is a variant of the transmigration legend found in Chandogya, V, 3–10, and Bṛhadaranyaka, VI, 2, which are both late passages in their Upaniṣads[4] The twelve explanations of Balaki Gargya in the Bṛhadāranyaka, II, 1, are expanded to sixteen in Kausitaki IV[5] The *pranasamvada* of the Aitareya, II, 4, is certainly older than either that of the Bṛhadaranyaka, VI, 11–14, or the Chandogya, V, 1, or the Kausitaki, II, 12–14, III, 3 The name, *indriya* for the organs of sense first occurs in Kausitaki II 15,[6] and in Aitareya III, 2, 1, and the word *manas* occurs in the sense of an organ, like speech, sight, hearing, instead of the old sense 'consciousness,' in Kausitaki, III[7]

Further it may be noted that in the Aitareya, even in III, 2, 3 there is no hint of the recognition of the Atharva as a fourth Veda Such hints occur in the Bṛhadaranyaka, V, 13 and VI, 4 13, and Atharvana occurs in Chandogya, VII, 1, 2, while the Atharvans and Angirases are mentioned in the early text, Bṛhadaranyaka, II, 4 10

Other Upaniṣads, including the Jaiminiya Upaniṣad Brahmana, may fairly be left out of account None of them can claim to be older than the Aitareya and many must be much more modern They are marked by a greater formalism of doctrine, accompanied by attempts to graft popular doctrines on to the philosophical conceptions of the Upaniṣads, which were apparently soon found too abstruse for the comprehension of their successors.

[7] *Ibid.*, p. 245, E. T, p 272

It may therefore be concluded that the first two Upanisads certainly, and probably also the third, precede the Brhadaranyaka and Chāndogya Upanisads in their main portions, especially the Yājñavalkya section of the former, that they are pre Buddhistic, as is proved both by the contents and the language,[1] and that they date from about 700–500 B C

In connexion with the **relation of the Upanisads to Buddhism** it may be well to trace the **history of the Ātman doctrine.** The derivation of the word is in dispute[2] and throws no clear light on the meaning But at any rate, it is certain that the Indians obtained gradually, doubtless through the phenomena of dreams and swoons and death, the conception of the body being animated by a soul This conception naturally reacted on their views of religion It is impossible to suppose, as is now so often done that the earliest or even an early form of religion was the belief in spirits which take up their abode from time to time in various forms It cannot have been until after long experience that the idea of a disembodied spirit can have been intelligible Primitive man must long have regarded body and mind as one So his earliest worship must have been addressed to things which seemed to him to be able to help or hurt him We cannot believe with Rhys Davids[3] that the early worship of trees was really dryad worship The early believer regarded certain trees as divine, just as he regarded certain animals, like the cow or the snake, as divine because of their beneficent or maleficent powers, and it was only later that the idea of the spirit as separable from the tree or animal appears Once the idea of a separate spirit is arrived at of course the nature of the deity changes, anthropomorphism arises, or other animals or things than that which the deity originally was become his place of abode[4] Further, other abstract deities can arise, and we pass from worship of natural objects to worship of spirits embodied from time to time in natural forms It was not unnatural that the thinker should endeavour to find some common explanation of the vast world of souls, and still less unnatural that he should decide that all souls were identical, a subject, and it is no answer that there need be no permanent individual self

---

[1] Liebich, *Panini*, ch iii, concludes that the language of the Brhadaranyaka is pre Paninean This incidentally supports the theory of the date of the Aitareya

[2] Cf Deussen *Philosophie des Veda*, p 285, Geldner, *Vedische Studien*, III, 116

[3] *Buddhist India*, p 226 Cf Oldenberg s view of early religion, *Religion des Veda*, p 37

[4] Hence the fetishism described in Farnell, *Evolution of Religion*, pp 44 47, and cf my article, *J R A S* 1907, pp 929 949, on theriomorphic deities

The doctrine of *anatta* therefore destroys all the basis of *samsāra*, and is complete proof that Buddhism is entirely dependent on the Upanisads which first clearly develop that view There are numerous other signs of dependence The dialogue form is copied from the dialogues of the Bṛhadaranyaka and Chandogya, and even the style of the Aitareya Upanisad, II 6 *yad etad hrdayam manaś caitat samjñanam ajñanam vijñanam prajñanam medha drstir dhrtir matir manīṣa jutih smrtih samkalpah kratur asuh kamo vaśa iti sarvāny evaitani prajñanasya namadheyani*, is a forecast of those intolerable lists of practically meaningless synonyms which disfigure the pages of the Pali Suttas In estimating the causes of the fall of Buddhism,[1] it must, I think, be recognized how great a part was played by the unphilosophical and uncritical nature of the metaphysical doctrine, and by the elaborate mass of inaccurate and fanciful psychology,[2] which the school endeavoured to set up as its contribution to the knowledge of truth The Upanisads contain much that is foolish and meaningless, but they are the first books of a new faith and were fated to be the sources of a system of philosophy whose influence in India is still paramount

It follows with certainty that the **Aitareya Upanisads** are considerably **older than Buddha,** whose date of death is certainly about 487 or 477 B C [3] We must therefore probably fix 600 B C as the lowest limit for their composition, or put 550 B C at the very latest thus modifying slightly the results above reached It is not possible to estimate how quickly thought then worked, but about 50 to 100 years will be required for the development from the earliest to the latest Upanisad, and I incline to fix approximately the dates at from about 700–600 B C for Aranyaka II, and 550 for Āranyaka III Āranyaka I may be somewhat earlier, but not necessarily much earlier, while, as seen above, the Āranyakas IV and V belong to about 450 B C, thus explaining the dictum of Sayana which distinguishes so sharply between the two parts The upper date may from the Samkhya may be yet it is clear that it was from the Samkhya that Buddhism derived its theory of the soulless entity which yet goes through transmigration For this is precisely the *lingasarira* which alone migrates, *purusa* being a truth utterly dissociated from matter From this point of view also is reached the result that the Aitareya is considerably anterior to Buddhism

[2] Mrs Rhys Davids in her *Buddhist Psychology* has done much for the study, but the fact remains that it is not worthy of the labour bestowed on it Cf Hopkins, *J R A S*, 1906, p 581, Louis de la Vallée Poussin *J R A S* 1906, p 944

[3] Cf p 37, n 5

Aranyaka I contains, in comparison with the Upanisads, little of philosophic interest It is important, however, to observe that in it *brahman* appears already as a principle of unity In I, *1*, *3* *gayatri* is identified with *brahman* and the Mahavrata day is also identified, because it leads to *brahman* Similarly Vasukra is *brahman* and so is identified with the Mahavrata day There can be no doubt that the *brahman* conception is older than that of the Atman, and that it originally meant the power of prayer, which even in the Rgveda is treated as a spell to bend the gods by its own force to grant what is craved, instead of being considered an appeal to the lovingkindness of the gods That eventually this doctrine was amalgamated with a younger rival, the Atman doctrine, as Oldenberg suggests seems to me undoubted The assimilation is seen complete in the Upanisad II *6* which indicates the length of time which we must assume between the first book and the Upanisad proper

It remains to consider whether any explanation can be given of the connexion with the doctrines of the Upanisad of the Mahavrata rite Some light on this matter is thrown by Prof Eggeling in the introduction to Part IV[1] of his translation of the Satapatha Brahmana He there points out that the Agnicayana and the Mahavrata appear to have been developed in connexion with a doctrine of the production of the world from the sacrifice of Purusa (cf Rgveda, X, 90) which eventually yields the equation of Prajāpati at once to the sacrifice and the sacrificer (cf Aitareya Aranyaka, II, 1, 2) But the sacrifice lasts a year and so Prajapati becomes time and death, and eventually mind Thus the Mahavrata rite is treated in the Aranyaka as specially secret and finds a natural development in the more purely philosophic Upanisads

In conclusion, a few words may be said as to the relation of Aranyaka III to the other Vedic texts of similar content It is of course very closely related to the Śānkhayana Aranyaka VII, VIII, with which it agrees verbally in some parts, showing that both versions go back to a not very distant common ancestor But on the whole the version of the Śānkhāyana seems the more modern in several respects[1]

---

[1] *S B E*, XLIII xii xxvii

The Saṃhitopanisad Brāhmana is certainly a much more recent work Burnell, in the preface to his edition, has urged general considerations for its comparatively late date It shows a considerable advance of phonetic science, and mentions such points as *lopa*, *atihāra*, *rephasandhi*, and *visargopagraha*, while it deals with the *svaras* Three sorts of Samhita are distinguished, the *deva*, *asura*, and *ṛṣi*, an artificial conception The Samhitā is also considered as *śuddha*, *aduhspṛṣta*, and *anirbhujā* In the last section philosophy has degenerated into meaningless formulae, and the demand for gifts in Section IV is beneath the dignity of the older Aranyakas and Upanisads Nor is it without significance that in so short a text are found *sukhibhavati* and *gulmibhuta*, forms rare indeed in the older texts[2] while the only narrative tense found is the perfect[3] (in III) and the language is classical

The Āranyaka III is also in all probability older than Taittirīya Upanisad, I, 3, which appears, as will be seen from the note on III, 1, 2, to be an enlarged version of the older Samhita doctrine, although it seems likely that the Upanisad is much older than the Samhitopanisad Brahmana

VI Style and Grammar

In this connexion it will be sufficient to consider the first three Aranyakas as forming one whole as distinct from the fifth Aranyaka, and to disregard the differences in date among their parts The quotations contained in the fourth Āranyaka, and also scattered throughout the rest of the work, may be left out of consideration until later (p 74)

The prose of the Aranyaka is of considerable historic interest The history of Sanskrit prose is one of continual degradation so far as the grammatical structure of the language is concerned Classical prose, whatever the subject matter, whether romance, as in Subandhu and Bana, clauses takes the place of due subordination, and an inordinate love for parallelism of structure is the chief sign of conscious literary effort (cf II, 1, 4, 4, 3) There is no power of transition from thought to thought, and in other cases it is difficult to tell whether it is the thought which is defective or the language which has failed to express it (cf e g II, 1, 2 *na tasyeśe yan nadyad yad vasnam nadyuḥ*, II 1, 5 *na tasyeśe yan mahyam na dadyuḥ*) Some defects it shares with all Sanskrit prose Although it has at command a considerable range of particles it fails to use them with any clear discrimination of sense, thus contrasting with the analogous phenomena in Greek literature where a delicate discrimination in the use of particles runs on from Homeric into classical Greek Again, although it commands a wide range of pronominal forms they are not used with any clear difference of sense, and indeed a characteristic of the Aitareya, as of all Brahmana prose, is the use of double pronouns, like *sa esa,* without the slightest real difference of sense from the single pronouns The same result, lack of precision, arises from the free use of the cases of the noun and the absence of prepositions to define exactly the sense intended

---

[1] I have had available for comparison the MS Sansk. e 2 of the Bodleian Library, described in Winternitz and Keith's *Catalogue* pp 59, 60, and, as I fear Dr Friedlander will not carry out his projected edition, I have not refrained from quotation from the text

[2] Whitney, *Sanskrit Grammar*, §§ 1093 1094

[3] Cf Wackernagel *Altindische Grammatik*, I, xxxi, n 2

But utterly lacking as is the style in precision balance and elegance, and although the Aranyaka is destitute of any attempt at ornament, it has nevertheless a certain fitness to its subject matter The naïve speculations, the vague guessings after truth, the confusion of thought, which make up the matter, are not inadequately mirrored in the harsh abruptness and elliptic brevity of the style and a certain variety is introduced in the frequent quotations of verses intended to bear out the argument

The historical position of the prose is not open to serious doubt It cannot be contemporary with the classical prose of the Kavya type, and it is clearly anterior to the prose of the Sutras This is shown not merely by the disuse in the Sutras of various grammatical forms still found in the Aranyaka but still more by the form of the Sutras The Aranyaka is written in prose as a literary composition, other Sutras consist merely of strings of rules, and though as Dr Knauer in his edition of the Gobhiliya Gṛhya Sutra, and Hillebrandt in his edition of the Śankhayana Śrauta Sutra have shown they can be construed as texts written continuously, still such compositions must be later than original prose works. On the other hand, not only does the Aranyaka contain fewer grammatical antiquities than the Aitareya Brahmana, but it is written in a more developed style and with a greater approach to a command over the language

The style shows also interesting affinities with that of the Buddhist Pāli Sūtras It is impossible not to recognize in both the same long lists (e g II, 6) of names of mental phenomena, in which thought is hidden under meaningless verbal distinctions Similar in both is the affection for parallelism of structure and the remorseless love of completeness which insists on repeating in every detail ideas applicable to more than one subject in every instance in which they apply, while the set formulae with which the Pali Sūtras open and close have close parallels in the Aranyaka

On the whole the vocabulary of the Āranyaka shows little that is remarkable, a few Rgvedic words are used with direct reference to the passages in the Samhita in which they occur *Visva* is found only in the phrase *visve devah* and twice in etymologies, I 2, 2, II, 2 1 *Yatha tu katha ca* occurs twice, III, 1, 3, 4 Other interesting words are *ayattah* III, 1, 2, from √*yat*, to stretch, *ādudam*, III, 1, 2, *addhatamam*, I, 2, 3, *bidale*, III, 1, 2, *batarakam*, III 2, 4, *mañjistha*, III, 2, 4, *sambalhatamah* from √*bamh*, I, 4, 1, *bisam*, III 2, 4, and *brsih*, I, 2, 4, where the dental *s* is remarkable, *dutah*, I, 4 1, which is taken by Sayana from √*du gatau*, *ulbamsnu*, II, 3, 8, *atayat*, II, 4, 3 which is usually derived from √*av*, meaning 'devour', *srutam*, I, 2 2, *vistapam*, II, 1, 2, *viksudram* I 5 1, *vyavah*, of doubtful number, I, 4 1, *sattyam* for *satyam*, II 1, 5, *samanodarkam*, I 5, 3, *stomatisamsanayat*, I, 4, 1, *antastyam*, I, 5, 1, *ksudramsram* II, 6, *udbhijjam* II, 6, &c

Throughout between vowels *d* and *dh* are written *l* and *lh* This is carefully observed in the best MSS and has been followed consistently In II, 4, 3 *saiso* is supported by the MSS, and in III, 2 4 *mayuragrivameghe* seems to stand for *mayūragriva(h) ameghe*, and cf *ajyesthavarabhyam*, III, 1, 3 *Namo astu* is the form in the MSS in III, 1 3, 4, and they read in III, 1, 2 *tasmin ha sma* Irregular lengthening of vowels appears in *iti nu*, III, 1, 2, and *vyujā*, II, 3 8, in the latter case in a verse The sandhi of *au* is peculiar, it becomes *av* before all vowels except *u* or *u*, when it becomes *a* The same rule is usually followed in the Aitareya and other Brahmanas (Aufrecht's ed, p 427)

In noun and adjective declension there are few irregularities *Atman*, I, 5, 2, occurs besides *atmani*, II, 5, *śirṣan*, I, 5, 2, also is found *Aksibhyam*, II, 4, 1 (cf Rgveda, X, 163) shows irregular lengthening of the vowel *Āpah*, II, 4, 1, appears to be an accusative as not seldom elsewhere *Aikya*, III, 2, 3, is perhaps a neuter instrumental The **genitive singular** of nouns and adjectives and pronouns which show *ah* in the Rgveda and in the later language have *ai* as usual in the Brāhmanas The only exceptions appear to be *prthivyah* II 1, 7, III, 1, 2, *asyah* and *amuṣyah*, III, 1, 2, 2, 5 In the ablative is found *brhatyai* II, 3, 6, *asyai pratiṣṭhayai*, I, 2, 4, of superlatives *brahmatatamam* II, 4, 3 for *brahmatatatamam*, and *annatamam pratyacyante*, I, 4, 1, are remarkable *Catuspadah* and *catuspatsu* occur in I, 1, 2, with a v l *catuspadah* *Navasrakti* in II, 3, 6, anomalously appears to stand for *navasraktih* *Enat* in II, 4, 3 is apparently a nominative as in Aitareya Brahmana VII 22, and if so *paran* is used as a neuter *Nabhyai* with the longer form occurs in II 4 1, in the ablative *Enam* is used almost as an adjective, III, 1, 3 *Imasmai* occurs in II, 3, 7

The **numerals** show certain interesting forms *Ekayā na trimśat* occurs in I, 1, 2, Besides *sapta satani vimśatiś ca*, III, 2, 1, appears *sapta vimsatisatani* III 2, 1, so also *trini sastisatani* (= 360), III 2, 1, and *pañca catvarimśatsatani* (= 540), III, 2, 2 as usual in the Brahmanas The form *ṣattrimsatam sahasrani*, II, 2, 4, 3, 8, denotes 36,000, and may be considered, perhaps like *ṣattrimśatam ekapadah* Aitareya Brahmana, VII, 1, as an irregular use of accusative for nominative, cf *pañcavimśatim samidhenyah*, V, 1, 1

Among **verbal forms** may be noted the Vedic forms, *duhe*, I, 3 2, and *ise*, II, 1, 2, 5, as third persons, both these forms occur in the Aitareya Brahmana As in that Brahmana unaugmented forms occur in *ikṣata*, II, 4, 1, 3, and *padi*, II, 1, 2 *Upanisasasada* in II, 2, 3 is supported by all the MSS *Abhityaikhyat* in II, 4, 3 appears, if the reading is correct, to be the aorist of *abhivikhya* with the *i* augmented *Atrapsyat* and the irregular *agrahaisyat*, II, 4, 3, are examples of the rare conditional The perfects *dādhara*, I, 5, 2, II, 1, 7, and *bibhaja*, I, 3 4, occur also in the Brahmana *Dadrśe*, II, 1, 3, 8, and *mene*, III, 1, 1, are, the former certainly, the latter probably passive The √*kr* alone is used as an auxiliary in the periphrastic perfect viz *upāsām cakrire*, II, 1, 8, and *vedayam cakre*, III, 1, 1 The following desiderative forms occur *Ipsati* II, 3, 2, *ipsantah*, I, 1, 1, *vicikitset*, III, 2 6, *ajighrksat*, II, 4, 3, *atyajighamsat* II, 4, 3, *abhitittrtsati*, I, 3, 1, *bibhatseta*, II, 3 7, *mimamsante*, III, 2, 3, *viruruciseta*, III, 2, 5, and the rare aorist *samadhitsisam* III, 2, 5 which is a distinct sign of antiquity The only intensives are *popluyante*, *sarisrpyante*, I, 3 5, and probably the form *vavadisat*, II, 4, 3, which I take as an aorist subjunctive, also an old form The denominative *patiyasi* occurs in I 3, 5 For the infinitive and subjunctive forms see below There are no irregularities in the use of *°tva* and *°ya* such irregularities being characteristic especially in the case of *°ya* of epic style, not of the Vedic style The gerund in *am* appears in *pranavam* and *chandaskaram*, I, 5, 1 It may be noted that in II, 1, 4, *smah* is substituted for *smasi* of the quotation *Attam*, II, 3, 6, and *apihita*, III, 2 5 may also be mentioned

Very characteristic of the early date of the Aranyaka is the **separation of prefixes** and their verbs It is not normal, the great majority of prefixes are placed immediately before the verb, and I have accordingly printed them as forming compounds But the older tradition survives in the following cases *ati manyeta*, II, 3, 3, *anu yujyate*, II, 3, 8 (in a verse), *abhi samvahanti*, ibid, *a gachati*, *gachatah gachanti* I, 1, 4, *a jayate*, II, 3, 1, *abhi trnatti* I, 3 1, *para bhavati* II, 1, 4, &c, *adhi caranti*, *bhavati jayate* II, 3 1

Pluti and the consequent lengthening of the vowels concerned occurs sporadically The MSS differ considerably, like the editions in noting the Pluti, and it has as a rule been considered proper to insert it in the text only where Sāyana mentions its presence

In regard to **syntax** it may be noted that the rules of concord are usually carefully followed as in all old works In II, 1, 7, examples will be found of a masculine and a feminine singular, and a masculine and a neuter singular, being accompanied by a verb in the dual, and a plural masculine accompanies a feminine plural and a masculine singular *Andam* in III, 1, 2, is unusual, as *andah* would be expected, but cf *sarvam asam*, I 5 2, *samanam asitajah*, II, 1 2 In III 2, 4, *etesam kimcid* occurs, although *svapnanam* is to be understood The usual attraction to the number and gender of the predicate occurs in I, 4, 1 *athato vijavas ta virajo bhavanti*, II, 6 1, &c The plural in *adyuh*, II, 1, 2, and *dadyuh*, II, 1, 5, offers difficulties

In the use of the **pronouns** there is little of note The forms of the base *enad* occur frequently, but as in all the Brahmanas the pronouns are used in a very confusing and inaccurate way Double pronouns are very common e g *sa eṣah*, II, 1, 5, 8, 3, 3, 6, 4 3, III, 1, 1, 2 4, &c, *saisa*, II, 3 6, 4, 3, III, 1, 6, *tad etad* II, 1, 2, 3, 6, 4, 3, *tasyaitasya*, (neut) II, 2, 4, III, 2, 1, (masc) III, 2, 1, 3, *tasya etasyai* (gen) III, 2, 6, *ta etah*, II, 1, 4, 2, 2, 3 3, 4, 2, *etat tad*, II, 1, 8, *tam imam*, I, 1, 2, *tad idam*, II, 1, 2, *ta imah*, II, 1, 1, *tanimam*, II, 1, 1, *so 'yam*, II, 5 1, *seyam*, II, 1, 2, *tasya me*, II 2, 3, *ya eṣah* II, 2, 1, *yo 'yam* III 2, 3 &c *Ya* forms numerous indefinite combinations which are given in the Index, *s v* The usual correlations are *ya* and *sa*, e.g *ye te*, II, 1, 1, &c, *yad tad*, II, 3, 6, &c More unusual are *tad etad yad etad*, II, 1, 2, *yad etad-tad etad*, II, 5 1, *etad yad etad*, II, 3 6, *yad etad tad* II, 3, 7 In one case it is uncertain whether a relative is not omitted, viz II, 5 *ko 'yam atmeti vayam upasmahe*, where *yam* may be read

In case construction there is the usual freedom The accusative denotes duration of time in *śatam varṣani*, II, 2, 1, *samvatsaram ga rakṣayate*, III, 1, 6, where the use of the historic present is to be noted, *ahoratre varṣati*, III, 1 2, where the meaning is 'day and night continuously' The cognate accusative appears in *ayayam ayau*, II, 1, 1, and *kakakulayagandhikam vayati* III, 2, 4 Other uses are *sarvam madhyato dadhe*, II, 2, 1, *enam atikṣaranti* II, 2, 2, *jyotih prakaśam karoti*, II, 1, 8, *ahah śamset* III, 2, 4 More unusual is the use of the accusative as if in apposition to the main sentence as in *ityatam cābhyutthanam ca*, I, 5 1 The instrumental is used with √*stu mahavratena stuvita*, III, 2, 4 The dative is used with √*arc sarvebhyo bhutebhyo 'rcata*, II, 2, 2, and *sarvebhyo rdhebhyo rcata*, ibid which is probably an extension of the usual *dativus commodi* found in the same passage with *kṣarati* The date of 'work contemplated' appears in *punyebhyah karmabhyah pratidhiyate*, II, 5 Other datives used predicatively are practically equivalent to infinitives, see below In *sarvebhyo bhutebhyo dadrśe*, II, 1, 3, 8, the case may be dative or ablative The ablative follows *anyat* in *anyat kuśalad brahmanam bruyāt* III, 1, 3 (cf I, 1, 2) when the double accusative is interesting In III, 2, 4, *atmana eva asya tat krtam bhavati atmana* may stand for *atmanah*, a predicative genitive, or for *atmane*, a *dativus commodi*, the former view is supported by V, 3 3, *atmano hanasya tac chastam bhavati* In either case *asya* is to be taken probably directly with *krtam* and *śastam*, cf *nah proktam*, III, 2, 1, *asya uditam*, II 1, 5 Worthy of note is the construction in

Āranyaka I, 6, there occur—as usually in the rest of the Āranyaka—perfects, *upajagama* (cf *upeyaya*) *uvāca*, and *uce* There must be a common source for the two narratives despite the difference of their present forms, and it must have used perfects in narrative Besides these narrative perfects, perfects in the present sense occur in *dadhara*, II 1, 7, *dadrse* II, 1, 3, 8, both of which are conjoined with present tenses

In Aranyaka II, 4–6, occur sixty-one examples of the imperfect from twenty-three forms of nineteen roots (*asit*, *asrjata*, *iksata* (5), *amurchayat*, *atapat* (2), *abhidyata* (5), *abhidyetām* (3) *apatan*, *arjat*, *abravit* (2), *abrutam*, *abruvan* (4), *anayat* (3), *aviśat* (5), *aviśan* (3), *ayajata* (2), *ajighāmsat*, *ajighrksat* (8), *aśaknot* (7), *avayat*, *apadyata*, *apaśyat*, *abhavat* (2) The only narrative perfect is *uvaca*, II, 5, and there is one present perfect, *dadhe*, II, 2, 1

In Aranyaka III occur *asramsata* and *adadhat* (2), III, 1, 6, and the present perfects, *mene*, III, 1, 1, *viduh*, III, 2, 5

The two periphrastic perfects *upasam cakrire*, II, 1, 8, and *vedayam cakre*, III, 1, 1, may both be narrative perfects, but the latter may be a present perfect

The results may be tabulated as follows, omitting periphrastic forms, the Slokas in II, 3, 8, are not taken into account The numbers in brackets denote the number of roots

Āranyaka	**Imperfects.**	**Present Perfects**	**Narrative Perfects**
I,	7 (5)	3 (3)	3 (2, *asa* and *vivyaca* (?))
II, 1, 2, 1–2, 3	67 (19)	2 (2)	3 (1, *babhuvuh*)
II, 2, 3–4	None	None	17 (6)
II, 4–6	61 (19)	1 (1)	None

The fair conclusion is that the Aranyaka is older than the later books, VI–VIII, of the Aitareya Brahmana as is indeed probable in view of the much more developed narrative style of the Sunahśepa legend It is probably older than parts (if not the whole) of the Satapatha Brahmana, viz I–V, X, XII–XIV, including the Brhadaranyaka Upanisad, which uses the narrative perfect throughout In view of the copious and rich style of that Upanisad with its wealth of metaphor, ease of motion, and dignity, it seems impossible to doubt that it belongs to a much later period than the Aitareya just as we have seen that its philosophic content goes far beyond that of the Aitareya Bearing in mind that the Brhadāranyaka shows considerable evidence of the activity of the Ksatriyas, and that the perfect as a narrative tense is common in the Epic, it may be suggested that the origin of the narrative use in the Brahmanas is to be found in a borrowing from the style of the old Itihāsa literature It is perhaps not without significance that such legends as that of Śunaḥśepa, Pururavas and Urvaśī (Śatapatha Brahmana, XI, 5, 1) Cyavana (ibid, IV, 1, 5), and, in the Aitareya Āraṇyaka itself, that of Viśvāmitra, II, 2, 3, should be told in perfects It may be noted that in the Śāṅkhāyana Śrauta Sūtra XV, 17 sq, the Śunaḥśepa legend is also set out in perfects. The Brahmana use of the perfect is as a present, while both usages are found in the earlier language of the Rgveda Saṃhitā The older is undoubtedly the Brahmana use as it corresponds most closely with the use of the Greek perfect as a completed action or state (cf Monro, *Homeric Grammar*^{2}, p 31)

The **future indicative** is used in its ordinary way as denoting future time in assertions or questions, but the so-called second future never occurs, as it does, e g in the Jaiminiya Upanisad Brāhmana

The **optative** is of comparatively very frequent occurrence. (1) Its use as denoting wish is infrequent, the subjunctive usually being preferred, but (2) its use in directions as a mild imperative occurs passim (3) It is also used in questions to express doubt precisely as is used the subjunctive with which it alternates in II, 4 3 *katham nv idam mad ṛte syat katarena prapadyai.* (4) Its most characteristic use in the Āranyaka is in the protasis and apodosis of conditional sentences In the apodosis it may denote either direction or the potential In all cases the condition is one referring to the future, and is of the type 'If A happens then B will happen, or should be done.' Examples of two potentials are *yadi aśnuvita manyeta*, II 3 3, so III, 1, 6, (with *yad* = if) II, 3 6, III, 2, 2, (with *yatha*) III, 1, 3, 4 Examples of a potential protasis and imperative apodosis are (with *yadi*) I, 1, 1, III, 1, 3, 6, 2, 4, 6, (with relatives) I, 2 2, III, 2, 4, 5, and without any particle *paśyet-dṛśyeyatam-vidyāt*, III, 2 4, with double protasis, *upaśrnuyat yadā śrnuyat vidyat*, III, 2, 4 (5) Arising from this potential use the optative appears as an indefinite, like the Greek subjunctive and optative or the Latin subjunctive This is possibly the explanation of the difficult phrases in II, 1, 2 *na tasyese yan nādyād yad vainam nādyuh*, II, 1, 5 *na tasyeśe yan mahyam na dadyuh* though the meaning might be merely a future Definitely indefinite is III, 2, 1 *yatha śalakamse sarve nya amsah* *samahitah syuh*, since the apodosis is an assertion of fact (6) An optative of characteristic, that is of result is found in III, 2, 3, *brahmanam kurvita yo pasyet* It will be seen that none of these usages offer any difficulty of explanation on the now generally accepted theory[1] that the optative is originally a weak future in sense

As in other languages the **indicative** can be **used modally**, and in conditional sentences this use is well developed in the Āranyaka In II, 3, 3, *yady antariksalokam asnute 'ty enam manyate* is clearly modal, and is followed by *yadi asnuvita manyeta* So *yatra vihiyete vidyat* in III, 2 4 Hence indicatives are sometimes combined with optatives in protases of conditional sentences, the following occur in III 2 4 *yatra drsyate pasyet na pasyet pasyeta vidyat*, *yatra drsyate abhikhya yeta pasyet, vidyat*, *upeksyeta tad yatha drsyante-yada na pasyet, vidyat*, III, 1, 4, *ya upavadet evu manyeta aha bruyat* The indicative also occurs in conditions where the fact is asserted in the apodosis (with *yadi*), e g II, 4 3, or when the protasis and apodosis refer to the future, e g *yasmin patsyati-bhavisyati*, II, 1, 4

The only case of a condition in the past which was not fulfilled occurs in II, 4 3 *yad hainad vacagrahaisyad abhivyahrtya hai vannam atrapsyat*, &c where the conditional is correctly employed This accuracy in the use of the conditional and generally in the use of the optative is characteristic of an early date

The **subjunctive** is of comparatively frequent occurrence, usually in the first person It denotes (*a*) resolve *pravisama utkramama* II 1, 4, *srjai*, II, 4 1, 3, *adama* (in a relative clause), II, 4 2, (*b*) desire *asani*, I, 5 2, II, 1, 4, 2 2 *asat*, I, 4, 3, 5 1, *apnavani* I 4 3, 5, 2, *avarunadhai*, I, 4 3 *asnavat*, I, 4, 3 (*c*) doubt in questions *bravani*, III, 2 6, *prapadyai* II 4, 3, *vavadisat* II, 4 3 if this is so taken, (*d*) with *ned ucchidyai* I 2 4, *asat*, I, 5 2

The **imperative** occurs several times, but there is no instance of the use of *ma* except in II, 7 1, which is not genuine, where *ma prahasih* (or *prahasit*) is found The Śankhayana Aranyaka, XI, 6, has *mā* with the future

The **infinitive** in *tum* occurs only twice in both cases with the verb

---

[1] Cf Goodwin *Greek Moods and Tenses* App A This would account for the disappearance of one of the tenses in Latin Teutonic, and Balto Slavic (Lindsay, *Latin Language* pp 511 516)

śak, *saṃdhātum naśakaḥ*, III, 1, 4, *aśaknot grahītum*, II, 4, 3. This is consistent with the early date of the Aranyaka. On the other hand, as in the Aitareya Brāhmana *īśvara* is construed with the infinitive in °*toḥ*, *bhavitoḥ*, II, 3, 5, 6, *caritoḥ*, I, 1, 1, *praitoḥ* II, 3, 5. Mention should also be made of a series of datives formed from verbal roots by the affix °*tyai* which serve as predicative datives signifying that to which an active tends viz *kḷptyai*, I, 3, 8, *abhijityai*, I, 1, 2, *prajātyai* I, 2, 4, 3, 1, 4, 4, 1, *saṃtatyai* II, 5, *āptyai* I, 1, 3, 2, 1, 3, 3, 8, *abhyāptyai*, I, 4, 2, *upāptyai* I, 3, 7, *avaruddhyai* I, 1, 2, &c., *apahatyai* (probably), I, 2, 2. The use of these forms is not precisely that of infinitives but it is analogous and forms a distinct feature of the style of the Aranyaka. Similar forms occur in the Aitareya Brahmana.

The injunctive, except in the form of the second person plural imperative, occurs only in *arjayan*, I, 5, 2.

In the use of participles the most characteristic feature is their use in place of finite verbs, a use arising from their employment as predicative adjectives. In the following cases the substantive verb is expressed: *uktam bhavati*, I, 3, 8, II, 1, 5, 8, III, 2, 4, *uditam bhavati*, II, 1, 5, *visto 'smi*, II, 2, 3, *vyāptam bhavati*, III, 1, 3, *samāhitāḥ syuḥ*, III, 2, 1, *kṛtam bhavati*, III, 2, 4, *apihita bhavati*, III, 2, 5, *anuṣaktā āsat*, I, 5, 2. In all these cases the expression means more than the corresponding form of the finite verb would have conveyed, and denotes a completed action whose results persist in the present. The accurate use of these forms is a distinct sign of early style. The same remark applies to most of the cases of the use without the copula: *sthitam*, I, 1, 1, *pratiṣṭhitam*, I, 1, 2, *pratiṣṭhitaḥ* I, 2, 2, 4, 2, *pratiṣṭhita*, I, 3, 4, *viṣṭaḥ*, *vistāḥ*, I, 3, 8, *aviṣṭāḥ*, *niviṣṭāḥ*, II, 1, 1, *śritaḥ* I, 5, 3, II, 1, 4, *channaḥ*, II, 1, 6, *sṛṣṭau sṛṣṭāḥ*, II, 1, 7, *āttam*, II, 3, 6, *avṛtam*, II, 1, 6, *vistabdhaḥ*, *vistabdhaṃ*, II, 1, 6, *sitam*, II, 1, 6, *niviṣṭaḥ*, II, 3, 3, *samāhitaḥ* III, 2, 1, *vyastaḥ* III, 2, 4, *samparetaḥ*, III, 2, 4, in these instances the effect persists into the present, and no examples of a use like *dṛṣṭā* = 'she was seen', occur. In II, 4, 3 *yadi vācābhivyāhṛtam*, &c., the sense approximates very closely to a mere present passive indicative.

There is no instance of the participle in *vat* formed from the past participle passive, which is so common later. That participle occurs also combined with the participle of √*as*: *dutāḥ satyaḥ*, I, 4, 1, *siktam sat*, I, 4, 2.

In one case the present participle is combined with the √*as* *tapann asmi*, II, 2, 3 expressing a continuing present It is used with √*man* in *śaknuvan manyeta aśaknuvantam manyeta*, III, 1, 4, where the change of case is remarkable Note also *anudgrhnan samdadhad varsati*, III, 1, 2

The **gerund** appears equivalent to a present participle in *himkrtya pratipadyate*, I 3, 1, where the action of the verb and participle are simultaneous (cf my note on the gerund, *J R A S*, 1907, p 164)

The **gerundive** *karaniyam* is used with √*man* in III, 2, 4 Here may be noted the strange form *abhivyaharṣan*, III, 1, 6, which has the sense of a future participle and the form of a participle of the *s* aorist No correction seems probable as *°hāriṣyan* (cf Whitney, *Translation of Atharvaveda*, p 846) is impossible

The use of **conjunctive particles** is marked by the number of combinations allowed as contrasted with the comparatively barren character of the later language In most of them *ha* plays some part Examples are *ha vai*, I, 2, 1, &c , II, 1, 2 &c , III, 1, 2, &c , *sa ha vai*, I, 2, 1, 5 2 , III, 2, 2 , *u haiva*, I 3, 8 , II, 2, 4 , *evam u haiva*, I, 3, 4 , 8 , *atho ha vai*, I, 4, 2 , *haiva* I 5 2 , II, 1, 4 , 8 , 3, 7 , 4, 3 , *u ha sma*, I, 1, 1, &c , *evam u ha sma*, III, 1, 2 , *ha sma vai*, I, 1, 3 , II, 1, 5 , 8 , 2, 4 , III, 2 5 , 6 , *ha sma*, II, 3 5 , 7 , III 1, 3 , 2, 1 , *ha tu*, II, 3, 5 , *atha ha*, III, 1, 1 , 5 , *u ha u*, I, 3, 3 , *athapi*, III, 2, 4 , *atha khalu*, III, 1, 5 , 2, 5 , *athatah* I, 4, 1, &c , *atho*, I, 1, 2, &c , *u khalu*, III, 1, 6 , *u eva*, II, 1, 1 , 2, 1 , III, 1, 3 , *tv eva* I, 1, 1 , 5 2 , II, 1, 4 , *tasmad hapy etarhi*, II, 1, 8 , *utapi*, III, 1, 2 , *ahaiva* (?), II, 1, 2

Of single **conjunctions** the use of *ca* is most important The regular use is *ca ca*, a formalism distinctly indicative of age, see I, 1, 4 , 2, 3 , 3, 1 , 4 , 4 , 5 , 7 , 5 1 , II 1, 2 , 6 , 7 , 8 , 2, 2 , 6, 1 , III, 1, 1 , 6 , 2, 3 , and in I, 1, 2, *chandah* is in apposition to *brhatim ca virajam ca*. A single *ca* is practically restricted to numerals, e g *vimśatiś ca* II, 3, 6 In I, 2 2, is found *ca ca ca* , and in II, 6 , III, 1, 6 *ca ca ca ca* In the *Ślokas in II, 3, 8, appears yad yac ca yac ca yad u ca* These facts render the usual division of *vayamsi sanguvagadhaś cerapadah*, II, 1, 1, into *ca irapadah* excessively improbable *Iva* is used frequently (see reff in Index V) in a sense hardly differing from *eva*, as is also the case in the Aitareya Brahmana though it can always be translated 'as it were', merely modifying the literal sense of the verb , cf I, 1, 2.

ciralaram iva vā agachanti *Va* has the sense 'indeed' as well as that of 'or', but a single *va* is more common than a double *va*, unlike the case of *ca* *Hanta* is used with the subjunctive, II 1, 4, as in the Aitareya Brahmana *Iti* has as usual a large variety of uses, and is never misplaced *Cana* in III, 1, 3, 4, following *na* appears to have the force of 'even' *Kamam*, I, 1, 1, III, 2 4, *vata* II, 2 2, 4 2, and *vava*, I, 3 4, &c., also occur *Aha* is contrasted with *u* in II, 3, 7

The same relative wealth is seen in the case of **correlative particles.** The most common form is *yad tad*, denoting time or cause, or comparison, I 1, 1, 3, 1, II 1, 4, 2, 2, 5 1, III, 1, 3, variants are *yat tena*, III 2, 6, *yat tasmāt*, II, 1, 6, 2, 1, 2, 3 6, III 2 6, more definitely signifying cause So *yad hi tasmat*, II, 1, 3 A characteristic and frequent type of sentence is I, 1 3, *tad yan madhuchandasam śamsati sarvesam kamānam avaruddhyai*, cf I 2, 2, &c *Yatha* is usually balanced by *evam*, II, 1, 6, 3 5, III, 1, 2, 2 1, 5, it stands alone in *yathāndam*, II, 4, 1, *yatha svam angam*, II, 5 1 It is balanced by *tathā* in *yathā prthivi tatha* &c, in II, 1, 2 In I, 3, 1, is *yatha vai evam* *Yatra* either has no correlative, as in III, 2, 4, or is balanced by *tad*, II, 1, 8, *tad utapi*, III, 1, 2, *tadā*, III, 1, 6 *Yada* is balanced by *atha*, II, 5, *yadi ha va api* by *haiva* II, 1, 5, *yad ha* by *haiva*, II 4, 3 In III, 1, 3, 4, occurs the phrase *yathā tu katha ca bruyād abhyaśam eva yat tathā syāt*, where the words *abhyāśam eva yat tathā* practically form a compound adverb

Finally it may be mentioned that the **grammatical terms** *yoṣan* and *vṛṣan* are used for feminine and masculine, I, 2, 4, as in Aitareya Brahmana, VI, 2

A comparison of the forms and usages cited above with the valuable list of similar forms in the Aitareya Brāhmaṇa given by Aufrecht[1] shows conclusively that the Aranyaka stands on nearly the same footing as the first five books of the Brāhmana It is not so old, e g it has fewer forms of the subjunctive, no infinitives in *-e* or *-ah* or *-tavai*, and none in *toh* after *ā* or *pura*, but it is not much younger The use of the narrative tenses is some argument for its being older than Books VI–VIII, to which otherwise it stands close in point of language, though it is much less developed in style

---

[1] *Aitareya Brāhmaṇa*, pp 427–431

The conclusion arrived at above on grounds of doctrine that the Śāṅkhāyana Aranyaka I, II, is later than the Aitareya Āranyaka I–III, is confirmed by the linguistic tests Generally the two works correspond most closely in vocabulary, and confirm the view that they must be derived ultimately from a common source For example, Dr Friedlander well explains *atiharan* in Śāṅkhāyana Āranyaka, I, 7, as 'laying across', as it means in Aitareya Aranyaka, V, 1, 4, and not, as explained by the commentator on the Śrauta Sutra, in the sense 'withdrawing' Probably the common source of the two Aranyakas had the word which has survived only in the Sūtra part of the Aitareya, but in both the Sūtra and Āranyaka of the Śāṅkhāyanas With the forms quoted above may be compared the irregular sandhi *niṣ tad*, I, 8, the noun and adjective forms, *ātman*, I, 8, II, 1, *etasyai devatayai* (gen), I, 8, *adhitaram*, I, 7; *udyatatarah*, I, 7, the datives of end served, *bhogyaya*, I, 8, *santyai*, I, 4, *bhiṣajyayai*, I, 4, *avāptyai*, *āptyai*, I, 2, II, 6, the constructions *iśvarah naparajetoh*, I, 8, *gamiṣyantī bhavati*, I, 8, *upāpta āsan*, I, 6; *śamsiṣyate*, I, 5 (cf *śamsiṣyantam*, Aitareya, II, 2, 3), *yatha parivyayet-dhatte*, II, 16, 1 ad fin, the use of the particles *u vai*, I, 1, 3, *na ha vai*, I, 8, *ha vai*, I, 5, 7, *tathā ha*, II, 1, *u ha*, I, 6, II, 10, the construction of the sentence with *tad yad*, II, 10, the irregular numeral *sapta vimśatiśatani*, II, 10 As has been seen above the narrative perfect occurs in II, 6, the parallel passage to Aitareya, II, 2, 3, and it occurs also in II, 17 (*provaca*, *jijña*), which may be compared with II, 2, 4, as far as the *provaca* is concerned Whereas however, the perfects in the Aitareya are marked exceptions, there is no other narrative tense in Sankhāyana Further, the language of the Śāṅkhayana Aranyaka is much more accurate and modern than that of the Aitareya Instead of *ṣattrimśatam sahasrani* the correct *sattrimśat* is found, II, 17, there are no subjunctives other than those of the first person, which occur with *ned*, I, 1, as in the Aitareya, there are no irregular forms either of nouns pronouns or verbs, save those mentioned above, the aorist is only represented by *avocam* in I, 6 *Ca* is used in *śastrena ca vratacaryaya*, I, 6, in a way not paralleled in the Aitareya and in that chapter occurs the form *vijijñasam eva cakre*, a periphrastic perfect of the desiderative, a form elsewhere practically confined to the Śatapatha Brahmana After making full allowance for the difference of length, the posteriority of the Śāṅkhayana is almost certain If, as seems probable, *brahma*[1] and *brahmam* in I, 5, 6, refer to Brahman and his wife, who perhaps owes her origin to these passages, then a strong argument is added for the later date of the Śānkhayana since the Aitareya does not even certainly know Brahman since the passages in which *brahmā* certainly appears refer to the Brahman priest, and in all the others *brahma* may equally well be read Brahman, however, appears in Aitareya Brahmana, V, 33 1 Books VII XIII of the Sānkhayana are still later

Aranyaka V is written in the regular **Sūtra style** It is practically impossible to understand it without a commentary for as usual the rules are condensed into unintelligibility Characteristic is the weight thrown on single words and phrases, e g *ajapaya vrtā*, V, 1, 4, *asidhakaraih*, V, 1, 1, and the frequent use of gerunds, besides the piling up of adjectives and adverbial phrases

In Sandhi it appears that *au* before *u* becomes *a*, although here, as in Āranyaka I–III, the MSS and the Anandaśrama edition vary Unusual forms are *atman*, V, 1, 6, *uttare* (loc), V, 1, 2, *vadatyah* without *n*, V, 1, 1, *ardharcyāh*, V, 2 5, meaning 'to be recited by half verses', *brhatikaram*, V, 1, 6, *gāyatrikaram* V, 3 1, *triyavarjam*, V, 1, 6, *samutah*, V, 1, 3 Of desideratives occur *jijīviset*, V, 3 1, *jigamiset*, V, 1, 4, and as amended, a desiderative causal *cikirtayiset* V, 3 3 The imperative *prabrutat* occurs in a direction, in V, 1, 5 The feminine genitive form is *āh*, not *ai*

More characteristic is the **pregnant use of case constructions**, when for the sake of brevity everything is made to depend on the mere case relation, e g (accusative) *avabrtham prenkham kareyuh*, II 3 2, *aprakampi*, V, 1, 3, in quasi apposition to the sentence, (dative) *niskevalyaya stuvate*, V, 1, 5, *avadyakarmane jigamiset*, V, 1, 4, (abl) *hotrāś caturvimśat*, V, 1, 1, (gen) *mahāvratasya pañcavimśatim samidhenyah*, V, 1, 1, where the irregular *pañcavimśatim* is also noteworthy, (abl and gen) *caturvimśān marutvatīyasyatanah*, V, 1, 1, (loc) *dīksite yajamānaśabdah*, V, 1, 5, *na vatse ca na trtīye* ('in the case of') V 3, 3, (loc and instr) *anyasu cet samamnatāsu rajanena samna stuvīran*, V, 1, 6, cf *bhuyasisu cet stuviran* V, 3 2, other uses are the dative after *dhatte* with *sam*, *sam paksayoh patanaya*, V, 1, 6, an apposition of whole and part *śakhaya mulade´sena*, V, 1, 4, and *abuddham-asya*, V, 3 2 Very strange is

---

[1] The form *brāhmanī* is curious and the passage may mean 'the Brahman and his wife' Cf Jaiminīya Upanisad Brāhmana III, 4 9

śriyam gor aśvam ātman dhatte, V, 1, 6, where *goh* may be a possessive genitive or a genitive of description

In the verb occur two subjunctives in directions put in the mouth of the sacrificer, *pariv rajatha*, V, 1, 1, *vinayatha*, V, 1, 2 In V, 3, 2, purpose is expressed by *yatha na* with *hamsyasti*, a curious but not rare (e g in the Śatapatha Brāhmana) use The optative occurs in directions frequently, and in both protasis and apodosis of conditions, (*a*) with potential force in both, e g *yāvatir-avaperan tāvanti jijīvişet*, V, 3, 1, (*b*) with imperative force in the apodosis (with *yatra tatra*, and *yatra tu kamam-tatra*) V, 3 3, (with *yadi*), V, 1, 4, 3 3, (with *ced*), V, 1, 6, (with a relative), V, 1, 5 In V, 1, 4, *yada śrāmyet* is probably indefinite, in V, 3 3, *yady api adhiyat na snatako bhavati*, the indicative in the apodosis probably expresses the certainty of the result, in V, 3, 2 the apodosis to *cyaveta ced* is curtailed, so also in V, 2, 1

With regard to participles *jagarito bhavati*, V, 1, 1, and *upakļpto bhavati*, V, 1, 3, both denote a past action resulting in a present state *Upalambhaniyah*, V, 1, 1, is a sign of comparatively late date, the earlier form being *upalambhyah*, cf Śankhāyana Aranyaka, I, 1 No infinitives occur, but many gerunds, e g V, 3, 3, and in all about 36 instances are found In place of an infinitive there is in V, 3, 2, *ijjayai sampresitah* The past participle passive in *yathetam*, V, 1, 2, 3, is simply the equivalent of a past indicative

The use of particles is comparatively restricted There occur the following combinations *atha ha*, V, 2 4, *ihaiva*, *iho eva* V, 1, 6, *ha sma* V, 3, 3, *haiva*, V, 3, 3, *no eva* V, 3 3, *iva* is equal to *eva* in V, 3 2, *aha* occurs in V, 1, 6, *khalu* in V, 1, 6, *kamam* in V, 3, 3, *punar api* in V, 1 4 In the case of *ca* the single use is the more common, as compared with Āranyaka I–III, in *na vatse ca na trtiye*, V, 3 3 the *ca* may connect with the previous sentence, or be like *śastrena ca brahmacaryaya* in Sankhayana Aranyaka I 6 In V, 1 1, *etaiś caivasvahakarair* (*mantrair*) *ehy madhu iti ca* occurs In V, 3 3, is *na cana*

Among other signs of late date may be reckoned the frequency of the locative absolute, the use of adverbial expressions like *antarvedi*, V, 1, 1, *anuparikramanam* V, 1, 4, *viharanaprabhrti* V, 1, 1, *anavrcam*, V, 1, 1, the plural of authorship as found in *nidarsanayodaharisyamah*, V, 3 3, and the use of gerunds like *napitena karayitva* V, 3 3

The same style and diction are found in Āśvalayana's Srauta Sutra, which, like Āranyaka V, consists of a disconnected string of sentences, which, when consisting of more than a few words, are constructed by heaping adjectives on adjectives, adding adverbial phrases, using gerunds, and piling up cases in different senses There is no independent evidence to show that there is any great difference in time between the Aranyaka V and the Srauta Sutra

There seems no reason to suppose that the Aranyaka V is not more ancient than the Sankhāyana Srauta Sutra XVII, XVIII Hillebrandt has, indeed suggested that the Sankhayana Śrauta Sūtra is older than Aśvalayana, and although the last two Adhyāyas may be of different date from the first sixteen, still they are hardly likely to be later, so that, if Hillebrandt's conclusions are sound, the Sutra XVII, XVIII, will be older than the Aranyaka V. But Hillebrandt's reasons are not convincing[1] He points out that as Weber has said, parts of the Sutra are written in the Brāhmana style This refers mainly to Adhyayas XV, XVI, which contain *inter alia* the Śunahśepa legend But even assuming that these books are part of the original Sutra, it cannot be denied that the version of the legend is in no way original, it is merely the same as that in the Aitareya Brahmana, and differs so little from it that both versions must be descended from a common source The part of the Aitareya where it occurs is decidedly later than the first five books. The Brāhmana like style is therefore not to be attributed to Suyajña, the author of the Sūtra Secondly, he refers to the description of the Aśvamedha and of the Purusamedha as signs of early age. But this argument depends greatly for its force on acceptance of the theory that Rgveda, X, 18, 8, can be explained from Srauta Sutra, XVI, 13 and this view is not now usually accepted[2] Thirdly, he points out that the Sutra is not written with the full brevity of the latest Sutra style This is true, but the argument is really in favour of the priority of Aranyaka V For that work is written in a style less condensed than that of Suyajña, and certainly less condensed than that of Books XVII, XVIII Further, it must be admitted that as a Sutra these books are much superior to the Āranyaka V. The ritual directions are far more precise and detailed, contrasting with the brevity of the directions in the Aranyaka, which mainly concerns itself with a description of the litanies In the Sūtra the whole process is gone through methodically while the Āranyaka covers only a part of the field The style is of the usual Sūtra type, it is not in any marked manner more recent than that of the Āranyaka, but it contains practically no irregular forms With the forms quoted above from the Aranyaka the following facts may be compared The Sandhi of *a+r* is *ar*, XVII, 5, 9, 7, 8, of *āu+u* is *a*, XVII, 10, 5, 16, 5, while *tasyah* occurs in XVII, 3, 2, as always in Aitareya Aranyaka V, *tasyai* is found XVIII, 2, 4, 19, and *prathamāyai, dvitiyayai uttamayai*, XVIII, 20 In XVII, 3, 12, 15, occur *ghatarih* and *ghatakarkarih*, nominatives with the *s* preserved The locative is used with *√stu* in XVIII, 2, 2, 22, 7, and extended to *√kr* in *atichandahsu kuryuh*, XVIII, 22, 9 Adverbial phrases besides *antarvedi* are *prasalavi*, XVII, 14 16, 15, 4, *antahsadah*, XVII, 4, 3, *nana badhnanti*, XVII, 3, 8, while *jaghanena* is used with the accusative, XVII, 5, 8

[2] Cf Whitney, *Translation of Atharveda*, p. 848, Oldenberg, *Gött Gel Anz.*, 1907 p 218, n. 1, see however, Lanman *Sanskrit Reader*, p. 355

Of **verbal forms** may be noted *pratyagrnitat*, XVII, 14 3, *prabrutat*, XVII, 14, 4; *vimimsamanah*, I, 7, 3, *paryesyanto bhavanti* XVII, 4, 8, *bhoksyamana(h) bhavanti, dhaksyanto (bhavanti)*, XVIII, 24, 14, 15, the gerundives *prayaniyah, udayaniyah*, XVIII, 24, 2, *karyam*, XVII, 6, 2, *deyam*, XVIII, 24 32, the gerunds in *am*, *punarādayam*, XVIII, 4, 3, 4, 5 3, 4, *kakupkaram*, XVIII, 4, 3, 4, 5, 3, 4, *panktisamsam*, XVIII 6, 4, 14, 4, 17, 5, *gayatriśamsam*, XVIII, 16, 1, and the late simple form *śamsam*, XVIII, 16, 2 Of the uses of the optative that in clauses of purpose with *na* is very frequent, in XVII, 10, 8, *yadi syat mimite*, it is purely indefinite, in *yadi na vidyeta ya etam dhiyam kuryat sa etat kuryat*, XVII, 5, 4, the second optative is one of characteristic 'one who can do' In XVIII, 24, 15, *yadi dhaksyanto (bhavanti) syat* the protasis is future in fact and the apodosis is equivalent to a mild future In XVIII, 23, 4, *yadi yajñayajñiyam kuryus tasyoktau stotriyanurupau*, the real apodosis is suppressed Of particles may be noticed the use of *api va*, XVIII, 3, 4, and of *yady u vai*, XVIII, 7, 17, 23, 5 It may be noted as a sign of more recent date that very few particles occur, *ha* only in XVII, 13, 8, *u ha* in XVIII, 2, 3, 5 In XVII, 9, 7, XVIII, 22 10, is found the remarkable phrase *iti nv a u Marutvatiyam, Vaiśvavedam*, in XVII, 1, 5, *athapi*, in XVIII, 20, 6, *atho*

The results arrived at may be supported by a comparison with a work of date somewhat later than the Āranyaka V, the Brhaddevatā, which shows a style much more modern, even despite poetic licences than the Āranyaka I–III, but which is still in vocabulary an archaic work, coeval in date with the early epic An interesting list of its irregularities is given by Prof Macdonell,[1] but they are rather of the epic type, e g use of *°ya* for *°tva* in the gerund, nominative for accusative, unaugmented pasts, &c It is significant that (1) no genitives or ablatives for *a, i, ū,* stems in *ai* occur, (2) there are no subjunctive forms other than first person forms, (3) the infinitive in *°tum* is common and no other form is found, while in VI, 37, even *śaptukamah* occurs Significant also is the use of the narrative tenses The aorist occurs only in the later narrative use and is rare, being formed only from the roots *ga, bhu, vac, vadh* The perfect surpasses the imperfect in frequency as a narrative tense, for in some 340 lines of narrative[2] there occur 202 perfects to 150 imperfects, and the proportion elsewhere is not materially different. Further, the periphrastic perfect with *asa* is frequent *kamayam asa*, VI 76, *utsadayam asa* VII, 53, *śikṣayam asa*, III, 84, *bodhayam asa* VI, 37, *varayam āsa*, VI 38, *chandayam asuh*, VII, 157, *prasadayam asa*, VIII, 3, *kirtayām asa*, VI, 24, *prastapayam āsa* VI, 13, *darśayam asa*, V, 63, while the use of *kr* is very rare, *upamantrayam cakre* V, 20 Further, the past participles passive are freely used to denote action either past or present in place of finite verbs and use is made of the new participial form in *vat*, *krtavat* occurring in VI 41, VII, 58, VIII, 18, *drstavan*, V, 58, *drstavan*, VIII, 33, *prsta van*, V, 71, *labdhavān*, V, 66, *hatavān*, VI, 152 &c. Prefixes are not separated from the verbs with which they are connected Particles are much restricted in number, and combinations are limited. Mention may also be made of the great development in grammatical doctrine seen not only in the discussion in I as to nouns, &c., and in II, 93 as to particles, but in the use of such forms as *āvi* locative of *au* the case termination, *ayoh* from *e*, the sign of the dual *vdi* the root *id*, and so on Indeed it is hard to resist the conclusion that the bulk of the Aranyaka I–III must lie before the more systematic treatment of grammatical questions in Yaska's Nirukta, and a new support is derived for the giving an early date to these books, since Yāska cannot well be later than 500 B C

---

[1] *Brhaddevatā*, I, xxxii

[2] See the fourth Index to Prof Macdonell's *Brhaddevatā*

It has been noted that **Book III** presupposes the Padapātha of the Ṛgveda[1] and also the Kramapātha It is therefore later than **Śākalya**, the author of the Padapātha This, however, leaves the date undetermined, since Śākalya's date is still uncertain Geldner[2] has recently argued that he dates from the later Vājasaneya period, and not as supposed by Oldenberg from the end of the Brāhmana period, and that he was a contemporary of the Aruni and Yājñavalkya known from the Brāhmanas But it is extremely hard to reconcile this with the facts that the Padapātha presupposes the Samhitā, that the Samhitā exhibits a text which cannot be reconciled with the statements of the Brāhmana texts[3] as to the number of syllables in word groups, in consequence of the Sandhi carried out in the Samhitā The evidence, therefore, is certainly in favour of Oldenberg's hypothesis, but it leaves the lower date of Śākalya vague He is, however, cited by Yāska and older than Śaunaka, so that in all probability he must date not later than 600 B C The Āranyaka III need not be much later than Śākalya, and if it is, as seems most probable, earlier than Yaska, it may be dated from about 600–550 B C It may be added that it must be older than the Taittirīya Upanisad and the Sānkhāyana Aranyaka, VII, VIII (see note on III, 1, 2)

These **chronological results** are admittedly uncertain They are based on the views that (1) the Aranyaka I–III is older than Buddhism by reason of the undeveloped character of its philosophic content, (2) that these books are older than the Bṛhaddevatā and Śaunaka, who may be dated about 450–400 B C, and probably older than Yaska, who can hardly be brought down lower than 550–500 B C, (3) that they are older than the developed systems of philosophy whose beginnings are at any rate known to Apastamba, whom Buhler dates in the fourth or fifth centuries B C, and who cannot well, on any view, be later than 300 B C, and that they are older than the Atharvaśiras Upanisad, known, it seems, to Gautama, who is older than Apastamba by some generations, *(4) that they are older* than Pānini, Katyayana, and Patañjali, who cannot well be dated later than 300, 200, and 100 B C respectively, (5) that

[1] Oldenberg, *Prolegomena*, p 380

[2] *Vedische Studien* III, 144 146 See Scheftelowitz, *Die Apokryphen des Ṛgveda*, pp 4, 5, who also supports this view, Wackernagel, *Altindische Grammatik*, I, lxv, n 7

[3] Cf Macdonell, *Sanskrit Literature*, pp 49, 50, and note on III, 1, 2

Books I and II date from the later Brahmana[1] period but are probably older than the Satapatha Brāhmana, parts of the Jaiminiya Brāhmana and Upanisad, the Gopatha Brahmana, and the Chandogya Upanisad, and so belong to a comparatively early date.

The **verses and sentences** quoted contain, despite their brevity, a remarkable set of old forms The Slokas in II, 3, 8, and the prose directions in Āranyaka V, are more properly treated as above as part of the main work, with which the latter no doubt coincide in time, while the former are not very much older Of these forms may be mentioned *tanum, tanvam* (loc) but *tanvah* (gen) in I, 3, 5, *sarvasyai* (gen) in the verse in III, 2, 5, which is a sign of more recent origin, the compounds *Vdrunaiayvitamam, prthivyupardm, brahmandbhartrkam, varṣdpavitram*, V, 3 2, the forms *arajah* (?), *tujah, ati vṛdhah, rántyam, vdnam* (?), *ddhrṣah*, in V, 2, 1 Among verbal forms are the third person singulars *ise, vide*, IV, 1, the first person *stusé*, IV, 1 The curious forms *rñjdse, sdmnyase, bhuvah*, IV, 1, *duham*, V, 3, 2, the subjunctives *dmśamsisah, parśat*, IV, 1, *jijosat*, V, 2, 2, *vibhajatha*, V, 1, 1, the injunctives *vidāh* (?), IV, 1, *spṛśat* (?) V, 2, 2, *kartana*, V, 2 2, and perhaps *āvit*, V, 1, 1, the precatives, *apyāsam*, V, 3, 2, *bhujāsam*, V, 1, 1 Of noun constructions may be noted, *jaja somanam*, V, 3 2, *svar yajñam vakṣyantim*, V, 1, 5, *vasañ ann*, IV, 1, *prati vam ṛjisi*, V, 2, 1 In V, 2 2, *kartana* seems used instead of a dual, in IV, 1, *bratavahas* needs explanation In V, 1, 1 occur *antarikṣam svāndpyam bhujāsam*, &c, where the predicate adjective follows the gender and number of the nearest noun the object of comparison The uses of *sivam* in that passage, of *maricayah*, and of *indh* and *sdmajah* in V, 2, 1, are all unusual The question of the date of the verses in IV, 1, has been dealt with in the note on that passage, and cf *J R A S*, 1907, pp 224 sq, Oldenberg *Gott Gel Anz*, 1907, pp 215 sq

॥ इत्यैतरेयद्वितीयारण्यके षष्ठोऽध्यायः ॥[16]

॥ इति द्वितीयारण्यकम् ॥

This ends the second Āraṇyaka, but the majority of the MSS. of the text, and of Sāyaṇa's commentary, and of Ānandatīrtha's own commentary, and his *ṭīkā*, add a seventh Adhyāya, which is:—

ADHYĀYA 7.

वाङ्मे मनसि प्रतिष्ठिता मनो मे वाचि प्रतिष्ठितमाविरावीर्म[1] एधि वेदस्य म आणी स्थः श्रुतं मे मा प्रहासीर[2]नेनाधीतेनाहोरात्रान्संदधाम्यृतं वदिष्यामि सत्यं वदिष्यामि[3] तन्मामवतु तद्वक्तारमवत्ववतु मामवतु वक्तारमवतु वक्तारम् ॥

॥ इत्यैतरेयद्वितीयारण्यके सप्तमोऽध्यायः ॥[5]

---

[15] इति पञ्चमः खण्डः ॥५॥ T, U, MSS. of Saṅkara; numbered 25 in A, E, H, K, L, not numbered in D, F, G, 5 in N [16] Text, R; इति द्वितीयारण्यके षष्ठोऽध्यायः ॥६॥ A, इति द्वितीयारण्यके षष्ठोऽध्यायः L, इति द्वितीय आरण्ये षष्ठोऽध्यायः K; द्वितीयारण्यके षष्ठोऽध्यायः F, G, इति षष्ठोऽध्यायः D, M; no colophon in E, N; इति ऐतरेये द्वितीये आरण्यके षष्ठोऽध्यायः। उपनिषत्सु तृतीयोऽध्यायः। ओं तत्सत्। T. L adds द्वितीयारण्यकं समाप्तं। Pūjārāma's ed. begins इत्यैतरेयारण्यके, and then as T

[1] ॰विरावीर्म॰ K, see on I, 1, 1, in the Sāntimantra, Eggeling, *India Office Catal.*, p. 117. [2] प्रहासीद् T, and Scheftelowitz, *Die Apokryphen des Ṛgveda* [3] वादृष्या A here. [4] ॰मा३म् D [5] This occurs in A, D, E, F, G, H, I, K, M, N, O, Q, R, S, T, U. In P, however, it is placed at the beginning of the Upanishad, and in S at the end of Āraṇyaka V, and see also note on I, 1, 1. It does not occur in most MSS. of

Saṅkara's commentary, and it is omitted even in L, which is a complete MS of all the text. It appears clearly not to have been known to Saṅkara It is, however, known to Ānandatīrtha *in his own commentary* in the MSS, H and O *In the* edition, U, of Ānandatīrtha's commentary on Saṅkara, it is said: सप्तखण्डस्य भाष्यं स्पष्टत्वादात्मतत्त्वाप्रतिपादनाच्च श्रीमच्छङ्कराचार्यैर्न कृतमित्येतट्टीकाया एव ज्ञायते । सा तु टीका दीपिकातोऽभिन्नैवेति ह्यस्माच्च न संगृहीता । M, N, Q, and apparently Max Muller's MS., *S B E*, I, 246, n 2, have एवं षष्ठेऽध्याये तत्त्वविद्यां परिसमाप्य सप्तमे (so N, Q. सप्तमे श्रीमत्परिव्राजकाचार्ये add M) शान्तिकरो मन्त्रः पठितः वाङ्मे मनसीत्यादि । तस्य स्पष्टार्थत्वादात्मतत्त्वाप्रतिपादकत्वाच्च भाष्यकारैर्न व्याख्यातः । स मन्दानां बोधाय दीपिकाकारोक्तरीत्या व्याख्यायते । यथोक्त° *&c*, exactly as in Sāyana's commentary. The end is इति श्रीसप्तमाध्यायस्य दीपिका संपूर्णा M, इति सप्तमाध्यायदीपिका समाप्ता *N* The question arises whether this wholesale borrowing was due to Ānandatīrtha or not On the whole the evidence is against the view that it was (1) It compels us to date Ānandatīrtha after Sāyana, which is (*a*) contradictory to the accepted dates of either writer, and (*b*) cannot be reconciled with the fact that *Sāyana sometimes follows Ānandatīrtha closely in his commentary*, cf on II, 4, 3 (2) It is of course clear from the consensus of MS evidence that the explanation of the last section was added at a comparatively early date to Ānandatīrtha's commentary, but this could easily have happened, and as a matter of fact the alteration needed to introduce the extract was very slight, as Sāyana begins षष्ठे तत्त्वविद्यां परिसमाप्य सप्तमे शान्तिकरं मन्त्रं पठति । वाङ्मे मनसीति । The addition was very natural, since the fact that the Adhyāya is recognized by Ānandatīrtha in his own commentary shows that it had already in his time become a recognized part of the Āraṇyaka In Jones' MS (Tawney and Thomas *Catalogue of Two Collections of Sanskrit MSS*, p 2) we have the commentary of Saṅkara without the *ṭīkā*, followed by 'Mādhava's' commentary as in the edition After II, 7, E continues हरिः ओं । अथातस्संहिताया उपनिषत् । वाङ्मे मनसि प्रतिष्ठिता । कोऽयमात्मेति वयमुपास्महे । पुरुषे ह वा अयमादितो गर्भो भवति । स ईक्षतेमे नु लोकाय लोकपालाय । ता एता देवतास्सृष्टाः । आत्मा वा इदमेक एवाग्र आसीत् । तस्यैते श्लोकाः । तद्वा इद बृहतीसहस्रं संपन्नं तद्यस्य इन्द्रः । तद्वा इद बृहतीसहस्रं संपन्नं तस्य वा एतस्य । तद्वा इद बृहतीसहस्र संपन्न तद्वैतद्देके । यो ह वै यज्ञो यज्ञ वेद । स एष पुरुषस्समुद्रः । तस्य य आत्मानमाविष्करां वेद । यो ह वा आत्मानं पञ्चविधमुक्थं वेद । तद्वा इदं बृहतीसहस्रं संपन्नं तस्य यानि व्यञ्जनानि । विश्वामित्रं ह्येतदहश्शंसिष्यन्तम् । एष च एष विभ्राजः । एष इदं लोकमभ्यार्चत् । आपाः इति आप इति । अथातो

[1] Accents do not appear in A D, F, G K, L, S But the accents are undoubtedly old and the fact that the other verses cited in the book are not usually accented is not in point, since these are non Rgvedic verses • Similarly in Āraṇyaka V the non-Rgvedic verses are all accented The motive is obvious, that the repeaters of the text should have guidance in repeating verses not from their own Saṃhitā

[2] आविष् A, in R आ॒भिष्ट्म.

---

[10] शस्यत F [11] यो om. L [12] After ह्यग्ना F has इन्द्र । एवा ह्येवैव ह्री३ एवा ह्येवैवा हि विष्णा३उ, G has इन्द्र । एवा ह्येवैवा ह्यग्ना इन्द्र । एवा ह्येवैवा हि विष्णा३उ,' R has `हीन्द्रम् and so A, E, K, L, S has ही३न्द्रम्, D only has हीन्द्रा३ which must clearly be right [13] पूषन् A, D, E, F, G, K, पूष३न् S
[14] देवाः A, D, E, F, G, K, R. [15] वशाँ D, F, G K, L R, S A and E have the *pluta* which is more likely to have been wrongly omitted than to have been inserted
[16] विश्वध G. [17] विदोम् D [18] इत्यैतरेयचतुर्थारण्यके प्रथमोऽध्यायः । इति चतुर्थारण्यकं समाप्तम् । A; प्रथमोऽध्यायः । इति चतुर्थारण्यः । D, विदा मघवन्नेका । हरिः ओम् । इति चतुर्थारण्यं समाप्तम् । E, चतुर्थारण्यकं समाप्तम् । F, चतुर्थारण्यकं सं (पूर्णम् in later hand), G, इति चतुर्थारण्ये प्रथमोऽध्यायः । समाप्तम् । K, इति चतुर्थारण्यकं समाप्तम् । L.

These verses occur also in the Kashmir MS of the Ṛgvedic Khilas (=K), which (V, 4) contains Āraṇyaka IV, in Sāmaveda, Naigeyaśākhā, ed. Ajmere, 1901, p 48, in Sāmaveda, Āraṇyasaṃhitā, ed by Fortunatov, p 74, and in Peterson, *Second Report*, p 97 (=P) K reads in v. 1 मघन्, which saves the metre, in vv 3, 4, यच्चिन् before चक्रसे, treating ऋ as equivalent to रि, in v. 4 K, P, SV read राये, probably a mere correction for the difficult रायः, in v 5 SV. has सुहि ईप, SV Ār सुहि ईपे, in vv 6 and 7 SV. has स्वर्यद्दु for पर्यद्दु, in v 7 द्विषः for त्रिधः, in v 8 अद्रिवोऽसुर्मदाय सुम्न. In v 8 K, P have शुर्लत, and SV पयो for ईपे. In v 9 K, P have मन्यसे, an obvious correction, see my note, *J. R A S*, 1907, p 224, SV. has चोयेंपु and चदयुः The second पुरीषपद is put third in K, the third is omitted in P and SV, and the last six in SV. In the second last K, P read विश्वथ The variants of the SV. appear all to be in the nature of attempted corrections, and the Aitareya seems to have possessed the oldest form of the words known to us, though it cannot obviously be the original *form* as Oldenberg points out.

With regard to the accents, in v 2 °हम् is unaccented in K and P as in R, R has सु दृर्ष. In v 3 पिब is unaccented in K, which is most probably wrong In v 5 both K and R have चिकित्वो, P °कित्वों, while K has नयं, and R has सुपे In v 9 K has गच्छति, which cannot well be correct, and चदुयाः, also unaccented In the पुरीषपदानि R has एवा, which cannot be accepted, while K has हि unaccented, which is inconsistent K has also no *pluti* in the case of हीन्द्र । हि पूषन् । and हि देवाः । It accents *eṣā3i* | *evṣā3u* | of which one or both must be wrong, and it twice has एवैवा. It has आयौं मन्यार्य । The accentuation of the first five पुरीषपदानि is *very remarkable, and can only be explained by taking* हि *as unaccented* both when combined and when alone, and by holding that the second एवा in एवैवा is unaccented

In the Ajmere ed of the Mahānāmnis the पुरीषपदानि appear as एवा होऽ३ऽ३ऽ३व
३ १ २ २ १ २ ३१र १र ३१र १र
एवा ह्यग्ने एवाहीन्द्र । एवा हि पूषन् एवा हि देवाः । In P they are very corrupt

[7] चमासं F. [8] °तनमासीनो S. [9] °मानोभद्रियं G

[10] Numbered 13 in A, E, K, L; 2, 13 in F, G; 2 in D

E omits accents, and K has the accents in many cases obviously wrong. In the case of the double accent of compounds, some of these may be correct; similar instances—some clearly wrong—occur, however, in the Kashmir MS of the Khilas of the Ṛgveda, as Scheftelowitz (p. 39) points out. The chief cases are, v. 1, वाचो॑, हृ॒दय॑स्य॒ सर्वं॑; v. 2, इन्द्रः॑ क॒र्मार्चि॒तमृ॑तं, वाचो॒; v. 3, स॒र्वं, पिन्वति॑, वाक्प्रभू॒तं॒, हृदये॒यं, ब्रा॒ह्मणभर्तृ॒कं; v. 4, वर्षप॒वित्रं॒, पृथिव्युप॒रं॒, तप॒स्तन्विन्द्रज्येष्ठ, °म॒युता॒चरम्; v. 6, वेदानां॒ सहजे॒, तेना॒हं विश्व॒माप्यासं स॒र्वान्का॒मान्दुहां; v. 7, स्व॒स् and ब्रह्म॒वर्चसं॒. वि॒शं मे॑ and य॒शो मे॑ are conceivable but improbable.

[7] At the end of the Āraṇyaka S adds a second set of Śānti Mantras, see on I, 1, 1 Similarly in the Ānandāśrama edition, 1895, of thirty two Upaniṣads there is prefixed to the Kauṣītaki Upaniṣad, and also appended to it, a set of Śānti Mantras, similar to those in Aitareya Āraṇyaka, II, 7, and Sāṅkhāyana Āraṇyaka, VII, 1.

AITAREYA ĀRAṆYAKA

TRANSLATION AND NOTES

ĀRAṆYAKA I

Adhyāya 1.

Now begins the Mahāvrata[1] rite. Indra having slain Vrtra became great. When he became great, then there came into being the Mahāvrata. Therefore the Mahāvrata ceremony bears the name of Mahāvrata. Some[2] say the priest should make two recitations with the ghee-offering for that day, but the established rule is one. He who desires prosperity should use the hymn, 'To Agni, to this god of yours, (I sing aloud)' (RV., III, 13) He who desires increase should use the hymn, 'The guest of all your folk' (RV, VIII, 74). For the folk indeed are increase and therefore he gains increase.[3] *Some say that one should not use that* hymn because there is in it the word 'guest', and a guest is liable to go begging.[1] But (Mahidāsa[2]) said that one should use that hymn. For he who becomes good and attains excellence,[3] is indeed a guest. For, him who is not so, men do not deem worthy of hospitality. Therefore one may by all means use that hymn. If he does use it, he should place first the tristich 'To him, best Vṛtra slayer, are we come' (RV, VIII, 74, 4-6). For eager for this day they worship the whole year, and now they draw nigh to it The next three tristichs[7] begin with *anuṣṭubh* verses. Now the *gāyatrī* verse is *brahman*,[8] the *anuṣṭubh* is Vac, and so he unites Vāc and *brahman* He who desires glory should use the hymn, 'Agni is aroused by the fuel of the folk' (RV., V, 1). He who desires children[9] and cattle should use the hymn,[10] 'The wise sacrificer has been born' (RV., II, 5)[11]

---

[1] The term *mahāvrata* is, Sāyana points out, explained by the Taittirīya school in three ways, either *mahān bhavaty anena vratena* or *mahato devasya vratam* or *mahac ca tad vratam*. The Chandogas give the latter two explanations. See Taittirīya Brāhmana, I, 2, 6, 1, and Sāyana, ad loc For the whole, cf. Aitareya Brāhmana, III, 21, 1; Taittirīya Saṃhitā, VI, 5, 5, 3; Śatapatha Brāhmana, X, 4, 1, 21, 22; *Pet. Lex*, s.v.

[2] The two Ājyas recommended are RV, VIII, 74 and VII, 1; the reference is to the view of the Śāṅkhāyana Āranyaka, I, 2. The former is the *prākrta* because it is an Ājya Śastra in the Agnistoma, the latter the *vaikrta* because it is an Ājya Śastra in the Viśvajit (see Kausītaki Brāhmana, XXV, 11) The Aitareya holds that only the *vaikrta*, VII, 1, should be employed, according to Sāyana because the Agnistoma which is the *prākrta* has twelve Śastras, and if there were two Ājya Śastras the Mahāvrata would have thirteen VII, 1, which is the Ājya Śastra, is also at the same time a *kāmya ājyaśastra* used by those who desire proper food (see I, 1, 2)

[3] This is the rendering adopted by Max Müller from Sāyana, who explains that Vaiśyas making large earnings offer much taxation (*karam api bahulaṃ prayacchanti*, which Max Müller takes as 'increase their capital', but this is in view of *prayacchanti* (Sāyana on Aitareya Brāhmana, VII, 29) hardly possible) Perhaps it would be possible to translate 'For he (Agni) is the increase of the folk and so he (the sacrificer) becomes prosperous,' but it is probable that the commentator has preserved the correct rendering, though of course in the original the *viśo viśo* is in the genitive. For taxation, cf Fick, *Die sociale Gliederung*, pp 79, 80; Rhys Davids, *Buddhist India*, p 48; Āpastamba Dharma Sūtra, II, 10, 26, 9, &c Already in the RV., I, 65, 7 (see Oldenberg, *S B E.*, XLVI, 56, and Pischel, *Vedische Studien*, I, xvi) the king devours the rich. In a series of passages (XI, 5, 7, 1; XIII, 5, 4, 24; XIII, 1, 5, 4; V, 4, 2, 3) in the Śatapatha Brāhmana, cited by Winternitz (*Gesch. der indisch. Litt*, I, 173, 174) the king receives the people, save only the Brahmins, as his food, because they pay him taxes. So often in the epic the exactions of kings are mentioned, cf Hopkins, *India Old and New*, pp 240, 243, n. 3; Keith, *Śāṅkhāyana Āranyaka*, p 68.

---

[1] Sāyana renders 'He who uses that hymn becoming poor has to go begging in other people's houses', which is clearly wrong. For the construction (II, 3, 5) cf. Delbrück, *Altindische Syntax*, pp. 420 sq.; Speyer, *Vedische und Sanskrit-Syntax*, § 217; Whitney, *Sanskrit Grammar*, § 984. The word *īśvara* in this sense becomes sometimes stereotyped in form, cf. Taittirīya Saṃhitā, III, 1, 3, 3 (cited by Weber, *Ind. Stud.*, XIII, 112) with Kāṭhaka Saṃhitā, XII, 5, 8. It is a construction peculiarly common in the Brahmanas and disappears later.

It will be seen that in the text throughout *paśūṃ bharati* and so forth have been printed, *m* being in every case when final, save at the end of a sentence, altered to *anusvāra*, and further in all cases where *m* occurs at the end of the first member of a compound (e.g. *saṃ°*) ṃ is used. It is clear that, in a text of the Brahmana period, before mutes generally the appropriate nasal should be used, before *y l v* either *anusvāra* or those semivowels nasalized, and before *r ś ṣ s h* *anusvāra*, with *m* in pausā (see Whitney, *Sanskrit Grammar*, §§ 212, 213; Wackernagel, *Altindische Grammatik*, I, 333, 334; Macdonell, *Vedic Grammar*, pp. 63, 65); but this course merely adds to the unnecessary difficulties of the Devanāgarī script (the continual use of which is an unfortunate necessity), and I have followed most editors, including Prof. Macdonell in his *Bṛhaddevatā*, in using *anusvāra* before mutes, semivowels and sibilants, as allowed by Pāṇini, VIII, 4, 59, and approved by Whitney, §§ 71, 73. The practice of writing *m* before labials while using *anusvāra* before the other mutes is convenient but illogical, and has not been followed. I have also written *ch* for *cch* of the MSS. (with many exceptions) except where *cch* represents an assimilated letter *t + ch*. It is no doubt the case that *ch* in Sanskrit is rarely, if ever (Wackernagel, *Altindische Grammatik*, I, 155, allows *puccha* as representing *ṣk*, but Dr. Scheftelowitz rejects the view), a representation of any save a conjunct consonant in Indo-Germanic (either *s + ḱ*, or (as Dr. Scheftelowitz in his forthcoming *Zur Stammbildung der indo-germanischen Sprachen* tries to prove) *s + k* normally). But there is no proof that *cch* represents this more properly than *ch* (the fact of position is of no importance), and the use of *cch* for the simple letter prevents any distinction between e.g. *t + ch* and *ch* alone. For this reason I follow Aufrecht (in his *Aitareya*), Bloomfield, v. Schroeder, Knauer (see his *Mānava Gṛhya Sūtra*, pp. xxx, xxxv, with all his MSS.), Macdonell and others in writing *ch* for the simple letter. [illegible] Whitney's and Lanman's use (in the *Translation of the Atharvaveda*) of *ch* even for *t + ch* (for *cch*) is the opposite extreme (cf. Prof. Macdonell, *J. R. A. S.*, 1907, p. 1105).

[2] The text has only 'He said'. Sāyana explains by [illegible]. Clearly it must be Mahidāsa Aitareya. Cf. II, 3, 1, n. 4; III, 2, 6, n. 13.

[3] It is not obvious how *atithi* is thus interpreted. Sāyana interprets *bhavati* as [illegible]. Max Müller says one would expect *yo bhavati* [illegible] (cf. Macdonell, *Vedic Grammar*, p. 126; but see Hopkins, *A. J. P.*, XIV, 22) and suggests that the obtaining of [illegible] is probably derived from *as* above in *atithi*. Another explanation seems possible: *bhū* in the Brahmanas has in composition the sense 'obtain' (cf. Sāyana's rendering —*bhū* [illegible] *prāpnoti*—of Aitareya Brāhmaṇa, III, 23, 3), *vid* according to the lexicographers has the same sense, so that here *yo vai bhavati* is perhaps explained by *yaḥ śreṣṭhatām aśnute*. *Bhūman* below is already found in Mantra, cf. Delbrück, *Altindische Syntax*, pp. 184 sq. For the duty of hospitality cf. Taittirīya Upaniṣad, III, 10.

---

[7] The Śaṅkhāyana Āraṇyaka, I, 2, ignores vv 13–15 of RV, VIII, 74, which form a *dāna stuti* of Śrutarvan Ārkṣya. The reference here shows clearly that the Aitareya takes the same view of these verses Verses 8, 9, 11, 12 are in *gāyatrī*, 14, 15 in *anuṣṭubh* ?

[8] Sāyaṇa gives as reasons for these identifications that the *parabrahma* is set forth by means of the *gāyatrī* (RV, III, 62, 10), and that, like the *anuṣṭubh*, Vāc has four forms (RV, I, 164, 45, Nirukta, XIII, 9, &c. *Z D M G*, XXXIX, 58), (*parā paśyantī madhyamā vaikharī* later, see *J. A O S*, XXII, 69, Mallinātha on Kumārasambhava, II, 17) There is no reason to suppose that the identification of Vāc and *anuṣṭubh* and *gāyatrī* and *brahman* has any basis beyond mere fancy, for different identifications, cf *J. A. O. S.*, XVI, 139 The original sense of *brahman* (so throughout to contrast with Brahman, the god) must clearly have been prayer or spell (cf II, 3, 8), the two ideas blending indefinitely since the prayer could be regarded as a spell and vice versa (Oldenberg, *Religion des Veda*, p 315) Deussen's view of *brahman* (*Allg Gesch der Phil*, I, 1, 241 sq) as 'der zum Heiligen, Göttlichen emporstrebende Wille des Menschen' is quite untenable, see Winternitz, *Gesch der indisch Litt*, I, 211, 212 That Vac is *brahman* was the doctrine of Jitvan Śailini and it is set forth by Yājñavalkya, Bṛhadāraṇyaka Upaniṣad, IV, 1, 2, and the identification is developed in the late Logos doctrine Cf also Tāṇḍya Mahābrāhmaṇa, XX, 14, 2, Chāndogya Upaniṣad, VII, 2, 1, Hopkins, *India Old and New* p 147, n 1, with whose view of the slight importance of the Logos doctrine in this form I agree

[9] Sāyaṇa concludes his commentary on this Khaṇḍa by explaining that, though by the *godohananyāya* (cf for another *nyāya* on this, Mīmāṃsā Sūtra, IV, 3, 10) the *kāmyasūktas* are intended primarily for the gaining of desired results, nevertheless they make up the sacrifice and do not leave it imperfect, on the principle *kāmyena nityasiddhiḥ* This *nyāya* arises, he explains, from the rule on the new and full moon sacrifice *camasenāpaḥ praṇayed godohanena paśukāmasya*, where as the sacrifice can be carried out *camasena* the *godohanena* is merely *puruṣārthatvam* (see Jacob, *Maxims*, 3rd series)

[10] In the references in the translation to the RV, where no line is mentioned, it is to be understood that the whole hymn as accepted by the Āraṇyaka is meant When only special verses are meant their numbers are given

[11] For the Śānti verses and their authenticity see Crit Note The verse in S *taladharam* is RV, III, 26, 9, *atadams*, II, 43, 3, *tvam Agne*, VIII, 11, 1, *bhadram*, X, 20, 1, *śaṃ no Mitraḥ*, I, 90, 9 *śivā* occurs in Taittirīya Āraṇyaka, I, 1, cf I 21, 31, as *śivā naḥ śantamā bhavantu | divyā āpa oṣadhayaḥ | sumṛḍīkā Sarasvati* (so accented in the Ānandāśrama ed), and as here in that Āraṇyaka, IV, 42, Lāṭyāyana Śrauta Sūtra, V 3, 2 (with *v l saṃdaśas*) The Atharvaveda, VII, 68, 3, has in the last *pada*, *mā te yuyoma saṃdṛśas* 'may we not be separated from thy sight', which explains the origin of the quite unintelligible *vyoma* * The verse *tac cakṣur* occurs also in Taittirīya Āraṇyaka, IV, 42 where will be found RV, IV, 31, 1–3 For *esthapi*°, cf III, 2, 5, n

In the Śāṅkhāyana Gṛhya Sūtra, VI, 4 and 5, verses are given to accompany the recitation of the Saṃhitās (Śāṅkhāyana Āraṇyaka, VII, VIII), and the formulae are placed at the beginning

---

* Cf also v Schroeder, *Die Tübinger Kaṭha Handschriften*, p 115, and the Śānti prefixed to the Kauṣītaki Upaniṣad in the Ānandāśrama ed

2 He who desires proper food[1] should use the hymn, 'Agni men kindle from the twigs with splendour' (RV, VII, 1)[2] For Agni is the eater of food In the other chants accompanying the ghee offerings men approach as it were more slowly to Agni, but here they come upon Agni at the very beginning, at the very beginning he[3] obtains proper food, at the very beginning they smite away

---

of the text in the Āraṇyaka thus *ṛtam vadiṣyāmi satyam vadiṣyāmi | adabdham mana iṣiram cakṣuḥ | sūryo jyotiṣām śreṣṭho | dīkṣe mā mā hiṃsīḥ |* Other verses are prescribed to precede *adabdham*, &c., in the case of the Śakvarīs and of the Mahāvrata the Mantha (Śāṅkhāyana Āraṇyaka, IX), &c. In Khaṇḍa 5 are given the expiatory formulae *ud itaḥ śukriyam dadhe | tad aham ātmani dadhe |* and then other differing formulae (see Oldenberg's ed pp. 163 sq, and *S B E*, XXIX, 145 sq) Oldenberg renders *ud itaḥ*, &c., as 'From here I take out the brightness (?)', but I would much rather take *uditaḥ* (and the version in the Ānandāśrama ed., p. 295 accents *uditaḥ*) as 'He, arisen gives forth brightness. That (brightness) I appropriate to myself', referring to the beneficial and purifying effects of the radiance of the sun (cf Macdonell, *Vedic Mythology*, p. 31) Oldenberg also takes *sūryo*, &c., as predicate to *adabdham*, &c., which is hardly necessary The phrase *sarvaḥ*, &c, probably means 'I arise whole (possibly with a suggestion of *sarvas* i e complete, perfect healthy) with breath, with strength, may prosperity attend me, may the gods attend me.' The assertion *adabdham*, may be based on the magic principle exhibited in faith cures. The other clauses offer no difficulty, but *bhūmim*, &c. is obscure *iḍā* (unaccented in R) may be nom. to *upaspṛśed*, *namaḥ* being interjected, but this is very unlikely, as *agne iḍā* occurs alone (see Crit Note) It may be, 'Honour (to thee), O Agni, and oblation, but this is merely possible

In the Mānava Śrauta Sūtra, II, 2, 2, 36 (cited by Bloomfield, *Vedic Concordance* pp 40ᵃ, 454ᵇ) occurs *adabdham cakṣur ariṣṭam manaḥ sūryo jyotiṣām śreṣṭhaḥ dīkṣe mā mā hāsīḥ satapa*, which illustrates the position here of *cakṣuḥ* In Taittirīya Saṃhitā, III 1, 1, 2 *dīkṣe mā mā hāsīḥ* occurs The exact words used here are found in Śāṅkhāyana Āraṇyaka, VII, 2, IX, 1

[1] Sāyaṇa explains *annādya* as a compound of *anna* and *ādya* Max Müller follows this view, cf Monier Williams *Dict* s.v *ādya* But it is surely preferable all through to take it as an abstract of *annāda*, an eater of food, with the sense 'eating of food' which passes into the idea 'food', or 'proper food', as *annāda* has the force of 'a healthy man' For the formation see Whitney *Sanskrit Grammar*, § 1212 Oertel on Jaiminīya Upaniṣad Brāhmaṇa, II, 11, 10, renders 'food eating'

[2] Sāyaṇa points out that the hymn is both a *nitya* and a *kāmya* hymn It is hardly correct to say, as Max Müller does that it is an obligatory part of the sacrifice, since as we have seen in I 1, 1, the *kāmyasūktāni* are sufficient to complete the ceremony What Sāyaṇa means is that it is both the normal form and also a form for a special purpose. He compares the use of *dadhi* in the Agnihotra both as normal and where strength is desired, and the use of *khādira* in the Agnīṣomīyapaśu rite as normal and when might is wished The possible forms then are (1) this hymn as normal, (2) this hymn as *annādyakāma* (3) any of the other *kāmyasūktāni* enumerated in I, 1, 1 In RV, VII, 1, vv 1–18 are in *virāj* metre, the rest in *triṣṭubh*, which explains the reference to these metres below

[3] The distinction between 'he' and 'they' is no doubt deliberate 'He' corresponds to *annādyakāmaḥ* and 'they' to *āgacchanti* Sāyaṇa explains the singular by *yajamānasaṅghaḥ*, but this is unnecessary Max Müller renders 'he' in each case R reads *sadyaḥ*, which is a correction probably of his own, for the *samdyaḥ* of most of the MSS including $S^1S^2S^3$, but is of course most unfortunate *Iva* is almost equivalent to *eva*, cf. Delbrück, *Altindische*

evil Because of the words (RV., VII, 1, 1^b), 'with moving of the arms they bring to birth *Agni*,' the hymn has the word 'birth' in it *Verily the sacrificer* is born from this day, and so the hymn has the word 'birth' There are four verses (in the *triṣṭubh*), cattle are four-footed, the verses serve to win cattle. There are three verses (*in the virāj*), these are the threefold worlds, *the* verses serve to gain these worlds. These two verses form a support. Man has a double support, cattle have four feet The hymn places the sacrificer with his double support among the four footed cattle.[5] The verses if said straight on number twenty-five. Man consists of twenty-five elements He has ten fingers, ten toes, two legs, two arms, and the trunk is the twenty-fifth By this hymn he adorns the trunk, the twenty-fifth Further, this day (of the sacrifice) is twenty-five, the *stoma* hymn[6] of this day is twenty-five, like is brought about by like So the two are[7] twenty-five. By repeating the first thrice, and the last thrice, the verses

---

Syntax, p. 477; Speyer, *Vedische und Sanskrit Syntax*, § 230, and Scheftelowitz, *Die Apokryphen des Ṛgveda*, p 79 who calls this use late, hardly correctly Cf III, 2, 6, II 1, 2, 6, 1, Aufrecht, *Aitareya Brāhmaṇa*, p 430 I think that *iva* must originally—or at any rate quite early—have had a sense approaching more or less to *eva* Cf RV, I, 145, 2 *tám ít pṛchanti ná simó ví pṛchati svéneva dhíro mánasā yád ágrabhīt* The sense is hardly 'by his own mind alone', as Oldenberg (*S B E*, XLVI, 164) takes it The phrase is softened by *iva*, just as metaphorical phrases are softened by *quasi*, &c. in Latin (Berger, *Stylistique Latine* p 140) This sense appears clearly in III, 2, 6 *yugbrahmaṇam ivopadaharati* This avoids amendment to *eva* as proposed for the RV passage by Oldenberg So in RV, IV, 5, 8 *vár iva* See also Eggeling, *S B E*, XLIII, 375, n 3, on Śatapatha Brahmana, X, 5, 3, 1, 'Sayana seems to take "iva" here in the sense of "eva", as indeed it often has to be taken, especially in negative sentences.' The real sense is clearly seen in phrases like *prātarām iva kriyante*, Aitareya Brahmana, III, 48, 4 See also n. 5 on II, 1, 2 So in Bṛhadaranyaka Upaniṣad, IV, 2, 2, for the Kanva text *eva*, the Madhyandina has *iva* explained as *eva* by the commentator (Max Muller, *S B E*, XV, 159, n 3), ibid, III, 9, 28 5, for the Kanva *iva vai*, the Madhyandina has *u vai* (*S B. E*, XV, 150, n 5) This use is not found in independent passages of the Śankhayana Aranyaka, where in VIII, 10, *eva* takes the place of *iva* in Aitareya Āranyaka, III, 2, 6 Cf also Oldenberg, *Z D M G*, LXI, 824 sq

[4] Sayana is probably correct in taking *paṇayanta* in a timeless or present sense Cf Whitney, *Sanskrit Grammar*, § 930, Avery, *J A O S*, XI, 326–361

[5] The hymn has two metres and in one of these metres four feet, man has two and cattle four feet, and the union in the hymn produces union in reality *catuṣpatsu* occurs also in Aitareya Brahmana, VI, 2, 7, where the whole phrase occurs with °*padaḥ* For *catuṣpadaḥ paśavaḥ* cf Śatapatha Brahmana, XII, 2, 2, 20, and often in the Gopatha Brahmana The whole phrase is also identical with Aitareya Brahmana, III, 31, 13, &c

[6] For this see I, 1, 4, II, 3, 4, Śankhayana Aranyaka, I, 1 The reference is to the *pañcaviṃśa stoma* in the Pṛṣṭha Stotra corresponding to the Mahaduktha

[7] The plural is explained by Sayana as due to the *ṛcs* being thought of and not the hymn, but here the 'attraction' of the predicate is an adequate explanation, since such examples of carelessness are very rare Cf, however, RV, III, 6, 3, where Oldenberg (*S B E*, XLVI, 24, 6) refers *yajñíyāsaḥ* to Heaven and Earth, RV, II, 5, 6 (ibid, 204), RV, VII, 93, 7, *yát sīm ā́gaś cakṛmā́ tát sú mṛḷa tád aryamā́ditiḥ śiśrathantu* | where Agni and perhaps the other

become thirty less one, that is equivalent to a *viraj* verse minus one syllable For in the small (womb) seed is deposited,[8] in the small (heart) the vital spirits, in the small (stomach) food is placed So (the *viraj* small by one) serves for the obtainment of these desires He who knows this obtains those desires The verses include also the *bṛhatī* metre[9] and the *viraj* metre, and the perfection of that day They also include the *anuṣṭubh* metre,[10] for the chants accompanying the ghee offerings depend on *anuṣṭubhs*[11]

3 'The Praüga[1] should be in the *gāyatrī* metre,' some say,[2] 'for the *gāyatrī* is brightness and splendour and thus (the sacrificer) becomes bright and splendid.' Others say, 'The Praüga should be in the *uṣṇih* metre, for the *uṣṇih* is life

---

Adityas are in the mind of the poet Ibid, X, 85 47 (altered in Āśvalayana Gṛhya Sutra, I 8, 9), *hṛdayam* is used of a man and wife In Maitrayaṇiya Saṃhita, I, 5, 12, *sryavahas* is used of the gods cf *bravivahas* in IV, 1, *supra* Cf too the verse cited V, 2, 2 *ścam me Mitravaruna kartanelam* and Atharvaveda XIV, 1, 39, with Whitney's note Cf. Delbruck *Altindische Syntax*, p 102, Speijer, *Sanskrit-Syntax*, § 26 n, Oldenberg, *Z D M G*, XXXIX, 62, n 1

[8] See I, 3 7 where this recurs.

[9] The verses taken together make up eighteen *viraj* verses (it is not necessary to assume the repetition of the first *viraj* thrice as does Max Muller), and seven *triṣṭubh* verses Repeating thrice the last *triṣṭubh*, and taking away eight syllables from each verse, we reach nine *bṛhatī* verses plus nine sets of eight syllables which taken all together give two *bṛhatī* verses. Cf. Śankhayana Āranyaka, I, 2

[10] The first verse, though called *viraj* in the Anukramaṇī, is really a verse of thirty three syllables and by the doctrine that one or two syllables make no difference, it can easily be regarded as an *anuṣṭubh* of thirty two syllables The acc is due to the force of *abhi*, cf *jaṇitvám abhí sámbabhūtha*, RV, X 18 8 as explained by Whitney, *A J P*, XIII, 297 and Geldner *Vedische Studien* II 306 Later √*bhu* governs the acc., see Hopkins *Great Epic of India* pp 265, 473 For the exact sense of *abhi* cf *abhi samenniḷ*, Śatapatha Brahmana, X, 2, 4 1 with Eggeling's note, Aitareya Brahmana III 22 6 *virajam dahin na abhisampadye tam*, and elsewhere in the Brahmana and Sūtra literature

[11] Ājya here, as above must mean Ājya Śastra as Sayana takes it. The reference is to RV, III, 13 which is an *anuṣṭubh* hymn and is the Ājya Śastra of the Agniṣṭoma

[1] After the eating of the *ṛtugrahas* and the recitation of the Ājya Śastra comes the *Vaiśvadevagraha* and the Praüga In the *prakṛti* the Agniṣṭoma the Praüga consists of seven *tṛcas*, comprising RV I 2, and 3 ascribed to the poet Madhuchandas, so in Kaushitaki Brahmana, XV 5 The Aitareya Āraṇyaka keeps these *tṛcas* for the Praüga, in the Śaṅkhāyana there is used a set apparently of seven *tṛcas* (RV, VII, 91, 1-3 4-6, VII 61, 1-3, IV, 43 1-3, IV, 23 1-3, IV, 55 1-3 VII, 95, 4-6), in the *triṣṭubh* metre, ascribed to Vāmadeva *chatrumyayena* though only three are his (Govinda on Śāṅkhāyana Śrauta Sūtra XVII 8, 10) The series of deities, Vāyu, Indra Vāyu Mitra Varuna Aśvinau Indra, Viśvedevaḥ Sarasvatī is the same as in the original *tṛcas* of RV, I 2, 3 There can be no doubt that the Śāṅkhāyana version is the later The order of the *grahas* is different in Kātyāyana Śrauta Sutra, IX, 13, 33 For the metres and their relation to the *savanas* see Bergaigne *Journal Asiatique*, XIII, 166 sq, Bloomfield *J A O S.*, XVI, 4 sq, Oldenberg *S B E*, XLVI, 301

[2] The *triṣṭubha* Praüga is preferred in the Śāṅkhayana, but nothing is there said as to the reason here given, while arguments for the *gayatra* are there mentioned, which here are not used This adds another reason for regarding the Śāṅkhāyana as the later version

and so (the sacrificer) wins life[2] Others say, 'The Praüga should be in the *anuṣṭubh* metre, for the *anuṣṭubh* is valour, and so it serves to obtain valour' Others say, 'The Praüga should be in the *bṛhatī*, for the *bṛhatī* is prosperity, and so (the sacrificer) becomes prosperous' Others say, 'The Praüga should be in the *paṅkti* metre, for the *paṅkti* is food and so (the sacrificer) wins food' Others say, 'The Praüga should be in the *triṣṭubh* metre, for the *triṣṭubh* is strength and so (the sacrificer) becomes strong' Others say, 'The Praüga should be in the *jagatī* metre, for cattle[3] are like the *jagatī* and so (the sacrificer) acquires cattle' But (the sacrificer) should take a *gāyatrī* hymn only For the *gāyatrī* is *brahman*,[4] and that day is *brahman*, and so through *brahman* is *brahman* commenced[5] The hymn should be one by Madhuchandas For Madhuchandas desires[6] honey for the singers and so he is called Madhuchandas Now food truly is honey, all is honey, all desires are honey, therefore if one recite the hymn of Madhuchandas, it serves to obtain all desires He who knows this obtains all desires Now this Praüga in the one day form[7] is perfect[8] Much indeed on that day is done that is forbidden[9] and (the Praüga) is the atonement[10] Now atonement is rest, and at the end (of the sacrifice) the sacrificers rest on the atonement of the one day (Praüga)[11] as their rest He rests who knows this, and they also rest for whom the Hotṛ priest, who knows this, recites this Praüga.

---

[3] Cf I, 1, 2, n 5 The point of resemblance is the number of feet See Taittirīya Saṃhitā, III, 2, 9 4, VI, 1 6, 2, Aitareya Brāhmaṇa, I, 21 15, 28, 11 Elsewhere the *gāyatrī* is connected with *aṣṭāśaphāḥ paśavaḥ*, Jaiminīya Brāhmaṇa, III, 241, Tāṇḍya Mahābrāhmaṇa, III, 8, 2, or *paśavaḥ* are *pāṅktāḥ*, Aitareya Brāhmaṇa, III, 23 5

[4] Cf I, 1, 1 ad fin

[5] The day is *brahman* because it causes men to attain *brahman* This passage appears to be quoted or referred to in Śāṅkhāyana Āraṇyaka, I, 2 *brahma vā ahaḥ* (?) *brahmaitad ahar brahmaṇaiva tad brahma samardhayati* See I, 2, 2, *infra*

[6] Sāyaṇa so takes *chandati* The compound may rather have meant 'praising honey', as the Naighaṇṭuka III, 14 gives *chandati* as an equivalent of *arcati* and cf also RV, VI, 11, 3 when *chanda* occurs, or possibly 'winning honey', cf Winternitz (*Gesch der indisch Litt*, I, 146, n 3) who takes the meaning of √*chand* as 'gefallen, befriedigen, oder befallen machen'. Cf also Wackernagel, *Altindische Grammatik*, I, 154 Macdonell, *Vedic Grammar*, p 31, n 3, Weber, *Ind Stud*, VIII, 4 sq, as to the connexion of *chandas* with *skandati*, which if real would be natural as giving a basis for the meaning of *chandas* as right time (cf. *pes*, 'foot,' 'scansion,' &c) √*chand* and √*chad* 'cover' are not separated by the Indian grammarians, but are of very doubtful connexion (Whitney, *Roots*, &c pp. 49 50, Ryder, *J A O S*, XXIII, 77, Weber, *Ind Stud* XVII, 236) Madhuchandas appears in Kauṣītaki Brāhmaṇa, XXVIII, 2, Aitareya Brāhmaṇa, VII 17, Bṛhaddevatā, II, 126, III, 57, Śāṅkhāyana Śrauta Sūtra, &c. For *tad yad*, &c, cf Delbrück, *Altindische Syntax*, p. 575.

[7] The Agniṣṭoma, which is the *prakṛti* of the [illegible] and that of the Mahāvrata, is a one day sacrifice Cf Sabbathier, *Agniṣṭoma*, Caland and Henry, *L'Agniṣṭoma*

[8] Because, Sāyaṇa says it can easily be performed by [illegible] the Agniṣṭoma, which it exactly follows This passage is repeated in I, 2, 1, &c.

[9] Max Müller renders 'to be hidden' Sāyaṇa says [illegible] *varjaniyam* The reference is clearly to the [illegible] (so R, S has what is better [illegible]), see I, 2, 5, i e the popular part of the old ritual

[10] This is perhaps better than Max Müller's 'and has to be [illegible] (by recitation)'.

4 (There is the word 'ready' in the verse,) 'Come hither, O Vāyu, conspicuous, these Soma draughts have been made ready' (RV., I, 2, 1), this day indeed is ready for the sacrificer and for the gods. Truly the day is ready for him who knows this or for whom a Hotṛ priest who knows this recites In the verse, 'Indra and Vāyu, these draughts are poured forth, come to what is prepared' (RV, I, 2, 4) by 'prepared' (*niskṛta*) he denotes what is 'well prepared' (*samskṛta*)[1] Indra and Vāyu approach what has been well prepared by him who knows this or for whom a Hotṛ priest who knows this recites In the verse, 'Mitra of holy might I summon (and Varuṇa) who make perfect[2] the oil fed rite' (RV, I, 2, 7^{ac}), speech is the oil fed rite Speech is his who knows this or for whom a Hotṛ priest who knows this recites In the verse 'Aśvins (accept) the sacrificial offerings' (RV, I, 3, 1^{a}), the sacrificial offerings are food and this serves to gain food The Aśvins go to the sacrifice of him who knows this or for whom a Hotṛ priest who knows this recites the verse, 'Come hither, ye whose path is red'[3] (RV, I, 3 3) In the verses, 'Indra of bright splendour, come hither, Indra impelled by prayer, come hither, Indra hastening, come hither' (RV, I, 3 5^{a}, 6^{a}, 4^{a}), he recites, 'Come hither, come hither' Indra goes to his sacrifice who knows this or for whom a Hotṛ priest who knows this recites The All-gods come to the call of him who knows,

---

It is a curious inversion of ideas by which the old popular rites retained no doubt reluctantly in the ritual become regarded as improper and needing atonement.

[11] Max Müller takes *pratiṣṭhāśikāhah* as separate from *śāntyam* but suggests that *ekāhaḥ* may go with *śāntyam* This certainly seems better, as it avoids the identification of *ekāhaḥ* and *śāntiḥ* 'At the end' refers to the fact that the Mahāvrata is the last day but one of the Sattra For *pratiṣṭhā* as a medical term see Hoernle, *J R A S*, 1907, p 14

[1] From *niskṛta* comes the Vedic *iṣkṛti* according to Bloomfield, *J A O S*, XVI, xxvi For *samskṛta* as 'well cooked', see Thomas, *J R A S*, 1904 p 748, Kirste, *J R A S*, 1905, p 353 For *iṣ* and *√kṛ* cf. Oldenberg *S B E*, XLVI, 2 4. For *aram* above, which as against *alam*, V, 2 3, is a sign of early date, cf Wackernagel, *Altindische Grammatik* I, 211 sq, Macdonell, *Vedic Grammar*, pp 43 sq *alam* already appears in the Atharvaveda. The syntax is normal, see Delbrück, *Altindische Syntax* pp. 146 147 Sāyaṇa, probably correctly, explains that the hymn has the word *aram* because the day is *aram*, not vice versa. The use of *vai* favours this.

[2] Sāyaṇa interprets *sādhantā* either as dual or as equivalent to *sādhayantam*. In the original the *pada* has *Varuṇam ca riśādasam* (cf Pischel, *Vedische Studien* III, 190)

[3] This is the most probable interpretation of *Rudravartani*, Pischel, *Vedische Studien* I, 53, but cf III 71, Macdonell, *Vedic Mythology*, p. 49 Others take as 'whose path is terrible' Sāyaṇa renders 'whose path is like that of Rudra unobstructed' According to R s division, here and above, *āha* must be taken as 'He says' (the verse), but the position of *asya* is hardly possible and the later examples show conclusively that *ā ha* goes with what follows, as it is taken in S

or for whom a Hotr priest who knows recites the verse, 'Ye All gods, protectors, supporters of men, come hither' (RV, I, 3, 7) In the verse, 'Ye givers, (come to) the libation of the giver' (RV, I, 3, 7^{c}), he means the libation of every giver Whatever a man wishes when he recites this verse, that wish the gods fulfil, if this he knows or if for him a Hotr priest who knows recites In the verse, 'May the holy[4] Sarasvati accept our sacrifice, she that is rich in prayer' (RV, I, 3, 10), speech is denoted by 'rich in prayer' Speech is his who knows this or for whom a Hotr priest who knows this recites When he says, 'May she accept our sacrifice,' he means, 'May she bear it away' These verses if said straight on number twenty-one[5] Man consists of twenty-one elements He has ten fingers, ten toes, and the trunk is the twenty first By this hymn he adorns the trunk, the twenty-first By repeating the first thrice and the last thrice the verses become twenty five The trunk is the twenty fifth, and Prajapati is the twenty fifth He has ten fingers, ten toes, two legs, two arms, and the trunk is the twenty fifth By this hymn he adorns the trunk, the twenty-fifth Further the day (of the sacrifice) is twenty five, the *stoma* hymn of that day is twenty five,[6] like is brought about by like So the two are twenty-five

ADHYAYA 2

The two tristichs, 'Thee like a car to aid us' (RV, VIII, 68, 1–3), and, 'This juice is poured, O Vasu' (RV, VIII, 2, 1–3) are the first and second of the Marutvatiya hymn[1] Both are perfect in form as belonging to the one day ceremony[2] *Much indeed is done on this day that is forbidden*, and (the Marutvatiya) is the atonement. Now atonement is rest, and so at the end (of the sacrifice) the sacrificers rest on the atonement of the one day (Marutvatiya) as their rest He rests who knows this and they also rest for whom the Hotr priest, who knows this, recites this Marutvatiya In the verse, 'Indra, come nigher, with thy strengths preserve thy singers'[3] (RV, VIII, 53, 5-6) (there is[4] the word 'singers'), this day indeed is a hymn, and being possessed of a hymn, the form of this day is perfect (There is the word 'hero') in the verse, 'Let Brahmanaspati come forth, hither the hero' (RV, I, 40, 3^{ac}), the form of this day indeed is perfect as endowed with strength (There is the word 'heroic might') in the verse, 'Rise up, O Brahmanaspati, heroic might' (RV, I, 40, 1^{a}, 2^{b}), the form of this day is perfect as endowed with might (There is the word 'hymn') in the verse, 'Now doth Brahmanaspati proclaim the hymn of praise' (RV, I, 40, 5), this day indeed is a hymn and the form of this day as endowed with a hymn is perfect (There is the word 'slaying Vṛtra') in the verse, 'Agni, the slayer of Vṛtra, will bear' (RV, III, 20, 4^{ac}), the slaying[5] of Vṛtra is a characteristic of Indra, this day is Indra's, and Indra's is the form of this day. (There is the word 'strong') in the verse, 'Thou art strong by insight, O Soma, thou art mighty in thy might and greatness' (RV, I, 91, 2^{bc}), might indeed is a characteristic of Indra, this day is Indra's, and Indra's is the form of this day (There is the word 'strong') in the verse, 'They fill full the waters, they lead forth the strong one[6] like a horse for rain' (RV, I, 64, 6^{d}), strength indeed is a characteristic of Indra, this day is Indra's, and Indra's is the form of this day Further in that verse, 'They milk the thundering never failing spring' (RV, I, 64, 6) (there is the word 'thundering'), thundering indeed is a characteristic of Indra, this day is Indra's, and Indra's is the form of this day (There is the word 'great') in the verse, 'To great Indra' (RV, VIII, 89, 3), what indeed is great, is large, the form of this day as endowed with largeness is perfect. (There is the word 'great') in the verse, 'Sing a great song to Indra' (RV, VIII, 89, 1), what indeed is great is large, the form of this day as endowed with largeness is perfect (There are the words 'was in the way of' and 'stayed not') in the verse, 'No one was in the way of,[7] none stayed, the chariot of

---

[4] Probably the original form was *pavakā* Arnold *Vedic Metre*, p 143, Wackernagel, *Altindische Grammatik*, I, xi, Macdonell, *Vedic Grammar*, p 110

[5] Cf I, 1, 2 ad fin

[6] The *stoma* peculiar to the Mahāvrata is the *pañcaviṃśa stoma* in the *rajana* melody in the Pṛṣṭha Stotra corresponding to the Mahaduktha, Śankhayana Śrauta Sūtra, XVII, 7 3, 4 The explanation of Prajapati as twenty fifth is variously given, cf Friedlander's note on Śankhayana Āranyaka I, 1, and see also below, II, 2 4

[1] This is the first Śastra at the midday pressing The *pragathas* used are made up of two verses expanded (Sayana *yasminn ṛgdvayasamuhe pragrathanena tisraḥ sampadyate sa yam pragathaḥ*) The *dhayyas* are interpolated verses to fill up the Śastra For the terminology, *pratipad* and *anucara*, see Hillebrandt, *Ritual Litteratur*, p 103 For *uktha* below, see Eggeling, *S B E*, XLI, xii–xv

[2] See I, 1, 3

---

[3] Sayana takes *prasutir* as a noun = *anujña deya*

[4] This is I take it, the meaning The verses contain words because the day has certain qualities. It is also possible to invert the relation, and derive from the epithets in the verses the qualities of the day but the position of the verse in the sentence points to the former interpretation as slightly the more probable, and that view is supported by Śāṅkhāyana Aranyaka, I 3 ad fin. *mahadvad hy etad ahah* The literal version is 'As to the words, &c'

[5] The argument seems to be (1) *Vṛtrahā* occurs in the verse, because (2) Indra is *Vṛtrahā*, and (3) the day is Indra's. Possibly it may be, because the word *Vṛtrahā* occurs, therefore, Indra is *Vṛtrahā* and this is Indra's day

[6] *vājinam* means 'having food' according to Sayana It clearly meant originally 'having energy' Cf Oldenberg, *S B E*, XLVI, 18 and Index, s. v *vāja*, Pischel, *Vedische Studien*, I, 10, 45

[7] Sayana renders *paryasa* as *svartham na calitavan* and *na ciramat* as *tena rathena gamanam api satrur na kritavan*, and *paryastavat* as *lokantaragamanaya paritaścalanavat* It is difficult not to believe that this absurd interpretation, which is that of the Āranyaka, was

Sudas' (RV., VII, 32, 10); the form of this day as endowed with the terms *paryasta* and *rānti* is perfect. He recites all the Pragāthas to obtain all the days, all the Ukthas,[1] all the Pṛṣṭhas,[2] all the Śastras, all the Praügas, all the pressings of the Soma.

2. He recites[3] the hymn, 'Fair has been my effort, singer; slayer of truth' (RV., X, 27). True, indeed, is this day and perfect its form as endowed with truth. This hymn is composed by Vasukra. Vasukra indeed is *brahman*, and this day is *brahman*. Thus by *brahman* is *brahman* commenced. Here they ask: 'Why then is the Marutvatīya Śastra commenced by Vasukra's hymn?' Because no other than Vasukra produced[4] a Marutvatīya Śastra nor separated it. Therefore by the hymn of Vasukra the Marutvatīya Śastra is commenced. This hymn is not addressed to any definite deity[5] and is therefore Prajāpati's. For Prajāpati is undefined, and the hymn serves to win Prajāpati. Once[6] he describes Indra, and so the hymn retains its form as Indra's. He recites the hymn, 'Drink the Soma, for which in anger thou breakest' (RV., VI, 17) (There is the word 'mightily') in the verse, 'The cow stall, Indra, mightily being lauded;' the form of this day as endowed with the word mightily[7] is perfect. This hymn is

---

deliberately chosen wrongly The exact sense of the original is, however, open to doubt, cf. Ludwig and Griffith's translations.

[1] The Ukthas here meant, Sāyana says, are those for the *ukthyakratus*, following the Yajñāyajñīya Sāman. The Pṛṣṭhas are the four Pṛṣṭha Stotras of the midday pressing. The Śastras are those of the Ājya and other rites The Praügas are the Śastras of the Praüga and are specially mentioned on the *nyāya*, *brahmaṇā āgatah parivrājakā apy āgatāḥ* (so S; R reads *abhy*°, which is nonsense).

[2] For these, see Eggeling, *S B. E*, XXVI, 339 For *āptyai* and the very numerous similar datives, cf. Speijer, *Vedische und Sanskrit-Syntax*, § 274, Whitney, *Sanskrit Grammar*, § 970. They differ from ordinary infinitives in not being construed clearly as verbal forms, but governing the genitive as here and in Śāṅkhāyana Āraṇyaka, II, 5, 6, &c., and as always in Celtic (Lindsay, *Latin Language*, p 535)

[3] This Khaṇḍa contains the general form as well as the specifically Mahāvrata part of the Marutvatīya. See on V, 1, 1, which gives only the special part, and cf. Śāṅkhāyana Āraṇyaka, I, 3, where Vasukra is equated to Indra He occurs also in Bṛhaddevatā, VII, 30, &c.

[4] i e. brought out of the Saṃhitā. The perf. here has a certain propriety, it expresses a relation not exactly that of mere past, and approximates to a present. Cf n. 6 For *atha kasmāt*, cf Aitareya Brāhmaṇa, III, 24, 7, &c

[5] Cf. Macdonell, *Sarvānukramaṇī*, p. 183, *Bṛhaddevatā*, II, 256, Sieg, *Die Sagenstoffe des Ṛgveda*, pp. 7, 8 See Aitareya Brāhmaṇa, III, 30, 3 *te ete dhāyye anirukte Prājāpatye*, VI, 20, 18; Kauṣītaki Brāhmaṇa, XXIII, 2; Maitrāyaṇī Saṃhitā, III, 6, 5; Nirukta, VII, 4 Sāyana says Prajāpati is *anirukta* as he has no *mūrti*. Śāṅkhāyana Āraṇyaka, II, 1 has: *anirukto vai Prajāpatiḥ* Cf. Weber, *Ind Stud*, XVII, 335; Lévi, *La Doctrine du Sacrifice*, p 16.

[6] In RV., X, 27, 22. The Bṛhaddevatā and Sarvānukramaṇī ascribe X, 27-29 generally to Indra, with certain exceptions (Macdonell, *Bṛhaddevatā*, I, 127).

[7] Clearly the Āraṇyaka takes *mahi* as an accusative = *mahad*, and presumably, like Sāyana, *gṛṇāna* as active. *Mahi* in the original is taken by Griffith in his translation as a vocative from

composed by Bharadvāja, and Bharadvāja was of seers the most learned, the longest lived, and the greatest practiser of austerities. By this hymn he drove away evil. When[1] therefore a man recites the hymn of Bharadvāja, it is that

---

mahin against the accent. Cf. also Grassmann and Ludwig's translations. For the passive sense of *grṇana* cf. Whitney, *Sanskrit Grammar*, p. 362; Delbrück, *Altind. sche Syntax*, p. 264.

[1] The form *apahatyā* may be either a dative, 'for the driving away,' or an ablative, more probably the latter, as presumably the sense is that Bharadvāja attained his length of years by the hymn rather than the reverse. *Āsa* above is clearly differentiated in time from the narrative, cf. Śāṅkhāyana Āraṇyaka, VI, 1, where the imperfect *avasat* describes the dwelling from time to time of Gargya Bālāki, while *āsa* is used to denote his permanent character, and *uvāca* in describing his conversation with Ajātaśatru. This use of the perfect as a narrative tense is not a sign of lateness when the use is different from that of the imperfect. In the Tāṇḍya Mahābrāhmaṇa itself *uvāca* and *āsa* (XIII, 6, 9) are both found in such cases. Cf. also Aitareya Brāhmaṇa, III, 48, 5, *Bharadvājo ha vai kṛśo dīrghaḥ palita āsa | so 'bravīt |*, and III, 48, 4. The position of the Aitareya Brāhmaṇa and Āraṇyaka as early appear clearly from the following table of the proportion of perfects to imperfects (see Whitney, *P. A. O. S.*, May, 1891, pp. lxxxv sq., slightly modified):—

Tāṇḍya Mahābrāhmaṇa, 1 : 130	Śatapatha Brāhmaṇa, XII, 1 : 2
Taittirīya Saṃhitā, 1 : 70	Jaiminīya Brāhmaṇa, 1 : 4
Maitrāyaṇīya Saṃhitā, 1 : 64	Gopatha Brāhmaṇa, II, 1 : 5
Taittirīya Brāhmaṇa, 1 : 20	„ „ I, 1 : 2
Taittirīya Āraṇyaka, 1 : 9	Kauṣītaki Brāhmaṇa, 3 : 5
Śatapatha Brāhmaṇa, VI–VIII, 1 : 20; I–V, 9 : 11	Chāndogya Upaniṣad, 4 : 1
	Aitareya Brāhmaṇa, I–IV, 1 : 40
„ „ XIII, 1 : 5; XI, 5 : 4	„ „ V, 1 : 16
„ „ IX, 2 : 5; XIV, 7 : 5	„ „ VI, 1 : 2
„ „ X, 1 : 3, (including Bṛhadāraṇyaka Upaniṣad)	„ „ VII, 4 : 1
	„ „ VIII, 5 : 3

The earlier part of the Aitareya (I–XXVI) can thus claim to be older than anything save the Pañcaviṃśa and the Saṃhitās, and may be as old (for in such small matters as those of the Aitareya the proportions are not fair) as the Saṃhitās (Brāhmaṇa parts, of course). Against this sporadic cases like *sam lokete*, *lujjate*, *sacava* (Wackernagel, *Altindische Grammatik*, I, xxx) cannot be regarded as of decisive weight. *Lujjamānā* indeed as a Prakritism[*] would be note he may become, by the driving away of evil, learned, long-lived, and versed in asceticism; for that he recites the hymn of Bharadvāja. He recites the hymn, 'With what splendour do ye who are of equal age and dwell together?' (RV., I, 165). (There is the word 'praises') in the verse, 'They call for me, the praises long for me' (RV., I, 165, 4ᶜ); this day is praise and the form of this day as endowed with praise is perfect. This is the *kayāśubhīya* hymn,[1] and it is harmony and

---

[*] Fick, *Bezz. Beitr.*, VII, 270 takes *luj* from Ind. Germ. *lug*ⁿ according to the ordinary and early phonetic rule; if so the Prakritism would disappear. The view of Leumann (Wackernagel, I, 210) is, however, more probable; cf. also Dr. Scheftelowitz's forthcoming book, *Zur Stammbildung in den indogermanischen Sprachen*, § 10. Dr. Scheftelowitz gives an interesting example of the way in which the texts were corrupted (though he does not apply it for this purpose). In later Vedic times *ts* and *ks* became frequently *cch*, and such forms found their way into the text of old work instead of the proper forms. Later still efforts were made to replace correct forms instead of obvious Prakritisms with in some cases unfortunate results. E.g. in Sāmaveda, I, 3, 1, 4, 9 (=I, 231) *pṛkṣa* as Benfey (*Glossar*, p. 128) says is for RV., VIII, 31, 15, *pṛtsu* via *pṛcchu*. So may be explained *ankiva* Aitareya Brāhmaṇa, VIII, 9, (cf. Aufrecht's ed., p. 428), for *antova* (*ā+√andh*). Cf. in Naighaṇṭuka, II, 17, *pṛtsudhaḥ* (cf. Roth's crit. note, p. 16) for RV. *pṛkṣu*, and for *pṛkṣāla* (*K. Z.*, XL, 264 sq.) the MSS. of Atharvaveda, X, 9, 23, offer either *pṛsāra* or *pṛcchāra* (Lanman, *Album Kern*,

---

worthy, but when it is considered that the form is unique (III, 22, 7), that the later language had always √*lajj* and that *lajjā* was a common word, there can surely be no hesitation in restoring *lajjamanā*, just as the Atharvan Prākritisms, cited above, must be removed. The exact verbal form of the text cannot always be relied upon, and it may be noted that, as Sāyana's note on VII, 10; 11 shows, in his time some versions of the Aitareya Brāhmana had, which some had not, these chapters, of which the second is a mere corruption of Kausītaki Brāhmana, VII, 11 (see Aufrecht, *Aitareya Brāhmana*, pp. 236, 382, 444). The case of the Gopatha Brāhmana may be held to contradict the deductions here accepted, since Bloomfield (*Atharvaveda*, pp. 164 sq.) has shown grounds for holding that the Pūrva is not later than the Uttara, but this objection is not of importance, since it is the case that the two parts owe most of their grammatical forms to these sources and the Pūrva borrows from the Śatapatha Brāhmana, XI and XII, in the first of which books the number of perfects is very high, while the Uttara exploits the Aitareya, &c. The potential in *sīta* (see Aufrecht, p. 429) also urged as a sign of late date is merely, in all probability, an inaccurate analogical form to forms like *īta* (*dadhīta*, &c.), and gives no criterion of date (cf. Liebich, *Pānini*, p. 32). *āmantrayām asa* occurs only in VII, 17 and proves nothing for the earlier part of the Brāhmana. Pānini, III, 1, 40, allows only *kr* (Liebich, p. 33); but as there can be no doubt of the priority of the Aitareya Brāhmana to Pānini (cf. Liebich's own paper, *Bezz. Beitr.*, XI, 309), this clearly shows either the selective character of Pānini's work or more probably the incorrect transmission of the text (the Śāṅkhāyana has *cakre*, Liebich, pp. 80, 81). The use of *evām* (for *evam*) is apparently a note of the Aitareya Brāhmana's style, not a proof of date.[b] Liebich (p. 30) holds that *asa* was obsolete in Pānini's day in prose and says Yāska uses only *babhūva*. I cannot accept this view as to Pānini.

[1] The story of Indra, Agastya, and the Maruts has received full treatment from Sieg (*Die Sagenstoffe des Ṛgveda*, pp. 108–119). He holds that RV., I, 170, 171, and 165 make up an Itihāsa to the effect that Agastya offered a sacrifice to the Maruts. Indra came and claimed it, and Agastya had to pacify Indra and the Maruts. The result is possible, but not certain. The Kausītaki Brāhmana, XXVI, 9, has (as amended by Sieg, p. 117, n. 7): *kayā śubhā*

---

p. 302; Whitney, *Translation of Atharvaveda*, p. 604). So in Khila, I, 2, 9ᵃ, MSS. read *prīnayanti* for *prīnanti* and this Prākritism is found in Vārttika 1 to Pānini, VII, 3, 37. See also Wackernagel, *Altindische Grammatik*, I, 135.

[b] Aufrecht's view (*Aitareya Brāhmana*, p. vi) of the dependence of the Brāhmana parts of the Taittirīya Samhitā seems borne out by the citations in his 'Anmerkungen'. It may be noted that the Brāhmana parts of the Samhitā cannot well be separated much in point of time from the Brāhmana itself and that Brāhmana deals with the late Purusamedha (Winternitz, *Gesch. der indisch. Litt.*, I, 167). Cf. also Taittirīya Samhitā, VI, 3, 10, 5 and Taittirīya Brāhmana, I, 5, 5, 6 with Aitareya Brāhmana, VII, 13, 3 (ibid., p. 184, n. 2). Noteworthy also is Winternitz's remark (p. 175, n. 1) that in Vājasaneyi Samhitā, XXX, Buddhists are not mentioned, though that section must be later than the oldest Brāhmanas.

abiding, the *kayāśubhīya* hymn For by means of it Indra, Agastya, and the Maruts came to harmony So the recitation of the *kayāśubhīya* hymn tends to harmony. Further the hymn tends to long life So if the sacrificer be dear to the priest, let him recite for him[8] the *kayāśubhīya* hymn He recites the hymn, 'Indra, with the Maruts, powerful, for joy' (RV., III, 47) There are the words 'Indra, powerful', power indeed is a characteristic of Indra, this day is Indra's and Indra's its form This hymn is composed by Viśvāmitra. Now Viśvāmitra was the friend of all, and all is the friend of him who knows this and of those for whom a Hotr priest, who knows this, recites this hymn. The hymn 'Thou art born, terrible, for strength, for energy' (RV., X, 73) is one containing *nivids*,[9] and, as belonging to the one day ceremonial, is perfect in form Much indeed is done on this day that is forbidden, and (this hymn) is the atonement Now atonement is rest, and at the end (of the sacrifice) the sacrificers rest on the atonement of the one day (*nividdhana*) as their rest He rests who knows this, and they also rest for whom a Hotr priest, who knows this, recites this *nividdhana*. If recited straight on, the verses number ninety seven[10] The ninety is made up of three *virāj* sets of thirty, and then

---

savayasah samiḍa iti marutvatiyam | *tad etat samjñanam santani suktam* | *etena hendras ca Marutas ca samajanatam*, which must go back to the same source as the Aitareya version, found also in Aitareya Brahmana, V, 16 which agrees verbally with this passage For *samjñana* see also Bloomfield, *Atharvaveda*, pp 72, 73

[8] The gen here is probably possessive and predicative (*eius faciat*), cf Speyer, *Vedische und Sanskrit Syntax*, §§ 63 and 71, Liebich, *Bezz Beitr*, XI, 307 sq, Delbruck, *Altindische Syntax*, p. 162, while the gen with *priya* is adnominal and regular from RV onwards. Not unnatural is the transition from such genitives to the genitive which is really a dative, e g Aitareya Brahmana, VII, 25, 7 *tasya śatam dattvā* would if *krtvā* were put for *dattvā* be quite regular On the other hand in *tasya śraddadhāti* (ibid., II, 40, 6) the gen. is practically datival In Pali (Muller, *Pali Grammar*, p. 67) and in Prakrit (Pischel, *Prakrit Grammar*, p 246) the dative of the indirect objective is always represented by the genitive, the dative of purpose alone surviving Cf Whitney, *Sanskrit Grammar*, § 297 Note the dative with *mitram* below, and genitive in *ekesam paśunam*, I, 2, 3, and Geldner, *Vedische Studien*, I, 283 On the low morality of the Brahmanas cf Lévi, *La Doctrine du Sacrifice*, p 9, Winternitz, *Gesch der indisch. Litt*, I 180 sq, Garbe, *Philosophy of Ancient India*, p 62

[9] In Śankhayana Aranyaka, I, 3 the *nivid* is in RV, VI, 19, see Śrauta Sūtra, VII, 19, 20. The *prakrti* is as here ibid., 15, Kausitaki Brahmana, XXV, 3 *Nivids* are early and apparently were known in Ṛgvedic times, cf Haug, *Aitareya Brahmana* pp 32 sq, Weber, *Ind Stud*, IX, 355, XVIII, 96, Oldenberg, *Religion des Veda*, p 387, n 2, Eggeling *S B E*, XII, 224 n 2, Scheftelowitz, *Die Apokryphen des Ṛgveda*, pp 136 sq Here the *nivid* comes in after the sixth verse

[10] Sayana explains thus the two *tṛcas* referred to in I, 2, 1 = 6, six *pragāthas* each of two verses made into a *tṛca* = 18, three *dhāyyas* = 3, *asat su* = 24, *piba somam* = 15, *kayā śubha* = 15, *marutvaṅ* Indra = 5, *janisthā ugraḥ* = 11, total 97 But in I, 2, 1 there are seven *pragathas* which would give 101 Apparently the author overlooked this, although of course the explanations are possible Oldenberg (*Prolegomena*, p 353) thinks that some of the *pragathas* may have been counted as two, others as three verses

there are seven which are over. Whatever is praise of the seven is also praise of the ninety. If the first and last are repeated thrice the verses number 101. There are five four-jointed[11] fingers, two pits, the arm, the collar bone, the shoulder-blade; these make up twenty-five. The other parts[12] have twenty-five each, making a hundred, and the trunk is the one hundred and first part. The hundred is life,[13] health, strength, glory; the sacrificer is the hundred and first, resting on life, health, strength, glory. These verses become *triṣṭubh*.[14] For the midday pressing is accompanied by *triṣṭubh* verses.[15]

3 They ask, 'Why is a swing[1] a swing?' He who blows *is the swing* He

---

[11] The four are, according to Sāyana, *agra*, *madhya*, *mula*, *tanmūla*, and he notes that though the *anguṣṭha* has really only three, it is given a fourth for the sake of symmetry So in the systems of Caraka and Suśruta (*Hoernle, Osteology*, pp 122, 123) there are sixty phalanges, giving fifteen in each hand Here the phalanges and the metacarpus are reckoned as phalanges In Śāṅkhāyana Āraṇyaka, II, 5, each *pāṇi*, on the other hand, is given three *parvāṇi*, which is the more correct view, and perhaps later. The expression *kakṣasī* is doubtful. It cannot mean 'armpits', for there is but one on each side; Max Muller says the pits 'in the elbow and the arm'; Monier-Williams, *Dict* (where the reference is inaccurate) gives the sense as the two depressions on the wrist, Sāyana says *kakṣasya pārśvadvayam*, and possibly the *armpit may be conceived of as in* some way double. He takes, followed by Max Muller, *akṣah* as eye, but (*a*) *śiras* is a separate element and the eye belongs to it; (*b*) the form is unparalleled Friedlander holds that *akṣa* (Ags. *ala*, Lat *axilla*, O H G *ahsala*) means 'shoulder blade', but that is the meaning of *aṃsaphalaka* in the systems of Caraka (Hoernle, *J. R. A S*, 1907, p 13), perhaps of Suśruta and Vāghbhaṭa (*J R A. S*, 1906, p. 931, *Osteology*, pp 76, 91) So *akṣu* must mean 'collar-bone', as I would take it in Śāṅkhāyana Āraṇyaka, II, 4 (*akṣū* and *akṣah*) and as in the Śatapatha Brāhmana (*ákṣa*). The later form is usually *akṣaka*, though *akṣa* is found in the 'non medical version of Ātreya', see Hoernle, *Osteology*, pp. 55, 134, n 1, and my review, *Z D M. G*, LXII, 135 sq Sāyana's error is found in the commentators on Yajñavalkya and in the modern translations

[12] i e the left side, and the two sides of the lower body, which have five four jointed toes, a thigh, a leg, and three *parvāṇi* ('joints', Max Muller, rather 'articulations', Hoernle, *J R A. S*, 1906, p 931) according to Sayana

[13] Because life is one hundred years and the other things depend upon it, Sāyana explains, probably correctly, as there is no doubt that life as one hundred years is a very early idea, see Lanman, *Sanskrit Reader*, p 384 and reff, and Weber, *Ind Stud*, XVII, 193, *Festgruss an Roth*, p. 137. Cf. Vajasaneyi Samhita Upanisad, 2.

[14] Because the last hymn is *triṣṭubh* (Sāyana) But all the hymns in that Khanda are in *triṣṭubh*.

[15] Cf Aitareya Brahmana, III, 12, 3–5, Śatapatha Brāhmana, IV, 2, 5, 20, and other *passages cited by Bloomfield, J A O S*, XVI, 4 *For the form praüga*, cf Wackernagel, *Altindische Grammatik*, I, 41; *Z D M. G*, XL, 678

[1] The use of the swing refers, in the opinion of Oldenberg (*Religion des Veda*, p. 444), to the sun, which is called 'the golden swing in heaven' in RV, VII, 87, 5. This is quite probable, as the Mahāvrata rite is, at least to some extent, a sun charm (cf. Introd, p 28) Sāyana's interpretation follows the text and makes the swing Vāyu, as does Śāṅkhāyana Āraṇyaka, I, 7 I, 2, 4 below is in favour of the sun, cf. Kaṭhaka Samhitā, XXXIV, 5, cited in *Ind. Stud*, III, 477. Compare the *dolāyātrā* of the young Kṛṣṇa, clearly a vegetation rite

swings forward in these worlds and then is a swing a swing 'There should be one plank,' some say, 'for the wind blows in one way and (the swing should be) like the wind' But this is not to be accepted[2] Others say, 'There should be three planks, for threefold are these worlds and (the swing should) resemble them' But this is not to be accepted There should be two planks, for these two worlds[3] seem most real, and the ether between them is the sky. So let there be two planks. Let them be of *udumbara* wood[4] The *udumbara* is sap and proper food, and planks of it serve to win sap and proper food. Let them be raised in the middle For in the middle food delights men, and so he places the sacrificer in the middle of proper food. There are two kinds of ropes,[5] the right and the left The right serves for some animals, the left for others. When there are both kinds, they serve to win both kinds of animals. The ropes should be of *darbha*[6] grass For of all plants *darbha* is free of evil,[7] and so they should be of *darbha* grass they[7] mount to food and fortune The Hotrakas[8] with the Brahman sit down on seats of grass Plants and trees having grown up bear fruit So then if they mount all together on this day they mount on strength, on sap, on proper food. This serves to win sap[9] and proper food Some say, 'Let him descend[10] after saying *vasat*'[11] But this is not to be accepted For the honour done to one that sees it not[12] is indeed not done Others say, 'Let him descend after taking the food' But this is not to be accepted For the honour done to one that has approached near is indeed not done Let him descend after seeing the food For that is honour indeed which is done to one who sees it. Therefore only after seeing the food, let him descend Let him descend towards the east, for in the east is born the seed[13] of the gods Then let him descend towards the east.

---

[2] This is the constant phrase of the Aitareya Brāhmana. That of the Kauśītaki Brahmana and it may be added of the Śaṅkhayana Araṇyaka, is *na tad adṛyeta* Cf. Aufrecht, *Aitareya Brahmana* p. 432, Lévi, *La Doctrine du Sacrifice*, pp 38, n 6, 44 n 1

[3] The ether or sky is as Sayana points out, invisible *Addhātama* (for *addhā*, cf. Wackernagel, *Altindische Grammatik*, I, 178, and Speyer, *Vedische und Sanskrit-Syntax*, § 228) is a curious word, which occurs also in the Śatapatha Brahmana, which also has, VI, 3, 1, 24, *anaddhapurusa*, on which see Weber, *Ind Stud*, XIII, 221, n. 2, Eggeling, *S B E*, XLI, 197, Hillebrandt *Ritual Litteratur*, p. 167

[4] Cf Śaṅkhayana Āranyaka, I 7, where there is one plank only *tad va audumbaram bhavaty urg va annadyam udumbara urja annadyasyopaptyai* The seat of the Udgatṛ also is of *udumbara* wood Taṇḍya Mahābrahmana, V, 5, 2 *audumbara bhavaty ūrg udumbara urjam evavarundhe* The Śaṅkhayana passages look like an imitation, while the Aitareya may well have followed the Tāṇḍya (cf *avaruddhyai*) Taittirīya Brahmana, I, 2, 6, 5, has *ūrg vā́ annam udumbáraḥ*. Cf. also Śatapatha Brahmana III 2, 1, 23 and often.

[5] Sayana explains right and left as fashioned by the right and left hands respectively, perhaps twisted from left to right and right to left respectively The plural *rajjavaḥ* is probably due as he says to the fact that as is said in V, 1, 3 Śaṅkhayana Śrauta Sutra, XVII, 2, 3, the ropes are each of three strands It should be noted that Āraṇyaka V differs in the purpose assigned to the ropes which it associates with the holding together of the swing Similarly it recognizes the number of planks as three or two, while two is here prescribed Again, I, 2, 4 the height of the swing is fixed at a *musti*, while V 1, 3 gives as alternatives *caturangula* or *musti* These remind us that the last book must differ considerably in date from the first.

[6] On *darbha* cf. Eggeling *S B E*, XII, 84, Zimmer, *Altindisches Leben*, p. 70.

[7] The construction of the genitive with a positive is based on the analogy of the superlative, e g *infra*, I, 2, 4 (Speyer, *Vedische und Sanskrit-Syntax*, §§ 65, 91 II). Similarly the ablative is found dependent on a positive, e g RV, V, 10, 4 (Oldenberg *S B E*, XLVI, 390), Speyer, *Vedische und Sanskrit-Syntax*, § 58, *Sanskrit Syntax*, p. 73, Delbruck, *Grundriss*, III, 1, 216, Pischel, *Gott Gel Anz.*, 1884 p 509 *Vedische Studien*, I, 309 Geldner, ibid, III, 76 77, and see II, 3 1, n. 6 For the word *apahatapapma*, cf Aitareya Brāhmana, IV, 25 4 *apahatapāpmānaḥ* and *anapahatapapmanah*, Bṛhadāraṇyaka Upaniṣad, IV, 3, 21 (Max Muller, *S B E*, XV, 168, n 3), Chāndogya Upaniṣad, I, 2, 9, VIII, 1, 5, 4 1, 7, 1

---

[7] They, i e the Hotr and Udgatr Max Müller follows R in translating 'he', but this makes nonsense and the commentary shows that R is wrong

[8] They are the Hotr's assistants, viz. Prasastr, Brāhmanacchamsin, Potr, Nestr, Agnidhra, and Acchavaka The division is not strictly accurate, as the second, third, and fifth are really classed with the Brahman and the Nestr with the Adhvaryu but it corresponds to facts better than the later classifications, see Weber *Ind Stud*, X, 144 sq, Oldenberg, *Religion des Veda*, pp. 383 sq, Hillebrandt, *Ritual Litteratur*, p. 97 *vrsah* may perhaps be better spelt *brsih* Both the *v* or *b* and *s* present difficulties, cf Wackernagel, *Altindische Grammatik*, I, 184, 233, Macdonell, *Vedic Grammar*, p 36 See Geiger, *Litt und Sprache d Singhalesen*, p 28 The following sentence is quoted in the Naigeya Anukramani, *Ind Stud*, XVII, 373 374

[9] Max Müller suggests that *iva* before *urjah* is expected If it had occurred, it would have been quite natural, but it is not necessary to suspect the text as the reading above is *tam eva tad urjam annadyam* and the *eva tad* renders it less unnatural that *iva* should not occur The phrase *eva tad* is very common in the Aitareya Brahmana, *tad* being of course adverbial. For the usual asyndeton, cf Delbrück, *Altindische Syntax*, p. 59

[10] The descent does not of course come here in its proper order, but is inserted to complete the discussion of the topic of the movements of the priests.

[11] The reason for this being rejected is that it is only after the second *vasat* (the *anuvasat*) that this *bhaksa* comes up, so that it could not see the priest on the swing descending in its honour (Sāyana) For the word, cf Wackernagel *Altindische Grammatik*, I, 172 Foy, *Z D M G*, L, 139, Macdonell, *Vedic Grammar*, p 34, Weber, *Ind Stud*, XVIII, 269, for the form, Whitney, *Sanskrit Grammar*, § 1091

[12] For the form *apasyate* cf Wackernagel, *Altindische Grammatik* II, 1, 77, Delbrück, *Vergl Syntax* II, 529 sq, *Altindische Syntax*, pp 240 sq *Adhyrstiya* appears clearly to come from √*rs* in the sense 'move' (cf Greek *ῥαιάρροος*) The separation into two roots (maintained in Bohtlingk and Monier Williams' *Dict*) seems quite needless (cf. Whitney, *Roots*, &c, p. 140), as *rsti*, spear, can easily be derived from √*rs* as trans. Cf also Khila, IV, 5 3 (ed Scheftelowitz)

[13] Max Müller suggests, and S apparently independently also suggests, that the reading may be *devaretah samprajayate* But the use of *samprajayate* is curious as the *sam* has no intelligible force and on the other hand the form *retasa* is not impossible, as forms from *a* as, *asa*, exchange more or less freely throughout Sanskrit, see Whitney, *Sanskrit Grammar*, §§ 415, 1319, and a long list in Wackernagel, op cit, II i 113 114. In a Bahuvrihi *cguiretas* occurs in the Satapatha, ibid, 111 In Pali of course the *asa* form prevails, Müller, *Pali Grammar*, p 65 Cf also Pischel, *Prakrit Grammar*, §§ 407 sq

ADHYĀYA 3.

They say, 'Let him begin this day[1] with saying the word *him*.' In the word *him* is *brahman*, this day is *brahman*, and so he begins *brahman* by means of *brahman*,[2] who knows this. Now with regard to his beginning with the word *him*, the word is masculine,[3] and the *rc* feminine. They make a pair and so he makes a pair at the beginning of the hymn for the sake of offspring. Children and cattle are his who knows this. Again with regard to his beginning with the word *him*, the word *is to brahman* like a wooden shovel.[4] Just as one desires to dig up anything with a wooden shovel, so with the word one digs up *brahman*. Whatever he desires, he digs up with the word *him*, who knows this. Again with regard to his beginning with the word *him*, the word is the discrimination of divine and human speech.[5] So he, who begins with the utterance of the word *him*, discriminates divine and human speech.

---

[1] The time of *himkrtya* and *pratipadya* are obviously really identical. This is readily explained by the originally timeless force of the form *krtya* (cf. Whitney, *Sanskrit Grammar*, §§ 889, 894). So the aorist participle in Greek sometimes coincides with the time of the verb, e.g. Monro, *Homeric Grammar*², p. 212. Delbrück (*Altindische Syntax*, pp. 405–409) holds that in all these cases the distinction of time between the main verb and the gerund exists, but, however natural the growth of this use is, it is only to be found in the examples by forcing the sense. Speijer (*Vedische und Sanskrit Syntax*, § 223) lays stress on the 'aoristic' effect of the weak root and appears to think that this accounts for the past force. But it should be noted that in Vedic we have no evidence that the forms were ever felt as other than participles either present or past. In *striyam drstvāya kitavám tatāpa* it is most probable that the writer did not feel *drstvāya* as = 'after having seen', but as 'seeing'. Cf. my remarks in *J. R. A. S.*, 1907, p. 164. For beginning the Mahāvrata with *him*, cf. Śāṅkhāyana Āraṇyaka, II, 1. For *him* + √*kr*, cf. Whitney, § 1079. It is obsolete in the classical language.

[2] Cf. I, 1, 3, 2, 2.

[3] Cf. I, 2, 4. The use is found in the Aitareya Brāhmaṇa, VI, 3, and often in the Śatapatha Brāhmaṇa. For the idea, cf. the stories of the wedlock of the *sāman* and *rc* in the Śatapatha (IV, 6, 7, 11, &c.), and Jaiminīya Upaniṣad Brāhmaṇas, and Aitareya Brāhmaṇa, III, 23, 2.

[4] Sāyaṇa explains this as a metaphor from the search of hidden treasure, a probable supposition in the case of India, where burial of treasure (cf. Gautama Dharma Sūtra, X, 43–45, Vasiṣṭha Dharma Sūtra, IV, 13, 14, Manu, VIII, 35–39, Yājñavalkya, II, 34, 35) has always been frequent in consequence of the uncertainty of life and government. A different idea is found in Śatapatha Brāhmaṇa, VI, 3, 2, 5, 4, &c.

[5] That is, it distinguishes ordinary conversation from divine service. The Śāṅkhāyana Āraṇyaka, II, 1, gives different reasons for the importance of *him*. In Śatapatha Brāhmaṇa, VI, 3, 1, 34, where the same distinction occurs, Sāyaṇa explains as Sanskrit and Apabhraṃśa (Eggeling, *S. B. E.*, XLI, 200, n.); *dasyat* must be correct, *daiyat* cannot well be adjectival, and the error in the MSS. is trifling. Cf. III, 2, 5. It is noteworthy that later *daivī vāc* is used for Sanskrit, cf. Daṇḍin, Kāvyādarśa, I, 33: *saṃskṛtaṃ nāma daivī vāg anvākhyātā maharṣibhiḥ*. Franke (*Pali und Sanskrit*, p. 89) compares the fact that Mathurā was called 'city of the gods' because of the Kuṣaṇa title *devaputra*, and is inclined to think that 'secondary' Sanskrit came to India from Kaśmīr via Mathurā, a hypothesis which can hardly be regarded as probable.

2. They say, 'What is the beginning of this day?' Let him reply, 'Mind and speech'[1] All desires rest on the one, the other yields all desires. All desires rest on the mind,[2] for with the mind man conceives all desires. All desires rest on him who knows this Speech yields all desires, for by speech man expresses all desires Speech yields all desires to him who knows this Then they say, 'One should not really begin the day with a *rc*, *yajus*, or *sāman* verse, nor start from[3] a *rc*, *yajus*, or *sāman* verse' So one should say the *vyāhrtis* first The *vyāhrtis* are *bhūh*, *bhuvah*, and *svar*,[4] and they are the three Vedas *Bhūh* is the Rgveda, *bhuvah* the Yajurveda, and *svar* the Sāmaveda[5] Therefore

---

The real meaning of the discrimination is suggested by Aitareya Brāhmana, VII, 18, 13 *om iti vai daivam tatheti mānusam | daivena caivainam tan mānusena ca pāpād enasah pramuñcati*, cf Winternitz, *Gesch der indisch Litt*, I, 162, n 1. The later use of *daivī vāk* must be related to Devanāgarī For the question of Prākrit, cf I, 5, 2, n In the Rāmāyana passage where Hanumant ponders as to addressing Sītā, the possibilities he contemplates are (according to Jacobi) *vācam mānusīm samskrtām*, or *dvijātir iva*, *vācam samskrtām* which appears clearly to discriminate between the popular and sacerdotal forms of Sanskrit That the former expression means (as Dr Grierson, *Ind Ant*, XXIII, 56, holds) the Prākrit of the educated Kşatriyas and well to do persons round the court appears excessively improbable Nor is it correct to say that these forms of Sanskrit were practically alike The Epic and the Sanskrit of the Brahminical schools are of distinctively different style, and Sītā might well have been surprised at being addressed not in the Kşatriya fashion but by priestly expressions, much as a lady of the middle ages would find a great difference between the address of a countess and a monk, even when both spoke the same Latin language

[1] Sāyana explains this as referring to the need for care in going through the service, composed as it is of mixed verses

[2] Sayana explains that the desires are phases of mind, *manovrttiviśesah* which is too subtle for the Aranyaka. Cf Brhadāranyaka Upanisad, III, 2 *manasā hi kāmān kāmayate*, and Jacob, *Concordance*, p 292, Aitareya Brahmana, VI, 2, 3

[3] Max Muller following Sayana, takes the words *narco—syād iti* as giving the ground for the rule referred to in *tad āhur* But this leaves no *iti* to mark the end of the rule referred to in *tad āhur*, and in view of the usual practice of the Āranyaka, it is safer to take the quotation as extending to *syād* There is no doubt that the construction of the last part of the sentence is not easy For the abl, cf Delbruck, *Altindische Syntax*, pp 107 sq, Speyer, *Vedische und Sanskrit Syntax*, § 51

[4] For the later history of the triad see Deussen, *Philosophie der Upanishads*, p 196, E T, p 217 See also Jaiminīya Upanisad Brahmana, III, 15, IV, 28, and I, 1 Taittirīya Upanisad, I, 5, 6, shows clear signs of a later origin than the Aitareya by its elaboration

[5] On the three Vedas and the Atharvaveda, see especially Bloomfield, *Atharvaveda*, pp 21 sq, Macdonell, *Sanskrit Literature*, pp 191 sq, Hopkins, *Great Epic of India*, pp 2 sq The silence of the Āranyaka is certainly in favour of its early date It is of course true that the Atharvaveda contains much old material[*] and probable that a Samhita existed before the Aranyaka was written (cf Taittirīya Samhita, VII, 5 11, 2, where the Angirases are referred to

---

[*] I agree with Winternitz that Oldenberg's view (*Literatur des alten Indien*, p 41) that prose magic formulae are older than 'poetic' which are imitations of the poetry of the hymns of the Rgveda is not probable

he does not really begin the day with a *ṛc*, *yajus*, or *sāman* verse, nor start from a *ṛc*, *yajus*, or *sāman* verse.

3. He begins with *tad*[1] this. Now 'this this'[2] is food, and so thus he obtains food. Prajāpati indeed uttered this as the first word consisting of one syllable or of two,[3] viz. *tata* or *tāta*. So a child when it first speaks utters the word of one or two syllables, *tata* or *tāta*. So with this very word with *tata* in it[4] he begins. A Ṛṣi says (RV., X, 71, 1), 'O Bṛhaspati, the first point of speech,' for this is the first point of speech. 'Which they have uttered making a name,' for by speech are names made. 'That of them which was the best and flawless,' for this is the best and flawless. 'That is hidden in secret by their love and yet is made manifest,' for this as regards the body is secret, merely the deities (who enter the body), but as regards the gods[5] it is made manifest. This is the meaning of the verse.[6]

(apparently as a fourth Saṃhitā), and Winternitz, *Gesch. der indisch. Litt.*, I, 110), but the recognition is a sign of later date (Taittirīya Saṃhitā, VII, is not probably early, but, like VI, is later than the Aitareya Brāhmaṇa).

[1] *Tad* is the first word of the first stanza of the first hymn of the Niṣkevalya Śastra, the so-called Rajana, RV., X, 120, 1.

✓ [2] It may be rendered 'this word *tad*' (= *tat tad iti*), but Sāyaṇa takes it as a repetition. The repetition of *annam* is apparently not connected with that of *tad*, though it may have been helped by it.

✓ [3] Max Müller seems to regard the two alternatives as *tat* and *tata* or *tāta*. This of course is the usual signification of *ekākṣara* and *dvyakṣara*, but Sāyaṇa refers these words to the quantity of the first and second syllables in *tata* and *tāta* respectively. The form of the sentences makes this seem certainly correct, however unusual it may be. We may have here early evidence of the omission of the final *a* in ordinary conversation. ?

[4] I take *tat tatavaty* separately and *eva tat* as = 'so'. This seems also to be Sāyaṇa's interpretation. Max Müller says, 'With this very word, consisting of *tat* or *tatta* [cf. the reading of L.] he begins,' and in a note, 'If *tat* is called the very same word, *eva* is used in the sense of *iva*.' This appears rather unsatisfactory, and Sāyaṇa is probably right in thinking *tat* and *tata* similar enough for the purpose here in view. This passage, indeed, seems to be a deliberate and somewhat elaborate variant of the older legend (preserved in Śatapatha Brāhmaṇa, XI, 1, 6) by which Prajāpati when he first spoke uttered *bhūḥ*, *bhuvaḥ*, and *suvar*, which are words of one and two syllables respectively. Sāyaṇa has *ekena hrasvena-plutakakṣareṇa dvābhyāṃ hrasvadīrghābhyām upetā dvyakṣarā*. *Ekadvyakṣara* is apparently an adj. Dvandva with disjunctive force, cf. Wackernagel, *Altindische Grammatik* II, 1, 70; Delbrück, *Altindische Syntax*, pp. 33 sq.; *Vergl. Syntax*, III, 224 sq. for early examples. The whole sense is little more than that *tad* (which is equal to *tat(a)* or *tāt a*) is the name which, as *brahman*, is revealed in the deities and implicit in man in whose organs, &c., the deities are (as in II, 1, 5; Śāṅkhāyana Āraṇyaka, IX, 1, &c.).

[5] For *adhidaivatam*, cf. Chāndogya Upaniṣad, I, 3, 1, &c.; Whitney, *P. A. O. S.*, Oct., 1890, p. li. So often in Jaiminīya Upaniṣad Brāhmaṇa.

[6] This stanza is very obscure. Sāyaṇa quotes Āśvalāyana Gṛhya Sūtra, I, 15, 8, where it is laid down that a child's secret name is only to be known by father and mother until the *upanayana*. That this is what is referred to here is not impossible, as Max Müller points out,

4 He begins with,[1] 'That was the oldest in the worlds' (RV, X, 120, 1), for that[2] is indeed the oldest in the worlds 'Whence sprung the terrible one with brilliant might,' for from it he was born who is terrible with brilliant might 'Immediately on birth he destroys his foes,' for immediately on being born he destroyed evil 'After whom all helpers rejoice,' for all creatures are helpers, and they rejoice after him, saying, 'He[3] has risen, he has risen' 'Growing by strength, the powerful one' (RV, X, 120, 2) for he grows by strength the powerful one 'As foe he smites fear into the Dāsa,' for all fear him 'Taking that which breathes and that which breathes not,' this refers to the living and the lifeless 'What was offered in the feasts came to thee,' this means, 'all is in thy power' 'All turn their thoughts on thee' (RV X, 120, 3), this means all beings, all minds, all thoughts, turn on thee 'When these two become three helpers,' these two being united produce offspring Children and cattle are his who knows this 'Join what is sweeter than sweet with the sweet,' for the pair is sweet, the offspring sweet, and so with the pair he joins the offspring 'He[4] conquered by the sweet that which is sweet,' for the pair is sweet, the offspring is sweet, and thus through the pair he conquers offspring A Ṛṣi[5] says,

---

but the interpretation adopted in n 4 above seems to render the reference quite unnecessary The last verse he explains as meaning that the form of the gods who enter the body is hidden from men but the gods themselves know the name well This is practically meaningless, and Max Müller suggests that it may be that the name refers to the gods or to *tad* the *brahman* The reference however, to the deities who enter the body is clearly meant in some form of II, 4 2, 1, 5 and the sense is the *brahman* = *tad* which is the beginning of speech and the first of names is revealed (as the gods) and implicit in man This section is referred to by 'Sayana' on Atharvaveda XVIII, 4 77 see Lanman in Whitney's *Atharvaveda*, p 892

[1] The *trca* RV, X, 120, 1–3, which begins is a *stotriya*, because it corresponds to the Rajana Saman

[2] i e *brahman* (Sayana) The explanations of this hymn in the Āranyaka must be deliberately perverse so absurd are they Cf Wackernagel, *Altindische Grammatik*, I, xxix n 6

[3] The double *ud gād* is, according to Sayana because he is Āditya of heaven and Agni of earth The exact use of the aorist is characteristic of the early character of the text, cf Whitney's criticism of Delbrück (*Synt Forsch*, II 8–86, *Altindische Syntax*, pp 280–289) in *A J P* XIII, 290, Speyer, *Vedische und Sanskrit Syntax*, § 174

[4] Sayana takes *adaḥ* as referring to *mithunam* which is *sumadhu* as consisting of the son and daughter in law *Madhuna* is equal to grandchildren, and *abhiyodhī ḥ* is 'provide', i e 'provide that dear pair with dear offspring, our grandchildren' He does not therefore even follow the Aranyaka which clearly took *sumadhu* as accusative Max Müller translates 'And this (the son when married) being very sweet conquered through the sweet' But this represents neither the Aranyaka nor Sayana

[5] This verse which is not in the Ṛgveda is not by any means clearly connected with the rest. Sayana gives two alternatives that it is connected with the verse *svādoh svādīyah svādunā srjā sam*, or with the whole Śastra (not as in Max Müller, that it is connected with the hymn *tad id āsa*, or the Veda in general) In the first case 'this body' is the body of the sacrificer, the other

'Since he raised this body in that body,' he means this body consisting of the Veda in that corporeal body[6] 'Then let this body[7] be the medicine of that,' he means this body consisting of the Veda is to be the medicine of that corporeal body Of this eight[8] syllables are *gāyatrī*, eleven are *triṣṭubh*, twelve *jagatī*, and ten *virāj* This consisting of ten syllables rests in the other three metres The three syllable word *puruṣa*[9] goes into the *virāj* These indeed are all metres, the three and the *virāj* To him who knows this[10] thus is this day completed with all the metres

5 He extends the verses by the use of *nada*[1] *Nada* indeed is man So a man speaking sounds as it were In the words *nadam va odatīnām*[2] (RV, VIII, 69, 2), *odatyaḥ* are the waters in heaven, for they water all this, and they are the waters of the mouth, for they water all proper food In *nadam yoyuvatīnām*, *yoyuvatyaḥ* are the waters of the sky, for they inundate as it were, and they are the waters of perspiration,[3] for they run constantly as it were. In the words *patim vo aghnyānām*, *aghnyāḥ* are the waters that are born of the smoke of fire,[4] and they are the waters that spring from the organ. In *dhenūnām*

---

body the body of the parents and the result is seen in *svādoḥ*, &c. The other case gives the interpretation of the Aranyaka, as Sayana himself admits, *tad etad dvitīyaṃ vyākhyānam asyāṃ ṛcy uditaṃ brāhmaṇena spaṣṭīkriyate* This shows how little Sayana felt bound to follow his authorities The words *svam—asrjata* occur in various guises in Atharvaveda, VII, 3, Taittirīya Samhita, I, 7, 12, 2, Maitrayani Samhita, I, 10, 3, Āśvalāyana Śrauta Sutra, II, 19, 32, Śāṅkhayana Śrauta Sutra III, 17, 1

[6] The body of the sacrificer (Sayana)

[7] The hymn *tad id asa* (Sayana)

[8] The hymn, RV, X, 120, is *triṣṭubh*, and the desired metres are only obtained by torturing it The first second, and fourth *padas* have ten syllables the third eleven The first eight of the first *pada* give the *gayatrī* the remaining two added to the ten of the second and fourth *padas* the *jagatī*, and the first, second, and fourth (or rather the fourth), the *virāj*

[9] Because by adding *pu* to the first *pada*, *ru* to the second, *ṣaḥ* to the third, the verses all become *triṣṭubh* See V, 2, 6 (4

[10] In *evam vid* (perhaps one word), cf Wackernagel, *Altindische Grammatik*, II, 1, 63 *viduṣa* may be genitive (cf. n 8 on I, 2, 2) or dative

[1] The exact meaning is explained in V, 1, 6 After each *pada* of RV, X, 120, 1 is inserted (besides the syllables *pu, ru, ṣaḥ*) one *pada* of the hymn, RV, VIII, 69 2, so as to make a *bṛhatī* Cf Śatapatha Brahmaṇa, VIII, 6, 2, 3, and Eggeling, *S B E*, XLIII, 113, n 1

[2] Sayana explains the verse with reference to juice produced at the third pressing of the Soma, the *ṛjīṣa* (cf Hillebrandt, *Ved Myth*, I, 235 sq), and takes *nadam* as the sacrificer, and supplies *rakṣata*. For the real sense see Pischel, *Vedische Studien* I, 191 sq

[3] *svedāte* is clearly correct, the accusative being cognate R's *svedante* is primarily attractive but is improbable, and as a perusal of p 80 will show, he (like the MSS, cf. Whitney, *P A O S*, Oct., 1887 p xxv) is very uncertain about nasals. Cf Whitney, *Sanskrit Grammar*, § 275, Speijer, *Vedische und Sanskrit Syntax*, § 24, Delbrück, *Vergl Syntax* I, 366 368

[4] Sayana gives two interpretations, either smoke (in the shape of a cloud) produced by fire, or from smoke and fire, quoting Kalidasa, Meghaduta, 4, *dhūmajyotiḥsalilamarutāṃ*

isudhyasih, the *dhena-ah* are the waters, for they stir all this, and by *isudhyasi* he means 'thou art lord'[3] He extends[4] a *tristubh* and an *anustubh* For the *tristubh* is male, the *anustubh* female, and the two are a pair So a man having taken to himself a wife regards himself as it were more complete By repeating the first verse thrice, the verses become twenty five[5] The trunk is the twenty-fifth, Prajapati is the twenty fifth He has ten fingers, ten toes, two legs, two arms, and the trunk is the twenty fifth He adorns this trunk, the twenty-fifth Further the day (of the sacrifice) is twenty five, and the *stoma* hymn of this day is twenty five, like is brought about by like So the two are twenty five.

6 He begins[1] with *tad*, this Now 'this this' is food, and so thus he obtains food Prajapati indeed uttered this as the first word consisting of one syllable or of two, viz *tata* or *tata* So a child when it first speaks utters the word of one or two syllables, *tata* or *tata* So with this very word with *tata* in it he begins A Rsi says (RV, X, 71, 1), 'O Brhaspati, the first point of speech,' for this is the first point of speech 'Which they have uttered making a name,' for by speech are names made 'That of them which was the best and flawless,' for this is the best and flawless 'That is hidden in secret by their love and yet is made manifest,' for this as regards the body is secret, namely the deities (who enter the body), but as regards the gods it is made manifest This is the meaning of the verse

7 He begins with the hymn, 'That was the oldest in the worlds' (RV, X, 120, 1) What is oldest is great, the form of this day as possessing greatness[2] is perfect. (There is the word 'greatness') in the verse, 'That fame of thine, O Maghavan, through thy greatness' (RV, X, 54, 1), the form of this day as possessing greatness is perfect (There is the word 'strength') in the verse, 'He groweth more for strength' (RV, VI, 30, 1), the form of this day as possessing strength is perfect

---

tan nipitah kva nitghah The waters are *aghnya*, he says, because plants and trees are to be tended by all Cf also Brhaddevata IV, 41, which explains RV, I, 164, 43 *śakamayam dhumam* Atharvaveda, IX, 10, 25

[3] 'Thou art food', in Max Muller's translation must be a slip *patiyasi* is regular, see Whitney *Sanskrit Grammar* § 1061, and is found in the Śatapatha Brahmana in this form

[4] *tad id asa* is in *tristubh*, *nadam va odatinam* in *anustubh* The former is male because bigger than the latter For the following cf Levi *La Doctrine du Sacrifice* p 157

[5] The twenty five are made up by nine verses of RV, X, 120, 1, six of X, 54 five of VI, 30 and three of I, 51, 4 which are mentioned in I, 3 7 below Cf I 1 2 4 and n 6 on V, 1, 5

[1] This is a mere repetition of Khanda 3 and the insertion of it here according to Sayana is for the glory of the whole hymn whereas the purpose of it as Khanda 3 was to extol the word *tad* This may be correct, but it is very obscure.

[2] The difference in the first two verses of course is that in the first *prathima* needs to be equated to *mahat*, whereas *mahitva* actually occurs in the second For the construction, cf I, 2, 1, n 4

(There is the word 'hymns') in the verse. 'Then, manliest of men, with songs, with hymns' (RV, III, 51, 4), this day is indeed a hymn, and the form of this day as possessing a hymn is perfect. He extends the first two[2] verses, which are deficient, by a syllable. In the small[3] (womb) seed is deposited, in the small (heart) the vital spirits, in the small (stomach) food is placed. This serves for the obtainment of these desires. He obtains these desires who knows this. The two of ten syllables serve to obtain both kinds of proper food, that which is footed and that which is footless.[4] They become eighteen syllables apiece.[5] Of the ten, nine are the breaths,[6] one is the self. This is the perfection of the self. Eight syllables[7] remain in each. Who knows this obtains whatsoever[8] he desires.

8. He extends the verses by means of *nada*.[1] Now breath is sound. Therefore every breath, when it sounds, sounds loud as it were. The verse *nadam va odatīnām* (RV, VIII, 69, 2) is by its syllables[2] an *uṣṇih*, but by its feet an *anuṣṭubh*. *Uṣṇih* is life, *anuṣṭubh* speech. Thus he places speech and life in him. By repeating the first verse thrice, the verses become twenty-five. The trunk is the twenty-fifth, Prajāpati is the twenty-fifth. He has ten fingers, ten

---

[2] That is RV, X, 120, 1ᵃ, with ten syllables, and VIII, 69, 2ᵃ, with seven. He adds *pu* to them.

[3] Cf I, 1, 2 ad fin.

[4] i e. animals and vegetables (Sāyana)

[5] i e. ten syllables in RV, X, 120, 1ᵃ, the syllable *pu*, and seven in VIII, 69, 2ᵃ. Similarly with the other three *padas*.

[6] (*śirasi*) *chidrani* is the version of Sayana and it is as probable as any other, though the word originally meant breath and only metaphorically is transferred to its use as describing the organs of sense The nine 'orifices', seven in the head and two in the body, according to a Śruti (Jaiminiya Upanisad Brāhmana, II, 5, 9, 10; 6, 8, is the reference, I think) cited by Sāyana (*sapta vai śīrsanyah prāṇā dvau avañcau*), are referred to in the Kāṭhaka Upanisad, V, 1 (where in all, however, there are eleven), Śvetāśvatara Upanisad, III, 18, Yogaśikhā Upanisad, 4, Yogatattva Upanisad, 16, and elsewhere They are ears, eyes, mouth, nostrils and organs of evacuation, with the navel when ten are counted, as in the Jaiminiya Upanisad, and Jaiminiya Brāhmana, II, 77 (*J A O S.*, XV, 240), and *brahmarandhra* when eleven are counted Cf Deussen, *Philosophie der Upanishads*, p 243, E T, p 265; *Sechzig Upanishads*, p. 281, n. 1, and *nava vai śirasi prāṇāḥ*, Śāṅkhāyana Āranyaka, II, 2, which points to a different idea, for which see I, 4, 1, n 5, 5, 1, n. 6, 2, n 13

[7] That is, after deducting the ten from the eighteen

[8] In his interesting note on relative clauses in the Veda, Edgren, *P. A O S*, May, 1883, pp xii–xv, points out that unlike Greek, Vedic Sanskrit uses the rel. pronoun with the indic. This rule is not observed in the later Vedic literature, e.g Āśvalāyana Gṛhya Sūtra, I, 3, 1, *atha khalu yatra kva ca hotryam syat*, &c.

[1] i. e by the stanza, RV., VIII, 69, 2.

[2] It has four *padas*, and is therefore like an *anuṣṭubh*, which of course it really is. But it has in the Saṃhitā form only twenty seven syllables, or resolving the *y* in *aghnyānam* in *pāda* 3, twenty-eight, which is the number of syllables in an *uṣṇih*, which, however, has three *pādas* (8 + 8 + 12) only

toes, two legs, two arms, and the trunk is the twenty fifth He adorns this trunk, the twenty fifth Further this day (of the sacrifice) is twenty-five, the *stoma* hymn of this day is twenty-five, like is brought about by like So the two are twenty-five This is the twenty fifth with regard to the body Now with regard to the deities The eye, ear, mind, speech, and vital spirits, these five deities[3] have entered into this person, and he has entered into these five deities He is then[4] pervaded wholly in all his limbs up to his hair and nails So all beings, down to ants, are born thus pervaded A Rsi says (RV, X, 114, 8), 'A thousandfold are these fifteen members,'[5] for five arises from ten 'As large as heaven and earth, so large is it,' for the self is as large as heaven and earth. 'A thousandfold are the thousand mights,'[6] thus does the poet please and magnify the members 'As far as *brahman* extends so far does Vac,' wherever there is *brahman*, there is Vac,[7] wherever Vac, there is *brahman*, is what is meant The first[8] of these hymns has nine verses, for nine are the breaths, and it serves to win them The second has six verses, the seasons are six, and it serves to win them The third has five verses, the *pankti*[9] has five feet, and it is food, so it serves to win proper food Then comes a tristich, there are three threefold worlds, and it serves to conquer them These verses become *brhatis*,[10] the metre, the immortal, the world of the gods. This is the body. Even so he who knows this comes by this way near to the undying self.[11]

---

[3] Cf I, 3, 3 above II, 4 2

[4] 'Then' is taken by Max Muller as referring to the five deities, by Sayana as referring to the body in which *purusa* is. But the latter view seems quite sound The senses and *purusa* are absolutely inter connected For *sangah*, cf Jaiminiya Upanisad Brahmana, III, 3 3 For *a* cf Speijer *Vedische und Sanskrit-Syntax* § 83, *J A O S*, XXIII, 151 sq

[5] *uktha* Sayana translates *utkrstany angani* and, as hymns will not do he must be approximately right His view is that the fifteen are made up of the five above mentioned and the corresponding five elements (earth, water fire, wind, and ether) forming the mother and father But this is more than doubtful. For the ten the *atman* comes with its five organs and a complete body

[6] Because the senses are applied to a great variety of objects (Sayana)

[7] *Brahman* is in all and wherever a name is given, it is there, cf I, 3, 3. Sayana quotes a Śruti Taittiriya Āranyaka III, 12 *sarvani rupani vicitya dhirah | namani krtvabhivadan yad aste* || For the very close connexion of *brahman* and *Vac*, see I, 1, 1, n 8, Atharvaveda, IV, 30, Bloomfield, *Atharvaveda*, p 83

[8] RV, X 120 has nine verses The repetition of *evam* is due, says Sayana, to the comparative nature of these hymns as used in the Śastra, the first *evam* refers to the hymns as they stand in the Śastra, the second to them alone as they stand in the Samhita. This is of course impossible For the nine *pranas*, see I 3 7, n 6 For the seasons, cf Zimmer, *Altindisches Leben*, pp 373, 374, Oldenberg, *S B E*, XLVI 184

[9] *annam ca panktichandasa s abhyat al krtatvena panktirupeṇa utpannatvad va panktirupam*, Sayana. For the tristich and the worlds, cf. Śankhayana Aranyaka, II, 3

[10] The first *pada* of RV X, 120 1, has with *pu*, eleven syllables the first *pada* of RV, VIII, 69 2, seven verses, making eighteen So two *padas* give thirty six syllables or a *brhati* The twenty three verses give forty six *brhatis*, as each is extended similarly (Sayana)

Adhyāya 4.

Then comes the *sūdadohas* verse.[1] *Sūdadohas* is breath and by breath he joins together all joints. Then the neck verses.[2] They denote them as *uṣṇih* verses according to their metre. Next comes the *sūdadohas* verse. *Sūdadohas* is breath and by breath he joins together all joints. Then come the head verses. They are in *gāyatrī*, for it is the beginning of the metres, and the head is the beginning of the members of the body.[3] They are in *arkavat*[4] verses. *Arka* is Agni. They are nine verses, the head is of nine pieces.[5] He recites the tenth verse. It is the skin and hairs of the head. It serves for reciting more than the *stoma*[6] These form the *trivṛt stoma* and the *gāyatrī* metre, and it is after the production of this *stoma* and this metre that there arises all that is These verses serve for production. Children and cattle are his who knows this. Next comes the *sudadohas* verse *Sūdadohas* is breath, and by breath he joins together all joints. Then come the vertebrae verses[7] They are in *virāj* metre So one man says to another, 'Thou shinest above us,' or, 'Thou bearest a high neck,' to one who is proud[8] Or, again, because they run[9] close[10] together, they are taken to be[11] the best food For *viraj* is food, and food strength Next comes the *sudadohas* verse *Sūdadohas* is breath, and by breath he joins together all joints

---

[11] Sāyaṇa explains this obscure statement as referring to a birth as a *deva*. It may be doubted if it means more than he comprehends the immortal body (cf. *ātmā*, just above), i.e. he who knows these verses thus performs that part of the rite which corresponds with the body of the bird to which the Niṣkevalya Śastra is likened (cf. I, 1, 1). That *ātmā* above means body or trunk seems certain, and the second *ātmānam* can hardly refer to anything else. If it does, it may simply mean, 'he becomes immortal.' The acc. is governed by *abhi*, cf. I, 1, 2, n. 10.

[1] The Śāṅkhāyana Āraṇyaka treats all this very briefly, II, 1, covers all Adhyāya 3 and the *sūdadohas*. The *śiras* comes in II, 2, before the *grīvāḥ*, II, 3, then the *pakṣau* (*akṣa*, *bāhū*, *prahastaka*), II, 4-5; then the *caturuttarāṇi*, II, 6, the *aśītis*, *gāyatrī*, *bārhatī*, *ānuṣṭubhī*, II, 7-10, the *vaśa*, II, 11, the *dvipadāḥ*, II, 12, the *asudrāgna sūkta*, II, 13; the *āvapana*, II, 14, the *ānuṣṭubha samāmnāya*, II, 15; the *triṣṭupchata*, II, 16, then two miscellaneous chapters, II, 17, 18.

Sūdadohas is interpreted as yielding milk and it represents the verse, RV., VIII, 69, 3, *tā́ asya sūdadohasaḥ sómam śrīṇanti pṛ́śnayaḥ | jánman devā́nāṃ víśas triṣv ā́ rocané diváḥ |* This is the verse immediately after the *nada* verse. Its use here is explained by Sāyaṇa because it is *prāṇasvarūpā*. Cf. Śāṅkhāyana, II, 1: *imani parvāṇi saṃhitāni bhavanti*. *parvan* is apparently used vaguely; cf. I, 2, 3, n. 12.

[2] For them see V, 2, 1, which is expressly here ascribed to Śaunaka by Sāyaṇa, Introd., p. 20. *grīvāḥ* here means 'cervical cartilages', see n. 7.

[3] *śīrṣṇaḥ Prajāpateḥ prathamam mukhato gāyatrī samutpannā* (Sāyaṇa quoting the Yajurbrāhmaṇa), see Lévi, *La Doctrine du Sacrifice*, pp. 18, 53.

[4] That is, RV., I, 7, 1-9; in v. 1 *arkebhir* occurs.

[5] Cf. Taittirīya Saṃhitā, VI, 2, 1: *tasmān navadhā śiro viṣyūtam |* (Sāyaṇa); *nava vai śirasi prāṇāḥ*, Śāṅkhāyana Āraṇyaka, II, 2, and I, 3, 7, n. 6. The first expression of this precise idea seems to be in the Atharvaveda, X, 8, 43: *puṇḍarīkaṃ navadvāraṃ tribhir guṇebhir āvṛtam*. Whitney in his *Translation*, p. 601, thinks that the later *guṇas* are already referred to, but as Lanman (*Translation*, p. 1045) points out, Garbe (*Sāṃkhyatattvakaumudī*, *Abh. der Bayerischen Ak. der Wiss.*, XIX, 579) renders the three coverings as skin and nails and hair (cf. n. 6). A different view of the *prāṇas* appears in Kāṭhaka Saṃhitā (XXVIII, 3, cited by Weber, *Ind. Stud.*, XIII, 113, n. 2 for a grammatical point): *daśa vai puruṣe prāṇāḥ stanau dvādaśau* (= 11th and 12th). Cf. also Kauṣītaki Upaniṣad, II, 15.

---

[6] In the *trivṛt stoma* only nine verses of the hymn are used, but here the tenth verse of the hymn is also employed. This is not the case in Śāṅkhāyana Āraṇyaka, II, 2 Sāyaṇa cites Taittirīya Brāhmaṇa, I, 2, 6 *trivṛc chiro bhavati | tredhā vihitaṃ hi śiraḥ | loma chavir asthi parāca stuvanti |* Cf also Śāṅkhāyana, l c. *trīṇi vā asya śīrṣṇaḥ kapālāni bhavanti*, Śatapatha Brāhmaṇa, XIV, 3, 1, 19.

[7] *viyavāḥ* is taken by Sāyaṇa as a masculine singular, he derives it from *viśleṣeṇa yauti*, and calls it the part at the root of the wings, or, taking it perhaps as plural, from *viyu*, the lower bones of the neck It is most probably a plural. Max Müller's dictum that *tā virājo* proves nothing as it must be attracted goes too far The exact sense of *viyavāḥ* is doubtful But as *grīvāḥ* is plural and properly means 'the cervical cartilages' or windpipe, the front part of the neck, then most probably *viyavāḥ* is also plural and denotes the back part of the neck, the cervical vertebrae, which are usually denoted by *skandhāḥ* (Hoernle, *J R A S*, 1906, p 918, 1907, pp 2, 3) This gives a perfectly good sense and seems imperatively demanded by the allusion below to a stiffnecked man, in the proverb *grīvāḥ* is used (in a way which spoils the argument formally), either (*a*) as neck generally or (*b*) as cervical vertebrae, a sense found in the Śatapatha Brāhmaṇa, XII, 2, 4, 10 (Hoernle, p. 918). The *grīvāḥ* of the Āraṇyaka must, however, be different from the *viyavāḥ* Eggeling (*S B E*, XLIII 112, n 2) takes *viyavāḥ* as 'the roots (sinews) of the wings' (cf. Böhtlingk and Monier-Williams, *Dict*, s. v.) and Friedlaender (Introd, p. 10) translates 'Flügelansätze'

For *tā virājo bhavanti*, if it is, as is not likely, attracted, cf. examples in Delbrück, *Altindische Syntax*, pp. 564–566, Chāndogya Upaniṣad, VI, 16, 3 *etad ātmyam idaṃ sarvaṃ tat satyaṃ sa ātmā*, *infra* II, 6 1, and for Sanskrit, Speijer, *Sanskrit Syntax*, § 27 Examples, however, of non-attraction are found when needed to make plain the sense, e g the Chāndogya passage cited has *tat tvam asi* and so passim in the Upaniṣads (see Jacob's *Concordance*, p. 137) The use is very old, being found in Greek and Latin also Cf. below, II, 1, 2 *eṣa vā ṛṣayaḥ*, &c.; *eṣa vai padam*, &c. A case or two seems to occur of the reverse attraction, e g Maitrāyaṇī Upaniṣad, I, 2 1 *etad vṛttaṃ purastād duḥkhakṣyaṃ etat prāśnam*, where see, however, Max Müller's note (*S B E*, XV, 288, n 1)

[8] This is the translation adopted by Max Müller from Sāyaṇa. This may be correct, but the passage would certainly run better if it were taken all as one sentence 'So one man says to another, "Thou shinest above us, thou bearest indeed a stiff neck," that is to one who is proud' But the position of *stabhamānaṃ vā* renders this doubtful On the other hand Sāyaṇa feels that it is difficult to explain the *grīvā vai dhārayasi* if taken alone, and this seems to me to turn the balance in favour of the translation here suggested For this meaning of *grīvāḥ* see Śatapatha Brāhmaṇa, XII, 2, 4, 10, and Hoernle, *J R A S*, 1906, pp 916–918 Śāṅkhāyana Āraṇyaka, II, 2 *trīṇi vā asya grīvāsu parvāṇi bhavanti*

[9] *dravanti* must be from √*dru gatau* (Dhātupāṭha, XXII, 46) as Sāyaṇa says. Monier-Williams' *Dict* omits this form giving *dravanti*, RV. X, 34 5, as the only quotable form (see v. Schroeder, *Vienna Oriental Journal*, XIII, 119 122) v. Schroeder (ibid., 297, 298) finds the same root with *upa + ā* in the sense 'anlegen' in Kāṭhaka Saṃhitā, VI, 2 *dikṣu upādutyaḥ*, and

2 Now comes the right wing It is this world,[1] it is this Agni, it is speech, it is the Rathantara, it is Vasiṣṭha, it is a hundred[2] These are the six powers of it. The *sampāta* hymn serves to win desires and for firmness The *pankti* verse serves for proper food Next comes the *sūdadohas* verse *Sūdadohas* is breath, and by breath he joins together all joints Then follows the left wing It is that world, it is that sun, it is mind,[3] it is the Bṛhat, it is Bharadvaja, it is a hundred[4] These are the six powers of it The *sampāta* hymn serves to

---

Kapiṣṭhala Saṃhita IV, 1 *lakṣa upadulyah* and compares Greek δύω ἐνδύω, ἐκδύω and Latin *induo, exuo* Winternitz (*Gesch der indisch Litt*, I 98) still treats *davisani* as if it meant 'I will play', as taken by Geldner (*Siebenzig Lieder*, pp 158 sq) It cannot be from √*du* 'burn', as suggested doubtfully in Whitney, *Roots &c*, p 75

[10] *sambiṣṭhatamaḥ* is clearly the reading, from √*bamh* (i e *bṛṃha* for *baṃha*) It occurs in the Taittiriya Āranyaka Cf Whitney, *Sanskrit Grammar*, § 954, Macdonell, *Vedic Grammar*, p 58, Wackernagel *Altindische Grammatik*, I, 44

[11] *annatamam pratyacyante* is thus construed by Max Müller who says the adverbial form is vouched for by Panini, V 4, 11 The free use of comparatives and superlatives of this class is a sign of early style but in the earliest literature (RV and AV) the accusative neuter is preferred, see Whitney *Sanskrit Grammar* §§ 1111 e, and 1119 Cf also Śatapatha Brahmana, X 2, 2, 5 *alamam khyayate* ibid, X, 4, 2, 10 *annatamam gopayati* and Delbrück, *Altindische Syntax*, p 194, *prataram iva krayante*, Aitareya Brahmana III 48, 4 *te nataram pāpmanam apahata*, Aitareya Brahmana, IV, 25, 3 But none of these or similar cases seem to justify *annatamam*, and the sense given by Sayana as *prapyante* would equally be obtained by rendering 'they approximate towards (*prati* + √*ac*) that which is most truly food' (fem, because *viraj* is fem) For such a use of *annatama* cf RV, II 41, 16 (*ambitama naditama, devitama*), and many examples in Delbrück, l c, p 193 and for the acc cf *abhitaḥ padyante* with acc I 1, 2, n 10 The acc. is governed by the preposition *pad* may be taken with *dutah* as equivalent to a finite verb which is not very probable, or with *pratyacyante*, as giving the explanation of 'the *vyuhaḥ* are *viraj*'

[1] Agni is the guardian of this world and he is also Vac, II 4 2 and Vac is Rathantara, III, 1, 6 (Sayana) while Vasiṣṭha brought the Rathantara

[2] See V 2, 2 for the verses. They are RV VII 32 22 and 23 VIII 3 7 and 8 (three each according to the reckoning of the Aranyaka) I 32 (15 vv), VII 18 1-15, VII, 19 (11 vv), 20 (10 vv), 23 (6 vv), 25-29 (26 vv), IV, 20 (11 vv), making 100 in all, and then the *pankti*, I, 80, 1, IV, 20, is styled the *sampata* hymn

[3] The moon is the deity of mind, but here the identity of sun and moon is meant, says Sayana, and *manas is Bṛhat*, and *Bharadvāja made the Bṛhat*

[4] See V, 2, 2 for the verses. They are RV, VI 46, 1 and 2 VIII, 61, 7 and 8 (three each according to this reckoning), VI, 18 (15 vv), 23 (10 vv), 24 (10 vv), 25 (9 vv) 31-38 (40 vv), IV, 23 (11 vv), making 101 in all, and then the *pankti* I 81, 1 The *sampata* is IV, 23, cf Aitareya Brāhmana IV, 30, 2 The *śatam* is not precisely accurate, but the inaccuracy is deliberate There are 100 in the right and 101 in the left, and the *pankti* verse adds one to each of them For the varying sizes of the wings see Taittirīya Brāhmana, I, 2, 6 3

win desires and for firmness The *pankti* verse serves for proper food These two are deficient and excessive The Brhad is male, the Rathantara is female The excess is of the male the deficiency of the female Therefore are they deficient and excessive Now by one feather is the left wing of the bird the better and therefore the left wing is the better by one verse Next comes the *sudadohas* verse *Sudadohas* is breath and by breath he joins together all joints. Then follows the tail This consists of twenty one *dvipada* verses[5] For twenty one are the backward feathers of the bird Again of all *stomas* is the *ekavimśa* the support, and the tail the support of all birds He recites a twenty second verse This is given the form of two supports[6] So all birds support themselves on their tails and having supported themselves on their tails they fly up For the tail is a support. He (the bird) is supported by two decades of *viraj* verses He again, the man is supported by these two *dvipadas* the twenty first and twenty-second That which forms the bird serves to obtain the desires of the man That which forms the man serves for his prosperity, glory, proper food, and honour Next comes the *sudadohas* verse next an additional verse, next the *sudadohas* verse The *sudadohas* is male the additional verse female Therefore he recites the *sudadohas* verse on either side of the additional verse Therefore the seed of the two when effused obtains oneness with regard to the woman alone So birth takes place in and from the woman Therefore he recites the additional verse in that way[7]

3 He recites the eighty *gayatri* tristichs[1] The eighty *gayatri* tristichs are this world and whatever glory, might[2] wedlock proper food, and honour there is in this world may I obtain it may I win it may I possess it may it be mine

---

[5] These verses RV X 157 (5 vv) 172 (4 vv) besides twelve from other Śākhas are given in V 2 2 Cf Taittiriya Brahmana I 2 6, 4 *ekavimśam pṛṣṭhānām* | *dvipadāsv ekavimśaḥ* *prati tiṣṭhati* |

[6] The feet Sayana says The idea seems to be when there are twenty two verses, that twenty represent the feet of the bird and two those of the man When twenty one it is the tail that is in question See also V 2 2

[7] *atra* is rendered *asmin viṣaye wohlhage* in Sayana It seems rather to refer to the position of the additional verse between the *sudadohas* For *abhi* in the Aitareya Brahmana cf Liebich *Bezz Beitr* XI 281 Speijer *Vedische und Sanskrit-Syntax* § 83 *Io atas* (Whitney *Sanskrit Grammar* § 1098) is possible and must be so taken if *ojas* is a noun as given in Lohtlingk and Monier Williams *Dict* But it is simpler to take it and *pra*° as adjectives. Cf II 1 2 *prthiv iah* where *stah* is probably meant Cf *ayanayah* in Taittiriya Upanisad II, 8 (*S B E*, XV 61 n 2) *ayanadevah* Jacob *Concordance* p. 162 For the *ekalera* see Weber *Ind Stud* X 142 n 3 XIII 113 n 2 Bolling *J A O S* XXIII 321 sq

[1] The three sets of tristichs are the food of the bird They are set forth in detail in V, 2 3 4, 5 respectively

[2] Might is interpreted by Sayana as *vedaśāstrapravṛttiprītiḥ* and as opposed to *apaciti* as *dhanadhānyad samṛddhau pūjā* but he gives *tejas* as an alternative rendering

Next comes the *sūdadohas* verse *Sūdadohas* is breath, and by breath he links together all this world He recites the eighty *bṛhatī* tristichs The eighty *bṛhatī* tristichs are the sky world, and whatever glory, might, wedlock, proper food, and honour there is in the sky-world, may I obtain it, may I win it, may I possess it, may it be mine. Next comes the *sūdadohas* verse *Sūdadohas* is breath, and by breath he links together all the world He recites the eighty *uṣṇih* tristichs The eighty *uṣṇih* tristichs are that world, heaven,[3] and whatever glory, might, wedlock, proper food, and honour there is in that world, and the divinity of the gods,[4] may I obtain it,[5] may I win it, may I possess it, may it be mine[6] Next comes the *sūdadohas* verse *Sūdadohas* is breath, and by breath he links together all that world

ADHYĀYA 5

He recites the *vaśa*[1] hymn desiring all to be in his power There are twenty-one[2] verses, for twenty-one are the parts in the stomach. Then the *ekaviṃśa* is the support of all *stomas* and the stomach the support of proper foods They are in different metres For the intestines are larger one than the other,[3] some small, some big He recites them with the word *om* according to the metre and according to the manner of the occurrence[3] For the intestines are as it were according to the manner of their occurrence, some shorter, some longer Next comes the *sūdadohas* verse *Sūdadohas* is breath, and by breath he joins together all joints. Having recited this verse twelve times,[4] he leaves off Twelvefold are these breaths,[5] seven in the head, two in the breast, three below There are they contained, there are they perfected Therefore there[6] he leaves off The hymn, 'O Indra and Agni, ye two' (RV, VIII, 40), forms the two thighs which belong to Indra and Agni,[7] the two supports with broad bones The

---

[3] The insertion of *dyauś* is curious and Sāyaṇa notes it as being *viśeṣaṇārtham*

[4] This is taken by Sāyaṇa as being equal to *brahman* the honoured of the gods, Indra, &c, and he quotes for it a passage intended to be Śvetāśvatara Upaniṣad, VI, 7 *taṃ īśvarāṇāṃ paramaṃ maheśvaraṃ taṃ devānāṃ paramaṃ daivatam* (so l., read with S *devatānāṃ* (or *daivatānāṃ* with ed) *paramaṃ ca daivatam*) But, though Max Müller accepts this view, it is simpler to equate it merely to the divinity of the gods, i e the divine nature

[5] Probably *aśnavam* is suggested by the *aś* of *aśīti* equated to √*aś*, as stated by Eggeling (*S B E*, XLIII, 112, n 1) The view that *aśīti* contains the √*aś*, eat, probably led to the identification of the *aśītis* with *anna* as throughout the Āraṇyaka and also in Śatapatha Brāhmaṇa, VIII, 5, 2, 17, but when Sāyaṇa in his commentary on this passage calls the *aśītis annarūpāḥ* he merely refers, I think, to that identification and does not base it on etymology, as suggested by Eggeling

[6] For the subjunctive as optative in sense, cf Speyer *Vedische und Sanskrit Syntax* § 186 and for the question of subj and opt, Goodwin, *Greek Moods and Tenses*, App I For subjunctives in Aitareya Brāhmaṇa see Aufrecht, pp 429 430, and a full list in Böhtlingk, *Chrestomathie*², pp 347 350 See also Delbrück, *Altindische Syntax*, pp 306 sq, *Vergl Syntax*, II, 365 sq

[1] In Śāṅkhāyana Āraṇyaka, II, 16, the *sūdadohas* verse is repeated twenty four times It agrees in counting the *vaśa* hymn as referring to the *udara* The hymn is RV, VIII, 46 See V, 1, 5 It is called a [illegible] in I, 5, 2 below The name is given because the author is Vaśa (Aśvya) says Sāyaṇa and this is probably the case, showing the early date of the traditional authorships Cf Śatapatha Brāhmaṇa, VIII, 6, 2 3, and Eggeling *S B E*, XLIII, 112, n 2. See also Oldenberg, *Z D M G*, XLII, 215 sq

[2] Only twenty of RV, VIII, 46, but the *sūdadohas* verse is counted in, see, however, on V, 2, 5 ad fin

[3] *Vikṣudram* is rendered 'confused' by Max Müller The rendering in the text is that of Sāyaṇa and is supported by the use of *vikṣudrā iva hi paśavaḥ* in Aitareya Brāhmaṇa, V, 6, 5,

---

where see Sayana's explanation For the compar, see Delbrück, *Altindische Syntax*, pp 196 sq The *hṛdaya* is *sthūla* according to Sayana The metres of RV, VIII, 46, are very various in the eyes of the Anukramani For the form *antastya*, cf Whitney, *Sanskrit Grammar*, § 1245 c The twenty transverse processes (*kuntāpa*) in the abdominal portion of the spine (*udara*), Śatapatha Brahmana XII, 2, 4, 12, 14 (Eggeling, *S B E*, XLIV, 164, n 1, Hoernle, *J R A S*, 1907, pp 8, 10) suggest a different rendering, but the tradition is quite plausible The epithet used too does not suit bones It is, however, to be noted that in Śāṅkhayana Āranyaka, II, 6, the *anūka* which can mean the lumbar portion of the spine (RV, VI, 163, 2, cited by Hoernle, *J R A S*, 1906, p 917) as well as the thoracic portion (Śatapatha Brahmana, XII 2, 4, 14 cited ibid, 1907, p 9) is said to have twenty-one *parvans*, and certainly this is so strikingly parallel to the *udara* with its twenty *kuntāpas* (Śatapatha Brahmana, XII, 2, 4, 12), since the twenty first may be the *anūka* itself, that it is possible that this passage should be so interpreted. But to do so would only be justified by the belief that these early medical statements rest, as Hoernle (*Osteology*, pp 101–109) holds, on acquaintance with current medical views, an opinion I do not share for reasons given in *Z D M G*, LXII, 134 sq

[3] *yathopapāditam* is a difficult phrase Max Muller, following Sāyana, renders 'according to rule' Sayana explains this with reference to the technical rule, given by Aśvalāyana Śrauta Sūtra VI, 5, 11, 12, that *dvipadā* verses are to be recited with a pause in the middle and *om* at the end, while *ekapada* verses are to have *om* prefixed and affixed This is artificial and perhaps it only means (cf Monier Williams' *Dict*, s v) 'just as it may happen', which version suits the *antastyam* better, and Sayana ends up with practically this version *Chandaskṛtam* (for the Sandhi, cf Wackernagel, *Altindische Grammatik*, I, 340, Aufrecht *Aitareya Brahmana* p 430, Macdonell, *Vedic Grammar*, p 71) refers of course to the different metres of the hymn Cf V, 2, 5, and note For the gerund, cf Whitney, *Sanskrit Grammar*, § 995, Delbruck, *Altindische Syntax*, pp 402 sq, Speyer, *Vedische und Sanskrit-Syntax*, § 224

[4] That is once each in the verses representing the body, neck, head, vertebrae, right side, left side, tail, food in three sets of eighty tristichs, and the *vaśa* hymn In the case of the tail there is a *sudadohas* before and one after the additional verse, and so the number twelve is made up

[5] The number twelve is clearly to suit the twelve repetitions of the *sudadohas* verse It is probably got by taking the seven openings in the head, I, 3 7, 8, and adding the two in the breasts, and the *nābhi*, *pāyu* and *guda* For other fanciful enumerations cf Deussen, *Philosophie der Upanishads*, pp 255 sq, E.T, pp 283 sq, and Jaiminīya Upaniṣad Brāhmana cited in note 6 on I, 3 7

[6] He does not use that verse in the 'thigh' verses.

[7] Indra and Agni are the strongest of gods and the thighs enable the bird to fly aloft (Sāyana). In Śāṅkhāyana these verses form part of what represents the tail in the Aitareya, but

verses have six feet[9] for firmness Man[10] has a double support, cattle have four feet So he places the sacrificer with his double support among the four-footed cattle. The second verse has seven feet,[11] and he makes it into a *gāyatrī* and an *anuṣṭubh* Now the *gāyatrī*[12] is *brahman*, the *anuṣṭubh* is Vāc, and so he unites Vāc and *brahman* He recites[13] a *triṣṭubh* at the end The *triṣṭubh* is strength and so with strength he surrounds animals. Therefore animals[14] depend on strength for their rising and their going forth

2 In the Niṣkevalya hymn addressed to Indra,[1] 'To thee, the mighty, the intoxicated one' (RV, X, 50), he inserts a *nivid*[2] For clearly thus does he place strength in himself They are *triṣṭubhs* and *jagatīs*[3] They say, 'Why then does he insert a *nivid* among *triṣṭubhs* and *jagatīs*?'[4] 'One metre only

---

in Śatapatha Brāhmaṇa, VIII, 6, 2, 3, they are referred to the wings, see Eggeling, *S B E*, XLIII, 111, 112 See also V, 3, 1, n 1, above, p 37

[9] They, except two and twelve, are in the so-called *mahāpaṅkti* metre For the correct expression *ūrvasthīvs*, cf the use of *ūruphalaka* for the thighs, Hoernle, *Osteology*, pp 206, 215, perhaps wrongly read for *ūru*° If *ūru*° is read here, it means 'the thighs and knees are supports', cf Vājasaneyi Saṃhitā, XVIII, 23, Āpastamba Śulba Sūtra, XI, 2 and 3 (*Z D M G*, LVI, 362)

[10] Cf I, 1, 2, n 5

[11] It consists of seven *pādas* of eight syllables and can be made into an *anuṣṭubh* preceded by a *gāyatrī* According to Sāyaṇa, following Āśvalāyana, in the latter case there is a pause after the second *pāda*, and *om* after the third In the former the *om* follows the fourth, and there is a pause after the second *pāda*

[12] Cf I, 1, 1, n 8

[13] Sāyaṇa holds this to refer to a special mode of recitation, by which after the first *pāda* there is a pause, and *om* follows the second, and so for the third and fourth, and which he calls *triṣṭupsamaya* This is from Āśvalāyana Śrauta Sūtra, VI, 15 6, RV, VIII 40 12 is an *triṣṭubh*

[14] This must mean, as Sāyaṇa says, and as Max Müller takes it that animals obey a master The last two accusatives are loosely connected as accusatives of point in which, such acc are more frequent in Greek and Latin (e g Tacitus *Ann*, I 27 *deserunt tribunal* *manus intentantes, causam discordiae et initium armorum*) In the Maitreya Upaniṣad (Max Müller, *S B E*, XV, xlv) *sa tatra paramaṃ tapa ādityam udikṣamāṇa ūrdhvas tiṣṭhati* Max Müller observes that *asthāya* would be expected but it is not necessary to suspect the text For the compound, cf Jaiminīya Upaniṣad Brāhmaṇa I, 47 and 48 In *palum parigachati* the acc is dependent on *pari* so Aitareya Brāhmaṇa, VIII, 28, 1, 2, *tam etah pañca devatah parimriyante* (correct Speyer, *Vedische und Sanskrit Syntax*, § 88)

[1] Forming part of the thigh verses

[2] Sāyaṇa says the *nivid* (cf Bṛhadāraṇyaka Upaniṣad III, 9, 1, for a Vaiśvadeva *nivid*) is to come after the fourth verse and is to be *Indra devah somam pibatu* (*pinnamanah* S), &c (Śāṅkhāyana Śrauta Sūtra, VIII, 17, 1) 'In himself' he renders as 'in the bird in the shape of the Śastra' It may mean 'in himself' only For the *nivids* see Scheftelowitz, *Die Apokryphen des Ṛgveda*, pp 136 sq The *nivitsam jñake granthe* in R is unhappily, a myth, the reading (in R², S, &c) is *saṅghe*

[3] The metre is irregular According to the Anukramaṇī, one and seven are *jagatī*, the rest *triṣṭubh* Sāyaṇa offers the alternative of the last two being *jagatī*

[4] The *prakṛti* has *triṣṭubhs* at the midday pressing and so the deviation needs explanation Note that the answer is repeated, and is not that of the Āraṇyaka itself, though it is adopted.

cannot support or fill the *nivid* of this day,' so he inserts the *nivid* among *tristubhs* and *jagatis*. Let him know that this day has three *nivids*[5] The *vaśa* hymn is a *nivid*, the Vālakhilyas are a *nivid*, and the *nivid* is a *nivid*. So let him know that there are three *nivids* in this day Then come the hymns, 'Who in the forest as it were has been put down' (RV, X, 29), and 'Who first is born, the wise one' (RV, II, 12) In these is the verse, 'When the hopes of all are on food' (RV., X, 29, 4), and it serves to win proper food Then comes an insertion. As many decades of verses[6] in *tristubh* and *jagatī* addressed to Indra as they insert between these two hymns, after transforming them into *bṛhatīs*, so many years do they live beyond the normal life[7] By this insertion life is gained Next he recites the *sajanya*[8] hymn that cattle may come to his offspring Then he recites the *Tārksya*[9] hymn Tārksya is welfare, and the hymn leads to welfare Thus he procures welfare. He recites the *ekapadā*[10] verse that he may at once be all and win all the metres[11] In the hymn, 'All songs have caused Indra to grow' (RV, I, 11), there are additions[12] to the verses Seven verses does he make additions to For seven are the breaths[13] in the head, and so does he place breaths in the head He makes no addition to the eighth The eighth is speech, and (he thinks), 'Let not speech be mingled with my breaths' Therefore speech, though it has the same abode as the breaths, is not mingled with them He recites the *virāj* verses[14] *Virāj* verses are food, and serve to win food He ends with the hymn of Vasistha,[15] that he may become Vasistha (He should end) with the perfect verse,[16] with the word 'great' in it, 'This praise to the great, the terrible, the bearer' (RV, VII, 24, 5) In the verse, 'Like a steed labouring at the yoke, he has taken his place' (RV, VII, 24, 5) the yoke is the end (of the car) This day is the end[17] Thus is (the verse) fit for the day (He should end) with the perfect verse, with the word 'praise' in it, 'O Indra, this praise celebrates thee' (RV, VII, 24, 5ᵉ) With regard to the verse, 'As heaven over heaven,[18] give us glory' (RV, VII, 24, 5[d]), wherever the speech of the Brahman[19] is uttered, this is his glory, when he who knows ends with this verse. So let him who knows this end with this verse

---

[5] Sayana says the *nivid* here referred to above is the *mukhya nivid*, and the others are *aupacarika*, and he assigns the use of several metres in the *vaśa* and of *tristubhs* and *jagatis* in the Valakhilyas as the reason for their being styled *nivids* The Valakhilyas occur in the *bṛhatī* tristichs see V 2, 4 The Valakhilyas and Nivids are printed from the Kaśmir MS by Scheftelowitz, *Die Apokryphen des Ṛgveda*, 1906 See also Oldenberg *Gött gel Anz*, 1907 Scheftelowitz (pp 10 sq) argues that the Valakhilyas are among the old Khilas which were accepted by some schools (probably the Baskala and Mandukeya) and not by others (Śakalya), who only included 'Nationalhymnen' in their tradition Oldenberg (pp 231–235) effectually—in my opinion—demolishes this argument and leaves the Khilas what they have hitherto been considered, later additions to the Ṛgvedic tradition, though doubtless in themselves old The Valakhilyas are mentioned by that name in Kausitaki Brahmana, XXX, 8, Taittiriya Āranyaka, I, 23 Maitrayani Upanisad, II, 3, &c Cf also Macdonell on *Brhaddevatā* VI 48, III 116 Max Muller, *Marut Hymns*, pp. xxxiii sq, who is, however, wrong in saying that they do not occur in any Khila collection, *St Petersburg Dict*, VI 954

[6] Sayana renders *daśat nam* as 'taken from the ten thousand numbered Samhita', and Max Muller takes it as 'taken from the ten Mandalas' Neither meaning appears certain *daśati* elsewhere means a decade, *daśatayi* refers to the Samhitā and I think *daśatinam* must mean decades. They are decades of *tristubhs* and *jagatis* turned into *bṛhatis*, and it may be noted that six *tristubhs* and two *jagatis* give ten *bṛhatis* This may be the reference, or the reference may be to the fact that three *tristubhs* and seven *jagatis* give thirteen *bṛhatis* Sāyana contents himself with explaining that of three *tristubhs* and four *jagatis* nine *bṛhatis* can be made which does not seem to be of much help V, 3 1, appears to support the view here taken

[7] That is, no doubt, one hundred years, V, 3, 1, and I, 2, 2, n 14 For *ā dhram* with abl, cf Speijer, *Vedische und Sanskrit-Syntax* §§ 58, 90, Delbruck, *Altindische Syntax*, p 113, Liebich, *Pess Beitr*, XI 295

[8] That is, RV, II, 12, called *sajanīyam* in Aitareya Brāhmana, V, 2, 1 For *arjayan* cf Speijer, l c, § 188, Whitney, *Sanskrit Grammar*, § 587 Delbruck, pp. 353 sq The form is given by Whitney, *Roots, &c*, p 14, as only found in the Sūtras and Epic

[9] RV, X, 178, addressed, says Sayana, to Tarksya Garuda, but cf Macdonell, *Vedic Mythology*, p 145 R reads *Tark o* but the Sarvānukramani and Bṛhaddevatā agree with the RV Cf Kausitaki Brahmana, XXX, 5, and III, 2, 6, n 5 For the form, cf Wackernagel, *Altindische Grammatik*, I, 233 Macdonell, *Vedic Grammar*, p 43

---

[10] Sayana gives it as *Indro viśvam virajati*, see V, 3, 1

[11] It is the last of the metres used

[12] The phrase occurs also in Śankhayana Āranyaka, II, 12, and is further explained in V, 3, 1, where Sāyana is much more explicit than in his commentary here The idea is 1^a, 1^b, 1^c, 2^a, 1^d, 2^b, 2^c, 3^a, 2^b, 3^b, and so on The result is a curious intertwining *vyatisanga*, of verses A similar proceeding is found in Aitareya Brahmana, IV, 3 VI, 24 For other examples of this process, called *viharana* also, cf Śankhayana Śrauta Sutra, VII, 15, 4 (at the Āpyayana of the Madhyandina Savana), IX, 5, 4 (at the Sodaśin), XII, 11 5, and Āśvalāyana Śrauta Sutra, VIII, 2, 7 (Valakhilyas, when a *vyatimarśam viharana* takes place), Roth, *Z D M G*, XXXVII, 109, who traces the practice even in the Rgveda, and Hillebrandt, *Ritual Litteratur*, p 103

[13] The openings are referred to above, I, 3, 7, 8 4 1, 5, 1 The eighth as Vāc refers no doubt to the tongue The first reference to seven openings is not (as Deussen seems to hold) that in Atharvaveda X, 8, 9, which is there practically unintelligible and which is given up by Whitney (*Translation* p 597) but which appears in a more plausible form in Bṛhadaranyaka Upanisad, II, 2, 3, where the verse has as its last *pada* '*vag astami brahmana samvidana*, but that in AV, X, 2, 6, where the seven *khani* are given as eyes, nostrils, ears and mouth (see Whitney, *Translation*, p 568, Hoernle, *J R A S*, 1907 p 12) In ver 7 the tongue is specially mentioned The seven, however, seem already to have included Vac, to judge from the explanation in that Upanisad, II, 2, 4, where, according to Deussen's translation, it is intended to stand for the tongue, as indeed seems clear from its being connected with Atri and *atti*, though Böhtlingk, in his translation, p 26, takes it otherwise Sayana here refers to the other *pranas* as *jihvatiriktaghrāṇādibhiḥ* Vac apparently then is little more than a duplicate Cf I, 3, 7, n 6 For the seven *pranas*, cf also Śatapatha Brahmana, IX, 5, 2, 8

[14] RV, VII, 22, 1-6, see V, 3 1

[15] RV, VII, 24 For the word *vīha* in ver 5, see Oldenberg *S B E*, XLVI, 135

[16] The sixth verse is placed after the fourth and the fifth comes at the end, V, 3, 1

[17] The last day is the *udayaniyatiratra* For *dhuh*, cf RV, II, 2, 1 *dhuksidam* 'charioteer', Hopkins, *J A O S*, XIII 237 sq

---

[18] Sāyana renders, 'as in heaven so in the worlds (the *maharloka*, &c) above the heaven!' The same *maharloka* is dragged in to explain II, 4, 1

[19] Sāyana vaguely says *vedasambandhi vakyam* But I think there is a clear reference to the speech of the Brahmans The opposition is probably as yet mainly to non Aryan tongues, cf Tāndya Mahabrahmana, XVII, 1, 2, 9 Whatever be the history of Vedic and Sanskrit, it is difficult to believe at this date (800-700 B C) in very much development of Prakritic forms so as to render contrast with them natural though no doubt such forms existed (Cf the discussions in *J R A S*, 1903, pp 435 sq) See also I, 3, 1, n 5, III, 2, 5, Śatapatha Brahmana, III, 2, 1, 23 with Eggeling's note on the Kānva reading, Macdonell, *Sanskrit Literature*, pp 20–24, Lanman's notes on Whitney, *Atharvaveda*, III, 12, 4, X, 9, 23; XII, 4 4, XIX, 8, 4, Wackernagel, *Altindische Grammatik*, I xvii. The Atharvan passages point to the possibility that some of the Prakritic forms are due to the later tradition and are no evidence for the time of the Atharva. Similar considerations are familiar in the Homeric question see especially Monro, *Odyssey*, XIII-XXIV, Appendix, pp 455–484 The early date of the Epic if adopted (cf my notes, *J R A S*, 1906, pp 1 sq, 1907, pp 681–683) would bear out the view that Prakrit was not so early as has been claimed (cf Franke, *Pali und Sanskrit* (1902), pp 49 sq) the ruling speech of the people No doubt the Mantra literature represents a poetic diction (cf Winternitz, *Gesch der indisch Litt*, I, 38 sq) but it has not yet been made even plausible that contemporaneous with it were really Prakritic dialects, though no doubt in certain cases the tendencies which produced Prakrit were already in full force The subsequent history is doubtless that of the more and more marked separation of the literary and the vulgar speech (cf Delbruck's neat summary of the history, *Altindischer Verbum*, pp 3 sq) and the place of the Epic must (it seems to me) be found either before the decay of speech had rendered the Sanskrit unintelligible to the warrior classes of the populace—and the Epic appears in origin to have been precisely like the Homeric Epic (see Lang, *Homer and His Age*, 1906) poetry composed by poets at the courts of princes who sang to the retainers and friends of their patron—not of course an epic of the lower classes or the mere cultivator, though he would understand it in part—or after the general revival of Sanskrit in the second and third centuries A D The latter view seems to raise more serious difficulties in our conception of the history of language and literature than it can pretend to solve I still think the earliest epic (as distinguished from mere *ākhyānas* or *itihāsas*) must date from the eighth to sixth centuries B C and be contemporaneous with the Brahmanas and Aranyakas, though of course in the case of both Mahabharata and Ramayana extensive additions have been made by priestly hands in the two or three centuries before the Christian era. Only thus can a real place be found for Panini's *bhāsā*, or for the custom of the Drama which must represent a real state of affairs when Sanskrit could be used by kings and nobles as intelligible to their inferiors. For what Ksatriyas spoke in the eighth to sixth centuries B C we have no evidence save the Brahmanas, where they speak Sanskrit, and the Epic, so far as we can regard it as contemporaneous In view of the fact that Patañjali knew the Drama (*Ind Stud*, XIII, 456 sq), it seems only reasonable to assign to his period the separate use of Sanskrit and Prakrit for the different characters and either then or earlier the state of affairs must have been real Nor is it possible to accept the theory of Lévi, Barth, and Grierson (*Ind Ant.*, XXIII, 110) that an originally Prakrit drama was turned into Sanskrit This theory leaves no plausible explanation open of the use of Prakrit for some characters, since *ex hypothesi* both men and women equally used Prākrit in conversation, and, while it is quite intelligible that after the drama was an

3 'We choose that of Savitr' (RV, V, 82, 1–3) and 'O god, Savitr, this day' (RV, V, 82, 4–6), are the strophe and antistrophe (of the Vaiśvadeva hymn[1]) and are perfect in form as belonging to the one day ceremonial[2] Much indeed is done on this day that is forbidden and (the Vaiśvadeva)[3] is the atonement Now atonement is rest, and so at the end (of the sacrifice) the sacrificers rest on the atonement of the one day (the Vaisvadeva) as their rest He rests who knows this, and they also rest for whom the Hotr priest who knows this recites this Vaisvadeva Then comes the Savitr hymn, 'Of Savitr, the god, this great and desirable thing' (RV, IV, 53) Great[4] is the end This day is the end So the verse fits this day. Then comes the Dyavā-Prthivi hymn, 'Which is the elder, which the younger' (RV, I, 185), in which (the verses) end alike[5] This day is one on which (the sacrificers) end alike So the hymn fits the day Then comes the Rbhu hymn, 'Born not for steeds nor reins, worthy of praise' (RV, IV, 36) With regard to the words, 'The chariot of three wheels,' the hymn is possessed of three (*trivat*), and what is possessed of three[6] is the end This day is the end So the hymn fits the day The hymn, 'Of this benignant, greyhaired, priest' (RV, I, 164), addressed to

---

established fact it could remain popular long after it had ceased to be intelligible the popularity of a literary form *ex initio* unread is very strange People in England would not go to Italian opera (which by the by is certainly understood by fifty per cent of the spectators), but for the fact that there was once and still is a popular drama in England

Of course it cannot be contended—nor is it so claimed—that Sanskrit was ever the vernacular of the lower classes What we have to conceive is rather a parallel series of languages diverging from vernaculars older than the Vedic of the earliest hymns, each current among certain portions of the people, but in their earlier stages intelligible to all The Greek and English dialects give a fair parallel, in both cases ending in a common form of educated and literary speech. Cf Jacobi *Z D M G*, XLVIII 407 sq

[1] Cf Sankhayana Āranyaka, II, 18, which differs in detail as usual This section refers to the evening Soma pressing, when the Vaiśvadeva and Āgnimaruta Śastras are recited, see Weber, *Ind Stud*, X, 353, 354 n 3, Eggeling *S B E* XXVI, 325, 361 (Vaiśvadeva), 369 (Āgnimaruta) Caland and Henry, *L'Agnistoma*, pp 334 sq

[2] The *prakrti* is here the Visvajit, and the *mulaprakrti* the Agnistoma, as usual

[3] Cf I, 2, 1 Sayana selects the two tristichs as the immediate point of reference

[4] Because greatness is the *ne plus ultra* of all things (Sayana)

[5] *udarka* is equal to *anta* in the one case and to *uttarakale eva bhavi phalam* in the other, according to Sāyana. The sacrificers obtain *brahman*, he adds, but this is hardly meant. Most of the verses end alike in this and the following cases Cf for the word, Aitareya Brāhmana, V, 1, 3, 19

[6] This is not obvious. Sayana refers it to the case where two wheels are inadequate and a third is found necessary This wheel, as before the *dhuh*, is the end, I, 5, 2 Zimmer (*Altindisches Leben*, pp viii, ix) points out that *tricakra* in the Samhitās is merely an epithet of the cars of the Aśvins where its sense is mythological and he therefore denies the existence of three wheeled cars in the Vedic period, but cf Weber, *Berl Sit*, 1898, p 564 n 1

the All gods, is multiform [7] This day is multiform So the hymn fits the day (Of what he recites) the end [8] is, 'Forming the waters, the buffalo hath lowed' (RV, I, 164, 41) The hymn, 'May powers auspicious come to us on every side' (RV, I, 89) addressed to the All gods, is one containing an insertion, and is perfect in form as belonging to the one day ceremonial Much indeed is done on this day that is forbidden and (the hymn with the insertion [9]) is the atonement Now atonement is rest, and so at the end (of the sacrifice) the sacrificers rest on the atonement of the one day (insertion) as their rest He rests who knows this, and they also rest for whom the Hotr priest who knows this recites the hymn with the insertion The verses 'To Vaiśvanara, who strengthens law, our praise' (RV, III, 2, 1 sq) are the strophe of the Āgnimāruta Śastra Praise is the end This day is the end So the hymn fits the day The hymn, 'The Maruts, rushing onward, with gleaming lances' (RV, V, 55) addressed to the Maruts, is one in which (the verses) end alike This day is one in which (the sacrificers) end alike So the hymn fits this day He recites, before the next hymn, the verse, 'To Jātavedas let us pour the Soma' (RV, I, 99 1) addressed to Jatavedas The Jātavedas verse is welfare and wins welfare So he makes this into welfare The hymn, 'To Jātavedas, who deserves our praise' (RV, I, 94) [10] addressed to Jātavedas, is one in which (the verses) end alike This day is one in which (the sacrificers) end alike So the hymn fits this day [11]

---

[7] It is of multifarious content as indeed is the case and is recognized in the Anukramani The day is multifarious because of its collection of Vedic mantras and popular elements like dancing

[8] That is only forty one verses are to be taken Cf V, 3 1

[9] The insertion is after the ninth verse, *visve devah somasya matsan* (Scheftelowitz, *Die Apokryphen des Rgveda* p 137) &c.

[10] On RV, I 94 see Oldenberg, *S B E* XLVI 108 sq

[11] At the end Sayana observes that this ends the *karmakaṇḍa* of the Āranyaka The next two books are the *jñānakāṇḍa* or the Upanisad This regular opposition really of course means very little Both parts deal with *jñana* and not with the performance of the rite, but the first Āranyaka does of course treat the rite in some detail, explaining its mystic significance, while the second Aranyaka diverges to speculations less closely associated with the actual Mantras of the ceremonial A more real opposition of *karma* and *jñana* would be to oppose books V and I-III For the relation of *karma* and *jñana* in Śaṅkara's view, see his commentary on Taittiriya Upanisad, I 12

In some MSS (see Crit Note) a summary of the chapters of each Āranyaka is given at the end For similar summaries, cf those of the Taittiriya Upanisad, Max Muller *S B E*, XV, xxviii, xxix, that in VIII, 3 of the Saṅkhāyana Aranyaka and Kausitaki Upanisad, IV, 1

ARANYAKA II

vide p 40 (with

Adhyāya 1

This is the path, this[1] is the sacrifice, this is *brahman*; this is truth Therefore let no man diverge[2] from it, let no man transgress it For they did not transgress it; of old, those that did transgress it were overcome A Ṛṣi[3] says (RV., VIII, 101, 14), 'Three peoples transgressed. Others settled round the sun. The great one stands in the middle of the worlds. The blowing one enters the dawns.' In the verse, 'Three peoples transgressed,' the three peoples which transgressed are the Vayases,[1] the Vaṅgāvagadhas, and the Cerapādas. In the

---

[1] Sayana, following, as throughout this part of his commentary, Śaṅkara (cf Śaṅkara on Taittirīya Upaniṣad, I, 12, translated by S. Sitarāma, *Upanishads*, V, 112–132), discusses the relation of the *karmakanda* and the Upaniṣad His conclusion is that it is that of *sādhana* and *sādhya* the sacrifices serving to purify the mind through the destruction of evil and the production of a desire for knowledge He quotes and rejects the views (1) that knowledge is unnecessary, it being sufficient to give up all works good or evil, and to perform the various regular and occasional sacrifices, and to exhaust what one has begun by enjoying it, so that at death freedom is attained He points out that it is not possible to abandon good and evil, such acts being endless, and that the sacrifices performed must bear fruits and the actions of previous births must produce many other births (2) Others held that a union of knowledge and sacrifice is the cause of freedom But knowledge is directly contradictory to sacrifice, since the latter involves the conception of the self as active, whereas the former recognizes that the self is *nirvikara* (3) Others hold that sacrifice is the ladder which beginning with the simplest and ending with the most complicated sacrificial rites leads to knowledge as the cause of freedom Sayana points out life is too short for this (4) Others think the *karmakanda* is used in a subsidiary manner, just as in catching cranes one throws curd on their heads and it melting blinds them, so one should sacrifice The reply is that this is surplusage one should catch one's crane straight off The story is reminiscent of putting salt on the tail of a bird (5) The use of sacrifice is to exhaust desire through the enjoyment of the desires produced by such acts but clearly it is replied, desire is not so quenched Sayana also explains at length the *visaya, prayojana adhikarin, pramanya* and *prameya* of the system which he attributes to the Upaniṣad Cf Deussen, *Philosophie der Upanishads*, pp. 57 sq., E. T, pp 61 sq 'This' means both what is just past and what is to come, and so Sāyana refers the *etat karma* to Āranyaka I, and *etat brahma* to Aranyaka II and III The latter alone is true

[2] Sayana thus discriminates the divergence is due to mere laziness the transgression to interest in other matters, ploughing or industry, or such forms of devotion as relic worship &c For *pra+√mad*, cf Taittirīya Upaniṣad, II, 5. I, 11 2, Kāṭhaka Upaniṣad, II 6, which support my emendation *pramattam* in Śāṅkhāyana Āranyaka, XII, 29

[3] The verse is of course absurdly construed It is impossible on any theory to make much sense of it As taken in the translation, the idea is that three peoples were ruined the others settled round Agni, in the sense that with Agni as their helper one people has been prosperous, the others not Compare the view of the Śatapatha Brahmana, I, 4, 1, 10–18, that no country is civilized until Agni burns over it, Eggeling, *S B E*, XII, xli sq., Macdonell, *Sanskrit Literature*, pp 214, 215 The last two verses of the stanza of course are hopeless, save as indicating vaguely the connexion between Agni, the Sun, and Vāyu The Atharvaveda, X, 8, 3, has a different version, see Whitney, *Translation*, p 596

---

[1] Sāyana and Ānandatīrtha agree in taking this as referring to the fates which in another life befell the three peoples who transgressed. The peoples are Brahmanas, Kṣatriyas, Vaiśyas, and Śūdras, and only one set was saved. The others suffer a *narakajanma* (cf. for this idea Hopkins, *J. R. A. S.*, 1906, pp. 581 sq.), as birds, &c. Only they differ as to the meaning of the words *vayāṃsi vaṅgāvagadhāś cerapādāḥ*. Sāyana renders them as birds, trees (*vanagatā vṛkṣāḥ*), plants (*a vati manuṣyādīn* and *gṛhyante 'bhikāṅkṣyante*), and snakes (*urapādāḥ sarpāḥ*). Ānandatīrtha prefers Piśācas, Rākṣasas (*vaṅga* is from *vam jīvanam* and *gamayanti*, and *magadha* from *gṛdhir abhikāṅkṣāyām*), and Asuras. We are justified therefore in holding that there was no trustworthy tradition, and it is therefore possible to consider whether Max Müller's suggestion that the words are perhaps old ethnic names is correct. In its favour it may be noted that Sāyana and Ānandatīrtha compel us to assume that the Āraṇyaka accepts the fullest form of the doctrine of transmigration as a punishment (e.g. Kauṣītaki Upaniṣad, I), which is a comparatively late view and which I do not think is found in this Upaniṣad. If they are ethnic names, then *Vayāṃsi* gives us a people like the Matsyas, Ajas, &c., in whose names we may, if we like, see totemism.[2] The *Vaṅgāvagadhāḥ* are a composite tribe or group of tribes like the Kuru Pañcālas, whose name reminds us of the later Vaṅga (known to Mahābhāṣya (Weber, *Ind. Stud.*, XIII, 386) and to Mahābhārata, Dharmasūtras, &c. in conjunction with Aṅga), as part of what is now Bengal. The *Cerapādāḥ* are a third tribe, whose name points to the later Ceras of Southern India. It is of course possible (cf. Rhys Davids, *Buddhist India*, p. 31) to argue that these verses show a later date and a wider geographical knowledge than is compatible with the early pre-Buddhistic date here attributed to the Āraṇyaka. But in this respect it may be observed that Rhys Davids (cf. Bühler, *S. B. E.*, II, xxxv sq.; *Ind. Ant.*, XXIII, 246–248; Weber, ibid., XXX, 273; *Z. D. M. G.*, XLIX, 479) presses unduly the argument from the Buddhist texts. There is in addition to the grave doubts as to the age of the Buddhist texts the possibility that these texts show only the regions where Buddhism had penetrated and that there were Brahmanical countries beyond these limits (cf. Bühler, *Ind. Ant.*, XXIII, 245 sq.; Winternitz, *Gesch. der indisch. Litt.*, I, 254 sq.; *Mantrapāṭha*, I, p. xv). It may be questioned whether Buddhism early gained a direct hold on much of Southern India; at least there is no evidence that it ever did. Besides the question arises whether the Cerapādas must have been settled in the South at this date. It should be noted that the text says they were destroyed, and this may refer to a disaster to the old tribe, a remnant of which wandered south and later appear as the Ceras, who are known in the south to Aśoka and to Kātyāyana, Weber, l. c., p. 371; Bhandarkar, *History of Deccan*, p. 143.

The version of Sāyana takes *cerapādāḥ* as *ca urapādāḥ*. This seems very unlikely because a single *ca* with the second of three connected words is not elsewhere found in this Āraṇyaka, and is nowhere common. (For examples cf. RV., I, 77, 2 (Oldenberg, *S. B. E.*, XLVI, 101) and Delbrück, *Altindische Syntax*, p. 475.) It is, I think, much more likely that three names of defeated tribes should not appear in the precise forms here found elsewhere than that names of plants and beasts should so disappear. At any rate they must all three be plants and verse, 'Others settled round the sun,'[5] these people are settled round Agni here, as the sun In the verse, 'The great one stands in the middle of the worlds,' that great one in the middle of the worlds means this sun In the verse, 'The blowing one enters the dawns,' the meaning is the purifying air enters the quarters[6]

---

[2] Mere animal names prove little as to totemism, which is not demonstrated for any Aryan stock, cf. Farnell, *Cults of the Greek States*, IV, 116, 256; Macdonell, *Ved. Myth.*, p. 153; Hopkins, *P. A. O. S.*, 1894, p. cliv; Keith, *J. R. A. S.*, 1907, pp. 929 sq.; Bühler, *Ind. Stud.*, III, 49.

2 People[1] say, '*Hymn, hymn*'[2] The hymn is indeed the earth[1] For from it all that exists springs It praises Agni Food are its eighty verses,[3] for by food one obtains all The hymn is the sky For (birds) fly along the sky, and along the sky men drive It praises Vāyu Food are its eighty verses, for by food one obtains all The hymn is also yonder heaven For by

---

animals or names of tribes Monier Williams' *Dict* takes *vanga* as plants, *avagadha* and *cerapada* as names of peoples, which is quite impossible Dr Scheftelowitz in his forthcoming *Zur Stammbildung in den indogermanischen Sprachen* (which he has been so good as to show me in MS) considers that *vanga* is formed from *van* by the suffix *ga* (when *g*=*gu*) He compares *madgu* (not for **mazg* but from √*mad*+*gu*), *khadga*, *phalgu* *margā*, *vargu* *phalgā*, *tunga*, *śṛnga* *drāhaga*, *ulig* *vanig*, *sphigī* *dāga* (not=IG *e guo*) &c But even if this is the case the origin of the word throws no light on its being used as a tribal name, nor do I feel sure of the equation *vanga*=tree Possibly *Varga Magadhah* may be read, cf my *Śaṅkhayana Āranyaka*, p. 46 n 4, Baudhayana Dharma Sūtra, I, 2, 13 and 14

The citation of the Ṛgvedic verse in full is of course natural when an explanation is being given So verses are cited and explained in full at II, 1, 6 (RV, I, 164 31) II, 2, 8 (RV, I, 164 38), II, 5, 1 (RV, IV 27, 1) III, 1, 6 (RV, X 114, 4) III 2, 3 (RV, I, 115 1) In the last case the verse is cited entire to indicate the sense desired to be understood So also verses are cited in full in the Śaṅkhayana Āranyaka, VII, 15, 18, 20, VIII 4 6, IX, 1; XII, 8 35

[5] Anandatirtha, here and throughout interprets in a Vaisnava sense *arkam* is Visnu Āditya is Visnu, and *tasthau* is *upasum cakre* To Sayana, *arkam* is Agni *aharaniya*

[6] Sayana justifies this by *pracyadidisah tattatkarmasu vihitah satye nutthanavaikalyam karanti*

[1] Sayana explains, following the Mimamsa, III, 4, IV 1 III 3, that the purpose of Āranyaka, II 1 3 is to enable men to attain concentration of thought by meditating on things connected with the sacrifice There are five principles in such meditation (1) The meditation falls to the lot not of the *yajamana* but of the *rtvij* (2) The meditation must be on the *pratikas* of the hymns as deities like earth &c, and not vice versa (3) If the *dhyana* is prescribed *for a certain thing only* in one *Śākha*, *it can nevertheless be taken over by another* Śākhā e g by the Kausitakins. (4) It is not obligatory in every case to go through all the forms of meditation which are prescribed in connexion with any part of the rite It is sufficient to make the choice desired (5) Nor is it necessary to adopt the meditation along with the sacrifice as an essential part. It is a matter of choice

The last rule shows the manner in which the Brahmins avoided the open rejection of sacrifice and yet justified their own speculations as a practical substitute for sacrifice

[2] That is, not knowing its secret reference Sayana follows the Aranyaka in deriving *uktham* from *ut ti ṣṭhati*. Anandatirtha, of course, explains the whole by the doctrine that Visnu is omnipresent and so all things can be identified with him and through him with one another Cf Bṛhadāranyaka Upanisad, V, 13. 1 (where *utthāpayati* is the derivation of *uktha*), Kausitaki Upanisad, III 3

[3] The three sets of eighty tristichs, in *gayatri* *brhati*, and *usnih* V, 2, 3, 4, 5

its gift all that exists springs It praises the sun Food are its eighty verses, for by food one obtains all So much as regards the gods Now as regards the self The hymn is man. He is great and is Prajāpati Let him know that he is the hymn[4] The hymn is his mouth, as in the case of the earth It praises speech Food are its eighty verses, for by food one obtains all The hymn is the nostrils, as in the case of the sky It praises breath Food are its eighty verses, for by food one obtains all The bend of the nose[5] as it were is the place of the brilliant one The hymn is the forehead,[6] as in the case of the heaven It praises the eye Food are its eighty verses, for by food one obtains all The eighty verses are food both with reference to the gods and with reference to the self, for by food all these beings breathe[7], by food[8] he conquers this world and by food that world Therefore the eighty verses are food both with reference to the gods and to the self The food and the feeder are the earth, for all that exists springs from it. Whatever goes forth, (heaven) consumes it all[9] Whatever goes thence, the (earth) consumes it all So earth is both food and feeder He[10] becomes feeder and food He is lord of nothing that he eats not, or that eats him not

---

[4] Sayana points out that this contradicts the Mīmāṃsā, see Brahma Sūtra, IV, 1, 3, 4, but solves the contradiction by saying the first view rests on *nyāyabala*, that here on *vacana balat, kim iva hi vacanam na kuryān nāsti vacanasyātibhāra iti hi śāstrakaraṇam durdamah Vidyāt* here means *dhyāyet* since both knowledge and meditation are concerned with mind (*jñānadhyānayor manasā tu asāmyena*)

[5] The reference is to the bend just below the brows where the nose springs out Sayana cites the Jabāla Upaniṣad II *katamam vasya sthānam bhavatīti* | *bhruvoh prāṇasya ca yah sandhih* (*sam bandhah* R²) *sa eṣa dyaurlokasya parasya sandhir bhavatīti* | This refers to *brahman*, so Āditya, who is *bradhna*, is here an *upadhi* of *brahman* Ānandatīrtha takes *iva* as meaning *kimcit* while Sayana says it is equal to *eva* or has no meaning cf I, 1, 2, III 2 6

[6] Viśveśvaratīrtha says *lalāṭaśabdena cakṣur gṛhyate* The word, found in the Atharvaveda, X 2, 8 properly denotes 'brow' or 'superciliary ridge' see Hoernle *Osteology* pp. 122 sq, 177 sq

[7] The *pluti* with the nasal is *uktārthaprasiddhyartha* says Sayana The next pred *sam nam* is noteworthy, see Delbrück, *Vergl Syntax*, III, 247, 248

[8] By giving food to retainers and by sacrifice respectively

[9] Sayana and Ānandatīrtha take this as referring to the doctrine of transmigration But this is hardly necessary The earth consumes what the heaven sends, e g rain, not persons who are born again, or as Sayaṇa says, sacrificers who having enjoyed heaven after death return again to earth It is not proved that such an idea is known to this Aranyaka. Cf II 1, 1, n 4 3, n 5 3 2 n 3, 7 n 5, 8, n. 15, 4, 2, n 1, 5, on 6 7, 9. For the use of *preris* (for the form, cf Oldenberg, *S B E* XLVI 2, Bartholomae, *Iran. Grundr*, I 54, 70) as *praiti* Sayaṇa has reference to the analogy of *pra* + √*i* The form of the *pluti* is that laid down in Pāṇini VIII, 2, 107, cf. Wackernagel *Altindische Grammatik*, I, 298 sq

✓ [10] This is very obscure There seems little doubt, however, that it is intended as the expression of a vague pantheism Cf Emerson's 'I am the doubter and the doubt And I the hymn the Brahmin sings.' The priest identifies himself with the hymn and also with Prajāpati (see above), and so becomes as Max Muller says subject and object in one

3. Then comes[1] the origin of seed. The seed of Prajāpati are the gods.[2] The seed of the gods is rain. The seed of rain is herbs. The seed of herbs is food. The seed of food is seed. The seed of seed is creatures. The seed of creatures is the heart.[3] The seed of the heart is the mind.[4] The seed of the mind is speech. The seed of speech is action.[5] The act done is this

Ānandatīrtha interprets it that Viṣṇu consumes all worlds, and all beings enjoy him, which is the same idea attached to the name of Viṣṇu. Sāyaṇa contrasts the *upāsaka* and the *anupāsaka* and explains the matter slightly differently in the last sentence as meaning that other men do not enjoy him (*yad vā = yasmāc ca kāraṇāt*). He reconciles this with the fact that he is *ādyaḥ* because that refers to *svātmabhūtasarvabhogyajalarūpatvam*. This explanation is not probable, but undoubtedly the construction of the last words contains a serious difficulty as *yad* cannot correspond to *ādyaḥ*. The fact perhaps is that *yad* is used for formal correspondence with the previous *yad* though it is not quite parallel in construction. It must be taken literally as an accusative of point in which—'or in so much as they do not consume him.' For the metaphor cf. Jaiminīya Upaniṣad Brāhmaṇa, III, 2: *anadyamāno yad adantam atti*; Taittirīya Upaniṣad, II, 2: *adyate 'tti ca bhūtāni*; III, 7, 9, &c.; Śatapatha Brāhmaṇa, X, 6, 2; XII, 9, 1; Maitrāyaṇī Saṃhitā, I, 10, 13; Kauṣītaki Brāhmaṇa, XI, 3; *A.J.P.*, XX, 446, and the Puruṣa Sūkta. Another possible explanation, however, is suggested by Jaiminīya Upaniṣad Brāhmaṇa, I, 5, 3: *sa* (*satyam* as *devatā*) *ha tasya neśe yad enam apanudet*, 'She is not able to drive him away,' where *yad* is a conjunction. So here the exact sense may be, 'He cannot help eating them and their eating him;' *tasya* being used to introduce the dependent clause. Cf. II, 1, 5, n. 5. No doubt originally *yad* was a relative, but the pronominal quality is clearly minimal in such cases. The opt. in such a case is one of consequence or characteristic, cf. *brāhmaṇaṃ kurvīta yo patyet*, III, 2, 3, n. 3. So I would explain Rāmāyaṇa, III, 19, 7: *na hi paśyāmy aham loke yaḥ kuryān mama vipriyam*, which Speyer (*Vedische und Sanskrit-Syntax*, § 171) explains (see § 191, 4) as merely indefinite. But the sense is slightly different from a mere indefinite. So Bṛhadāraṇyaka Upaniṣad, IV, 3, 23: *na tu tad dvitīyam asti tato 'nyad vibhaktaṃ yat paśyet*. Ibid., 24-30, &c.

[1] Sāyaṇa says this section is intended to explain the greatness of *puruṣa*, mentioned in II, 1, 2. Ānandatīrtha, on II, 1, 1, much more correctly says: *vidyāntarakathanena puruṣakhaṇḍasya saṃgatiḥ | uttaratrāpy etad anusaṃdheyam* | Cf. Pischel, *Vedische Studien*, I, 83 sq.

[2] Sāyaṇa says that the element of *sattva* is represented in the gods, of *rajas* in men, and of *tamas* in animals, &c., and this explains the high position here given to the gods. This doctrine is of course later, appearing first most clearly in the Śvetāśvatara Upaniṣad, see Deussen, *Philosophie der Upanishads*, pp. 226 sq.; E.T., pp. 250 sq. Garbe (*Sāṃkhyatattva-kaumudī*, p. 591) has conclusively, I think, dispersed the assumption countenanced by Weber (*Ind. Stud.*, IX, 11), Muir (*Texts*, V, 309), and Whitney (*Translation of Atharvaveda*, p. 601) that Atharvaveda, X, 8, 43 refers to the *guṇas*, see Lanman, ibid., p. 1045.

[3] Because the *jīvātman* is here, says Sāyaṇa. Cf. Deussen, op. cit., p. 259; E.T., p. 287.

[4] Ānandatīrtha distinguishes *hṛdaya* and *manas* as being *saṃkalpātmakam antaḥkaraṇam* and *vikalpātmakam* respectively. Sāyaṇa's explanation is much more probable that *manas* denotes the knowing part of the heart, a frequent early use of the word, cf. Deussen, op. cit., pp. 243 sq.; E.T., pp. 270 sq.

[5] Sāyaṇa renders speech as the Veda, and action as sacrifice. Ānandatīrtha evidently takes it as equal to *adṛṣṭaṃ kriyā vā*. He also (unlike Sāyaṇa) construes *karmakṛtam* as one word, *karmanirmitam*. Rājendralāla prints in the text *karmakṛtam* against the commentary. Sāyaṇa of course explains *kṛtam* as done in a former birth, but this again is an unnecessary intro-

man, the abode of *brahman* He consists of food[6] and because he consists of food, he consists of gold He becomes golden[7] in yonder world, he is seen as golden for all mortals, who knows this

4 *Brahman*[1] entered into that man by the tips of his feet Because *brahman* entered that man by the tips of his feet, so men call them the tips of the feet (*prapadyata prapode*), but in the case of other animals hoofs and claws Then he crept higher up, and they became the thighs Then he said, 'Swallow[2] widely,' and that became the stomach Then he said, 'Make it wide for me,' and that became the chest The Śārkarākṣyas[3] meditate on the stomach as *brahman*, the Āruṇis on the heart These two are indeed *brahman* But he crept upwards still, and arrived at the head Because he arrived at the head (*śirayata*) then it became the head (*śiras*) So the head is the head These delights settled in the head, sight, hearing, mind, speech, breath Delights settle on him who

---

duction of the transmigration theory, see II 1, 1, n. 4, 2, n 9 and Ānandatīrtha does not accept it The passage only means that action is the man, the man is what he does, a perfectly plausible view For the relation of speech and action see Jaiminiya Upanisad Brahmana, I, 33 4, II, 2, 8 III, 32 9, Mahanarayana Upanisad, IV, 7, Oertel *J A O S*, XVI, 231

[6] Ānandatīrtha renders *sa* as *bhagavan* and *iramayah* as *icchanurupasukhapurnah* and *hiranmayah* as *bahyanandat sūksmasukhapurnah* Sayana quotes Taittiriya Upanisad, II, 1, 1 *sa va esa puruso annarasamayah* He explains that as man is composed of food so he is gold in the shape of the egg of Brahman Really the thing is a mere play on words For the form *hiran(ya)mayah*, cf Bloomfield, *P A O S*, April, 1893 p xxxv, *A J P*, XVII, 418, Wackernagel *Altindische Grammatik*, I, 279 280, Macdonell, *Vedic Grammar*, p 58

[7] Anandatirtha explains *Narayanam yonau karmayam rupam utsrjya nijanandakarupako bhavati* Sayana says he appears as golden as the sun for the benefit of all creatures Really it means, he appears (*dadrśe* passive cf Delbrück *Altindische Syntax*, pp 264 sq) to all creatures no doubt originally as the sun The passage is like all this part of the Aranyaka II, 1–3, pantheistic In Śatapatha Brahmana X, 1, 4 9, the Agnicit is promised birth in the other world as *hiranmayah*, rendered by Sayana *hiranyasamanavarnah* see Eggeling *S B E*, XLIII 295, n 2

[1] Sayana explains that this chapter shows *prana*, the *upadhi* of Brahman, entering the subtle body His entry into the gross body is seen on II, 1, 2 He compares Taittiriya Upanisad, II 6, 1 Maitrayaniya Upanisad II For *prapada* Lanman in Whitney *Translation of Atharvaveda*, II, 33 5 suggests toe as the meaning, but the dual renders that impossible here, and I believe in all the passages cited at p. xcviii the sense 'front part of the foot' as opposed to 'heel' is correct.

[2] Make a large hole, says Sayana Max Muller's 'grasp' is a slip The form is overlooked in the *Dict* and in Whitney's *Roots, &c*

[3] *Śarkaraksyah* is rendered *suksmadrstayah* by Ānandatīrtha, who, however, calls the *Arunayah* Ṛṣis He explains *udaram* as locative in sense as does Sayana, tacitly The Śarkaraksyas are a subdivision of the Handravyas according to the Caranavyūha and are mentioned in the Mahabhāsya, IV, 1, 74 75 Max Muller points out that neither in Chandogya Upanisad, V, 11 15, 17 nor in Śatapatha Brahmana X 6 1, do these views appear—at least in terms *Arunayah* appears also in Jaiminiya Upanisad Brāhmana II 5 1 wrongly amended by Oertel to *Aruneyah*, against the MSS *brahma* may be meant but the neut is more likely Cf Weber, *Ind Stud* XVIII 140, v Schroeder *Ind Lit*, p 98, n 1 That the heart (*hrdaya*) is *brahman* was the view of Vidagdha Śākalya see Yājñavalkya's exposition in Bṛhadāranyaka Upanisad, IV, 1, 7 See also Chāndogya Upanisad, III, 12, 4, VIII 3, 3 *Ind Stud*, II 177

knows thus why the head is the head. They strove together,[4] saying, 'I am the hymn, I am the hymn.' They said, 'Come, let us leave this body, then that one of us at whose departure the body falls, will be the hymn.' Speech went forth, yet (the body) remained, speechless, eating and drinking. Sight went forth, yet (the body) remained, sightless, eating and drinking. Hearing went forth, yet (the body) remained, without hearing, eating and drinking. Mind went forth, yet (the body) remained, blinking as it were,[5] eating and drinking. Breath went forth, when breath went out, (the body) fell. It was decayed. (Because men) said it had decayed, it became the body. Therefore is the body the body. Who knows this, his enemy, the evil one, who hates him decays, the enemy, the evil one, who hates him is defeated. They strove together, saying, 'I am the hymn, I am the hymn.' They said, 'Come, let us again enter this body, then that one of us, on whose entrance the body rises, will be the hymn.' Speech entered, (the body) lay still. Sight entered, (the body) lay still. Hearing entered, (the body) lay still. Mind entered, (the body) lay still. Breath entered, (the body) arose, and (breath) became the hymn. Therefore breath only is the hymn. Let men know that breath is the hymn. The gods[6] said to breath, 'Thou art the hymn, thou art all this, we are thine, thou art ours.' A Ṛṣi says (RV., VIII, 92, 32), 'Thou art ours, we are thine.'

---

[4] There are similar passages in Bṛhadāraṇyaka Upaniṣad, VI, 1; Chāndogya Upaniṣad, V, 1; Kauṣītaki Upaniṣad II 12–14, III, 2; Praśna Upaniṣad, II, 1. The comparative antiquity of the versions must be open to doubt. But this version certainly seems simpler and more original than those of the Bṛhadāraṇyaka, Chāndogya, or Kauṣītaki Upaniṣads, which seem to embellish the theme with further details. The account in the Praśna Upaniṣad is simple, but as that Upaniṣad is on other grounds late, that may be explained as merely a reference to a well known theme, and indicates the danger of arguments from comparative simplicity. For *hanta* with subj., cf. Delbrück, *Altindische Syntax*, pp. 23, 43; Aufrecht, *Aitareya Brāhmaṇa*, p. 430.

[5] The masculine, *milita*, is explained by Sāyaṇa as referring to *dehaḥ* understood. It is probable that the idea in the mind of the writer throughout was *puruṣa* as the subject, hence the masculines as long as *prāṇa* remains in the *śarīra*. √*śad* is Brāhmaṇa style first. Cf. Bṛhadāraṇyaka Upaniṣad, I, 4, 11 and 12 (2, 22 and 3 in the Mādhyandina text) where *brahma* is followed by *sa*. On the other hand in Bṛhadāraṇyaka, IV, 3, 22, the Kāṇva text, after a series of masculines, produces *ananvāgataṃ puṇyena*, and Śaṅkara explains *rūpaparatvān napuṃsakaliṅgam*. The Mādhyandina version (as in Weber and Böhtlingk) has the masc., but as Max Müller (*S. B. E.*, XV, 169) points out, Dvivedagaṅga had *ananvāgatam* as he says *ananvāgatam iti rūpaviṣayo napuṃsakanirdeśaḥ*. There are also difficulties in the genders in Śvetāśvatara Upaniṣad, III, 7; see Max Müller, *S. B. E.*, XV, 245, n. 4. In Śāṅkhāyana Āraṇyaka, VII, 22, *kāmarūpa* and *kāmacara*, according to one MS., agree with *brahma*. Such uses are not rare in Latin and Greek, e.g. φίλε τέκνον, *Vergl. Syntax*, III, 244. For *iti* 3 *ṁ*, cf. Aitareya Brāhmaṇa, VII, 22, 2, against Böhtlingk, *Sächs. Ber.*, 1890, p. 170.

[6] The gods are those presiding over the parts of the body, see II, 1, 5, n. 3. For Prāṇa as *brahma*, cf. Kauṣītaki Upaniṣad, II, 1, 2; Chāndogya Upaniṣad, IV, 10, 5; Taittirīya Upaniṣad, III, 3, 1; Jaiminīya Upaniṣad Brāhmaṇa, I, 33, 2. It was held by Udaṅka Śaulbāyana (Bṛhadāraṇyaka Upaniṣad, IV, 1, 3) and is refuted, ibid., V, 13, 1; Oertel, *J. A. O. S.*, XVI, 230.

5 The gods carried him forward[1] Being carried forward he was stretched out (Because men say) he has been carried forward, the morning came into being. (Because men say) he has gone to rest, the evening came into being. Day is breathing forth,[2] night is breathing down. Speech is fire,[3] sight yonder sun, mind the moon, hearing the quarters, this is the union[4] of those sent forth These deities are such in the body, but they openly appear among the deities, this is the meaning This indeed said Hiranyadant Vaida who knew this, 'Whatever they give me not,[5] I own not myself I know the union of those sent forth in the body which they enter This it is' To him who

---

[1] Sayana explains that this section treats of *prāna* under various forms. Ānandatirtha as usual equates *prana* and Visnu The section is composed of bad etymologies The first alludes to *pra* + √*ni* (*pra anayanta*)

[2] For the meanings of *prana* and *apāna* see Deussen, *Philosophie der Upanishads*, pp. 249-251, E T, pp 276-279 The oldest view is that they mean expiration and inspiration respectively, whence *apana* comes to refer to the wind of digestion. Cf I, 3, 7, 4, 1, II, 3 5

[3] This idea originates with the Purusa Sukta, RV, X, 90, 13, 14, see Deussen, *Allgemeine Einleitung*, p 157, and later it develops into a regular system of gods who correspond to and guard the several psychic faculties Cf Deussen, *Philosophie der Upanishads* p 241, E T, p 267 It is developed most in II, 4 1, 2, where Agni, &c., become speech, &c., and enter man, while here they are merely considered as the several parts of the body Cf. also I, 3, 3, Śankhayana Āranyaka, X and XI, Lanman, *Hindu Pantheism*, p 18.

[4] The idea seems clearly to be that these four are gathered together in the body, and exist openly as deities as Sayana says But *prahitām* is very difficult and the whole seems an explanation of what was even then obscure Cf the varying versions of *purnam apravarti, amrtam satyena channam* &c, cited in Deussen op cit p 20 E. T, p. 10, n 3

[5] This authority occurs also in Aitareya Brahmana III, 6 Is his name a reference to gold stopplugs in his teeth? They were known to the XII Tables (B C 450?) and to very early Egypt *Iam* is read by Rajendralala and in the Ānandasrama edition and also by Sayana But it seems obvious that it stands for *yan* written before *m* carelessly as *anusvara*, cf Max Müller, *Maruti Hymns*, p. lx II, 3 3 n. 2, III, 1, 4, n 3, Macdonell, *Vedic Grammar*, p. 62, Wackernagel, *Altindische Grammatik*, I, 313 To Sayana *yam* presents no difficulty as he merely supplies *padarthas abhi tam* The word *dadyuh* is difficult because the plural is unexpected after *sie* if that is a third person, when the sense would be 'nobody owns what the deities give not to me' This is rather awkward but not impossible The rendering of II, 1 2 suggested in n 10 there would give in this passage (though *yan* would still remain properly a pronoun), 'He owns nothing that they will not give me also,' which by an easy process of development would slide over into the sense, 'He cannot help them giving me (it),' showing the origin of such a developed construction as that in II, 1, 2 This comes to an assertion of the fact that all that the cosmic *purusa* has (he must be the subject of *sie*), that has man It is simpler to neglect the commentators and take *sie* as first person, thus asserting the intimate union of man and the deities In this use *yad* is used with consecutive force, cf. the Mantra use of *yad* as final with subj. or opt (Delbruck, *Altindische Syntax*, pp 321, 341), and the classical use (Speyer, *Sanskrit Syntax*, § 466) The absence of such a use in the Brahmanas (cf Speyer, *Vedische und Sanskrit-Syntax* § 279 c) is improbable *sie* as a third person belongs to a type which occurs in all Brahmanas, and is not a mere imitation of Mantra forms (as held by Aufrecht, *Aitareya Brahmana*, p 429, where see other examples), see Whitney, *Sanskrit Grammar*, § 613 The form *prahitam* presents great

knows this all creatures unconstrained pay homage That is *sattya* (truth) For *sat* is breath, *ti*[6] is food, *yam* is yonder sun That is threefold Threefold as it were is the eye, white, dark, and the pupil[7] Even though he speaks falsely,[8] yet speaks he truth who thus knows why truth is *sattya*

6 Speech is his rope, names the knots[1] So by his speech as rope, and by names as knots, all this is bound For all this is names, and by his speech he names everything. Men[2] bound with ropes carry him who knows this His hairs are the *usnih*, his skin the *gayatri*, his flesh the *tristubh*, his sinews the *anustubh*, his bones the *jagati*, his marrow the *pankti*, his breath[3] the *brhati* He is covered with the metres Since he is covered with the metres, therefore they call them metres (coverings) Thus the metres cover him from illhap[4] in

---

difficulty To take it as Vedic for *prahitanam* as Sayana does is to introduce a very rare* form (cf Whitney, l c, p 114) into the text on the other hand the word *prahit* has no parallel (save conceivably in form (*Ind Stud.*, III, 225) in *prahitah samyojane* in the Arseya Brahmana, if we may take that as dual form gen and not as in Monier Williams' *Dict* as a gen of *prahiti*) at any rate in sense Whitney (*Roots &c*, p 205) gives *hit* as a form from √*hi* I think that *prahit* should probably be taken as the 'impeller', i e the deities cause the organs to work, cf. II, 4 1, and a

[6] *The i of ti is to enable it to be pronounced* (*Sāyana*). *Chandogya Upanisad*, VIII, 3, 5 gives a different version, from *sat* + *ti* + *yam*, as the binding of the immortal and the mortal (*ti* being the dual of *ti*) Cf Deussen cited in n 4 above Taittiriya Upanisad, II, 6, derives *sat tyam* from *sat* 'manifest', and *tyat* 'not manifest' Bṛhadaranyaka Upanisad V, 5 1, gives *sa-ti-yam* (so Śankara (as here) but Kanva text, *sa*) + *am* when *sa* and *am* are = true, and *t* (*ti*) = untrue (for *t* occurs in *anrta* and *mrtyu*) Kausitaki Upanisad, I, 6, gives, *sat* (what is other than the gods and the senses) + *tyam* (the gods and the senses)

[7] Cf Jaiminiya Brahmana, I 254 (*kaninikā*), Śatapatha Brahmana, XII, 8, 2, 26, *A J P*, XVII 400, elsewhere *purusa* is the third member, Jaiminiya Upanisad Brahmana I, 26 1, 34, 1 and Oertel s note

[8] This doctrine undoubtedly shows the moral disadvantages of the doctrine of salvation by knowledge, and it is the precursor of the later immunity from moral censure of the *jivanmukta* Cf Kausitaki Upanisad III 1 Sadananda Vedantasara, 235 *śubhaśubhayor audasinyam* and Jacob s note in his *Translation*, Lévi *La Doctrine du Sacrifice* pp. 164 167 In *asya* the genitive is presumably possessive cf Delbrück *Altindische Syntax* p 153, Franke *Bz Beitr*, XVI, 112, Speijer, *Vedische und Sanskrit-Syntax* §§ 69 94, n, Whitney, *Sanskrit Grammar*, § 296 b Compare *etam me sutam* with *sh maḥ frutsh* (Introd, p 57), *J A O S*, XXV, 116 117 For the position cf *Z D M G*, LXII, 129

[1] Sāyana explains the metaphor from a rope for tying up cattle Ānandatirtha explains as usual by identifying all with Visnu 'His' refers to *prana* of course

[2] Like oxen who carry men.

[3] *pranaḥ here refers to the air in the strict sense, and has not the wider sense of prāṇa* (Sayana), perhaps it = *ghrana*, as in II, 1, 7, and often, cf my *Śankhayana Āranyaka*, p 21

[4] This must be the sense Sayana however appears to render it 'whatever evil he desires to do, the metres keep him from contact with it' The connexion of √*chad* and *chandas* is very doubtful, see I 1, 3 n 6, Leumann, *Et Wort*, p 103

---

* See also RV, IV, 2 3 and 11 *martam*, VI, 47, 16 *manusyan*, Oldenberg, *S B E*, XLVI, 319, Pischel, *Vedische Studien*, I, 44 Bartholomae, *Studien* I, 48

whatever quarter he desires who knows thus why metres are called metres. A Rsi says (RV, I, 164, 13), 'I saw the guardian,' for he is a guardian, for he guards all this 'Never tiring,' for he never rests 'Coming and going on his ways,'[3] for he comes and goes on his ways 'Illuminating[4] the principal and intermediate,' for he illuminates these quarters only, the principal and intermediate 'He moves up and down in the worlds,' for he moves up and down in the worlds Then there is the verse[5] (RV, I, 55, 8), 'Covered[6] like caves by the makers' For all this is covered by breath This ether is supported by breath as *brhatī*, and one should know that, even as this ether is covered by breath as *brhatī*, so all things including ants[7] are covered by breath as *brhatī*

7. Now come the powers of this person By his speech are created earth and fire On the earth plants grow; fire ripens them 'Take this, take this,' thus saying do these two, earth and fire, serve their parent, speech As far as the earth extends, as far as fire extends, so far extends his world, and as long as the world of earth and fire decays not, so long does his world decay not who knows thus the power of speech. By breath[1] the sky and the air are created People follow the sky, and hear along the sky, and the air bears

---

[3] The veins, says Sayana He explains that *prāṇo* is the guardian by referring to Kausītaki Upanisad III, 2 *yavad(hy)asmiñ charire prāno vasati tavad ayur* This passage of the Rgveda later served as the authority for the activity of *prana* even in *suṣupti*, Praśna Upanisad, IV, 3, Deussen *Philosophie der Upanishads*, p 268, L T p 297 Jaiminīya Upanisad Brāhmana, III, 37, takes the *pranah* and the sun's rays as meant

[4] The four quarters and the four intermediate quarters SE, SW, NE, and NW. For the number of the quarters, at first four, later ten, cf Hopkins, *J A O S*, XVI, 283 *Prāna*, Sayana explains, is internally what Āditya is externally, see Praśna Upanisad, I 5, III, 8 *ādityo ha vai bāhyah prana udayati* In the original and in Jaiminīya Upanisad l. c., *vaste* means 'wears'.

[5] Not RV, I, 55 8 (Max Muller following Rājendralāla), nor I, 56, 8 (Ānandā rama series).

[6] Ānandatīrtha and Sāyana both cite and explain quite differently, the whole verse, but they agree in taking the caves as holes for concealing wealth Cf I, 3, 1, n 4

[7] Anandatirtha renders, 'beginning with ants'

[1] In the nose, i e the power of smell (Sāyana) The use of the masc *tyajau* with a masc and a neut and of *ta stāh* below do not entirely agree with the rules of concord later accepted Delbruck (*Altindische Syntax*, p 88) gives only one doubtful example (RV, I, 8, 10) and Speyer (*Vedische und Sanskrit Syntax*, § 101) thinks that in classical Sanskrit with names of things the neuter is a more common predicate if the genders differ and one is neuter This is laid down in a Vārttika (not in the Kāśika Vṛtti, it appears) on Pāṇini, I, 2, 72, which runs *tyadadītah śese pumnapumsakato lingavacanani | sā ca Devadattaś ca tau | tac ca Devadattaś ca Yajñadattā ca tani | tac ca Devadattaś ca te |* So the neuter appears in Mahābhārata III, 58, 10, VI 6 26, Rāmāyana VI 62, 37 If only persons are concerned the masc. is regular, e g Mahābhārata, XVII, 1, 29 *Pāndavāś ca mahatmāno Draupadī ca yaśasvinī | krtopa arāh Kauravya prayayuh prāṅmukhās tatah ||* Raghuvamśa III, 23 *tatha urpah sā ca sutena Māgadhī, nanandatus tadsadrśena tatsamau*, &c That this is old is indicated by the rule in Homeric Greek, thus formulated by Monro (*Homeric Grammar*², p. 157), 'Where an adjective

pure scent[2] Thus do sky and air serve their parent, breath As far as the sky extends, as far as air extends, so far extends his world, and as long as the world of sky and air decays not, so long does his world decay not who knows thus the power of breath. By his eye are created the heaven and the sun Heaven gives him rain and proper food, the sun causes his light to shine. Thus do heaven and sun serve their parent, the eye As far as the heaven extends, as far as the sun extends, so far extends his world, and as long as the world of heaven and sun decays not, so long does his world decay not who knows thus the power of the eye By his ear were created the quarters and the moon From the quarters they come unto him, from the quarters he hears, the moon produces for him the bright and the dark halves for good deeds[3] Thus the quarters and the moon[4] serve their parent, the ear. As

---

refers to more than one noun, it follows the most prominent or (if this is at all doubtful) the masc is used of *persons* the neut of *things* e g, *Il* ii 136 —

> αἱ δέ που ἡμέτεραί τ' ἄλοχοι καὶ νήπια τέκνα
> ἥατ' ἐνὶ μεγάροις ποτιδέγμεναι,

because the wives are chiefly thought of, but *Od* xiii, 434 —

> ἀμφὶ δέ μιν ῥάκος ἄλλο κακὸν βάλεν ἠδὲ χιτῶνα,
> ῥωγαλέα ῥυπόωντα

The neut plur is especially used of sheep and cattle *Il* xi, 244 —

> πρῶθ' ἑκατὸν βοῦς δῶκεν, ἔπειτα δὲ χίλι' ὑπέστη,
> αἶγας ὁμοῦ καὶ ὄις'

The first example shows that a fem can prevail over a neut in the case of persons, the second that in regard to things the neut prevails over the masc, the third that in regard to things the neut. may be used of masc and fem animals Here *antarikṣam* is a deity and so naturally the masc. prevails cf Manu, VIII, 86, where *hṛdayam* is personified In Latin the rule is (Allen and Greenough, *Latin Grammar*, p 173), generally, a predicative adjective will be masculine, if nouns of different genders mean *living beings* neuter, *if things without life*' as Livy ii, 40 *uxor deinde ac liberi amplexi*, but Livy v, 4 *labor voluptasque societate quadam inter se naturali sunt iuncta* Even if masc nouns and fem occur, the neut. can be used if one of the subjects is a thing, e g, Livy xliv, 24 *natura inimica sunt libera civitas et rex*, or even if two fem nouns represent things, e g Cicero, *de Fin* iii, 11 *stultitia et temeritas et iniustitia sunt fugienda* The basis of discrimination, therefore, is rather between living creatures especially persons, and things (which include sometimes the animals)

The use of the dual and plural of the verb is regular, cf Delbruck, pp 83 sq; Speyer, l c, though as in Greek and Latin and Anglo Saxon the nearest subject may determine the verb, as is usual in the Bṛhaddevata. Cf ibid, VII, 74 for a set of mixed genders with a neut plur, VIII, 47, for a masc plur with a masc sing, a fem sing, and a masc dual, which follow Cf Delbruck, *Vergl Syntax*, III, 244 247, which this supplements

[2] Sayana refers to Bṛhadaranyaka Upanisad, I, 3, and Chandogya Upanisad, I, 2, for the reasons, interference by Asuras, for the existence of bad smells, cf Farnell, *Evolution of Religion*, pp. 99 sq Ānandatirtha takes 'him' throughout as meaning Visnu.

[3] Probably it refers to sacrificial acts

[4] Sayana admits the apparent inconsistency of this and II, 4, 1 where the moon is derived from the mind, but explains it away that the creation here is merely an imaginary one for

far as the quarters extend, as far as the moon extends, so far extends his world, and as long as the world of the quarters and the moon decays not, so long does his world decay not who knows thus the power of the ear. By his mind were created the waters and Varuna. The waters yield to him faith for good deeds and Varuna preserves his offspring by his law. Thus the waters and Varuna serve their parent, mind. As far as the waters extend, as far as Varuna extends, so far extends his world, and as long as the world of the waters and Varuna decays not, so long does his world decay not who knows thus the power of mind.

8. Was it water?[1] Was it water? This world was water. This was the root, that the shoot. This the father, those the sons. Whatever there is of the son's that is the father's, whatever of the father's, that is the son's. So it is said. Mahidasa Aitareya[2] who knew this said, 'I know myself as reaching to the gods, and the gods as reaching to me'[3]. For hence are they gifted, hence are they supported. This is the hiding-place[4] eye, ear, mind, speech and breath. They call it the hiding place of *brahman*. He who knows this throws down the enemy, the evil one, who hates him. The enemy, the evil one, who hates him is defeated. He is the life, the breath, being,[5] and not being. The gods adored him as being, and so became great. So in sleep a man breathes *bhur bhuh*. The demons adored him as not being, and so were overthrown.[6] He becomes great by himself who knows this. The enemy, the evil one, who

purposes of worship, a *yathāvacanam* as opposed to a *yathāvastu* creation. Such inconsistencies are not very important, but this small point adds to the evidence against II, 1-3 and II, 4-6 being by one hand. For Varuna, cf. Lévi, *La Doctrine du Sacrifice*, pp. 152 sq.

[1] Khanda 7 treats of *purusa* as the efficient cause, this khanda of him as the material cause. *Ap* is to be considered as an expression of the five elements according to Sāyana, an unnecessary idea. The *pluti* indicates a question. The cause and effect are naturally identified. Ānandatīrtha identifies them in Visnu. The Garbha Upanisad I, traces the five elements in the human body, but the idea is not necessarily contained here.

[2] This mention is enough to prove that Mahidasa did not write the Āranyaka. But it is quite probable that he was the redactor of the Brahmana in its form of forty chapters. The saying here may no doubt be regarded as one of his Upanisads in the sense of secret teachings. Cf. Introd., p. 16. For the form, cf. Leumann, *Gurupūjākaumudī*, p. 42.

[3] Rājendralāla's commentary is wrongly printed. *Veda* is an error for *veda* and *omad* is resolved wrongly. The end of the sentence explains the dependence of deities on men for devotion.

[4] It is called *giri*, because *prāna* is swallowed up and hidden by the other senses. Cf. the doctrine that the senses enter in sleep into the *prāna*. The *prāna* forms thus the basis of the senses. Probably the idea of the Āranyaka is something like this, and the translation 'mountain' misleading. For *śloka* cf. Lévi, *La Doctrine du Sacrifice*, p. 38, n. 1.

[5] Because the presence of *prāna* secures the *jīvātman* (Sāyana).

[6] Sāyana solves the difficulty of the evil effects of *abhūti* by discriminating between the desire of *abhūtis* for oneself as shown in the ruin of the demons and for one's foe.

hates him, is overcome. He is death and immortality. A Ṛṣi says (RV., I, 164, 38), 'Down and up he goes, grasped[7] by food,' for this up-breathing restrained by down-breathing does not go forth. "The immortal dwells with the mortal," for through him all this dwells together. For these bodies are mortal, the deity immortal. 'These two even go in different directions, they increase the one, but not the other,' for they increase the bodies, but the deity is immortal. He who knows this becomes immortal in yonder world and is seen as immortal by all beings.[8]

Adhyāya 2.

He who shines approached this world[1] in the shape of man. For he is the breath. So he approached it. For he who shines is the breath. For a hundred years he approached it. Therefore a hundred are the years of the life of man.

---

[7] Ānandatīrtha renders *svadhayā* by Viṣṇu. Sāyaṇa takes it more properly as referring to digestion. The end of the verse means, according to Sāyaṇa, that men nourish the body by food and drink, but not the *prāṇa*. Ānandatīrtha renders, 'at death they see the bodies deserted by Vāyu.' The epithet *śaśvantā* can only be justified by the fact that one of the two is immortal, and on the principle *chatriṇo gacchanti*. For more or less analogous cases, cf. *uṣásā, dhanī* (Delbrück, *Altindische Syntax*, p. 102), and *kṣapáh*, RV., I, 70, 7, as interpreted by Oldenberg, *S. B. E.*, XLVI, 70. On the same *chatrinnyāya* Govinda on Śāṅkhāyana Śrauta Sūtra, XVII, 8, 10, explains why the Prauga Śastra in the Mahāvrata according to that school is called Vāmadeva's though less than a half of it is by him (Friedländer, p. 33, n. 1). Weber (*Ind. Stud.*, XIII, 113) quotes *dvādaśāu māsau* from Taittirīya Saṃhitā, VII, 5, 2, 1; Kāṭhaka Saṃhitā, XXXIII, 1; Pañcaviṃśa Brāhmaṇa, IV, 1, 2; *stómau dvādaśau*, Kāṭhaka, XXXIII, 3, and similar cases from Śatapatha Brāhmaṇa, IV, 5, 7, 2; XI, 6, 3, 5; XIV, 6, 9, 5; XII, 3, 2, 2; Pañcaviṃśa Brāhmaṇa, VI, 2, 5 (cf. *Ind. Stud.*, IX, 18). *Viṣūcīnā* is explained as having diverse functions, the breath moving the bodily senses, the body supporting the *prāṇendriyas*. *Viyantā* is referred to the fact that on death the body remains on the ground, while *prāṇa* seeks another world. Cf. Oldenberg, *Religion des Veda*, pp. 574 sq.; Pischel, *Vedische Studien*, II, 221; Böhtlingk, *Sächs. Ber.*, 1893, p. 92; Hillebrandt, *Ved. Myth.*, I, 336, n. 1; II, 8.

[8] Sāyaṇa explains 'immortal' as united with Hiraṇyagarbha; Ānandatīrtha says 'emancipated.' But that this Āraṇyaka knows emancipation, instead of immortality, as the highest end is not even probable. *Dadṛśe* (II, 1, 6) and *mene* (III, 2, 1) are both clearly present passives in sense. The original sense of the perfect was not distinguished from the present in point of time but denotes a state, cf. Giles, *Comp. Phil.*, § 549; Monro, *Homeric Grammar*², pp. 31, 32; Delbrück, *Synt. Forsch.*, II, 192 sq.; *Vergl. Syntax*, II, 211 sq.; *Altindische Syntax*, p. 297; Whitney, *Sanskrit Grammar*, § 823. The oldest sense is quite frequent in the Ṛgveda. In cases like *bibhāya* (I, 3, 4) and *dadhāra* (I, 5, 2) the naturally intensive form of the perfect is further strengthened.

[1] This Khaṇḍa shows that the names of the seers of the Ṛgveda can be deduced from *prāṇa's* actions. Ānandatīrtha explains the section as proving that Viṣṇu is superior to all the gods. He takes *abhyārcat* as "he entered into", *brahman* and the other gods. He justifies his theory by quoting the Vāc Sūkta, RV., X, 125, as proving that Vāc, i.e. *Ramā*, is superior to the gods, and she of course is inferior to Viṣṇu.

The sun and *prāṇa* are as usual identified, the one being the *adhidaivatam*, the other the *adhyātman* representation. The former attracts the vision, the latter impels the body.

Because he approached him for one hundred years, therefore they are the Śatarcins[*] Therefore they call him who is (*prāṇa*) the Śatarcins He placed himself in the middle of all that is Because he placed himself in the middle of all that is therefore they are the Madhyamas Therefore they call him who is (*prāṇa*) the Madhyamas As up-breathing he is the swallower, as down breathing delight Because as up breathing he is the swallower, as down breathing delight, therefore he is Gṛtsamada Therefore they call him who is (*prāṇa*) Gṛtsamada All whatsoever was his friend Because all whatsoever was his friend, therefore he is Viśvāmitra Therefore they call him who is (*prāṇa*) Viśvāmitra The gods spake to him, 'Let him be dear to all of us' Because the gods spake to him 'Let him be dear to all of us,' therefore he is Vāmadeva Therefore they call him who is (*prāṇa*) Vāmadeva He protected all this from evil Because he protected all this from evil, therefore they are the Atris Therefore they call him who is (*prāṇa*) the Atris

2 He also is a bearer of offspring Offspring is *vāja*,[1] and he supports offspring Because he supports offspring, therefore he is Bharadvāja Therefore they call him who is (*prāṇa*) Bharadvāja The gods spake to him, 'Let him be the richest[2] of us all' Because the gods spake to him, 'Let him be the richest of us all,' therefore he is Vasiṣṭha Therefore they call him who is (*prāṇa*) Vasiṣṭha He went forth[3] to all this whatsoever Because he went forth to all this whatsoever, therefore they are the Pragāthas Therefore they call him who is (*prāṇa*) the Pragāthas He purified all this whatsoever Because he purified all this whatsoever, then they are the Pāvamānīs[4] Therefore they call him who is (*prāṇa*) the Pāvamānīs He said, 'Let me be everything small and great They became the Kṣudrasūktas and Mahāsūktas[5] Therefore

---

[*] Really, Max Muller points out the name refers to their composing about 100 verses each They are the seers of RV, I The Mādhyamas are the seers of Books II–IX, Gṛtsamada of II, Viśvāmitra of III, Vāmadeva of IV, the Atris of V For the rest see Khaṇḍa 2 The Madhyamas appear in Kauṣītaki Brāhmaṇa, XII, 3 Āśvalāyana Gṛhya Sūtra, III 4 2, Śāṅkhāyana Gṛhya Sūtra IV, 10, 3, Bṛhaddevatā, III, 116 (Madhyamāḥ), Sarvānukramaṇī, Introd, II 10 &c For the pl r, *Atrayaḥ*, cf Oldenberg, *Z D M G*, XLII, 226, n 1

[1] *Vāja* is taken as either the body from the √*vaj* in the sense of going, or as food by Sāyana.

[2] Sāyana translates 'causing to dwell by his entry into us', and Ānandatīrtha has 'best of dwellers' The ordinary sense seems preferable Cf II 2, 4 n 5

[3] This seems to be the sense and it is so taken by Sāyana Ānandatīrtha takes it either as 'he obtained' or 'he sang' Sāyana says the verses are called *Pragāthās* and also the poets. Probably the poets, of Book VIII, are meant Bharadvāja and Vasiṣṭha correspond to Books VI and VII respectively The same lists appear in Āśvalāyana Gṛhya Sūtra III, 4 2, and Śāṅkhāyana Gṛhya Sūtra IV, 10 3

[4] Presumably the poets of Book IX are so described Cf. Ārṣeya Brāhmaṇa (ed Burnell), p 42, *Indische Studien* III, 99. In Āśvalāyana *pavamānāḥ* and in Śāṅkhāyana *pāvamānīs* occur

[5] The poets of Book X are referred to Perhaps also the hymns were called *kṣudrasūktāḥ* as Max Muller suggests, but this is not certain. The last *kṣudrasūktāḥ* no doubt implies

they are the Kṣudrasūktas. Therefore they call him who is (*prāṇa*) the Kṣudrasūktas. (He said), 'Ye have said what is well said.' These became a hymn.[6] Therefore there is a hymn. Therefore men call him who is (*prāṇa*) hymn. He is a verse, for he went to[7] all beings. Because he went to all these beings, therefore he is a verse. Therefore they call him who is (*prāṇa*) a verse. He is also a half-verse, for he went to all these places.[8] Because he went to all these places, therefore he is a half-verse. Therefore they call him who is (*prāṇa*) a half-verse. He is a quarter-verse,[9] for he has entered all these beings. Because he has entered all these beings, he is a quarter-verse. Therefore they call him who is (*prāṇa*) a quarter-verse. He is a syllable, for he pours forth gifts to all these beings and because none can pour forth[10] gifts beyond him. Because he pours forth gifts for all these beings, and because none can pour forth gifts beyond him, therefore he is a syllable. Therefore they call him who is (*prāṇa*) a syllable. Therefore one should know that all these verses, all these Vedas, all sounds[11] are one word, *prāṇa*, and that *prāṇa* is all the verses.[12]

---

mahāsūktāḥ. See besides Āśvalāyana and Śāṅkhāyana, Bṛhaddevatā, III, 116; Sarvānukramaṇī, Introd., II, 10, with Macdonell's note.

[6] The poet is also called Sūkta, says Sāyaṇa, but there is no authority for this.

[7] The construction is obscure, but the rendering 'he went' seems best. The dat. is natural, cf. Speijer, *Vedische und Sanskrit Syntax*, § 44; Whitney, *P. A. O. S.*, April, 1891, p. lxiv; *Sanskrit Grammar*, § 285 b. Ānandatīrtha renders 'he went'. Sāyaṇa's version is *svapraveśena pujitam akarot*, taking *bhūtebhyaḥ* as *sarvabhūtārtham deham*, and Max Muller renders, 'he did honour to'. He also adds that the poet is called Ṛc as well as the Mantra. Cf. Geldner, *Vedische Studien*, III, 95.

[8] *Ardha* is taken as 'place' (cf. *ardo*) by both Ānandatīrtha and Sāyaṇa, and is probably so intended, as Max Muller takes it.

[9] Sāyaṇa renders 'word', but this is less likely. He adds that it means also 'quarter-verse'. For the intrans. *pādi*—which (as *apādi*) is recognized by Pāṇini—cf. Delbrück, *Altindische Syntax*, p. 266; Whitney, l. c., § 845; Speijer, l. c., § 170. In Jaiminīya Upaniṣad Brāhmaṇa, III, 9, 9, *apādi* seems transitive, but see Oertel's note. The use of the aor. here is hard to distinguish from that of the imperfect, as with *abhiprāgāt* above. But in these cases it is possible that the aor. has a sense almost *present*, a natural derivation from the true aorist sense of the immediate past (cf. Monro, *Homeric Grammar*², pp. 66, 67; Giles, *Comp. Phil.*, § 552 (iii); Whitney, *Sanskrit Grammar*, § 930, who points out that it is especially frequent in the Maitrāyaṇī Saṃhitā). It is also possible that the imperfect sense may be old (despite Whitney, § 929 a), for it is found in the Mantra literature. In the case of *abhiprāgād* there is the further possibility that after all it means 'he sang of all this' or 'he sang towards all this' (*abhipragāyata* occurs in the RV.), and is an imperfect from √*gā*, for *gāti* occurs in the Kauṣītaki Brāhmaṇa and the Mahābhārata (cf. Whitney, § 855, and *St. Petersburg Dict.*, s. v.), or even from √*gā*, go. *I do not therefore think these forms are signs of late date.*

[10] 'Without him' is Max Muller's rendering. That of the text is supported by Ānandatīrtha, the other version by Sāyaṇa. Cf. Delbrück, *Altindische Syntax*, p. 441.

[11] Sāyaṇa takes *ghoṣāḥ* as the aspirated sonants, *jh, gh, bh, ḍh, dh*, as in Ṛgveda Prātiśākhya, 714; Siddhāntakaumudī (ed. Tārānātha), p. 14; Max Muller, *Ṛgveda Prātiśākhya*, p. cclxi. It can hardly here, however, have this limited sense. Cf. Chāndogya Upaniṣad, II, 22, 5; all vowels are *ghoṣavant*.

[12] Oldenberg (*Z. D. M. G.*, XLII, 199–247) has shown conclusively that few if any of the

3 Indra[1] sat down beside Viśvāmitra who was about to recite the hymns of this day. He saying, 'This is food,' recited the thousand *bṛhatīs*. Thus he went to Indra's dear home. Indra said to him, 'Seer, thou hast come to my dear home. Do thou, seer, repeat a second[2] hymn.' He saying, 'This is food,' recited the thousand *bṛhatī* verses. Thus he went to Indra's dear home. Indra said to him, 'Seer, thou hast come to my dear home. Do thou, seer, repeat a third hymn.' He saying, 'This is food,' recited the thousand *bṛhatī* verses. Thus he went to Indra's dear home. Indra said to him, 'Seer, thou hast come to my dear home. I give thee a boon.' He said, 'Let me know thee.' Indra said, 'I am breath, thou, seer, art breath, all creatures are breath, he that shines is breath. In this form I pervade all the quarters. This my food is my friend, my support.[3] This is the food of Viśvāmitra.[4] I am he that shines.' Thus said he.[5]

4 This is produced as a thousand *bṛhatīs*.[1] The consonants[2] are the body,

---

hymns of the Ṛgveda go back to their nominal composers when these composers are the heads of the great families, but that they were written by members of the family. The only possible exceptions are Vasiṣṭha and Viśvāmitra under Sudās (p. 236). It is possible that here (p. 226 n. 1) a recollection of the facts is seen in that book V is ascribed to the Atris, while the others to individuals Gṛtsamada, Viśvāmitra, &c., but more probably the plural is used because it gives the proper play of words with *atrayata*. This is not, however, a sign of late date, for it seems likely that in RV., X, 181, the author held the same view as he attributes to Vasiṣṭha the *rathantara* (VII, 32, 22, 23) and to Bharadvāja the *bṛhat* (VI, 46, 1, 2), later attributed to Śaṃyu Bārhaspatya (Oldenberg, pp. 225, 227, n. 1).

[1] Sāyaṇa explains that this khaṇḍa shows the nature of the *aśītis* as being Indra's food. The form *upaniṣasāda* is wrong and can easily be corrected, but it is as old as Śaṅkara. The Jaiminīya Upaniṣad Brāhmaṇa, III, 3. 7, has *upaniṣasāda*.

[2] The collection of verses is regarded as three *aśītis* of tristichs, in *gāyatrī*, *bṛhatī*, and *uṣṇih* respectively. For them, see V, 2, 3. 5 and notes.

[3] Ānandatīrtha explains *dakṣiṇam* as *dakṣabhāge sthita iṣṭaḥ patiḥ jayaḥ tā dakṣiṇa mitraviśeṣaṇatvād dakṣiṇam iti napuṃsakaprayogaḥ*. Sāyaṇa refers the use to *abhivṛddhihetutvāt*, citing Dhātupāṭha, XVI, 7. This sense must be somewhat as in the text.

[4] Ānandatīrtha explains *Vaiśvāmitram* as *Kāmayābhimanyamānabṛhatīsahasrākhyam annam Viśvāmitreṇa sampāditatvād Vaiśvāmitram ity ucyate*. Sāyaṇa has: *Viśvāmitreṇa śaṃsanāt iti sampāditatvād idam Vaiśvāmitram*.

[5] In Śāṅkhāyana Āraṇyaka, I, 6, there occurs a dialogue between Indra and Viśvāmitra. It seems to show clear signs of a later origin, though it verbally reproduces some of this dialogue. It is much more philosophical. The Jaiminīya version, l. c., is very much altered, but all have clearly a common source, and use the narrative perfect (cf. Introd., p. 67). The threefold boon may be compared with the story of Naciketas (Kāṭhaka Upaniṣad).

[1] This khaṇḍa gives the correspondence of the various *akṣaras* of the 1000 *bṛhatī* hymn, which is got by the addition of the verses of the whole Niṣkevalya Śastra, to parts of the body of *prāṇa* (Sāyaṇa). Ānandatīrtha explains it as an identification of the various deities who preside over the sounds, &c. The number 36,000 is merely theoretical; Eggeling (S. B. E., XLIII, 111) counted about 37,200, and though the number could be reduced in various ways, it is not worth while.

[2] What are called by Pāṇini *hal* (Sāyaṇa). The Kaumara school adopt the term *vyañjana*

the vowels[3] the soul, the sibilants[4] the breath Knowing this he became Vasiṣṭha[5] Thence took he the name Indra proclaimed this to Viśvāmitra, Indra proclaimed this to Bharadvaja, so Indra is in sacrifices invoked by him as a friend[6] This is produced as a thousand *bṛhatīs* Of this produced as a thousand *bṛhatīs* there are thirty six thousand syllables So many thousands are the days of a hundred years They make up the nights by the consonants, the days by the vowels[7] This is produced as a thousand *bṛhatīs* After this being produced as a thousand *bṛhatīs* he who knows this becomes full of knowledge,[8] of the gods, of *brahman*, of the immortal, and goes to the gods What I am[9] he is, what he is, I am A Ṛṣi says (RV I, 115, 1), 'The sun is the self of all that goes or stands Let one consider this

Adhyaya 3

He who knows himself as the fivefold hymn[1] from whence all this springs, he is wise Earth, air, ether, water, light, these form the self, the fivefold hymn From him all arises, into him all resolves He who knows this is a refuge

---

for *kadins* as do the Sarasvata. The term corresponds with the use of the Ṛgveda Pratiśākhya, see Max Muller's edit., pp xii sq, and with the Śrauta Sutras *St Petersburg Dict*, s v

[3] Sayana takes this as in II, 2 2, n 11, as aspirated sonants This can hardly be accepted *Ātma* is taken by him as *madhyatarīram* The vowels must somewhere be alluded to, and *ghoṣa* can be = *svara*

[4] Ānandatīrtha and Sayana both render *śaṣasah* The Kaumara school also take this term In the Ṛgveda Pratiśākhya it includes *anusvara visarga*, *jihvāmūlīya*, and *upadhmanīya*, in the other Pratiśākhyas it refers to *śaṣasahah*

[5] Sayana here ascribes the name to his causing to dwell, and his covering, cf II, 2, 2 n 2 Ānandatīrtha prefers 'best of dwellers

[6] Sayana refers this to the Subrahmaṇyā rite of the Soma sacrifice, where Indra is called, *Indra a gacha, harīva a gacha* (Saḍvimśa Brahmana, I, 1, 12, Taittirīya Āraṇyaka, I, 12, 3 &c.)

[7] The Kaumara school thus defines *svarah*, Katantra I, 1, *siddho varṇasamāmnayah* | *tatra caturdaśādau svarah* (Sayana) See Max Muller, op cit, p x

[8] Sayana appears to take the first part of the sentence as independent, and as describing *prāṇadevah* For *devata apyeti* cf Bṛhadaraṇyaka Upaniṣad, IV, 1, 2, Aitareya Brāhmana, IV, 24, 5 No doubt the acc is mainly governed by the verb, but the prep force of *api* is too much ignored in Speijer, *Vedische und Sanskrit-Syntax*, §§ 87 88

[9] This no doubt refers to the identity of the sun and the self one of the oldest forms of Brahminical monism. Sayana illustrates the doctrine by a quotation from the commentary on the Brahma Sūtras, III, 3 Sun worship is a very early and widespread form of religion, cf Farnell, *Cults of Greek States* IV, 143, Evans, *Journal of Hellenic Studies* 1901, pp 108 sq, Manucci, *Storia do Mogor* (trans by Irvine) III, 3 for its real importance in India

[1] Ānandatīrtha explains that there are three *ādis* and a *pūrvabhāga* and an *uttarabhaga* These correspond to the five forms of Viṣṇu, Nārāyana, Vāsudeva, Saṃkarṣaṇa Pradyumna Aniruddha, who represent earth, ether, air, light, and water respectively

for his friends To him[2] who knows food and feeder a feeder[3] is born, and food is his Food is water and earth, for of them are foods compounded Light and air are the feeder, for by them[4] he eats food Ether is the bowl for in the ether is all poured He who knows this becomes the refuge (bowl) of his friends To him who knows food and feeder a feeder is born, and food is his Plants and trees are food, animals the feeder, for animals eat plants and trees Of animals, those who have teeth above and below and are formed like men,[5] are feeders, the rest food They overcome therefore the other animals, for the feeder is over his food He becomes over his friends who knows this[6]

2 He who knows more and more clearly the self obtains fuller being[1] There are plants and trees and animals, and he knows the self more and more clearly (in them) For in plants and trees sap only is seen, in animals consciousness In animals the self becomes more and more clear, because in them sap also is seen, while thought is not seen in others[2] The self is more and more clear

---

[2] *Tasmin* may refer to the *uktha* as Sayana and Max Muller take it Or it may be merely a precursor of *annam*, in accordance with the usual preference of Sanskrit for the order *sa y ah*

[3] i e a son able to eat The second *anya* must, I think, refer to the father, not the son The change of reference is too abrupt to be probable and either version is good sense Sayana takes it as referring to the son For the form *e jayate*, cf Jaiminiya Upanisad Brahmana, I, 27 6

[4] They aid digestion

[5] Zimmer (*Altindisches Leben* pp 74 76) shows the identity of the contrast between *ubhayadant* and other animals, which is found in the Samhitās with the old Latin contrast of *ambidens* (in Festus not = *bidens*) and *ἀμφώδοντα* in Aristotle That however, *ubhayadant* originally included the first class of sacrificial animals with man, as he holds (p 76) appears doubtful In this passage the resemblance to man is made explicit, and this is scarcely so likely if man were naturally one of the *ubhayadant* class Either *anu vadham* or the indeclinable *anuvadham* (as in III 2, 3) is grammatically possible, but the corruption to *anuvadham* would be much easier than to *anu vadham* *Anu vadhah* is also possible *Vadha* occurs several times *infra* II, 3 4, 5 Cf *vadham anu adhīyate*, Maitrāyaṇī Saṃhitā, III, 2, 4 10

[6] In *adhiva carantī* the acc. is governed by *adhi*, a use found in Mantra and Brahmana alike (Speijer, *Vedische und Sanskrit Syntax*, §§ 87, 88, Atharvaveda XIV, 49, 2 *adhi viśvany aruhad gabhīrā* RV, VIII, 68, 15b *adhi tiṣṭhan suvam ratham*, Vajasaneyi Samhita, VI, 2 *adhi tva sthasyati* &c) I do not, however, think it can well be construed with the gen, so I think the gen *samananam* is a partitive one 'of his friends he, &c.' For similar cases of the partitive gen, cf I, 2, 3 n 6 and Harivamsa, II, 79, 12, where Hopkins *J A O S*, XXII, 152, n 1, takes the gen as local. Delbruck (*Altindische Syntax*, p 441) is, I think, wrong in holding that *adhi* rarely has the accusative The root *sthā*, e g, would not naturally take an acc. without the aid of a preposition Cf II, 2, 4 n 8

[1] This is the most philosophical part of the whole Āranyaka and is a determined effort to explain the different stages of conscious life It will be observed that the distinctive marks of man are all elements which make his consciousness into an ordered system and they imply self consciousness, as opposed to the mere consciousness of animals in the form of their receptivity of external stimuli The theory of the soul in Aristotle *De Anima*, II 4 sq, is worth comparing For the form *āvistarām* cf I, 4 1, n 11, Bohtlingk, *Sachs Ber*, 1893 p 11

[2] Max Muller renders, 'but in others thought is not seen,' the apparent meaning being that

in man For he is most endowed with intelligence, he says what he has known, he sees what he has known, he knows to morrow, he knows the world and what is not the world By the mortal he desires the immortal, being thus endowed As for the others, animals, hunger and thirst comprise their power of knowledge They say not what they have known, they see not what they have known They know not to morrow, they know not the world and what is not the world They go so far, for their experiences are according to the measure of their intelligence[2]

3 This man is the sea,[1] he is above all the world Whatever he reaches, he desires to be beyond it[2] If he gains the sky world, he desires to be beyond it If he were to gain yonder world, he would desire to be beyond it. Fivefold is thus man[3] What is hot in him is fire; the apertures are the ether, blood, mucus, and seed are water, the body is earth, the breath is air. Fivefold is the air,[4] up-breathing, down breathing, back-breathing, out-breathing, on-breathing

---

some animated beings have not thought What must be meant is that others, i e plants and trees, have no intelligence, and so Sayana and Ānandatirtha construe it *Itara* frequently means, like ἄλλος and *alius*, others, not as opposed to a part of a species, but as another species, *A J P*, VII, 101 Stones have only *sattā*, says Sayana, i e are only objective, not also subjective

[2] Sayana takes the last sentence as meaning they are born according to their knowledge in a *former* birth This, however, assumes the transmigration theory, which is not certainly known in this Aranyaka The better meaning seems to be that taken above, which is more suited in point of fact to the context for the idea of former birth is nowise necessary or in point Sayana cites Bṛhadāraṇyaka Upanisad, IV, 4 2 and 7, but this Upanisad is earlier The word *yathaprajñam* does not occur in Jacob s *Concordance* Kausitaki Upanisad, I, 2, has *yathavidyam* of transmigration See also Lévi *La Doctrine du Sacrifice*, pp 96 sq

[1] The sea is typical of all unsatisfied desires Sayana cites Taittiriya Brahmana, II, 2, 6 *kamam samudram avivesety aha | samudra iva hi kamah | naiva hi kamasyanto 'sti na samudrasya |* The same idea appears over and again in the Greek Anthology, cf Butcher, *Greek Genius*, pp 266 sq For the separation of the prefix and verb, cf Introd, p 57, and examples from the Aitareya Brahmana in Liebich, *Panini* p 24, and from Bṛhadaraṇyaka, p 28

[2] *Enam* in R and in Sayana must stand for *m* in place of an assimilated *n*, as in II, 1, 5 n 6 For *ati* √*man*, cf Jaiminiya Brahmana, I, 42 (*J A O S*, XV, 234)

[3] Cf II, 3, 1, n 1 Ānandatirtha here repeats the identifications with the different forms of Visnu

[4] The five *pranas* frequently occur No intelligible explanation of them all is possible *Prana* and *apana*, once originally the same, were first divided as expiration and inspiration, then as breath, and the wind of digestion, cf II, 4, 1 and 2 *Vyana* 'through breathing or circulating air' (Eggeling *S B E*, XLIII, 263, n 1) is the bond between the *prāna* and *apana* *Samāna*, which 'distributes the digested juices through the limbs' (Eggeling, p 264, n 1), leads to union of the two first. *Udana* conducts the soul from the body at death. See Deussen, *Philosophie der Upanishads*, pp 249-252, E T, pp 276-280, and I, 3, 7, n 6 Sayana says that *prana* is in the mouth and nose, rising from the heart, *apana* is in the lower parts, *vyana* in all the veins, *udana* in the throat to lead forth the soul, *samāna* leads food and drink evenly through the whole body Jaiminiya Upanisad Brāhmana, II, 5, 6 adds *avana* to the number For further variations see on I, 3, 7, 4, 1 The same five as here occur in Śatapatha Brāhmana X, 1, 4 2-6, and Maitrāyani Upanisad, II, 6, where see Cowell's

The deities, sight, hearing, mind, and speech, are comprised in up-breathing and down breathing For they depart with the departure of breath He is the succession[4] of speech and thought which is the sacrifice The sacrifice is fivefold, Agnihotra, new and full moon sacrifices, the four monthly sacrifices, the animal sacrifice, and the Soma sacrifice The Soma-sacrifice is the most perfect of the sacrifices, for these five kinds are seen in it, that which precedes the libations,[5] is one, then there are three libations, and the rest (of the sacrifice) is the fifth

4 He[1] who knows one sacrifice above the other, one day above the other, one god above the gods, is clever This great litany is the sacrifice above the other, the day above the other, the god above the others This litany is fivefold As a chorus[2] it is *trivṛt*, *pañcadaśa*, *saptadaśa*, *ekaviṃśa*, and

---

notes, and Max Muller, *S B E*, XV, 293 With the following, cf. Bṛhadaranyaka Upaniṣad (Kanva), I 4 17, where man, animal, sacrifice, and *sarvam idam* are all fivefold, and Taittirīya Upaniṣad, I, 7, 1, where mind, speech, breath, sight, and hearing are man

[4] For *uttarottar°*, cf Wackernagel, *Altindische Grammatik* II, 1, 60 For *ati* + √*i*, cf Caland *Altind Zauberrit*, p. 18

[5] That is the *dīkṣā* The last is the *avabhṛtha udavasanīya*, &c See Hillebrandt, *Ritual Litteratur*, pp 97 sq It is worth noting that the Aitareya Brahmana does not deal with the new and full moon or the four monthly sacrifices, though the Kausitaki does, cf Introd, p 32

[1] This section is unusually foolish Ānandatirtha exercises much ingenuity in equating the five forms of Visnu to the several members of each of the sets of five The parts of the *saman* are also dealt with in Jaiminiya Upanisad Brahmana, IV, 9 10 See Hillebrandt, *Ritual Litteratur*, p 100

[2] Sayana explains these as follows *trivṛt stoma* is formed by the three hymns at the beginning of the Samaveda Uttararcika, 1 9, RV, IX, 11, 1-3, 64 28 30, 66, 10-12 The first three verses are taken from the first verse of each *sūkta* the second from the second verses, and the third from the third It is called *udyati* The *pañcadaśa* is formed out of one hymn, by repeating the first verse three times, the second and third once each, then repeating the second three times, and so on The *saptadaśa* is the *pañcadaśa* save that in the third round the second and third verses each are repeated thrice, i e. (1) aaabc, (2) abbbc, (3) abbbccc The *ekaviṃśa* is made by singing all verses three times, except the last first and second respectively in the three rounds, i e (1) aaabbbc, (2) abbbccc (or aaabccc—the MSS vary), (3) aaabccc (or abbbccc) The *pañcaviṃśa* is formed by singing in the first round the first verse thrice, the second four times the third once, in the second round, the first once, the second thrice, the third four times, in the third round, the first five times, the second once, the third three times, according to Dhanamjaya, or the first four times the second twice, the third thrice, according to Gautama. (This seems to be the sense, R's version is corrupt and S is imperfect) These *stomas* are called *pañcapañcinīs* (not as Max Muller, *viṣṭutis*, which is the generic title of which these are species), *daśasaptā*, and *saptasaptinī*, no name for the last being given Max Muller quotes Mahidhara on Yajurveda Saṃhitā X, 9 for the *trivṛt* More in point is Sayana on Aitareya Brāhmana, III 42 which closely resembles this passage The *St Petersburg Dict* (s v *trivṛt*) gives the *trivṛt* as consisting of one *sūkta*, RV, IX, 11 only, see Eggeling *S B E*, XXVI, 308, 309, Pañcaviṃśa Brāhmana, I, 99 sq, II, 1, 1, 7, 1, 14 1, Hillebrandt l c, p 101, and schemes in Caland and Henry's *L'Agniṣṭoma*

pañcaviṃśa As a *sāman*[1] it is *gāyatra*, *rathantara*, *bṛhat*, *bhadra*, and *rājana* As to metre it is *gāyatrī*, *uṣṇih*, *bṛhatī*, *triṣṭubh*, and *dvipadā* The explanation[2] is that it is the head, the right wing, the left wing, the tail, and the body (of the bird) He performs[3] the *prastava* five times, the *udgītha* five times, the *pratihāra* five times, the *upadrava* five times, the *nidhana* five times This forms a thousand syllables[4] The verses here are recited as five orders[5] What precedes the eighty tristichs is one order; then come the three sets of eighty tristichs, and the fifth consists of the rest This makes a thousand (verses)[6] That is the whole, these ten by tens are the whole For number is such Ten tens are a hundred, ten hundreds a thousand, and that is the whole These are the three metres, this food indeed is threefold, eating, drinking, and chewing. He obtains this food by these.

5 This is produced as a thousand *bṛhatīs* Some recognize a thousand of various metres, saying, 'Is there another?[1] let us say there is' Some say a thousand *triṣṭubhs*, some a thousand *jagatīs*, some a thousand *anuṣṭubhs*. A Ṛṣi says (RV, X, 124, 9), 'Sages in their wisdom discovered Indra dancing an *anuṣṭubh*'[2] That denotes, they discovered in speech then the breath of Indra He can become famous and of splendid renown 'Rather' he is liable to die untimely,'

---

[1] The *gāyatra sāman* is formed from RV, III, 62, 10, *rathantara* from RV, VII, 32, 22, the *bṛhat* from RV, VI 46, 1, the *bhadra* from RV, X, 157, 1, the *rājana* from RV, VII, 27 1, according to Sāyaṇa's note, cf V, 1, 2, n 2

[2] See Āraṇyaka, I, 4 2

[3] The *sāman* of the Niṣkevalya is the *rājana*, and each of its usual five parts is repeated five times The *upadrava* falls to the Udgātṛ and all join in the *nidhana* (Sāyaṇa)

[4] The *stobhas* are meaningless syllables, added to verses sung to make up the metre See Chandogya Upaniṣad, I, 13 These syllables are marked in Samaveda MSS, but they have not as yet been satisfactorily explained Cf Burnell, *Saṃhitopaniṣad Brahmaṇa*, p xviii, Hillebrandt, l c, p 104, n 15, Caland and Henry, op cit, App II.

[5] The verses corresponding to the body, head, wings, &c, are the first order, the three *aśītis* follow, then come the belly and chest verses.

[6] There are 1000 *stobhas* and also in the whole Śastra a 1000 *bṛhatīs* The rest refers to the nature of number as being measured by tens There are nothing but sets of ten The three 'metres' mean, according to Sayana, the numbers 10, 100, 1000 which govern all numbers This however is inadequate, as the reference is clearly to the three sets of *aśītis* The reference to food is because these *aśītis* are the food of the bird There is no sign that the numbers 100 or 1000 are to be treated as specially important Sayana's explanation is otherwise good He quotes for *daśataḥ*, Panini, V, 1, 60 Ānandatīrtha is very weak on this point.

[1] Sāyaṇa takes *kim anyat* as the question, *sad* the answer The others do not include the Śāṅkhāyanas, who also recognize a thousand *bṛhatīs* This is rather in favour of an early date, the dispute had disappeared before the Śāṅkhāyana Āraṇyaka. *Anyat* may be adverbial, 'variously'

[2] Sayana explains that the clouds rumbling produce a sound with an *anuṣṭubh* in it, cf. Geldner, *Vedische Studien*, II, 304, v Schroeder, *Mysterium und Mimus*, pp 40, 41

[3] Ānandatīrtha takes the whole as one argument and as meaning, 'he can die when he likes.' This is impossible For the construction, cf I, 1, 1, n 4

he[4] declares. For the self that is speech is imperfect, since[5] a man understands if driven to thought by breath, not if driven by speech. Let him produce the *bṛhatī*,[6] for the *bṛhatī* is the whole self. The self is on all sides surrounded by members, and, as the self is on all sides surrounded by members,[7] so is the *bṛhatī* on all sides surrounded by metres. The self is the middle of the members, and the *bṛhatī* of metres.[8] He can become famous and of splendid renown, while the other[9] will die untimely, so said he. For the *bṛhatī* is the whole self. Therefore let him produce the *bṛhatī*.

6. This is produced as a thousand *bṛhatīs*. Of this produced as a thousand *bṛhatīs*, there are eleven hundred and twenty-five *anuṣṭubhs*.[1] For by the larger the smaller is comprehended. A Ṛṣi says (RV., VIII, 76, 12), 'I a speech of eight feet,' for there are eight feet of four syllables. 'Of nine corners,' for the *bṛhatī*[2]

---

[4] Ānandatīrtha points out that 'he' is Aitareya Mahidāsa or Mahaitareya. Sāyaṇa vaguely says 'a wise man'. Cf. I, 1, 1, n. 5.

[5] This is very obscure. The version here adopted means that the activity of *manas* if evoked by speech (= *anuṣṭubh*) only is imperfect, but it is more perfect if evoked by breath (= *bṛhatī*). *Manas* will then stand in its wider sense, not as an *indriya*, as later, cf. Deussen, *Philosophie der Upanishads*, p. 245, E. T., p. 271. This is very strained, but at least it is less absurd than (1) Sāyaṇa's version, 'If he proceeds with the Śastra with reference to the *anuṣṭubh* which is proclaimed as Vāc, and not with reference to the *bṛhatī* which is proclaimed as *prāṇa*, then being driven by his mind he does not manage the Śastra by speech alone.' He adds that without breath speech merely conceived is inadequate, breath being essential for any sense activity. The idea is not unlike the one adopted above. (2) Ānandatīrtha renders, 'Being urged to objects of sense by *prāṇa*, i.e. Vāyu, and by *manas*, i.e. Śiva, he enjoys them, and not by voice alone.' He reads *manase* because he tries to account for the *e*. Sāyaṇa must have read *prāṇena* and taken *vāg* as an accusative or locative, as Max Müller points out. For the dat., which is rarely found in the local sense in the Brāhmaṇa style (Delbrück, *Altindische Syntax*, p. 144), see Speyer, *Vedische und Sanskrit Syntax*, § 43, and cf. II, 2, 2, n. 7.

[6] I.e. make out that the *bṛhatī* is the metre.

[7] Because it is surrounded in the Śastra (Sāyaṇa).

[8] Because metres are both bigger and smaller than the *bṛhatī*.

[9] Sāyaṇa ignores the difficulty of this passage. Ānandatīrtha of course renders it, 'he is able to die at will.' The text follows Max Müller's version. The syntax *yad bṛhatī* is very common in the Aitareya Brāhmaṇa, III, 43, &c.; Śāṅkhāyana Āraṇyaka, I, 4, &c.; *Altindische Syntax*, p. 564.

[1] 1000 × 36 syllables (*bṛhatīs*) = 1125 × 32 syllables (*anuṣṭubhs*).

[2] I.e. it is nine feet of four syllables and is formed by adding one to the eight feet of the *anuṣṭubh*. Sāyaṇa says the MS. *navasraktis* is *chandaḥ*. Cf. Benfey, *Sāmaveda*, Glossary, p. 87. The correction *navasraktir*, though easy, is more convincing, because of *r* following. Cf. Wackernagel, *Altindische Grammatik*, I, 32; Macdonell, *Vedic Grammar*, p. 68, n. 15. MSS. frequently differ in such points, cf. Whitney's note on AV., VI, 33, 2 (*ryathi(s)*); cf. V, 1, 1, n. 18; 2, 1, n. 6. Note should be taken here of the readings of the Mānava Gṛhya Sūtra, I, 2, 6 *caturvimlati* in the acc., and I, 23, 15 and 23 *pañcavimlaty anuvākam* combined with Mānava Śrauta Sūtra, VI, 2, 6 *sā caturvimlaty ayam te* (see Knauer, p. xli). I confess that the possible explanation suggested by Dr. Knauer of these cases as either contractions with omission of *anusvāra* or *visarga* or as neuters is not attractive. In the last case, as perhaps here, the original may have been as Dr. Knauer also suggests *caturvimlati(ḥ) ayam te*, &c., with the loss

becomes nine-cornered 'Touching the truth,' for speech[2] united with verse is truth 'I made[3] the body out of Indra,' for from this thousand *bṛhatīs* made into *anuṣṭubhs*, which is *prāṇa* connected with Indra, and from the *bṛhatī* he makes speech, the *anuṣṭubh*, as a body. The great litany is the highest development of speech, and it is fivefold, measured, unmeasured, music, true, and untrue. A *ṛc* verse, a *gāthā*,[4] a *kumbyā*,[5] are measured, a *yajus* verse, an invocation, conversation,[6] are not measured, a *sāman* or part of it is music; *om* is true, no is untrue. The flower and fruit of speech is what is true He can become famous and of splendid renown, for he speaks the truth, the flower and fruit of speech The untrue is the root of speech, and, as a tree with roots exposed dries up, and perishes, so a man who speaks untruth exposes his roots, dries up, and perishes Therefore let a man speak not untruth, but guard himself against it. The syllable[7] *om* is empty and goes forward. So if

---

of *ḥ* (as often in MSS *in pausa*) and subsequent erroneous contraction. So *pañcaviṃśatiḥ(m)* may have been written by error in the MS and then the *m* dropped and contraction applied But in verse, of course, we find clear cases of contraction or of the use of shortened forms, especially *va* for *eva*, e g Śāṅkhāyana Araṇyaka, XII, 29 *puṣpam iva* must *metri causa* be *puṣpeva* or *puṣpaṃ va*, probably the former, Oldenberg, *Z D M G*, LXI, 830, Roth, ibid, XLVIII, 682

[2] Speech is *anuṣṭubh*, verse *bṛhatī*, and united they touch *prāṇa* Ānandatīrtha explains by equating *bṛhatī* with a form of Viṣṇu and speech with Umā!

[3] 'He makes' in Max Müller's translation, ignores *aham* Sāyaṇa does not do this, but he explains the sentence by the action of the Hotṛ, as the Āraṇyaka uses the third person It only means that the *anuṣṭubh* is made out of the *bṛhatī* which is identified with *prāṇa*, and *prāṇa* is (see II, 2, 3) Indra.

[4] Sāyaṇa defines a *gāthā* as *sarvalokaprasiddhārthapratipādikā*, e g *prātaḥ prātar anṛtam te vadanti* (a *yajñagāthā* from Aitareya Brāhmaṇa, V, 31, 6, the example is not very happy), Ānandatīrtha as *parasparaṃ asamānaṃ viṣamasaṃkhyākṣaraṃ svaraniyamarahitaṃ khaṇḍavākyam* Cf Hopkins, *Great Epic of India*, pp 365 sq *St Petersburg Dict*, II, 731, Aufrecht, *Aitareya Brāhmaṇa*, p. 429, Bloomfield, *Religion of Veda*, p 196.

[5] Sāyaṇa defines as *ācāraśikṣārūpa*, e g *brahmacāry asy apo 'śāna karma kuru divā mā svāpsīḥ* or *mā suṣupthāḥ* (the MSS vary), i e Āśvalāyana Gṛhya Sūtra, I, 22, 2, Ānandatīrtha as *yajñāṅgavākyaṃ* In the parallel passage, Śatapatha Brāhmaṇa, XI, 5, 7, 10 (where see Eggeling's trans, *S B E*, XLIV, 101) *kumvyā* is read, which Weber (*Ind Stud*, X, 111, n 1) suggests as equal to 'refrain', cf *kumba kurīra*

[6] Sāyaṇa explains *brāhmaṇagata ye 'rthavāda yā ca rājasabhādau parihāsarūpeṇocyate sā sarvā vṛthā vāk*, Ānandatīrtha simply has *vyarthavāk* Cf *Vedische Studien* I, 118, 328 For *nigada* see *St Petersburg Dict*, s v, Bṛhaddevatā, VIII, 104, Winternitz, *Gesch der indisch Litt*, I, 142, n, who describes them as a kind of Yajus to summon the other priests to perform their tasks Sāyaṇa gives as an example of a *nigada* *Agne mahāṃ asi brāhmaṇa bhārata* (=Taittirīya Saṃhitā, II 5, 9 1, Bloomfield, *Vedic Concordance*, p 26ᵃ) For *sāman*, cf. Winternitz, p 146, n 3, who renders it as originally 'Besänftigungslied', 'ein Mittel zur Beschwichtigung von Göttern und Dämonen,' Bloomfield, *Religion of Veda*, p 38

[7] A curious piece of common sense (cf Mr Falconer's advice to Pepys, *Diary*, Aug 8, 1662) interpolated to avoid the danger of the preceding doctrine that *om* is truth For *om* as *tathā*, see Aitareya Brāhmaṇa, VII, 18, and Chāndogya Upaniṣad, I, 1, 8 The comp[illegible] with *amen* is of course accidental, Winternitz, *Gesch der indisch Litt*, I, 162, n 1

a man says *om*, then that[9] is taken from him, if he should say *om* to everything, he would empty himself and be unable to have delights The syllable 'no' is full[10] for one's self If a man should say 'no' to everything, his fame would be evil and he would destroy himself Therefore should one give at the proper time, and at the proper time he should refrain[11] from giving So does he unite the true and the untrue From their union he grows and becomes greater He who knows this speech of which (the great litany) is a modification, he is clever. 'A' is the whole of speech and being manifested[12] through the mutes and sibilants it becomes manifold and various If uttered in a whisper it is breath, if aloud it is body Therefore it is as it were hidden, for what is incorporeal is as it were hidden, and breath is incorporeal But spoken aloud it is body and visible, for body is visible

7 This is produced as a thousand *bṛhatīs* It is glory,[1] it is Indra, it[2] is the lord of creatures 'He who knows it as Indra, as the lord of creatures, leaves this world shaking[3] off all ties,' so said Mahidasa[4] Aitareya. Having departed, having become Indra,[5] he shines in those worlds They say, 'If by this form he gains yonder world, then by what form does he experience this world?'[6]

---

[9] Sayana construes as 'he is emptied for that, viz. the enjoyment of house, fields, &c' This is to force the meaning of *ātmas* overmuch, it is a *dativus incommodi*

[10] Is selfish. Sayana cites Bhagavadgita, II, 34 *sambhavitasya cakirtir maranad atiricyate* |

[11] Rajendralala prints in text and commentary *kalena* It should be *kāle na* as the commentary and also Anandatirtha, shows

[12] 'A' with the different letters is the source of the alphabet. It may be interesting to speculate if this denotes that writing where the 'a' was not expressed was already known It may be so, but it is not clear In any case as the date of writing is very doubtful, no great light would be thrown on the date of the Āraṇyaka, cf V 3, 3 ad fin, where the reference is clear but cogent only for Śaunaka's period For later reference to the *akṣara* see Jacob, *Concordance*, p 2 and cf Tandya Mahabrahmana, XX 14 2

[1] Sāyana compares Taittirīya Āraṇyaka I 1 *na tasyeśe kaścana tasya nama mahad yaśaḥ* | For Indra, cf II, 4, 3 Taittirīya Upaniṣad, I, 4, Kausitaki Upanisad, II 6, III, 1 Bṛhad aranyaka Upanisad, III 2 9

[2] This is the sense rather than, 'Indra is the lord as taken by Max Müller *Etan* below is the usual Sanskrit attraction of a pronoun to the gender of the predicate, *Vergl Syntax*, III, 240 sq

[3] This must be the sense, and so both Sayana and Anandatirtha take it Originally the word meant the decay of old age

[4] The quotation ends here, it seems The new sentence looks like a prose version of a Śloka cf V, 3 2

[5] Sayana quotes Bṛhadāraṇyaka Upanisad, IV 1 2 *devo bhutvā devan apyeti* | He refers also to Brahma Sūtra, IV, 3 15, and discusses whether this deification is a hindrance to real *mukti* and decides it is really a step towards it But of course the doctrine of *mukti* is not clearly found in this Aranyaka, see II, 1 2 n 9, Hopkins *Religions of India* pp 232, 238 sq

[6] For the nasal in *pluti*, cf Wackernagel, *Altindische Grammatik*, I, 299, 300, Whitney, *Sanskrit Grammar*, § 78

The blood in the woman[1] is the form of Agni, therefore one should despise it not The seed in the man is the form of Āditya, therefore one should despise it not This self gives itself to that self, that self gives itself to this self[2] They thus gain each other In this form[3] he gains yonder world, in that form he experiences this world

8 Here there are these verses[4]—

---

[1] Ānandatīrtha has a wonderful explanation This world and that world are both *svastrirūpam* of Bhagavant Sayana explains that there are six elements in the body, three, fat, bone, and marrow, are white and represent the man, three, skin blood, and flesh, are red and represent the woman *ayam* is used of the woman because she is connected with earth, *asāu* of the man because he is connected with the sun and the upper world

[2] The fact that Sayana does not comment on *amdsmai* shows how little he can be relied on to note points in the text The reading is quite certain, and cf Whitney, l c, § 502 b

[3] This is taken by Sayana and by Max Muller as referring to the words at once preceding But it is perhaps rather a reference to the question above Then *anena* will refer to the knowledge of Indra, and *amuna* to the human form produced by the union of the parents Sayana seems to have been misled by the use of Agni and Āditya into misinterpreting *lokam* The tone of the section is noteworthy when contrasted with the pessimism which the body and its imperfections induces in Buddhism and the later Upanisads (Maitrayani Upanisad, I, 2-4, Winternitz, *Gesch der indisch Litt*, I, 224) Max Muller's view (*S B E*, XV, l–lii) that, despite its references to Nirvana (p xlvi) and other hints at Buddhism (e g VII, 8), this Upanisad is anti Paninean cannot be supported The irregular Sandhi is merely a conscious and deliberate archaism (so perhaps also in the Manava Gṛhya Sutra, a piece of patchwork), and generally the language is quite recent in form compared to the really old Upanisads Deussen recognizes the later character and style of the Upanisad and Winternitz (p. 225) definitely refers it to a post Buddhistic date Indeed Weber (*Indian Literature* pp 96 sq) and Macdonell (*Sanskrit Literature*, pp. 230, 231) tend to refer it to classical times though its doctrine is no doubt earlier The optimism of the Upanisads is natural what is other than the *ātman* is miserable, but not the *ātman*, cf Bṛhadaranyaka Upanisad, III, 5, Taittiriya Upanisad, II, 9, III, 6, Iśa Upanisad, 7, Hopkins, *Religions of India* p 240

[4] The verses are probably older than the prose They are earlier than the *triṣṭubhs* cited by Patanjali (cf Weber, *Ind Stud*, XIII, 483 sq) and show every sign of antiquity in their metrical form (cf *J R A S*, 1906 pp 1-10, Oldenberg, *S B E*, XXX xxxv, Hopkins, *Great Epic of India*, pp 194 sq) which is decidedly irregular The third verses of 1, 2, 4 are *jagatis*, the first verse of 1 has only ten syllables, the last verse of 4 only 9 and even if by resolutions they are altered into 11 syllable verses, then the characteristic *triṣṭubh* ending is missing In no case are the four verses assimilated, and indeed in no case are even two verses assimilated The last stanza, *pada* 1, is an iambic ended *anuṣṭubh*, a very early verse indeed It is of course true, as Bloomfield (*Atharvaveda*, pp 41, 42) points out that the actual development of the *anuṣṭubh* (*padas* 1 and 3) cannot possibly have been from ⏓⏓⏓⏓⏓⏓⏓⏓ to ⏑–⏑–⏑–⏑⏓, and thence to the Epic Śloka with its differentiated *padas*, but that the iambic *anuṣṭubh* is a priestly as opposed to a popular verse with free *padas* 1 and 3 But it is equally clear that the development of the iambic *anuṣṭubh* in the priestly circles was comparatively early and that the later verse writers tended more and more to fall back (with sporadic cases of imitation such as in the Vimada hymns, see my criticisms[*] of Arnold's *Vedic Metre*, in *J R A S*, 1906,

---

[*] I may note here a small point confirmatory of my criticism of Prof Arnold's views The term *daksina* (*pada*) occurs in RV, X, 61, 8 which is therefore naturally called one of the

That fivefold body the undying enters,[2]
That which the harnessed steeds[3] draw to and fro,
In which is yoked the trueness of the true,[4]
In that are all the gods in one combined ‖ 1 ‖

Which from the undying[5] the undying joins,
That which the harnessed steeds draw to and fro,
In which is yoked the trueness of the true,
In that are all the gods in one combined ‖ 2 ‖

---

pp 484 sq, 720) on the popular anuṣṭubh and its later development ⏓⏓⏓⏓⏑––⏓ That development is shown in the late Mantras found in the Gṛhya Sūtras e.g in thirty out of thirty nine cases in the Śāṅkhāyana (Oldenberg, *Z D M G*, XXXVII, 67 sq, *S B E*, XXX, xxxv sq), in the Ṛgveda Prātiśākhya of Śaunaka (*S B E*, l c), in the Bṛhaddevatā (*J R.A.S.*, l c.), in the Epic (Hopkins, l.c., Jacobi, *Ind Stud.*, XVII, 443 sq, *Das Rāmāyana* (1893), and in *Gurupūjākaumudī* (1896)) It is quite possible and even probable that Oldenberg is right in thinking that the iambic hymns are in the Ṛgveda earlier than the bulk of those hymns where the endings of the first *pāda* of each hemistich is unrestricted in point of form, the period of the Kuru princes Parikṣit and Janamejaya[2] (*Z D M G*, XXXVII, 65)

It is obvious that these verses are of the same type as the *yajñagāthās* of the Aitareya Brāhmaṇa and Āśvalāyana Gṛhya Sūtra (I, 3, 10), i.e. they were composed to illustrate and sum up the doctrines which the Āraṇyaka supports, and here as used are older than the work in which they occur (cf Oldenberg *S B E*, XXX, xxxv–xxxvii, *Ind Stud*, XV, 11) These verses form an interesting parallel to the rise of the Ākhyāna, in which the verses perhaps denoted the chief movements in the narrative and were fixed before the prose (or verse later) connecting parts (Oldenberg, *Z D M G*, XXXVII, 54 sq, XXXIX, 52 sq, Winternitz *Gesch der indisch Litt*, I, 89 sq) For similar verses, see Bṛhadāraṇyaka Upaniṣad, I, 6, 23, Taittirīya Upaniṣad II 8 &c In Bṛhadāraṇyaka Upaniṣad II 4 10, Ślokas are mentioned after Vidyā, Upaniṣads and before Sūtras in such a way as to suggest that such Ślokas as here occur are denoted *Asyāḥ* is also a pre Brāhmaṇa and Ṛgvedic form, though occasionally found later, e g III 2, 3

[2] This is not very clear Ānandatīrtha explains that the fivefold body is that composed of Nārāyaṇa, &c, and is male and female united, in which all the gods Nārāyaṇa, &c., are united Sāyaṇa explains that the breath enters the body and the worshipper meditates on himself as identical with the breath and thus with all the gods. The five are presumably the five senses.

[3] The metaphor is common, cf Kaṭhaka Upaniṣad III, 4 *indriyāṇi hayān āhuḥ* | The senses are meant Cf. Max Müller, *S B E* XV, 12, and n 14

[4] i e *brahman* probably At least so it was later interpreted and the idea may well be early, though it might be enough to take it merely as "the essence of truth" Cf. Bṛhadāraṇyaka, II, 3 6 *athā nāmadheyaṃ satyasya satyam iti prāṇā vai satyaṃ teṣām eṣa satyam* | For the position of *brahman* in the body with *prāṇa* Sāyaṇa cites Praśna Upaniṣad, VI, 3 *sa īkṣāṃ cakre kasminn aham utkrānta utkrānto bhaviṣyāmi kasmin vā pratiṣṭhite pratiṣṭhāsyāmīti sa prāṇam asṛjata* | For the next line cf Bṛhadāraṇyaka Upaniṣad, I 4 7 *ātmety evopāsītātra hy ete sarva ekaṃ bhavanti*, other examples are given in Jacob, *Concordance* pp 260 sq

[5] The undying here is *brahman* the other undying breath as in ver 1 (Sāyaṇa)

---

latest hymns by Rhys Davids *Buddhist India* p 30 But Prof Arnold (*Vedic Metre*, p 286) assigns this hymn to the archaic (by which he means the oldest) period!

[2] Cf however Whitney in Colebrooke, *Essays*², I, 118 on legendary contemporaneities

Of speech that which is 'yes' and which is 'no',
That which is harsh[6] and that which is immense,
Laying aside[7] have poets found their quest,
They, bound by names,[8] rejoiced in the revealed ‖ 3 ‖

In which[9] revealed the poets did rejoice,
In it in unity the gods exist,
Casting aside all evil by this lore,[10]
The wise one rises to the world of heaven ‖ 4 ‖

Neither by name of woman[11] is he called,
Nor yet by name of neither man nor woman,
Nor yet by name of man may he be named
By him who fain would tell the name of breath ‖ 5 ‖

Brahman is called 'a' and the 'I' is there contained[12] This is produced as a thousand *bṛhatīs* Of this produced as a thousand *bṛhatīs* there are thirty-six thousand syllables. So many are the thousands of the days of man's life By the syllable of life[13] alone does he obtain the day of life, and by the day of life the syllable of life There is a chariot of the gods which destroys desires[14] Its seat is speech, its two sides the ears, the horses the eyes, the driver the mind Breath mounts upon it. A Ṛṣi says (RV, X, 39, 12), 'Come hither on what is quicker than mind,' and (RV, VIII, 73, 2), 'On what is quicker than the winking of an eye'[11]

---

[6] Sayana cites Taittiriya Āranyaka, IV, 27 (Ānandaśrama ed, p 333) *khat phaḍ jahi chindhi bhindhi handhi kaṭ iti vacaḥ krurani* | *ulbanesu* he renders *akroṣṭakam* Cf also Āpastamba Śrauta Sutra, XIV, 14, 1, Hillebrandt, *Ritual Litteratur*, p 166, *Ved Myth*, III, 366

[7] *vyuya* like *nama* in ver 4 appears 'metrical'

[8] This merely means they rose above mere names to the unity of *brahman* or *prana* Sayana renders 'dependent on the letter 'a' which is the name of *prana*' Anandatirtha refers to the names of Bhagavant

[9] *nama* is rendered by Sayana as equivalent to *namayattah* above. This cannot be the case, nor can it well be for *namani* as Ānandatirtha construes it It must be for *nama* the last *a* being lengthened *metri causa* For such cases cf Macdonell *Vedic Grammar* p. 62, Aufrecht, *Aitareya Brahmana* p 427, Sankhayana Śrauta Sutra XVII 9 7, XVIII, 22 10, even in prose (cf Introd, p 70) *J A O S*, XXV, 98, below, III, 1, 2, n 2

[10] By the help of *brahman* is Sayana's version and so also Anandatirtha takes it More probably it is by aid of this doctrine For *apahatya*, cf Jaiminiya Upanisad Brāhmana, II, 1 10, 2

[11] Sayana quotes Śvetaśvatara Upanisad, V, 10 (the late metre is noteworthy) —

naiva stri na puman esa naiva cayam napumsakah |
yad yac chariram ādatte tena tena sa codyate ‖

For the nominative, cf passages like Bṛhaddevatā, V, 39 where I would read *Haspatih* with MSS h d, Rgveda Prātisakhya, XVII, 26, Taittiriya Samhitā V 7, 4, 4, &c.

[12] This must be taken as a clear assertion that *brahman* includes the individual self Sāyana says it refers to Hiranyagarbha quoting the very late Nrsimhottaratāpaniya Upanisad, V *sarvoham mam Hiranyagarbhah* |

[13] Ānandatirtha explains the *aksara* as the female form of Visnu, the *ahas* (sic) as the male As a matter of fact the sentence merely asserts he obtains *brahman* or *prana* by means of *brahman* or *prana* as both are revealed in the syllable and the ritual of the Mahavrata day, as in I, 2, 2

[14] Sāyana explains this as a chariot of Hiranyagarbha Anandatirtha renders *anakima*

ADHYĀYA 4.

In the beginning[1] the one self was this, there was nothing else blinking. He[2] thought, 'Shall I create worlds?' He created these worlds, water, lights,

---

indrah as, '*Prāṇa* has no desires and delights in *Māyā*' i e Ramā. Really all that is meant is that there is a chariot, viz. the body, where *prāṇa* mounts as contained above in the verses Ānandatīrtha explains the *uddhi* as Pamā in snake form *śrotre* as Candra and his wife, *pakṣau* as Candra and his wife, *cakṣuṣī* as Sūrya and his wife, *manaḥ* as Rudra. The metaphor is not rare, e g p 3, quotation in Āśvalāyana Śrauta Sūtra VI, 5, 3, Śāṅkhāyana Āraṇyaka, I, 8, RV, III, 14, 7, as interpreted by Bergaigne (Oldenberg, *S B E*, XLVI, 270) where the prayer is a chariot, Atharvaveda VIII, 8, 22, where *uddhi* and *pakṣas* also occur, and are rendered as above by Whitney, Maitrāyaṇī Saṃhitā, III, 4, 4, Kāṭhaka Saṃhitā, VIII, 8

[11] Sāyaṇa adds a long disquisition (cf Max Müller, *S B E*, I, 235, 236) on the difference of this *prāṇavidyā* from that of the Bṛhadāraṇyaka Upaniṣad and the Chāndogya Upaniṣad, in which *prāṇa* is not related to the Mahāvrata ceremony Following as usual Śaṅkara he also discusses what is the result of this *prāṇavidyā*, and concludes that it leads after death and absorption in the *paramātman* to rebirth in the *brahmaloka* where after enjoyment of all the powers of a deity, he proceeds to obtain full knowledge and *mukti* But Śaṅkara ignores the fact that *mukti* is not as yet known to this Āraṇyaka, which in its philosophic doctrine reaches only the unity of existence and the identity of the self and *brahman* and which promises immortality, not liberation, to the devout. It is impossible even to say that this Āraṇyaka, II, 1-3 realises clearly the doctrine that all is consciousness, though it approaches this standpoint. It does not assert that the self is unknowable as pure subject or the unreality of existence, as is done by the later Upaniṣads and the Vedānta To the writer of this Upaniṣad immortality meant a continuance of conscious existence, because the identity of the self and the world did not involve in any way the destruction of self All that it involved was the destruction of what is really self from its accidents It is of course true that this position is not strictly consistent, but it is no more unsatisfactory than that of Vedāntism.

[1] Śaṅkara, Ānandatīrtha, and Sāyaṇa all expend great efforts in explaining this short Upaniṣad, II, 4-6, but they mainly deal with difficulties which do not arise if no effort is made to reconcile this text with pure Vedāntism or to explain logically its inconsistencies. The real advance on II, 1-3, consists in (1) the fact that *ātman* is the subject, not as before *prāṇa*, *puruṣa*, (2) that *ātman* and *brahman* are more explicitly recognized as intelligence, but both these points are foreshadowed in II, 1-3 Max Müller (*S B E*, I, 236) leans to the view that this Upaniṣad rises from the conception of life to that of the self, but this is rather too great a distinction This Upaniṣad is a little more advanced than II, 1-3 but not much so Deussen (*Sechzig Upanishads*), of course, interprets it as a later Upaniṣad and reads into it doctrines not contained in it. Colebrooke (*Essays*, I, 47-53), Roer (*Trans*, pp. 26-34), and S Sītārāma (*Upanishads* V, 1-64) follow Śaṅkara On *udam*, cf Max Müller, *S B E*, XV, xix Böhtlingk has rendered the Upaniṣad, *Sächs Ber*, 1890 p 161, cf 1891, p. 85, 1897, p 95 For Rāmānuja's interpretation, cf. *S B E*, XLVIII, 71 81, 201, 206, 391 417 461, &c

[2] This is an imitation of the Puruṣa Sūkta RV, X, 90, cf Taittirīya Āraṇyaka III 12, but, as Deussen points out with the essential difference that the metaphysical *prius* of the *puruṣa* is the *ātman* The view of the relation of the *ātman* to the world is cosmogonic,

mortal, and waters This water is above the[3] heaven, and heaven supports it The lights are the sky The mortal is the earth, those under the earth are the waters He thought, 'There are these worlds Shall I create guardians of the world?' He formed the person,[4] taking him out from the waters[5] He brooded[6] on him, and when he was brooded over, a mouth burst forth as an egg does From the mouth came speech, from speech fire Nostrils burst forth From the nostrils came forth scent,[7] from scent wind Eyes burst forth From the eyes came forth sight, from sight the sun Ears burst forth From the ears came forth hearing, from hearing the quarters[8] Skin burst forth From the skin came forth hairs, from hairs plants and trees The heart burst forth From the heart came forth mind, from mind the moon The navel burst forth From the navel came forth down breathing,[9] from down-breathing death The generative organ burst forth. From the organ came forth seed, from seed water.

---

not pantheistic. Of course the orthodox view of the commentators that the *ātmā* is the *Īśvara*, not *Virāj*, and the creation is *adhyāropa* from II, 4, 1, to II, 4, 3 This is not, it is admitted by Sayana clear from the text, but he appeals to Śvetāśvatara Upaniṣad, IV, 10, *māyām tu prakṛtim vidyād*, and Brahma Sūtra, I, 4, 23, *prakṛtiś ca pratijñād dṛṣṭāntānu rodhāt* besides other passages equally irrelevant. In Jaiminīya Upaniṣad Brāhmaṇa, I, 1, 1, *aikṣata* the regular form occurs The Aitareya Brāhmaṇa often has unaugmented pasts, see p 56, Böhtlingk, *Sächs Ber* 1900, p 413 The next clause, here and II, 4 3, may be interrogative or merely an expression of determination (so commentators and translators) For *apas*, cf Atharvaveda VI, 23 2, *Ind Stud*, X, 440, n 1, *J A O S*, XXV, 120

[3] The translation of Max Muller, 'and it is heaven,' can hardly be right, and it is not supported by the commentators It is true that heaven must come in somewhere, for it is sufficient if it comes in as a support, and so Böhtlingk and Deussen, with Colebrooke, Sītārāma, Rajārāma, and Roer take it Ānandatīrtha explains *ambhas* as *mahas* and the other worlds beyond the heaven where the waters were originally placed, 'the blue firmament,' Rajārāma

[4] This is the later *virāj* of the Vedānta Ānandatīrtha calls it Brahman, in accordance with the Viṣṇu legend Cf Hopkins, *Rel of India*, pp 232 sq

[5] The five elements (Sāyaṇa), Brahman, &c. (Ānandatīrtha)

[6] The sense of *√tap*, to create by will, is pointed out by Śaṅkara, who (cf Winternitz, *Gesch der indisch Litt* I, 87 sq, 91 sq, Oldenberg *Religion des Veda* pp 402 sq) cites Muṇḍaka Upaniṣad, I, 1, 9 *yasya jñānamayam tapaḥ* I The translation here is borrowed from Max Muller (cf also *S B E*, XV, 28, n 2) For *yathāyatam* below, cf Jaiminīya Upaniṣad Brāhmaṇa III, 14, 8, Jaiminīya Brāhmaṇa, II 12 There are sets of three, the organ, the activity and the natural phenomenon corresponding which is later called the presiding deity See e g the Anugītā, Mbh, XIV, 1119 sq For this *sṛṣṭikrama*, cf Chāndogya Upaniṣad VI, 2 Taittirīya Āraṇyaka, II, 1

[7] *Prāṇa* here means clearly the power of smell Originally (1) it meant the breath in the widest sense from which it came to denote (2) life or the principle of conscious life, as frequently in II, 1-3 On the other hand, (3) it was narrowed down to denote one of five *prāṇas*, II, 3, 3 and these *prāṇas* were contrasted with *manas* and the *indriyas*, though in death or sleep the fundamental character of the *prāṇas* came out. (4) The sense 'smell' is an independent and not very common development (5) Another development applies it to all the organs of life, e g eyes, nose, tongue see I, 3, 7, n 6. Cf *Śāṅkhāyana Āraṇyaka*, p 21, n 1

[8] Ānandatīrtha explains them as Indra, Yama, Varuṇa, and Kubera.

[9] *Apāna* here has the other meaning of down breathing, not inspiration, but breathing,

2. These deities[1] being created fell into this great ocean[2]. He troubled him with hunger and thirst. The deities spake to him, 'Grant us a place, where we can rest and eat food.' He led a cow[3] for them. They said, 'This is not enough for us.' He led a horse for them. They said, 'This is not enough.' He led man[4] to them. They said, 'Well done!'[5] Man is indeed well done. He said to them, 'Enter according to your places.'[6] Then fire,[7] having become speech, entered the mouth. Air, having become scent, entered the nostrils. The sun, having become sight, entered the eyes. The quarters, having become hearing, entered the ears. The plants and trees, having become hairs, entered the skin. The moon, having become mind, entered the heart. Death, having become down-breathing, entered the navel. The waters, having become seed, entered the generative organ. Hunger and thirst said to him, 'Grant us two a place.' He said to them, 'To these deities I assign you, I make you sharers

---

or wind in the lower part of the body. Cf. on II, 3, 3 and II, 4, 3. Rajarâma takes it as 'air inhaled by mouth, *not through nostrils*.' Colebrooke has 'the air drawn in by deglutition', explaining that swallowing was considered a parallel to inhaling. Cf. *Z. D. M. G.*, LV, 261, LVI, 156, *J. A. O. S.* XXII, 249.

[1] This section really reverses the former section. There *âtman* produced the worlds, then *purusha* and the deities. The deities now enter into *purusha*. Compare the common process in the Brâhmanas where the *brahman* creates the world and then enters it, but here the deities have no creative power, and the section only seems to show the reciprocal dependence (cf. Winternitz, *Gesch. der indisch. Litt.*, I, 218, 219) of the deities and the senses, of the great cosmic forces and the microcosm. I take the subject of action to be the *âtman* throughout, so do Śankara and Sâyana. Roer apparently takes *purusha* as subject of all save the first two sentences. Colebrooke apparently read *abhyavchan* and so makes the *âtman* alone subject and object in the sentences.

[2] This must mean the ocean of being, from which *purusha* is evolved. Sayana says into the *srray*, but this seems less probable. The v. l. below *aśanayapipase* is the form in the Bṛhadâranyaka Upanisad, while in Taittirîya Âranyaka IV, 23, *aśanaya ca pipasa ca* is found. Cf. Aitareya Brâhmana, VII, 15, *aśanayapipasah*, Aufrecht, p. 431, Böhtlingk *Sächs. Ber.*, 1900, p. 418.

[3] Because it has no upper teeth, says Sayana. He is, however, right in quoting II, 3, 2, as showing the real reason for the preference of man, as the most intelligent.

[4] The commentators Ânandatîrtha and Sayana, who often follows him, Colebrooke, followed by Roer, Max Müller and Deussen explain this *purusha* as different from though allied to the *purusha* of II, 4, 1. This hardly seems likely, and the confusion of thought is just as great on the former theory as on the latter. The exact parallelism with II, 4, 1, of what follows is against their view. For the particle *su* cf. *P. A. O. S.*, Apr. 1893, pp. xli, xlii.

[5] Śankara suggests it may mean 'self made' (cf. Max Müller's trans. (*S. B. E.* XV, 58) of Taittirîya Upanisad II, 7) because man is created by his own illusion, or that he is the 'abode of all good actions', which S. Sîtarâma in his trans. accepts. Max Müller (*S. B. E.*, XV, 20, n. 4) equates *sva°* and *sukrta* as = deeds performed by oneself and believed to be good.

[6] Cf. Jaiminîya Upanisad Brâhmana I, 18, 3, which may be borrowed.

[7] This means, Sayana says, that in the absence of the deity the faculties cannot work. He quotes Brahma Sutra, II, 4, 14, *jyotirâdy adhishthânam tadâmananât*. Jaiminîya Upanisad Brâhmana II, 11, 12, seems reminiscent of this passage.

in them' Therefore to whatever deity an oblation is offered, hunger and thirst are partners in it[3]

3 He thought, 'There are these worlds and the guardians of these worlds Shall I create food for them?' He brooded over the waters[1] From the waters brooded over form[2] was born The form that was born was indeed food The food when created sought to go away[3] He was fain to seize it He sought to grasp it with speech He could not grasp it with speech Had he been able to grasp it with speech, man would have enjoyed food by uttering its name alone He sought to grasp it by scent[4] He could not grasp it by scent Had he been able to grasp it by scent, man would have enjoyed food by scenting it alone He sought to grasp it by the eye He could not grasp it by the eye Had he been able to grasp it by the eye, man would have enjoyed food by seeing it alone He sought to grasp it by the ear He could not grasp it by the ear Had he been able to grasp it by the ear, man would have enjoyed food by hearing it alone He sought to grasp it by the skin He could not grasp it by the skin Had he been able to grasp it by the skin, man would have enjoyed food by touching it only He sought to grasp it by the mind He could not grasp it by the mind. Had he been able to grasp it by the mind, man would have enjoyed food by thinking of it alone He sought to grasp it by the generative organ He could not grasp it by that organ Had he been able to grasp it

---

[3] Sayana following Anandatirtha, explains that as hunger is mitigated by the knowledge of its (i e food's) proximity, or by hearing of it, so the senses all appease hunger and thirst Śankara's view is that the sensations become eaters by sharing in the deities i e. fire, &c., in the body and in the world, so they share in every offering to a deity (i e the deity and the worshipper both eat)

[1] The five elements (Śankara and Sayana)

[2] Form or organism, as Rajarama translates it, is natural, not something imposed on matter, and it plays no such part in Indian thought as in Greek. Even the Buddhist *rupam* is not a pregnant conception

[3] Roer reads *nadat*, 'crying' so Rajarama, and see crit notes. Śankara explains 'that mice &c, try to run away from cats that eat them He takes *ajighamsat* as 'it sought to run away,' and this is followed by Sayana and Ānandatirtha and by Viśveśvaratirtha, besides being accepted by Colebrooke Roer, S Sitarama, and Rajarama, Max Muller, and Deussen But that this is correct seems very unlikely Rather it may mean, 'He sought to strike, grasp it' which idea is later developed in detail This leaves the exact sense of *parau* difficult If it is neuter cf Whitney *Sanskrit Grammar*, § 1117, Jaiminiya Upanisad Brahmana I, 2, 4, 6, 1, Katha Upanisad, II, 4 1, Maitrayaniya Upanisad, VI, 17, Oertel, *J A O S*, XVI, 126 But if it = to no purpose (cf Aitareya Brahmana, III, 46, 2, Jaiminiya Upanisad Brahmana I, 2, 4) a tolerable sense is made as masculine But I prefer Bohtlingk's *atyajigamsat*, cf Roth, *Z D M G*, XLVIII, 106-112 If *enat* is nom, cf Introd, p 56 In Manava Gṛhya Sutra, I, 12 5, occurs *atharman dadhimadhu samaśnutah*, which Knauer (p xliv) defends by quoting the Aitareya Brahmana passage (VII, 22) and Kausitaki Brahmana XXII, 1, and by the fact that *na* in Pali occurs in the nom (cf Muller *Pali Grammar*, p 88) Bohtlingk, *Sachs Ber*, 1896 p 155, 1900, pp 418, 428, denies the use

[4] As above in II, 4 1 For a rather similar list, cf Jaiminiya Upanisad Brahmana I, 60

by that organ, man would have enjoyed food by sending it forth alone. He sought to grasp it by down breathing. He obtained it.[5] Thus it is Vāyu who lays hold of food, and Vāyu is he who lives by food.[6] He thought, 'How can this be without me?'[7] He thought, 'By which way[8] shall I enter?' He thought, 'If speech distinguishes, if scent smells, if the eye sees, if the ear hears, if the skin feels, if the mind thinks, if down breathing digests, if the organ sends forth, what then am I?' Having split open the top of the skull he entered by that door. That door is called *vidṛti*, the place of happiness.[9] There are three[10] dwelling places of him, three dreams, this dwelling place, and this, and this. Born he looked through all beings, to see whether any one wished to proclaim another self[11] He saw this person only as the most widely extended *brahman*[12] I have seen it, so he said. Therefore he was Idamdra by name, he was indeed

---

[5] *Vāyu* is derived from *avayat*. The use of this causal form is confined to this sense, but is found both in Saṃhitā and Brāhmaṇa. The sense is perhaps 'consumed' rather than 'seized'. Possibly *a vī* is the source (Monier Williams' *Dict.*), but this is less likely; cf. *J.A.O.S.*, XVII, 53; *Ind. Stud.*, XVIII, 24.

[6] Or he who gives life by food, as Sāyaṇa and Ānandatīrtha take it, quoting Bṛhadāraṇyaka Upaniṣad II, 2, 1: *annam dāma*, IV, 3, 6, and Kauṣītaki Upaniṣad, III, 2. Sāyaṇa describes the passage as *itihāsabrāhmaṇa*. For the long series of conditionals, cf. Whitney, *Sanskrit Grammar*, § 950; Delbrück, *Altindische Syntax*, p. 366; Speyer, *Vedische und Sanskrit Syntax*, § 198. These cases are all normal; they refer to a past unreal condition, for the act of creation is not conceived as continuous, and correspond to the Latin pluperfect subject. or the Greek aorist indic. in protasis with ἄν with aorist in apodosis. The form *agrahaiṣyat* is remarkable; cf. Aitareya Brāhmaṇa VI, 24: *paryagrahaiṣam*, ibid., 35: *pratyagrahaiṣam*, and see Whitney, *Sanskrit Grammar*, §§ 904 b, 1068 a, for other cases of the anomaly. The Suparṇādhyāya also contains the form *agrahaiṣam*; Wackernagel, *Altindische Grammatik*, I, xxxii; see Mantrapāṭha II, 8, 3 *agrabhaiṣam*; cf. Böhtlingk, *Z.D.M.G.*, LIV, 511, with Bloomfield, ibid., XLVIII, 577; *J.A.O.S.*, XXV, 125.

[7] Śaṅkara illustrates by the metaphor 'Unless the lord the city keep, the watchers watch in vain'. There must be the soul in the body. Sāyaṇa compares Bṛhadāraṇyaka Upaniṣad III, 4, 1. Contrast with Aristotle, *De Anima*, III, 5, is interesting.

[8] I.e. by the tip of the foot, as in II, 1, 4, or the skull. Sāyaṇa connects the former with the *karmendriyas*, the latter with the *jñānendriyas*. Ānandatīrtha refers to a variant in Śaṅkara's commentary *antar* for *ataḥ*. It obviously must have been wrong, but it is worth noting that Śaṅkara's text was not very complete or certain. It is noteworthy that here we have no hint of *karman* (cf. Bṛhadāraṇyaka Upaniṣad III, 2, 13 sq., IV, 4, 2, 5).

[9] So called because connected with Hari, says Ānandatīrtha. The Jaiminīya Upaniṣad Brāhmaṇa knows a *nāndana sāman* and Sāmaveda, II, 651, a *nāndana svarga*.

[10] These three are variously interpreted. Śaṅkara gives two explanations. The first is that of right eye, inner mind, and ether in the heart. Ānandatīrtha explains the mind as in the throat, and identifies the heart with the ether. He thus gets in his own commentary the triad right eye, throat, and heart, and so Colebrooke. Sāyaṇa as often follows him rather than Śaṅkara, and after him cites the Brahma Upaniṣad III: *netre jāgaritaṃ vidyāt kaṇṭhe svapnaṃ samādiśet | suṣuptaṃ hṛdayasya tu* (al. *hṛdayasthaṃ*) ||. Śaṅkara and the others explain the states as of waking, dreaming, and deep sleep, for all are sleep as compared with true knowledge of *brahman* (cf. Kaivalya Upaniṣad, XII). The other explanation is that referring to another birth, viz. one's own body and those of one's mother and father; this is no doubt quite wrong, but Sāyaṇa reconciles the two theories by assigning two kinds of *saṃsāra*, *dinacaryasaṃsāra* and *janmāntarasaṃsāra*, to which the theories correspond.

---

[11] Śankara does not explain this passage Ānandatirtha says that either he regarded it as clear or his copyists (cf n 8) omitted it His own explanation gives us a choice (1) He identified himself with creatures because he did not see the true self, *iti* being used in the sense of *yarmat*, or simply, he identified himself with creatures he did not see the true self, *iti* marking the close of the *adhyaropa* section (2) The *adhyaropa* ends with *avasatha iti*, and with *sa jata* begins the *apavada* He examined the creatures separately, whether they had *svattah satta* or not, and concluded that 'there is nothing that I can call different from the true self' *Vadisyami* is given for *vavadisat* Sayana follows this one of Ānandatirtha's explanations, using some of the actual words Colebrooke has, 'What else (but him) can I here affirm (to exist)?' S Sitārama renders 'How should he speak of any other?' and Roer has, 'How could he desire to declare any other thing different from him?' Rajarama, 'Can any (element) here call (the ruler) different?' Max Muller and Deussen render, 'whether anything wished to proclaim here another self.' This must be right, or perhaps the subject should be 'any person', the difference is, however, slight This version is supported by Ānandatirtha in his own commentary, *iha bhutesu anyam matto 'nyam pravartakam vavadisat kim vadet*, says Visnu *Vavadisat* cannot refer to the subject of *abhivyaskhyat* and *anyam* must refer to *atmanam* *Vāvadisat* may be an intensive aor subj, or the injunctive of a desid from the intensive, both rare forms (Whitney, *Sanskrit Grammar*, §§ 1019, 1025) Nilakantha thinks this passage is referred to in the Moksadharma Mbh, XII, 10060, no doubt wrongly, see Deussen's trans, p 493 For *abhivyaskhyat*, *abhivyaksat* should certainly be read The confusion between *khy* and *ks* is very frequent in all sorts of MSS., cf Weber, *Ind Stud*, IV, 273, Hillebrandt's notes on Śankhayana Śrauta Sutra, IV, 12, 10, 15, 1, Gobhila Grhya Sutra, I, 3 18 (Oldenberg, *S B E*, XXX, 21), Knauer, *Manava Grhya Sutra*, p xxxv Scheftelowitz, *Die Apokryphen des Rgveda* pp 174, 175, and at great length in his forthcoming work, *Zur Stammbildung*, &c, on *krechra*, *Z D M G*, L, 42 Wackernagel, *Altindische Grammatik*, I, 136, *Epigr Ind*, IV, 222, *prakhyalitam* for *praksalitam* The Nirukta, III, 20, already recognizes it and uses it in connecting √*khya* with *rksa* On the other hand T, a South Indian MS, has the correct °*ksat* though perhaps only by conjecture. Rājarama gives the form as Vedic for *abhivyakhyat*, and no doubt a confused remembrance of such a form may have helped to keep the absurdity in the text when once it had forced its way in *Vavadisat* he gives as *let* of √*vad*. For *atma* he accepts the etymology from √*at*, the 'motor' or 'vital force' Geldner (*Vedische Studien*, III, 116, 117) adopts the etymology of Weber and Garbe (*Die Samkhya Philosophie*, p 293) of *atman* from √*at* and so denoting (1) the wandering wind, (2) the *samsarin* soul, whence come the other meanings, person, self, body, nature It is quite possible that the soul and the wind were deemed to be closely connected—there are plenty of parallels—but of course in this case we cannot take *samsarin* in the technical sense The more usual derivation is from √*an* (Roth), while Deussen (*Allg Gesch der Phil* I, 1, 285 sq) prefers to derive *atman* from two pronominal stems No explanation as yet offered is satisfactory, since none explains Vedic *tmana*, &c (Wackernagel, *Altindische Grammatik*, I, 61) Bohtlingk's conj *vava diset*, 'to see if it referred to any one save himself,' is good, but not essential

[12] The commentators all read *brahma* separately, and though the sense would be much the same this is better than to take *brahmatatamam* (with S text) as one word The commentators and translators all agree it is for *tatatamam*, and Deussen compares *durnisprapataram* in Chandogya Upanisad, V, 10, 6 We may also compare *navamam* (= *navatamam* according to Max Muller in RV, V, 27, 3, see Oldenberg, *S B E*, XLVI, 412) *Varunavayvitamam* for °*vatamam* in V, 3, 2, though there the Jaiminiya Upanisad Brahmana, I, 10, 1, reads *pari*

Idaṃdra by name. Him who is Idaṃdra they call Indra[13] mysteriously. For the gods love mystery[14]

ADHYĀYA 5

In man[1] he is from the first as a germ[2] That seed is strength gathered from all the limbs and he thus bears a self in his self When he connects the seed to the woman, then he causes it to be born. That is his first birth. The seed becomes the self of the woman like one of her own limbs Therefore it hurts her not She nourishes the self he has given her there. She, as nourisher, is to be nourished. The woman bears the germ The man before the birth of the child and thereafter[3] supports him. When he supports the child before its birth and

---

yatanam, and for a large number of somewhat similar (but often doubtful) cases Wackernagel, *Altindische Grammatik*, I, 280, II, 1, 128, Macdonell, *Vedic Grammar*, pp. 58, 59 Bloomfield, *P A O S*, April, 1893, p xxxv, *A J P*, XVII, 416-418 Otherwise it might be translated 'just that' in accordance with Panini, V, 3 93 for which use Bhāgavata Purāṇa, X, 36, 28 is also cited, so Bohtlingk, and in Chandogya, *l c*, °*tama* is now read

[13] For Indra as a designation of *ātman* cf II, 3 7, n. 1 For *adarśam*, Lévi p 107

[14] The phrase here occurs in Aitareya Brāhmaṇa, III, 43, 1 *ity ā akṣate parokṣam parokṣakāmā hi devāḥ*, a similar but characteristically slightly different phrase occurs repeatedly in Śatapatha Brāhmaṇa VI X, but not in I V, Weber, *Ind Stud*, XIII, 268, X, 127 Cf also Bṛhadāraṇyaka Upaniṣad, IV, 2, 2, where Indra is mysteriously called Indha as the person in the right eye, for the same reason as here Winternitz (*Gesch der indisch Litt*, I, 181) happily compares the riddles found in the Ṛgveda the Atharvaveda, and the Yajurveda The gods require amusement as well as reverence So also the gods must have animals to play with (Macdonell *Vedic Mythology*, p 148, Oldenberg *Religion des Veda* p 74, and Keith *J R A S*, 1907, p 936) Other examples of obscenity are Śatapatha Brāhmaṇa, VI, 1, 1, 2, VII, 5, 1, 22 (Winternitz p. 177) Cf also Winternitz, *Mantrapatha* I, xxix, n Śaṅkara sums up the result of this chapter in an interesting and polemical discussion of the *ātman* as eternal and unthinkable subject (U pp. 50-64 trans. by S Sitārāma, pp. 39-49), but what he says bears rather on his system than on the Upaniṣad See also Lévi *La Doctrine du Sacrifice*, p. 38, n 6

[1] Sāyana following Śaṅkara thus sums up the result of the Upaniṣad in the introduction to this Adhyāya There is (1) *brahman* undeveloped and truly real, (2) then *adhyāropa* in (a) the fourteen worlds in *brahman's* egg (b) *virāj* who regards the worlds as his body, (c) the *indriyas* arising in his body, (d) the presiding deities (e) the subjects of the *indriyas* including man, (f) the food of the deities and its appropriation, (g) the three states of the self, (3) the *apavāda* beginning with *sa pitaḥ* and ending with the end of II 4 3 This section takes up as regards other births than the present the question of the three states of the soul This section seems to be referred to in the Mokṣadharma, Mbh, XII, 10562, and 9494 Cf Śatapatha Brāhmaṇa, XI 2, 1, 1, Lévi, p. 107 For the egg, cf Gomperz, *Greek Thinkers* I 93

[2] This simple and early narrative should not, of course, be explained by the *pañcāgnividyā* as Sāyana proposes, but is much earlier in conception Ānandatīrtha explains the whole as a question of the different manifestations of Viṣṇu. The edd except S [illegible] and U and Rājārāma punctuate at *vetas*, but the comm. and the parallelism *yad etad—tad etad* are in favour of the other punctuation. The sense is the same Bohtlingk *ātmanam* (= *ātmānam*) is not essential.

[3] The commentators here differ Śaṅkara and Ānandatīrtha in his *ṭīkā* take (1) *janmano 'gre* as 'before birth', (2) *agra eva* as [illegible], (3) *adhi* as 'after birth'. This seems preferable, except that *agra eva* must be considered as explained by *janmano 'gre* Ānandatīrtha in his *bhāṣya* explains (1) as above; (2) as *agryaḥ, sarvaguṇa* [illegible], (3) *adhi* as

thereafter, he supports in truth himself, for the continuation of these worlds[4] For thus are these worlds continued This is his second birth This self[5] is appointed for holy deeds The other self having done its duty and attained old age departs, and departing hence is born again. This is his third birth[6] A poet says (RV, IV, 27, 1), 'Within the womb, I learned all the races of these gods A hundred brazen forts restrained me, but like a hawk I escaped swiftly downward'[7] Vāmadeva lying in the womb thus declared this Knowing this, he

---

adhikaraṇena Sāyana renders (1) *agra eva* as *prasavat prāg eva*, (2) *janmano 'gre* as *prasavād ūrdhvam*, (3) *adhi* as *adhikaraṇena*, apparently borrowing this from Ānandatīrtha's *bhāṣya*. The services before and after birth which Rājārāma Rāmakṛṣṇa Bhāgavata alone recognizes, as apparently also Colebrooke, are explained as the nourishing the mother and performing the usual ceremonies before and after birth It is just possible, however, that *adhibhāvayati* is the verb, and the reference is only to what is done before birth Böhtlingk omits *agra eva*

[4] Contrast the late and elaborate passage in Kausitaki Upanisad, II, 15 The passage, Jaiminiya Upanisad Brahmana, III, 11, is fundamentally different

[5] That is the son The following passage is quoted by Śaṅkara on Bṛhadāraṇyaka Upanisad, p 307

[6] Śankara explains that as father and son are one *ātman* (cf V, 3, 3), the three births are correct Sāyana says either (1) the *ātman* being one, it has three births, two as son, one as father, or (2) the two births of the son have analogies in the case of the father and that of the father in the case of the son, so that each has three births The third birth is taken by the commentators as rebirth in heaven, hell, or in the world of men Probably, as there is no proof that the Upanisad knows the doctrine of transmigration, it refers to being born in the next world, an idea familiar in the Brahmanas (cf Macdonell, *Vedic Mythology*, pp 168 169, *Sanskrit Literature* pp 223, 224) which differs essentially from transmigration, i e birth into this world again, see Deussen, *Philosophie der Upanishads*, pp 294, 295, E T, pp 325 sq, Lévi, pp 96 n 1, 97, n 2, Hillebrandt, *Ved Myth*, II, 8, contra Geldner, *Vedische Studien*, II, 288, Böhtlingk, *Sächs Ber*, 1893, p 92 For *vayā gata*, see Wackernagel, *Altindische Grammatik*, II, 1, 190

[7] This verse is very obscure in this connexion Śankara, Ānandatīrtha, and Sāyana all explain it as referring to the innumerable bodies through which Vamadeva had passed until he obtained *mukti* through knowledge This meaning cannot be got from the passage The context seems to show that it only means that Vamadeva knew the three births of *ātman*, and so escaped and became immortal The doctrine of *mukti* is not apparently known to the writer of the Upanisad If it were, it would be made clear For the meaning of the verse in the original cf Bergaigne, *Rel Véd*, III, 322 Eggeling *S B E*, XXVI xx n 1, Roth *Z D M G* XXXVI, 353, Hillebrandt, *Ved Myth*, I 282, and especially Bloomfield, *J A O S*, XVI, 1 24, who explains the myth as referring to Agni When the cloud is rent in the storm, the lightning (= *śyena*) breaks from the cloud and simultaneously the Soma flows upon the earth Sayana in his Rgvedic commentary follows this passage On RV, IV, 26, 1, Sayana says that Vamadeva, who had in his mother's womb the knowledge of Brahman, sets forth that knowledge of the identity of himself and Brahman, in the verses *aham Manur*, &c (so Śatapatha Brahmana, IV, 4, 2, 21 and 22) So [Sayana] on Atharvaveda, XVIII, 3 15 *sa khalu garbhāvastha eva san utpannatattvajñānaḥ svayā sarvātmyam anusaṃdadhau* Sieg (*Die Sagenstoffe des Rgveda*, pp 76 sq) holds, no doubt rightly that the idea is not found in the RV passage, but no conclusion as to the priority of the Śatapatha Brahmana, *l c*, can of course be drawn from the fact that no mention is there made of the legend, which may quite well have been known to the Śatapatha, though not referred to His version

brahman,[6] Indra, Prājapati, all the gods, the five great elements,[7] earth, air, ether, water, lights, all these and those which are mixed with small as it were,[8] seeds of various kinds, born of eggs, born from the womb, born from heat,[9] born from germs,[10] horses, cows, men, elephants, and all that breathes, whether it walks or

---

atatajñāna, vividhajñāna, prakrstajñāna, anusprstajñāna, darśana, dhārana, manu prānanesu śaktatvam matih, brahmaśīnam jñātram, sarvaprerana, sarvesu deśakālesu svarūpesu ca samam ramate, sarvaklpti, sarvakartrtvam asana amrtananda svatantrata Sayana borrows from both, he refers *samjñanam* to *samyak*, *medha* to *granthataddarthadharanam*, *jutih* to *javas* or as in Śaṅkara, *samkalpah* to *asamicine 'pi vastuni samyaktvena kalpanam*, for the rest he follows faithfully Śaṅkara. Rajarama renders 'consciousness, direction, sagacity, intelligence, retentive power, understanding, courage, power of thinking freedom of thought, intrepidity, memory, will, capacity, vitality, ambition, obedience' Bohtlingk makes these subjects and *prajñānanetram* predicate

[6] This may fairly be construed as an assertion of the pre-eminence of knowledge The parallel passage in the Kausitaki Upanisad, III, is clearly later for it combines elaborately the doctrine of *prana* (see II, 1-3 above) and that of *prajña* The relations cannot be reversed

[7] Possibly masculine as Śaṅkara Anandatirtha, and Sayana think, followed by Colebrooke, Roer, Sītārama, Rajarama, Max Muller, Bohtlingk, and Deussen But this is not necessary nor likely in view of the neuter below, and Brahman (m) is not found as a deity in the Aitareya Brahmana (but only as priest, p 63) The occurrence in Maitrayani Samhita II 9, 1, is interpolated v Schroeder, *Ind Lit*, p 91, n 1 Muir *Sansk Texts* V, 323, finds the masc in various Śatapatha passages, unnecessarily But it occurs, e g Kausitaki Upanisad, I, 3 The masc is natural and is helped by the following masc

[7] This passage is relied on by Deussen (op cit p 168, E T, pp 185, 186) in support of his view (accepted by Macdonell, *Sanskrit Literature*, pp 217 sq, a d Winternitz *Gesch der indisch Litt* I, 205) of the lateness of the Aitareya Upanisad But there is nothing in the expression itself to demand a late date, and the fact that the version in the Upanisad of the creation is so detailed instead of being a proof of lateness, may rather be considered a sign of early date, when the creation still was considered a real act and the doctrine of the omnipresence of *brahman* as consciousness was not so fully developed The passages Brhadaranyaka Upanisad I, 4, 7, Chandogya Upanisad, VI 1, 3 both contain a reference to name and form, a conception familiar to Buddhism but not apparently at all early The Taittiriya, II, 6, is evidently a mere *résumé* of a well known doctrine But that Upanisad bears conspicuous traces of lateness indeed it already quotes Ślokas very often and becomes quasi metrical while it knows the Atharvangirases (II, 3) and has a much developed theory of the *kośas* of *atman* For the elements (*akāśa* = empty space) see Bohtlingk, *Sachs Ber* 1900 pp 149-152 Keith *J R A S*, 1909 July

[8] Mixed with small (Śaṅkara) *Iva* he calls meaningless Cf I, 1, 2 n 3 III 2 6 'Mixed from smaller portions (of the former)' is Roer's version, which is no doubt the sense The others of various sorts are opposed to the great elements. Colebrooke has 'joined with minute objects and other seeds'

[9] Śaṅkara explains as *yukadini* which Ānandatirtha accepts. Sayana renders *krimidamśadini* The word does *not occur in* the Chandogya Upanisad VI, 3 1, but it is impossible to accept that as a valid proof of later date since such lists (cf those of the *pranas*, I, 3 7, 4 1) vary enormously in the same book In *jarujaas*, cf *jaru*, Jaiminiya Brahmana II, 430, 6 (*J A O S* XIX 100), Bohtlingk's *jarayu* is not necessary For a similar list cf Anugita, Mbh, XIV, 1134

[10] Rendered by Śaṅkara *vrksadini*, by Ānandatirtha *bhumim bhittva jatani trnadini*, and by Sayana *tarugulmadini* Rajarama has 'shoot born' The form is normal and is not a case

You are the two pins[2] of the Veda May my lore forsake[3] me not. I join day and night with what I have learned I will proclaim the real, I will proclaim the true[4] May this protect me, may this protect the teacher. May it protect me, may it protect the teacher

vanih is a conjecture of his the text MSS. in I, 4, 4 have either *vanosi* or *vans*, while, ibid 8, all save one (*vanosi*) have *vans* Only one Paddhati (cf p iv) has *vanim*, obviously an error for *vanosi* (which of course (cf V, 1, 6, n 4) is the Sandhi of *vans asi*), if it is not a mere misreading of the MS There is thus no real support for *vanih* (how exactly Dr Knauer would take it, I am not sure), and in the Manava Gṛhya Sutra the simple Sandhi *matma* for *me + atma* is actually found in I, 3, 2 (so also I, 9, 11 *vastarasi*[a], I, 11, 16 *vaivadi*, &c, see Knauer, p. xxxix) Probably *mam* lead to the more intelligible (to the scribe) *vam*

For *vam*, &c, Knauer, who does not notice the Aitareya passage quotes Paraskara Gṛhya Sutra, I, 3, 25, Taittiriya Samhita, V, 5 9, 2, Taittiriya Aranyaka (Andhra text), X, 72, Atharvaveda, XIX, 60, 1 There is also the parallel version in Śankhayana Āranyaka, VII, 1, where *vedasamattaravah* takes the place of *vedasya*, &c This may perhaps mean 'hidden in', but probably we have a mere corruption, see my translation The Mantras are no doubt old enough Colebrooke, who comments on the use of Mantra as applicable to part of an Upanisad, renders, 'May my speech be founded on understanding, and my mind be attentive to my utterance'

[2] *Ānanyasamartha*, Sayana Colebrooke renders, 'For my sake (O speech and mind) approach this *Veda*,' perhaps reading *mānu* Dr Scheftelowitz takes it as 'navel' The word in the Rgveda, I, 35, 6, &c (cf Macdonell, *Vedic Grammar*, p 39), seems to refer to the pin of the axle of a cart, and the metaphor is natural enough, cf Leumann, *Et Wort* p 31

[3] *prahasih* may be a second person, or a problematic third person based on a false analogy (cf Whitney, *Sanskrit Grammar*, § 889, Weber, *Berl Sitz*, 1895, p 830), or an error for *prahasit* Precisely the same difference of reading occurs in Khila, IV, 8, 5, *śrutam me mā pra hasīh*, where Peterson's MS has *hasit* and cf Manava Śrauta Sutra II 1 2, 36 (*hasit*) with Taittiriya Samhita, III, 1 7, 2 (*hasih*), in the same phrase, *dikse ma ma hasi(h)*, and in Hiranyakesi Gṛhya Sutra, I, 6, 20, 1 *yathasat* for *yathasah* (Oldenberg, *S B E*, XXX, 189) Scheftelowitz renders 'das von mir Gehorte moge man nicht verspotten vermittels des Erlernten,' taking *hasih* from √*has* The long *a* would be unusual,[b] but in any case a derivation from √*ha* seems preferable in point of sense and is supported by Atharvaveda, VI, 41 3, Taittiriya Āranyaka, IV, 42 (Anandasrama ed, pp 352, 355) The translation will be literally 'O lore, forsake me not,' reading *śruta* perhaps as the nom is unusual, and the neuter voc is perfectly well supported (cf Delbrück, *Altindische Syntax* § 66), and the reading *śruta me* is easily corrupted into *śrutam me*, cf Lanman's note on Whitney, *Atharva Veda*, XVIII, 2 3, Whitney, *P A O S*, Oct, 1887, p xxv, and my note in *J R A S*, 1907, p 225, although the nominative can stand cf Winternitz, *Mantrapatha*, I, p xviii[b] For the sense cf Atharvaveda, I, 1, 4, Taittiriya Upanisad I, 4, 1

[4] From here to the end this is identical with the Taittiriya Upanisad, Śiksavalli, I, 1, or Taittiriya Aranyaka, VII, 1, 1 The sense of *ahoratran* is no doubt, 'I work all day and night,' as Sayana takes it Colebrooke renders, 'Day and night may I behold this, which I have studied' In III, 1, 2, the neut is used

---

[a] Compare, however, *saksye* which Whitney, no doubt rightly, reads in Atharvaveda, II, 27, 5 although the form elsewhere is always *saksye*, and III, 1, 6, n 5 *Ahasit*, given as only grammatical by Whitney (*Roots*, &c, p. 203), is found in the Daśakumaracarita (Buhler, *Ind Ant*, XVIII, 147)

[b] See also my note in *J R A S*, 1908, pp 1124 sq

ĀRANYAKA III

ADHYAYA 1

NEXT comes the Upanisad of the Samhitā text. The former half[1] is the earth, the latter half the heaven, their union the air, says Māndūkeya. The union is the ether,[2] so proclaimed Maksavya. 'For it is not considered independent,[3] and so I do not agree with his (Māndūka's) son,' he said 'They are alike[4] and it is considered independent,' said Āgastya, for the air and the ether are both alike. So far as regards the deities Now as regards the self 'The former half is speech, the latter half the mind, their union is the breath,' so said Śūravīra Māndūkeya Then said his eldest son 'The former half is mind, the latter half is speech For by mind one first resolves and then utters speech Therefore is mind the first half, speech the second half, and truth their union' It is indeed alike[5] with both father and son This compact of mind, speech, breath, is like a chariot[6] with three horses He who knows thus this union, obtains children, cattle, fame, glory, and the world of heaven. He lives all his days. So teach the Māṇḍūkeyas.[8]

---

[1] e g in *Agnim īle* *m* is *pūrvarūpam* *ī uttararūpam*, and *mī* Samhitā (Sāyana) For all this Aranyaka cf. Śāṅkhāyana Āranyaka, VII, VIII, printed in Appendix, and my translation, pp 41 56

[2] *Ākāśa* is rendered 'void' by Böhtlingk in his translations of Chandogya and Bṛhadāranyaka Upanisads see II 6, n 7 contra Whitney *P A* , Oct 1890, p lii

[3] This is not at all easy *Mene* (like *dadṛśe*, II 1, 3, 8) seems to be passive because it is difficult to make out a translation either as *nirjitavān* (Sāyana) or *manye* (Anandatīrtha) The subject must be *vāyuḥ*, and the sense must be as in Sayana (cf Śaṅkara on Taittirīya Upanisad III 10, 4, Max Müller, *S B E* XV 68 n. 1) that *vāyu* is included in *ākāśa* and therefore is inferior to it Anandatīrtha takes *putrena* as referring to the fact that *ākāśa* is the father of *vāyu* The subsequent identification he explains on the ground that *vāyu* is the stronger In Taittirīya Upanisad I 3 2 the earth, sky, ether (=*antarikṣa*, Śaṅkara) and *vāyu* are given as the four factors. *Asya* is obscure it may be a gen = dat and refer to Māṇḍūkeya or possibly a vague reference (cf Ṛgveda Prātiśākhya I, 2) to the subject, helped by such genitives as that in V, 1, 1

[4] *Samane* is neut., probably because *mate* is understood, or perhaps it is fem The solution is that the two views are equally correct, because in *upasanās* it is not things but words that are considered (Sayana) Anandatīrtha rightly takes the last words as giving the opinion of Mahaitareya Otherwise they must be Agastya's in which he concurs Max Müller reads as S *ceti* but it is not in B or the other MSS and it is merely a misunderstanding of the commentator

[5] They give a similar result, and so are alike and equally justifiable, *na hy upādānā tattulatattvam apekṣate* For *manas* and *vac*, see Lévi *La Doctrine du Sacrifice*, pp. 30, 31

[6] Visnu is made the subject by Anandatīrtha. The real subject is clearly the meditation on the Samhitā For three horses, cf RV I 39 6 100, 17, VI, 47 24, VIII 7, 28 The metaphor recurs constantly in different forms in Sanskrit Literature e g Mbh, XII, 1417 sq The analogy with the *Phaedrus*, 246, is obvious. For *samhatah* cf. RV, III, 1, 7, Geldner, *Vedische Studien* I 164

[7] Anandatīrtha renders the children as *prajñāna*, and the cattle as Vedas. Sāyana with

2. Then comes (the teaching) of Śākalya.[1] The first half is the earth, the second half the sky, their union is rain, Parjanya is the uniter. Thus it is when he rains strongly and continuously for day and night, then people say, 'Earth and heaven have united.' So far as regards the deities. Now as regards the self.

Śaṅkara regards this Upaniṣad as intended for persons who are neither fit for *mukti* (II, 4-6) nor even for union with Hiraṇyagarbha (II, 1-3).

[8] This section gives us the views of certain Māṇḍūkeyas. The Māṇḍukeyas occur in Ṛgveda Prātiśākhya, § 200, and in the Purāṇa tradition (Weber, *Ind. Stud.*, II, 100 sq.; III, 253). Scheftelowitz, *Die Apokryphen des Ṛgveda*, p. 12, has revived the theory that certain of the Khilas represent parts of their Saṃhitā, but cf. Oldenberg's review, *Gött. gel. Anz.*, 1907, pp. 218 sq., and my review, *J. R. A. S.*, 1907, pp. 226 sq. The word Upaniṣad in this section clearly means 'secret doctrine'. This is certainly the earliest sense of the word (derived, no doubt, from teaching in the forest, which was done for the sake of secrecy, cf. Introd., p. 15). I cannot accept Deussen's view (*Philosophie der Upanishads*, pp. 13 sq.) that the earliest sense was 'secret word' (a case like *tajjalan*, &c.), then 'secret text', then 'secret sense' of a ritual action. The earliest sense may well have been 'secret meaning' of a ritual action whence it seems to me the other meanings are very easily derived. Deussen's theory is bound up with his view of the Kṣatriyas as propounders of a secret lore, as to which cf. Introd., pp. 50 sq.; III, 2, 6, n. 11. I agree with Deussen, however, and with Winternitz (*Gesch. der indisch. Litt.*, I, 208, n.) in rejecting Oldenberg's view (*Z. D. M. G.*, L, 458 sq.) of Upaniṣad as *upāsana*. See, however, also *Z. D. M. G.*, LIV, 70 sq., and Max Müller's view in 1869, *Ṛgveda Prātiśākhya*, p. iv; Hopkins, *Rel. of India*, p. 218.

A muddled version of this section occurs in the Ṛgveda Prātiśākhya, I, 2, 3: *Māṇḍukeyaḥ saṃhitāṃ vāyum āha tathākāśaṃ vāsya Mākṣavya eva | samānatām anile cāmbare ca mātṛgāsya vyapārthakaraṃ tad eva || 2 || adhyātmakḷptau Śūravīrasutaḥ[a] ca tanmanase vivadanty anupūrvye | sandher vivartanam nirbhujaṃ vadanti śuddhākṣaroccāraṇaṃ ca pratṛṇṇam || 3 ||* See Max Müller, pp. iii–vi. The Śāṅkhāyana has, VII, 2, an attempt at an improved version, reading in one MS. *pārthakyaḥ* in both cases. Böhtlingk, in the smaller *Dict.*, I, 130, renders *avipārthakya* as 'identic', but this makes no sense. The reference in the Prātiśākhya is of course valuable as giving Śaunaka's date as a *terminus ad quem* for the lowest date of the Āraṇyaka.

[1] It refers to the case of *iko yaṇ aci*, Pāṇini, VI, 1, 77, i.e. where vowels like *i* become *y* before *a*. A fourth party is introduced. Śākalya must of course be the great grammarian to whom the Saṃhitā is ascribed, and this gives us not a very ancient date for this Upaniṣad. But it need not have been written long after Śākalya. Rather it seems to be early. For Śākalya's date see Introd., p. 71. He must probably go back to 700 B.C. Geldner (*Vedische Studien*, III, 144 sq.) considers that Śākalya must be identical with Vidagdha Śākalya mentioned in the Śatapatha Brāhmaṇa, XI, 6, 3; XIV, 6, 9 (see Weber, *Ind. Stud.*, IX, 277 sq.; *Indian Literature*, p. 33) and identified with the maker of the *padapāṭha* by the Vāyu Purāṇa, LX, 58. He was therefore a contemporary of Āruṇi and Yājñavalkya in opposition to Oldenberg's view (*Prolegomena*, pp. 371 sq.) which refers him to the end of the Brāhmaṇa period.[b] Weber (*l. c.*) thinks that *Śākala in the Aitareya Brāhmaṇa, III, 43, 5, refers to his school, but the*

---

[a] *sutāḥ*, which is wrong in fact, illustrates the inaccuracy of the reproduction.

[b] Geldner evidently takes a much more respectful view of the antiquity of these sages than I would. I think it quite possible to hold that Śākalya and they belong alike to the end of the Brāhmaṇa period. On the other hand I think Hoernle's dating (*Osteology*, pp. 106 sq.) wrong, see *Z. D. M. G.*, 1908, pp. 138, 139; *J. R. A. S.*, 1908, p. 364.

Every man is egg-like,[2] there are two halves, they say;[3] this is the earth, this is the heaven, and between them is the ether, just as there is the ether between earth and heaven. In this ether[4] the breath is fixed, as is the air in that ether.

reference is too far fetched to be worth consideration—indeed such comparisons hinder rather than aid progress. The evidence of the Vayu Purana is worthless. Identifications are easy and obvious, and we cannot tell that we have a piece of tradition at all. The fact that the Aitareya Brāhmana does follow the rule of Śakalya (Panini VI, 1, 128), that *e* before *r* becomes *a* and that *a* may remain, cannot prove that Śakalya is prior to it: the reverse may be the case. As Geldner admits, the RV.—and the Aitareya Brahmana is in the same position—do not follow his rule (VI, 1, 127) as to *ī ū* before dissimilar vowels, and we are left with grave doubts whether Geldner's view that Śakalya was merely to Panini the author of the *padapatha* and author of the Prātiśākhya is sound. The fact therefore remains that when Aitareya Brahmana, III, 46, recognises *bhavasi urubhih* as the pronunciation, it cannot have before it Śakalya's text, unless we admit (which is too bold) that the Samhita is later than Śakalya. I prefer, therefore, Oldenberg's date of Śakalya, and I would lay stress on the fact that in the Aranyaka he is Sthavira Śakalya[a], in the Brahmana Vidagdha. These names are too distinct to permit of identification. The Śakalya of the Prātiśākhya is likewise Sthavira and must be the same as the man here.[b]

[2] *Andam* (later *anda*, cf Wackernagel, *Altindische Grammatik*, I, 171, Macdonell, *Vedic Grammar*, p 33, n 14) *andavadrūpam varnavyatyāt chandasah* (Sayana). The neut is noteworthy as comparatively rare in Sanskrit. Cf Aitareya Brahmana, VII, 13 *krpanam ha duhita*, also II, 3, 5, *madhyam atma* &c. Parallels are common in Greek and Latin (οὐκ ἀγαθὸν πολυκοιρανίη Monro, *Homeric Grammar*[2], p 166, *malum mihi videtur* (*esse*) *mors* Cicero, *Tusc* I 5 9). The use is thus substantival rather than adjectival as is clearly felt in the case of *madhyam*. See also the striking case, Bṛhadaranyaka Upanisad, I, 4, 3 *tasmād idam ardhabṛgalam iva svah* (so Bohtlingk, *Chrestomathie*[2], p 357, Max Müller, *S B E*, XV, 85, n 3). In *iva* there is a lengthening found also in the Aitareya Brahmana in prose (Aufrecht, p 427) with *iti* also. Cf Wackernagel, *Altindische Grammatik* I, 312, II, 3, 8, n 9.

[3] 'They say' can hardly refer to the following words, as Max Muller takes it, though this is partly supported by the last words of the section.

[4] *Tasmin hasmin* is certainly curious. The Śankhayana parallel VII, 3, is a correction and throws no light. The MS evidence is strong and Ānandatirtha renders it as *tasmin ha asmin*. Perhaps *smin* stands for *asmin* (cf Muller *Pali Grammar*, p 24) and *ha* is the particle. No root or base *ha* exists from which *hasmin* could naturally be formed. Sayana ignores the point and may possibly have read *tasminn asmin* as does Rajendralala, but this is unlikely. The correction *hasmin* leaves the error unexplained. It is to be noted that in the Śunahśepa legend, Aitareya Brahmana VII, 13 the MSS read *iti ha sma akhyaya* which Aufrecht keeps in the text and gives (p 431) as one of the grammatical errors of the Brahmana. The parallel Śankhāyana text has merely *iti*. Bohtlingk in his *Chrestomathie*[2], p. 358 and *Sachs Ber* 1900, p 418, amends to *hasma* and claims that Sāyana bears this out. But Sāyana's note while showing that he took *sma* as equivalent to *asmai* is not conclusive though it tends to show that he had *asma*(*i*) before him, just as he seems to have read *tasminn asmin* here but arguments from his silence are dangerous. He ignores *tasmai* in II, 3, 7. I do not think it impossible that this *smin* and the Aitareya Brahmana's *sma* are parallel phenomena of an attempted simplification of

---

[a] It is true Sthavira does not occur in III, 1, 2, but I do not think it is reasonable to take the Śakalya of that passage as different from him of III, 2, 1, 6, as does e g Weber, *Indian Literature*, p 50.

[b] On him see Max Muller *Rgveda Prātiśākhya* pp 7 seq

Just as there are those three lights in heaven, so there are these three lights in man. As there is in heaven the sun, so there is the eye in the head As there is in the sky the lightning so there is the heart in the body As there is the fire in earth, so there is the seed in the member Having thus represented the whole world as the self, he said, 'This is the symbol of the earth, this of the heaven' He who knows thus this union, obtains children, cattle, fame, glory, and the world of heaven He lives all his days[2]

3 Then come the reciters[1] of the Nirbhuja The Nirbhuja dwells on earth the Pratrnna in heaven, the Ubhayamantarena in the sky Then if one should rebuke him who recites the Nirbhuja, he should reply, 'Thou hast fallen from the two lower places'[2] If one should rebuke him who recites the Pratrnna, he should reply, 'Thou hast fallen from the two upper places' But there is no rebuking him who repeats the Ubhayamantarena[3] For when he unites the words, that is the Nirbhuja form,[4] when he pronounces the two syllables pure, that is the Pratrnna form This is the first By the Ubhayamantarena both are fulfilled

---

the forms of the base *a* Possibly the production of such forms may be due to the analogy of *ásmin* (RV) and cf *sasmin* (Chandogya Upanisad) Whitney *Sanskrit Grammar*, § 495 fin See however, also Bohtlingk's remarks in his *Grammat Absonderlichkeiten im Aitareya brahmana*, Leipzig 1900, where he regards the irregularities noted by Aufrecht l c as due to misreadings of the text and I fully recognize that undue reverence to such texts is absurd On the other hand old forms did appear and cf perhaps the use of *ima* and *imanam* Maitrayani Upanisad VI 7 II 6 and the Vedic *imana* (Panini VI 4 141 Wackernagel *Altindische Grammatik* I 61) There is also the elision of *a* in *nasi* Mantrapatha I 13 9 (= Hiranyakesi Grhya Sutra I 16 3) see Winternitz's edition I xxvi Wackernagel I, 318

[2] These sections 1 and 2 may be compared with Taittiriya Upanisad I 3 which treats the *samhita* with reference to the spaces (earth heaven ether wind) lights (fire sun water, lightning) knowledge (teacher, pupil knowledge training) generation (mother father child begetting and the self (lower jawbone upper jawbone speech tongue) This elaborate system must be later than the Aranyaka. Cf Max Muller *Rgveda Prâtiśâkhya* pp iii sq

[1] Or recitations of The Nirbhuja is the Samhita the Pratrnna the Pada and Ubhayamantarena the Krama Patha Max Muller (see his *Rgveda Pratisakhya* p 11 and *Nachtrage*, p ii) first pointed out the importance of this passage Cf also Oldenberg *S B E*, XXX 146 sq *Prolegomena* p. 380 Macdonell *Sanskrit Literature* p 51 It is summarized in Pratiśâkhya I 4 see my *Śânkhâyana Âranyaka* p. 48 n 3 III 1 2 n 8

[2] *Ayo thai tarabhyam* is clearly a case of irregular Sandhi cf Atharvaveda IX, 1 1 *prthivyântâraksit* III 2 4 n. 11 Wackernagel *Altindische Grammatik* I 316 317 Macdonell, *Vedic Grammar* pp 64 65 *J A O S* XXX 99-102

[3] It is the perfect form, e g Sayana says, in the Samhitâ in *agnim i e* the *i/e* is *svarita + pracita* in the Pada they are both *anudatta* (cf. Whitney *Sanskrit Grammar* § 90, Macdonell *Vedic Grammar* p. 78 n 7)

[4] Sâyana explains *ninds (au bhujasadrśau purvottara adau yasmin* Max Müller thinks it may refer to the arms of the words being cut off as it were or with two arms stretched out the two words forming as it were two arms to one body In the following *ayo thâ* is clearly the reading though S and R in the commentary vary reading *ayo thâ* and *a yo tha* The Sânkhâyana Âranyaka, VII 8, has the correct form

He who desires proper food should recite the Nirbhuja, he who desires heaven should recite the Pratrnna, and he who desires both should recite the Ubhayamantarena Then if another should rebuke him who recites the Nirbhuja, he should reply, 'Thou hast offended the earth, the deity The earth, the deity, will strike thee' If another should rebuke him who recites the Pratrnna, he should reply, 'Thou hast offended heaven, the deity The heaven, the deity, will strike thee' If another should rebuke him who recites the Ubhayamantarena, he should reply, 'Thou hast offended the sky, the deity The sky, the deity, will strike thee' Whatever he says to him[1] or says in reply to him, that shall assuredly be fulfilled But to a Brahmin one must not say anything save what is auspicious Only in exceeding[2] prosperity may one say ill to a Brahmin 'Not even in exceeding prosperity may one say ill to a Brahmin, let Brahmins be honoured,' so says Śuravira Māndukeya

4 Then come the imprecations[3] Let him know that breath[4] is the beam If any one rebuke him who has become breath as the beam, then if he thinks himself strong[5] he says, 'I have grasped the beam, breath, thou canst not overcome me who grasp the beam, breath Let him then say, 'The beam, breath,

---

[1] *bruvan va bruvantam va* This may perhaps be taken as I have taken it as equivalent to 'whether he speak to him or speak in reply' This is quite a simple construction But it is not so taken by the commentators Sayana renders *bruvan* as equivalent to *bruvantam*, and takes the second part as *va abruvantam* This is followed by Max Muller Ānandatirtha interprets it as *bruvan va abruvan va bruvantam va abruvantam va* For similar curses, cf Śankhayana Aranyaka VII 10 and Chandogya Upanisad II 22 3

[2] Sayana takes this as permitting a curse on a Brahmin in the case of great wealth (such wealth being sinful) Anandatirtha denies this and carries on the negative Thus Sūravīra's dictum confirms this This is less probable Max Muller accepts Sayana's view that the man is to say Let them be known to Brahmins It is simpler to take it as in the text For *na cana* cf V, 3 3 Delbruck *Altindische Syntax* pp 544 sq, Channing *J A O S* XIII xviii Jaiminiya Brāhmana II 77 (*J A O S* XV 240) *na te śarirani cana grham prapsyanti* and Jaiminiya Upanisad Brahmana, IV 14 5 The rule that *na* precedes seems true for the Brahmana prose

The two accus. with √*bru* (for *bru* cf Bloomfield *A J P*, V 180, Wackernagel, *Altindische Grammatik* I 182 Macdonell, *Vedic Grammar* p 36) are said by Delbruck (*Altindische Syntax* p 174 cf Speyer *Vedische und Sanskrit-Syntax* p 8 Gaedicke, *Der Accusativ im Veda* p 265) not to be found in the Brahmana language, which this passage disproves *Bru* is expressly mentioned as governing two accusatives in the Kārikā cited by the Kaśikā Vṛtti on Panini I, 4 51, where a much more marked case than that here (where the second acc is merely a pronoun) is adduced, viz. *manavakam dharmam brute*

[3] Sayana takes this as a noun of agency like *nirbhujapravadah* in III 1, 3 Anandatirtha says *atmano jñanasamarthyānusarenoktiprakara ucyanta iti śesah*

[4] Cf Śakalya's view, III, 1 2 The metaphor is from house building The opt. below is clearly indefinite (like the subj in Latin and opt in Greek), see III 2 1, n 1 and see my note on the Kathaka *J R A S*, 1909 For *vamśa* see Zimmer *Alt Leb*, p. 150

[5] The construction is curiously changed below to the accusative unless, as is possible the other person is meant But see *St Petersburg Dict* s v *man* 3 The nominative is,

will forsake thee' But if he thinks himself weak, he should say to him, 'Thou hast not been able to overcome he who have been fain[4] to grasp the beam, breath Breath, the beam, will forsake thee' Whatever he says to him or says in reply to him, that shall assuredly be fulfilled But to a Brahmin one must not say anything except what is auspicious Only in exceeding prosperity may one say ill to a Brahmin 'Not even in exceeding prosperity may one say ill to a Brahmin, let Brahmins be honoured,' so says Śuravira Māndūkeya[5]

5 Now the reciters of the Nirbhuja say, 'The former syllable is the former half, the latter the latter half The space between the former half and the latter half is the union' He, who knows thus this union, obtains children, cattle, fame, glory, and the world of heaven He lives all his days Now Hrasva Māndūkeya says, 'We that recite the Nirbhuja say that the former syllable is the former half and the latter syllable the latter half, but that the union[1] is the space between the former and latter halves in so far as thereby one produces the union and distinguishes accented and unaccented and separates the mora and what is not' He, who knows thus this union, obtains children, cattle, fame, glory, and the world of heaven He lives all his days Now his son,

---

however, quite regular, see Whitney, *Sanskrit Grammar*, § 268, Speyer, *Vedische und Sanskrit Syntax* §§ 208 and 99 Cf also the idiom *krsno* (&c) *rupam kr* (Taittiriya Samhita, V, 2, 6, 5 VI, 1, 3, 1, 6 5, 2, 4, 1, 4 7, 1, VII, 1, 6, 2, 3 4 Brahmana, I, 1, 3 3, Aitareya Brahmana, VI 35 see Weber, *Ind Stud*, XIII, 111) The construction with the nom (cf Delbruck, *Vedische Syntax*, pp 104 sq Speyer, *Vedische und Sanskrit Syntax* § 33) is no doubt rare in later Sanskrit, but I have found it in an independent passage in Anandatirtha and the analogous use of the gerund is found in the Ramayana, &c Cf the curious phrase, Manu VIII, 91 *eko 'ham asmity ātmanam manyase* *Chakusuam* in Rajendralāla is merely an assimilated *n* altered into *anusvara* The error of B in reading *chakusuantam* shows how little dependence can be put on this MS As to *aha* cf III, 2, 4 n 10 *Enam* is here in apposition to *pranam* but I agree with Speyer, *Vedische und Sanskrit-Syntax*, § 136, that the strict rule (Bohtlingk *Z D M G*, XLI 181) cannot be proved for Vedic or Sanskrit

[4] *Samadhitsusam* is of course the aorist indic of the desiderative of the root *dha* Max Muller translates *samadhitsantam* as a participle, but this is impossible Cf Whitney, *Sanskrit Grammar*, § 1035 a, *Roots, &c*, p 249, *J A O S*, XIII, lxx

[5] These curses are just intelligible, but the curses in Śāṅkhāyana Āranyaka, VII, 8 and 9 offer serious difficulties As the text stands the first case is that of rebuking another, when if strong the rebuker (this must be the subject) says to the other, 'Thou hast grasped the breath or beam but canst not overcome me who am fain,' if weak, he says, 'Thou hast sought to grasp, but couldst not' In the second case the sense must be (reading *parah* or making *param* mean the subject of the main clause), the man who holds that *prana* is weak says to his rebuker, 'I have been fain to grasp the beam, breath, thou canst not overcome one who is fain,' if the rebuker is strong If not, he says, 'Thou hast sought to grasp, but couldst not.' Other renderings are quite possible and the text can be altered (e g read *samadham* in VII 8), but it is not possible to be certain of the sense, see my trans., pp 44–46

[1] i e this view is differentiated in one or two points from the view above Cf Śāṅkhāyana Āranyaka, VII, 11–13

Madhyama, his son by his wife Pratibodhi,[1] says, 'One pronounces these syllables by their letters, neither separating entirely nor uniting absolutely,[2] and the mora which is between the former and latter halves and indicates the union is the sliding. I consider therefore the sliding to be the union.' A Ṛsi says this also (RV., II, 23, 16), 'O Bṛhaspati, they know nought higher than the sliding.' He, who knows thus this union, obtains children, cattle, fame, glory, and the world of heaven. He lives all his days.

6. Tārukṣya[1] says, 'The union is formed by the Bṛhat and Rathantara Sāmans. The Rathantara is speech, the Bṛhat breath.[3] By these two, speech and breath, the

---

[1] Metronymics like this were inevitable where polygamy was possible. They do not prove matriarchy or anything similar. A similar instance is the famous Kṛṣṇa Devakīputra of Chāndogya Upaniṣad, III, 17 (not 7 as in Max Müller), 6, who is the subject of an interesting discussion in Garbe's translation of the *Bhagavadgītā*, and cf. *J. R. A. S.*, 1907, pp. 975 sq.; 1908, p. 173, n. See also Winternitz, *Gesch. der indisch. Litt.*, I, 169. A child sometimes, if illegitimate, was named after its mother, e.g. Satyakāma Jābāla, Chāndogya Upaniṣad, IV, 4. For a long list of metronymics of a curious character see Bṛhadāraṇyaka Upaniṣad, VI, 4, 30-32. The reading of B is a mere error in an inaccurate MS. Max Müller suggests Pratibodhī as the correct form, and this seems the form in the Śāṅkhāyana. For the ī, cf. however Macdonell, *Vedic Grammar*, p. 75. Pratibodha is a recognized name in the Gaṇa *tikādi*. For other metronymics cf. Fleet, *J. R. A. S.*, 1905, pp. 637, 638; Hopkins, *J. A. O. S.*, XIII, 105, 370, n.; for a discussion of matriarchy as affecting the Aryan Hellenes, see Farnell, *Archiv f. Religionswissenschaft*, 1904, pp. 70 sq. and refs.

[2] The reading is clearly *anekīkurvan*. *Ekīkurvan* is an easy but bad blunder. Sāyaṇa explains that you must not (1) pronounce *tava it* as *tava + it* nor (2) as *tavat*, but (3) as *tavet*. This cannot be meant. It is really intended that you should pronounce so as to give a sound of *ai* together. Compare the fact that in the so-called elision of Latin both elements were distinctly preserved in pronunciation (cf. Lindsay, *Latin Language*, p. 144), as in modern Spanish. Cf. also Deussen, *Sechzig Upanishads*, p. 215. This passage is of particular interest as confirming the notice in the Ṛgveda Prātiśākhya, III, 6 (200) (Max Müller's edit., p. lxv) that Māṇḍūkeya laid down the use of the circumflex in the Praśliṣṭa Sandhi (e.g. *a + e*, &c.) as well as in the Abhinihita Sandhi (*e* or *o + a*), and the exceptional cases of *i + i*, in which the circumflex is regularly laid down, and the fact that the *a* is not merely elided generally recognized by the Prātiśākhyas (Wackernagel, *Altindische Grammatik*, I, 324; Macdonell, *Vedic Grammar*, p. 104). So Pāṇini, VIII, 2, 6, has *svarito vānudātte padādau*, and see Wackernagel, I, 292, 293; Macdonell, p. 104. The requirement of the circumflex is only intelligible on the *anekīkurvan* theory.

The form *anekīkurvan* is interesting. *Ekī + √kṛ* is found in the Śatapatha Brāhmaṇa, see Whitney, *Sanskrit Grammar*, § 1093, and contrast III, 2, 3. *aikyā bhaviṣyan*; *ekībhū* occurs in the Bṛhadāraṇyaka Upaniṣad, IV, 4, 2 in the sense of dying, and cf. Maitreya Upaniṣad (Max Müller, *S. B. E.*, XV, xlii) *tena ekībhavati paramena*; cf. also Jacob, *Concordance*, p. 268. For RV., II, 23, 16, cf. Geldner, *Vedische Studien*, III, 68.

[1] Tārukṣya is more probable than Tārkṣya because the alteration to Tārkṣya is natural, the word occurring above on I, 5, 2. Possibly Tārukṣya is merely a case of Svarabhakti, cf. Wackernagel, *Altindische Grammatik*, I, 56 sq. It is clear that Sāyaṇa read Tārukṣya as he derives it from Taruksa. The Ānandāśrama corrects it into Tṛkṣa without warrant. The Śāṅkhāyana Āraṇyaka, VII, 19, has Tārkṣya; cf. Kauṣītaki Brāhmaṇa, XXX, 9.

[3] These Sāmans are used in the Pṛṣṭha Stotra of the Agniṣṭoma.

union is made' Taruksya guards[3] (his teacher's) cows for a year for the sake of this Upanisad For it alone does Taruksya guard the cows for a year A Rsi says (RV X, 181, 1, 2), 'Vasistha bore hither the Rathantara, Bharadvaja carried hither the Brhat of Agni'[4] He, who thus knows this union, obtains children, cattle, fame, glory, and the world of heaven He lives out all his days Kaunthāravya says 'Speech is united with breath, breath with the blowing air, the air with the All gods, the All-gods with the world of heaven, the world of heaven with *brahman* This is the gradual union' He, who knows this gradual union, obtains children, cattle, fame, glory, and the world of heaven, just as does this union If he for the sake of another or for his own sake recites (the union) let him know as he is about to recite,[6] that this union has gone up to heaven, and that so it will be with those who know it (and become) gods So will it come to pass He, who thus knows this union, obtains children, cattle, fame, glory, and the world of heaven He lives out all his days. Pañcālacanda[1] says, 'The union is speech' 'By speech are the Vedas composed, by speech the metres By speech friends are united, by speech all beings, therefore is speech all this' Now[2] when one repeats or speaks, breath is in speech, speech then swallows breath When one is silent or in sleep, speech is in breath, breath then swallows speech They swallow each other Speech indeed is the mother, breath the son A Ṛṣi says (RV, X, 119, 4), 'There is one bird,'[3] he enters the sky, he sees this whole world, with ripe mind I beheld him nigh at hand; the mother absorbs him, and he the mother' He, who thus knows this union, obtains children, cattle, fame, glory, and the world of heaven He lives out all his days

---

[3] This is a quaint piece of human nature There are plenty of parallels cf Chandogya Upanisad, IV, 4 The omission of the second sentence in B is clearly a slip, showing how untrustworthy is the MS when uncorroborated For the *mimilfarmplanu*, cf Brhadaranyaka Upanisad, I, 3 2 Speyer *Vedische und Sanskrit Syntax*, § 77, 4, Delbruck, *Altindische Syntax* p 92, Geldner (*Vedische Studien*, III, 33 n) finds such a loc in RV, I, 6 9 *sám asminn rñjate girah* *Raksayate* is a hist pres The middle here gives clearly the idea of personal interest (cf Speyer, *Vedische und Sanskrit Syntax*, § 166 b, Delbruck, *Altindische Syntax*, pp 236 sq) For the hist pres cf Delbruck, *Altindische Syntax*, p 502, Speyer, *Vedische und Sanskrit-Syntax*, § 172, *Sanskrit Syntax*, § 327, Brugmann *Griech Gramm*[3], § 156, and especially his paper, *Berichte der Königl sächs Gesellschaft der Wissenschaften*, 1883 pp 169 sq, Giles, *Comp Phil*, § 547 The present tense essentially denotes what is continuous or progressive (cf Monro, *Homeric Grammar*[2], pp 62 63) as opposed to the momentary and that whether the verb has the sense of an action or a state The historic use with a particle of time is Homeric, but not the simple historic present though it is found in the earliest Latin (e g the epitaph of Lucius Cornelius Scipio (B C 298)) *cepit, subigit omne(m) Loucanam opsidesque abdoucit*) and must be Indo European

The acc of time is common, see Introd, p 56, Delbruck, *Altindische Syntax* pp 170, 171, Gaedicke, *Der Accusativ im Veda*, pp 175 sq, Speyer, *Vedische und Sanskrit Syntax*, § 28, Hopkins, *A J P*, XXIV, 7

[4] These Sāmans are required to accompany the important Pravargya Cf my *Śaṅkhāyana Āranyaka* p 48, n 6

[6] *abhivyāharsan* is an extraordinary form Whitney, *J A O S*, XIII, lxx, takes it as an aor ind but I cannot make sense of this To take it as at first seems most natural as a mistake for a future participle (°*harsyan*) is faced with the difficulty that √*hr* gives only *harisy* as the future in accordance with the established rule (Pāṇ i, VII 2 70) that roots in *r* take intermediate *i* (Max Muller, *Sanskrit Grammar*[2], § 332), and that even if *hars* were assumed *hars* would need explanation though *s* and *sy* are constantly confused in MSS (e g *aratsyam* and *aratsam*, Maitrayani Samhita, IV, p 138[8], Whitney, *P A O S* Oct, 1887, p xxv, *asusyam* and *asusam*, Chandogya Upanisad, I, 11, 2, Whitney, *P A O S*, Oct, 1890, p lii, *niksana* and *niksyana* Aitareya Brahmana, VII, 16, Aufrecht, *Aitareya Brahmana*, p 431, above I, 1, 5), *aprakṣyah* and *apraksah*, Chāndogya Upanisad Max Muller, *S B E*, XV, xiv, n 1, Knauer *Mānava Grhya Sutra*, p xxxv, and occasional longs are formed, e g in *saksye*, Atharvaveda, II, 27, 2, for *sahiye*, &c, *asaksi* (Whitney *Sanskrit Grammar*, § 887) There remains only to take *abhivyāharsan* as an aorist participle (without of course any past sense), 'while reciting,' cf e g RV, II, 4 7 *dhák ad urvím* But such forms are also very

---

rare The form *abhikaryate* in Bṛhadāraṇyaka Upaniṣad (=*abhikaryati*) may be explained perhaps by the cases of irregular lengthening above, and by the (Epic) use of middle terminations for active (*J A O S*, XXV, 132), rather than as a causative passive as in the Dict. In Atharvaveda XVIII 2, 58 the editions both read *vidhakṣán* and the pseudo-Sāyaṇa apparently so read though he renders by *ukhan*, but the parallel passages, RV, X, 16, 7 and Taittirīya Āraṇyaka, VI, 1, 4 have both the correct *vidhakṣyán* (Whitney, *Translation of Atharvaveda*, p. 846), and the accent proves clearly that *vidhakṣán* is incorrect Macdonell (*Vedic Grammar*, p 57 n 1) suggests that in the case of *yakṣe*, *vidhakṣán*, *sakṣe*, *mekṣāmi*, the *y* has dropped phonetically, cf *J A O S*, XXV, 142

śaśvat tathā syāt might of course mean, 'may it ever endure' (as taken by Max Muller), but the usual use of the phrase in the Aitareya Brahmana supports the rendering above adopted, e g II, 21, 2 *ya enam tatra brūyād vācā vajreṇa yajamānasya prāṇān vyagāt prāṇa enam hāsyatīti śaśvat tathā syāt*, 22, 3, 28, 2 5 29 7, IV, 7, 7, VI 23, 13, 26, 6, Delbruck, *Altindische Syntax*, p 343 n 1 (for the construction with *īśvara* there mentioned, cf Sāṅkhāyana Āraṇyaka I, 8) Eggeling on Śatapatha Brāhmaṇa, V, 4 3, 2 (*S B E*, XLI, 98, n 2), now adopts 'wohl' as the regular equivalent of *śaśvat* at any rate in the Brāhmaṇas, and see also Oertel's note on Jaiminīya Upaniṣad Brāhmaṇa, I, 54 3 Sāyaṇa takes *vidyāt* as a part of the protasis In any case the sense is very much the same

sa or *sa yadi* is of course not a particle but the demonstrative The cases in which Max Muller (*S B E*, XV, 110, n 7 on Bṛhadāraṇyaka Upaniṣad, II, 4, 7) and Delbruck (*Altindische Syntax*, pp 215, 216), following the *St Petersburg Dict*, find *sa* as a particle are merely instances of an ordinary anacoluthon, and do not prove that *sa* was ever felt as a particle Precisely the same idiom is common in early English and no one there thinks of 'he' as a particle, see Kellner, *English Syntax*, pp 68 sq Correct Caland, *Über das Rit Sūtra des Baudhāyana* p 46

[1] Pañcalacaṇḍa must mean Caṇḍa (no doubt Prākrit for Candra, cf Atharvaveda, II, 24, 1 (Cāṇḍa)) of the Pañcālas, as Sāyaṇa takes it The Aitareya Brāhmaṇa, VIII, 23, knows a king, Durmukha Pāñcāla.

[2] This is the proof of the nature of speech as other than and distinct from breath Their activities are different *Anyo 'nyam* is very interesting as already it tends to become a separate word, though it still is here two words, see Wackernagel, *Altindische Grammatik*, II, 1, 321 sq

[3] This verse is more misconstrued even than usual He enters the sky, it is said, as wind, the world he sees as *prāṇa*, he is seen close in the heart (Sāyaṇa) On the √*rih* of the RV verse cf Hopkins, *J A O S*, XXVIII, 125 sq

Then comes the Prajāpati union[9] The first half is the wife, the latter half is the husband The union is the son The act of union is the begetting This union is Aditi For Aditi is all whatever there is, father, mother, child and begetting A Rsi[10] says this also (RV, I, 89, 10), 'Aditi is mother, is father, is son' He, who knows thus this union, obtains children, cattle, fame, glory, and the world of heaven[11] He lives out all his days

ADHYAYA 2

Sthavira Śakalya says that breath is a beam,[1] and that as the other beams rest on the main beam of the house, the eye, the ear, the mind, the speech, the senses,

---

[9] *Proclaimed by Prajapati (Sayana), but see Śankhāyana Āranyaka VII 16 Cf Taittiriya* Upanisad, I, 3 5, and on III 1, 2 *Prajanana* occurs in the concrete sense in RV, III 29, 1 (Oldenberg, *S B E* XLVI, 305)

[10] This verse is cited and explained in full in Jaiminiya Upanisad Brahmana I, 41, which is in fact parallel For Aditi cf especially Oldenberg *Religion der Veda* pp 203 sq, Macdonell *Vedic Mythology* pp 120 sq

[11] Taittiriya Upanisad I c, 7 continues after *brahmavarcasena, annadyena suvargena lokena,* where S Sitarama renders all kinds of food' Cf for this section Śankhayana Aranyaka, VII, 14-16 18 19

[1] This Adhyaya (cf Śankhayana Āranyaka VIII 1) deals with meditations on the several classes of letters The construction *yatha syuh—samahitah* is noteworthy For the verb understood cannot be considered as other than an indicative, so that the optative in the first clause must be indefinite The same force seems to be found in V, 1, 4 *pratisthapayati—yada—śramyet* Śankhayana Aranyaka II, 16 *tad yatha vraje paśun asarjyargalesthe pariyyayet evam evaitaih padanusangaih sarvan kaman ubhayatah parigrhyatman dhatte,* VII 1, &c Aitareya Brahmana V, 34 4 *tam yady etesam trayanam ekamcid akusam abhyabhavet tasyasti Vamadevasya stotre prayaścittih* Manu, VIII 3, 1, 78 (other examples in Delbruck, *Altindische Syntax* p 349) So with *yatha* Delbruck p 350, with *yatra, &c*, ibid p 351 So in *krtakrtyah syuh* in Sayana s introductions to the RV, curiously misunderstood by Peterson (*Rgveda Handbook*, p 126) The use differs distinctly from but is easily derived from the use of the opt with either an opt (potential) (cf the use in Avestan, Jackson *J A O S*, April 1896, p 187, Delbruck, *Vergl Synt*, II 372) or an opt (imperative) in the apodosis, since in either of these cases the future sense is primarily present, whereas when an indic forms the apodosis the sense is clearly merely indefinite The use, especially as here in sentence, is common in Homer where the subj with primary and the opt with secondary tenses have both this sense (cf Monro, *Homeric Grammar*², pp 258 sq, 269 sq), is found in the subj in early Latin prose as well as verse in which Greek imitation is always possible (e g Cato Maior, *de Mor*, *ingenium prope uti ferrum est si exerceas conteritur, nisi exerceas rubiginem contrahit*), in early English (Kellner, *English Syntax*, p 239) &c

The use of the pass part with or without copula (Introd, pp 64, 65) is significant Delbruck (*Altindische Syntax*, pp 394 395), followed by Speyer (*Vedische und Sanskrit Syntax*, § 176) regards the use as corresponding both to imperf and aor, but while of course it is dangerous to dogmatize on matters which ultimately depend on a delicate analysis of a language so remote as Vedic Sanskrit, it seems to me that there is a very clear distinction between (1) the aor, the tense of which has just happened, (2) the imperf, the tense of narration, he body, the whole self, rests on this breath 'Of this self the truth is like the sibilants, the bones the mutes, the marrow the vowels, and flesh and blood, the fourth part,[1] the semi vowels,' so says Hrasva Māndūkeya We have,[2] however, learned that the number was three Of those three, bones, marrow, and joints, there are three hundred and sixty (parts) on this side and on that side These make up seven hundred and twenty. Seven hundred and twenty are the days and nights of the year This self[4] then, which consists of sight, hearing, metre, mind, and speech, is like the days in number[5] He, who knows thus this self, which consists of sight, hearing, metre, mind, and speech, as like the days, obtains union, likeness, and nearness to the days,[6] becomes rich in sons and cattle, and lives out all his days.

2 Then comes Kauntharavya There are three hundred and sixty syllables,[1] three hundred and sixty sibilants, three hundred and sixty unions What we have called syllables are the days, what we have called sibilants are the nights, what we have called unions are the junctions of the nights and days So far as regards

---

and (3) these forms with participles which express a completed action whose results persist into the present Of course many actions can be regarded from either point of view and be differently described, but that is not to say that the effect is not different when different forms are used To take some of Delbruck's instances RV, I 81, 5 *nd tvdvan Indra kds cand nd jatd nd janisyate* the sense is not either 'was born' (imperf) or 'has just been born' (aor), but 'exists, having been born', in Taittiriya Samhita II 6 9, 3 *tė devā avūrtuh prdcyuto vai pdrastat sdmb tha no nāgachati gandharvā sas pary amositur iti*, which Delbruck gives as a case of the part corresponding to an aor the sense is clearly different between the continuing absence of the Soma and the one definite past act of the Gandharvas in stealing it The real tendency of the Mantra and Brahmana is to assimilate the part to a present though, as is the case with *all* the expressions of past time in the Mantras, occasionally it may have a narrative sense (e g RV, III 48, 22 *Prinya dugdhdm sakte piyah*) The present sense—yet with the past action—is very clearly seen in cases like Bṛhaddevata VIII, 47 *prathamayām vai stutah | ardharce dyauś ca bhumiś ca Aśvinau cottare tatah ||* It is not *stūyante*, for the actual praising is over (*astaut* is regularly used of the Ṛsi), and yet it does not mean 'were praised'

[1] Max Muller takes *anyat* as 'the rest', but it rather means 'the other, the fourth'

[2] This view is apparently Śakalya's (Sayana), the first three being his, to which *Mandukeya* adds a fourth The threefold view, with *ghosa* for *svara*, *vyañjana* for *sparśa*, is found in II, 2, 4 where the difference of terms denotes a difference in dates

[4] Anandatirtha explains all this of Visnu as usual

[5] The symbolism of the year is common in all religions, cf, e g, Farnell, *Cults of the Greek States* IV, 284 285

[6] Cf the Khila MS (B) at end (fol 191ᵇ = Scheftelowitz, *Die Apokryphen des Rgveda*, p 168) *etāsam evā devatānam sarstitam sāyujyam salokātam aśnute yā evām veda 'ān svadhyayam adhīte* For the compound, cf Wackernagel, *Altindische Grammatik* II, 1 149, 150

[1] Syllables are vowels, sibilants consonants and their unions the Sandhi (Sayana) Sayana takes *sats* as separate, to explain how it comes to be = 360 But though the construction is illogical it is regular in the Brāhmanas (Whitney, *Sanskrit Grammar*, § 480 b, cf for Prakrit, Pischel, *Prakrit Grammar*, p 409), and *sats* should not be printed apart as in S.

the gods Now as regards the self The syllables which we have explained with reference to the gods are with reference to the self bones, the sibilants which we have explained with reference to the gods are with reference to the self marrow, the marrow is indeed the real breath, for it is seed, and without breath seed is not effused Or if it is effused without breath, it will decay and will not produce The unions which we have explained with reference to the gods are with reference to the self joints Of these three,[2] bones, marrow, and joints, there are five hundred and forty parts on this side and on that They make one thousand and eighty, and one thousand and eighty[3] are the rays of the sun They make the *bṛhatī* verses and this day Thus the self[4] which consists of sight, hearing, metre, mind, and speech is like the syllables in number He, who knows thus this self, which consists of sight hearing, metre, mind, and speech, as like the syllables, obtains union, likeness, and nearness to the syllables, becomes rich in sons and cattle, and lives out all his days

3 Badhva[1] says, 'There are four persons, the person of the body, the person of the metres, the person of the Veda, and the great person That which we have called the person of the body is the corporeal self Its essence is the incorporeal conscious self That which we have called the person of the metres is the collection of letters Its essence is the letter 'a'[2] That which we have called the person of the Veda is that by which one knows the Vedas, Ṛgveda, Yajurveda, and Sāmaveda Its essence is the Brahman priest Therefore should one choose a Brahman[3] priest who is full of *brahman* and can discern flaws

---

It is curious as S points out that no comment is made on the similar passage in III, 2, 1 For *Kaunthaº* cf the Dhātupāṭha root *kunth* which Franke (*Vienna Orient Journ*, VIII, 323) compares with Greek *κυλλός* Wackernagel *Altindische Grammatik* I, 170 The name seems not to occur elsewhere, except in the parallel passage in Śankhayana Āranyaka VIII, 2

[2] The words inserted by B are quite out of place here and show how little that MS can be relied upon For *mayūkham* cf Atharvaveda II 12 7 Roth, *Z D M G*, XLVIII, 102 For the construction cf Baudhāyana Dharma Sūtra II, 17, 11, 37 *J R A S*, 1909 contra Böhtlingk *Sächs Ber* 1892 p 197

[3] This extraordinary doctrine Sāyana can only support by the Ātharvana passage (Praśna Upanisad, I 8 = Maitrī Upanisad, VI 8 Bloomfield, *Vedic Concordance* p 1002 a) *sahasraraśmih śatadhā vartamānah prāṇah prajānām udayaty esa sūryah*, which he explains includes by denotation the eighty There are 1080 syllables in thirty *bṛhatīs*

[4] Visnu according to Ānandatīrtha, who has considerable difficulty in working out the details of his interpretation here

[1] Badhva is undoubtedly correct, *Vālkyah* is merely a slip of Rājendralāla's, and did not deserve record in Monier Williams' *Dict* *Vātsy(y)ah* is read in Śankhāyana Āranyaka, VIII, 3

[2] Cf II, 3 6 The precision in the use of the aorist is to be noted, cf Introd p 60

[3] The Brahman priest is required to guard the sacrifice and sits in the South (the place of the dead), Śatapatha Brahmana, XI, 5, 8, 7, Winternitz, *Gesch der indisch Litt*, I, 141, n 2 He is not here in any way connected with the Atharvaveda (the later connection is probably due to his employment (Winternitz, p 139 n 2) in the household ritual which is found mainly in

It hath filled heaven and earth and the sky The sun is the self of all that stands and moves' This I regard as the regular[1] Samhita as composed, thus says Badhva For the Bahvṛcas consider him in the great hymn, the Adhvaryus in the fire, the Chandogas in the Mahāvrata rite They see him in this earth, in heaven, in the air, in the ether, in the waters, in plants, in trees, in the moon, in the constellations, in all beings Him they call *brahman* The self which consists of sight, hearing, metre, mind, and speech, is like the year in number He,[2] who recites to another the self, which consists of sight, hearing, metre, mind, and speech, and is like the year,

4. To him the Vedas yield no milk, he has no part in what his teacher has taught him He knows not the path of virtue A Ṛṣi says this also (RV, X, 71, 6) 'He who forsakes the friend who knows his friends,[1] in speech he has no part What he hears, he hears in vain, he knows not the path of virtue' This means that he has no part in what he has studied and that he does not know the path of virtue So a man who knows this should not[2] lay the fire for another, nor sing the Sāmans of the Mahāvrata for another, nor recite the Śastras of that day for another Only[3] may he recite for a father or a teacher, for that is done for oneself We have said[4] that this incorporeal conscious self and that sun are one and the same Where these two are separated,[5] the sun is seen like the moon,[6] its rays do not manifest themselves,

---

[1] All the above must be Badhva's view, just as III, 2, 2 gave Kauṇṭharavya's views. The following alludes to the fact that the Adhvaryus mystic speculations centre in the Agnicayana, cf Eggeling, *S B E*, *XLIII*, xxiv

[2] The section runs on in a way that cannot be early V, 1, 1 and 2 is precisely similar, and the present section division must remain of doubtful (though early) date The divisions of the Śaṅkhayana are similarly illogical For the loc cf Delbruck, *Altindische Syntax*, p 105

[1] Sayana points out that Taittiriya Aranyaka, I, 3, II, 15, reads in this verse *sakhivedam*, a point overlooked in Bloomfield *Vedic Concordance*, p 700b *Sayana's reference does tend* to show that he also wrote a Taittiriya Aranyaka commentary, which on other grounds might be deemed very doubtful (cf III 2 3 n 5)

[2] i e not as Adhvaryu, Udgatṛ or Hotṛ priest It is impossible to square the total prohibition here with V, 1, 5, which (see n 5) contemplates a breach of the rule but it agrees with the *opinion of 'some' (eke) in* V, 3 3 *see n 1 on that passage*

[3] A frequent exception Cf V, 3, 3 n 1

[4] III, 2, 3 The relevance of this passage is not obvious Sayana takes it as a reflexion induced by the idea of the attainment of *brahman* in the brief space of life, whence omens as to the duration of life are inserted The connexion of sun and self is elsewhere used to give *omens of death* In Bṛhadaraṇyaka Upaniṣad, V, 5, 2, the sun appears as white *only* to the man about to die The parallel passages in the Śaṅkhāyana are VIII, 7, and XI, 3, 4

[5] This is not very logical, as there is no reason why the separation of the two should be a sign of death The rest of the signs are clearly old folklore ideas pressed into service For the extensive literature on Vedic superstitions, see Hillebrandt, *Ritual Litteratur*, pp 167 sq, 183-185, Hatfield, *Auśanasādbhutāni*, *J A O S*, XV, 208, &c, Bloomfield,

the sky is red like madder, the wind is not retained, his head smells like a raven's nest, and a man should know that his self[7] is gone and that he will not have long to live. Let him do then whatever he considers must be done, and recite seven verses beginning, 'What is near, what is far' (RV., IX, 67, 21-27), the single verse, 'Of the ancient seed' (RV., VIII, 6, 30), six verses beginning, 'Where purifying Brahman' (RV., IX, 113, 6-11) and the single verse, 'We from the darkness' (RV., I, 50, 10). Next when the sun is seen pierced, and looks like the nave of a cart-wheel, or he sees his shadow pierced, let him know that this is so. Next when he sees himself in a mirror or in the water with a crooked head[8] or without a head, or when his pupils are seen inverted[9] or crooked let him know that this is so. Next let him cover his eyes and look, then threads[10] are seen as if falling together. If he sees them not, let him

---

Atharvaveda, pp. 82 sq., Kauśika Sutra, XIII, and Adbhuta Brāhmana. Aufrecht's idea (*Z. D. M. G.*, XXXIII, 573) that the passage is not in place is disproved by the parallel in the Sāṅkhāyana, VIII, 6 and 7, XI, 3 and 4.

[6] i. e. its rays are pale and cold. *Kākakulāyagandhikam* is probably an adj. as a quasi pred. For examples cf. Delbrück, *Altindische Syntax*, pp. 78, 79. *Kulāya* is a curious word in Mānava Gṛhya Sūtra, II, 14, 23. Knauer takes it (wrongly, I think) as = stall (cf. p. 55 of his edit.)

[7] Ānandatīrtha renders *samparetaḥ* as *samnikṛstaṃ gamanam*, Sāyana as *mṛtaḥ*. In *yat manyeta* the opt. is probably indef. It may also be 'attracted', cf. Speyer, *Vedische und Sanskrit Syntax*, § 281. The form in *eta* is rare in the Brāhmaṇas, cf. Delbrück, *Altindische Syntax*, pp. 400, 401, Whitney, *Sanskrit Grammar*, § 965. The use of *man* with participles of all sorts is curious, cf. the use with the gerund, Whitney, § 994 e, Speyer, *Vedische und Sanskrit Syntax*, § 223, with the pres. part., III, 1, 4. With the past part., even in Bṛhaddevatā, e. g. VII, 125.

[8] The reading of the text is supported by Sāyana and also by Ānandatīrtha and is certain. For water divination cf. Farnell, *Cults of the Greek States*, IV, 230. For *ādarśa* (also in the Bṛhadāraṇyaka and Kaṭha Upaniṣads) cf. Max Müller, *S. B. E.*, XV, xxiv.

[9] Sāyana explains a white pupil in a black eyeball. It probably means only, upside down, although the contrast of white and black in the eye is frequent, II, 1, 5. Sāṅkhāyana Āraṇyaka, VIII, 7, suggests reading here *jihme na vā* 'or are not seen at all' and this may be right.

[10] Sāyana explains the operation thus, *cakṣusī nimīlya netrayoḥ prāntam eva tābhyāṃ netra saṃlipam paśyet*. Ānandatīrtha has *aṅgulyā akṣimūlam avaṣṭabhya*. The *bṛṣṭarakāni* (*baraṭakāni* or *varāṭakāni* in Sāṅkhāyana) are, Sāyana says, *vartulāni sūkṣmāni śuklavarṇāni keśāndrakāśabdābhidheyāni* and he takes *sampatantīva* as *samyan netre nirgacchantīva*. This is hardly possible. For *varāṭakān*, cf. Śrīharṣa, Khaṇḍanakhaṇḍakhādya, p. 239, cited by Jacob, *Laukikanyāyāñjali*, p. 1. The construction is difficult, as the *yathā* is not properly in place. It may be that *yathā* goes with *baṭarakāṇi* and *iva* qualifies only *sampatanti*, and the sense is, things are seen like, &c., but it is also possible that *tad yathā* is practically = then it is that. This use is of course common in later Sanskrit, e. g. Bāṇa, Kādambarī (p. 337, 11, ed. Peterson, p. 600, ed. Nirṇaya Sāgara): *āgameṣu sarveṣv eva purāṇarāmāyaṇabhāratādiṣu samyag asakṛt prakaraṇaśaḥ pravṛttaḥ tad yathā*, &c. Cf. the Pāli use of *seyyathā*. Bṛhadāraṇyaka Upaniṣad, IV, 3, 42 sq. has a series of *tad yathā*, so ibid., IV, 4, 4, 5, &c.

Cases of conditional sentences without particles are of course very frequent in Vedic as know that this is so Next let him cover his ears and listen, then there is a sound as of a burning fire or of a chariot If he does not hear that sound, let him know that this is so Next when the fire appears blue like the neck of a peacock,[11] or when he sees lightning in a cloudless sky, or no lightning in a cloudy sky, or in a great cloud sees bright rays as it were, let him know that it is so Next when he sees the ground as though burning, let him know that this is so So far as regards the visible signs Then come the dreams[12] He sees a black man with black teeth, he kills him, a boar kills him, a monkey jumps on him; the wind carries him swiftly along, having swallowed gold he spits it out, he eats honey, he chews stalks, he carries a single[13] lotus,

---

in other languages. Cf Speijer, *Vedische und Sanskrit-Syntax*, § 284, *Sanskrit Syntax*, § 487, Aufrecht, *Aitareya Brahmana*, p 431 my note *J R A S* 1909

The Maitreya Upanisad (Max Muller, *S B E*, XV, xlvi) has a passage which may be reminiscent of this text *agnir vaisvanaro* . *tasyaisa ghosa bhavati yam* (wrong reading ? *yad*) *etat karnav apidhaya srnoti sa yadotkramisyan bhavati nainam ghosam srnoti*

For *upabdis*, infra which denotes literally the noise of going and is particularly in place here, cf Aitareya Brahmana, IV, 9 3 Jaiminiya Brahmana, I, 253, Jaiminiya Upanisad Brahmana, I, 37, 3, with Oertel's note, RV, I 74, 7, with Oldenberg's note (*S B E*, XLVI 94), Schmidt, *K Z*, XXV, 55 Scheftelowitz (*Zur Stammbildung in den indo-germanischen Sprachen* § 9) compares RV, IX, 77, 4 *urubjā*, which he considers as going back to IG *pago*, cf Greek πηγή The construction above *drsyate* and *abhikhyayeta* in parallel uses and below *drsyate pasyen na pasyen pasyeta* are decidedly curious (cf Introd p 63) The temptation to amend to *drsyeta* is very strong and on the whole I incline to think that it would be dangerous to insist on these examples The case of *upeksetа—drsyante* differs, for the two verbs are not parallel The first is an instruction, the second expresses categorically the result (and *drsyante* may have helped to bring about the incorrect *drsyate*) In III, 1, 4 where *upavadet* and *aha* occur, the *aha* is very strange, and one would like to take *saknoty aha—hasyatity* as two sentences both dependent on *brūyat* There is, however the real difficulty that *a—√ha* would be a strange combination, and the division of the sentences is also curious though no more curious than the *aha* I suspect some corruption of the text Sāyana renders differently He takes the whole as one Mantra and supplies *bhavan* as a subject for *aha*, and so in the next sentence he interpolates *bhavan aha* in sense In the numerous passages in the Aitareya Brāhmana which are more or less parallel (see the reff cited in III, 1, 6 n 5), no such *aha* occurs, and *hasyati* has no prefix But probably *a—hasyati* must go together *Āha* might, of course, be taken as a first person and made part of the quotation (cf Speijer § 178), but this is not likely, and for the indef opt, cf III, 2, 1, n 1

[11] *Mayuragrivah* is perhaps intended by the reading of B *mayuragriva ameghe* (but Śankhayana has *mayuragriva* when it can be °*vah*), and undoubtedly *grivah* is the form alone recognized by Panini and usual in the earlier literature *J R A S*, 1906 pp 916 919 Probably the reading was originally *mayuragrivameghe* by an incorrect Sandhi for *mayuragrivah* For similar irregular Sandhis, cf Buhler, *S B E*, II xli (from Āpastamba), Macdonell, *Brhaddevata*, I xxvii, and V, 3, 2, n 9, III, 1, 3, n 2 For the next portent, cf Pischel, *Vedische Studien*, I, 112

[12] The plural must be right Cf Markandeya Purana, XLIII, 1 sq, Hillebrandt, op cit, p 184

[13] 'Red' in colour (Sayana), for red as unlucky, cf *Z D M G*, XL, 117

he drives with a team of asses and[14] boars; wearing a wreath of red flowers, he drives a black cow with a black calf towards the south[15] If he sees any of these, he should fast and cook a pot of milk, and offer it, reciting a verse of the Ratrī hymn (RV., X, 127, 16) to each oblation, and having fed the Brahmins with other food,[16] himself eat the oblation Let him know that the person within all beings who is not heard,[17] not reached, not thought, not subdued, not seen, not understood, not classified, but who hears, thinks, sees, classifies, sounds, understands, and knows is his own self[18]

5 Now comes this Upaniṣad of the whole speech All these indeed are Upaniṣads of the whole speech, but this they so call. The mutes are the earth, the sibilants the sky, the vowels heaven The mutes are fire, the sibilants air, the vowels the sun The mutes are the Ṛgveda, the sibilants the Yajurveda, the vowels the Sāmaveda. The mutes are the eye, the sibilants the ear, the vowels the mind The mutes are the up breathing, the sibilants the down-breathing, the vowels the back-breathing Then comes this divine lute[1] The

---

[14] 'Or' (Sayana), which may be more correct.

[15] The ten dreams are so taken by the commentator and by Max Muller whose note (p. 261) is apparently wrong *Etesam kimcid* is noteworthy The neut. of the pronoun is practically nominal and is to be compared with the neut in predication, III, 1, 2, n 4. So in Latin, e g Horace, *Sat*, 1, 7 *Lydorum quicquid* The parallel passage in the Śaṅkhāyana has corrected the original *kimcid* of the MS, but the correspondence is conclusive.

[16] Cooked in the house (Sayana) See Saṅkhayana Gṛhya Sutra, V, 5, 9 and my article, *J R A S*, 1907, p 929, for *sthalīpaka*, see Bṛhadaraṇyaka Upaniṣad, VI, 4, 19 Gṛhyasaṃgraha, I 114, Oldenberg, *S B E*, XXX, xvi, n 4. For the causative with instr and acc. cf. Delbruck, *Altindische Syntax*, pp 224 sq; Whitney, *Sanskrit Grammar*, §§ 277 a, 282 b, Speyer, *Vedische und Sanskrit-Syntax* § 21, *Sanskrit Syntax*, § 49 According to Panini, I, 4 52, and the examples cited in the Kaśikā Vṛtti, ad loc, here we should have two accusatives.

[17] *Ataḥ* is rendered by Sayana, *atmad dehendriyādisaṅghataḥ vilakṣaṇa iti śeṣaḥ*, while Ānandatīrtha suggests *adhikaḥ*

[18] This is the most advanced point in the definition of the Ātman arrived at in the Āraṇyaka. The Ātman is not object, but subject only—as Sāyana says, *atmā viṣaye na bhavati viṣayī tu bhavaty eva* This occurs frequently later and with it the doctrine that the self cannot be known Sāyana cites the *antaryamibrahmana*, Bṛhadaraṇyaka Upaniṣad, III, 7, 23 the *akṣarabrahmana*, ibid., III, 8, 11, the Kauṣītaki Upaniṣad, I, 6, the Praśna Upaniṣad, IV, 6, and the Nṛsiṃhottaratapaniya Upaniṣad, II See also Deussen, *Philosophie der Upanishads*, pp 133 sq, E.T, pp. 147 sq Jaiminiya Upaniṣad Brahmana, IV, 18, is devoted to this topic (= Kena Upaniṣad)

[1] i e the human body This metaphor explains Praśna Upaniṣad, II 2, where *vīṇa* (V, 1, 4) is equated to *śarīra*, which Max Muller (*S B E.*, XV, 274, n 3) finds unintelligible Connected with Viṣṇu is Ānandatīrtha's explanation of the word *darvī* *Ambhaṇa* is a curious word I think it is from *anu* + √*bhan* (as in Class. Sansk for √*bhan*, Wackernagel, *Altindische Grammatik*, I, 194) Compare *ambara* for *anu* + *vara* and *jambila* for *janu* + *bila* (ibid, 59). The omission before *v* (common) led to omission before *b* and sporadically before *bh* The meaning would be 'sounding board' (?) Cf. v Schroeder, *Ind Lit*, p 755

6. Now Krsnaharita[1] proclaims this Brahmana[2] as it were regarding speech to him.[3] Prajapati, the year,[4] after creating creatures, burst. He put himself together by the metres. Because he put himself together by means of the metres, therefore is it the Samhita. Of that Samhitā the letter *n* is the strength, the letter *s* the breath, the self. He who knows the verses in the Samhita and[5] the letters *n* and *s*, he knows the Samhita with its breath and its strength. Let him know that this is lifegiving.[6] If he is in doubt[7] whether to say it with an *n* or without an *n*, let him say it with an *n*. If he is in doubt whether to say it with an *s* or without an *s*, let him say it with an *s*. Hrasva Māndūkeya says, 'If we repeat the verses according to the Samhitā, and if we say the teaching[8] of

---

must be taken that the she-ichneumon is a synonym for what is very piercing; the nearest approximation to this idea is the passage in Atharvaveda, VI, 139. 5 (cited in Zimmer, *Altindisches Leben*, p. 86), which refers to the ichneumon's (m.) skill in chopping up and then restoring his work.

[1] A son of Harita who was dark in colour (Sayana), cf. Hiranyadant Vaida, II, 1, 5. A Kumara Harita (so, not Harita) appears in Bṛhadaranyaka Upanisad, II, 6. 3; IV, 6. 3; VI, 4. 4. Weber (*Indian Literature*, p. 50) reads Harita, and the lawyer is always so called (ibid., p. 269) even in Apastamba Dharma Sutra I, 10, 29, 12. 16. On the other hand Vartika 8 on Panini I, 1, 73 recognizes Haritakata, and Panini, IV, 1, 100 Haritayana as names, where Harita appears. Weber's Harita here is therefore probably wrong, and Śāṅkhayana Āranyaka, VIII, 11, has *krtsnaharita*.

[2] Brahmana here means secret doctrine like Upanisad. *Iva* seems to be used to indicate the somewhat unusual sense; the Sankhayana version has *eva*, cf. I, 1, 2, n. 3; *J. R. A. S.*, 1908, p. 1193, n. 1. Sayana in his commentary repeatedly has phrases like *antaryamibrāhmana*, the secret doctrine of the *antaryāmin*, see III, 2, 4, n. 18, and cf. the name of Bṛhadāranyaka Upanisad, I, 4 (*purusavidhabrāhmana*), Max Müller, *S. B. E.*, XV, 25, and the common *tasyoktam brāhmanam*.

[3] To his pupil or son (Anandatirtha and Sāyana).

[4] The reading of B, *samvatsaram* (see Introd., p. 3) must be a correction to improve the sense. But it could never have been corrupted into *samvatsarah*. Prajapati as the year is a Brahmanic commonplace (for its deeper significance, see Eggeling, *S. B. E.*, XLIII, xx sq.), e.g. Aitareya Brāhmana, II, 17. 2; VI, 19. 7; Maitrāyanī Samhitā, I, 10. 8; Kausītaki Brahmana, VI, 15; Śāṅkhāyana Āranyaka, I, 2, &c. The phrase *Prajapatih prajah srstva vyasramsata* is frequent in Śatapatha Brahmana, VI–X, not in I–V; Weber, *Ind. Stud.*, XIII, 268; and for a similar case cf. II, 4. 3, n. 14. One might translate 'he is the year.' Cf., however, Śatapatha Brahmana, X, 1, 1, 1 and 2. The confusion of *vyasramsada* and *°sata* is another example of the confusion of surd and sonant so common in Śāradā MSS. Cf. Lanman in Whitney's *Translation of the Atharva-veda*, pp. 57, 1045; J. Hertel, *Tantrākhyāyika*, p. xvi; Roth, *Z. D. M. G.*, XLVIII, 106–111.

[5] This is the literal rendering. Sāyana takes it, 'Who recites the verses thinking of the *n* and *s* which accompany the Samhitā.'

[6] To the Samhitā (Sayana), or perhaps to the reciter, if not to both.

[7] Sāyana takes it, 'If a pupil ask his teacher,' but this is unnecessary. The question is, he says, whether the reflection on the Samhitā is to take the differences of *n* and *s* into account or not.

[8] Sayana refers this to Śūravīra's doctrine, III, 1, 1. For [illegible], cf. Kausītaki Brāhmana, XIV, 5; Śāṅkhāyana Āranyaka, I, 6, where Dr. Friedländer renders '[illegible]'.

Māndukeya, then the letters *n* and *s* are obtained for us' Sthavira Sakalya[9] says, 'If we repeat the verses according to the Samhitā, and if we say the teaching of Māndukeya, then the letters *n* and *s* are obtained for us' Then the seers, the Kāvaseyas, knowing this,[10] say, 'To what end shall we repeat the Veda, to what end shall we sacrifice? For we sacrifice breath in speech,[11] or in breath speech For what is the beginning, that is the end' These Samhitas let no one[12] tell to one who is not a resident pupil, who has not been with the teacher for one year, and who is not himself to become a teacher Thus say the teachers[13]

---

[9] The sayings are identical, and apparently this is intended to denote that the doctrine received universal acceptance The passage may indicate (cf also Śankhayana Śrauta Sutra, IV, 10, 9 where Śakalya is younger apparently than Mandukeya) that the Mandūkeya Sakha had its Samhita text before Śakalya produced the Pada Patha, which is quite likely

[10] This is a clear proof that the holders of the Aranyaka doctrine rejected sacrifices or recitations as means of knowledge, cf Bṛhadaranyaka Upanisad, I, 5, 23 Kausitaki Upanisad, II, 5, Chandogya Upanisad, V, 11-24; Taittiriya Upanisad, II, 5, Deussen, *Phil d Upanishads*, p 63 A Tura Kavaseya *purohita* of Janamejaya occurs in Khila I, 9 6 and in—as already noted by Colebrooke, *Essays*, I, 72, see Oldenberg *Z D M G*, XLII, 239 sq—the Aitareya Brahmana, IV, 27, VII, 35, VIII 21 For the spelling cf Scheftelowitz *Die Apokryphen des Rgveda*, Addenda p 190 Wackernagel, *Altindische Grammatik* I, 239. Winternitz (*Gesch der indisch Litt*, I, 199) uses the story of Kavasa as the son of a non Brahmin (Aitareya Brāhmana II 19) as a piece of evidence in favour of the theory of the attribution to the Ksatriyas of philosophic speculation over the origin of the doctrine of transmigration (cf. Introd pp 50, 51, Garbe, *Beiträge zur indischen Kulturgeschichte*, pp 1 sq) He argues that the Brahmins merely accepted and made these doctrines their own by adopting them along with the doctrine of the four Asramas This all seems very doubtful That among the priests none should rise superior to the sacrificial cultus is contrary to all religious history That hermits, &c, were originally not of the priestly caste is a mere theory and not a probable one Winternitz view leads him (p 202 n 1) to adopt the improbable theory of Aranyaka as a text to be studied by Vanaprasthas for which he quotes the (late) Aruneya Upanisad (Deussen *Sech 19 Upanishads* p. 693) and Ramanuja (Thibaut, *S B E*, XLVIII 645) Cf Introd, p 16 It must always be remembered that the Brahmanas contain already in germ all the ideas which make up the fundamental doctrine of the Upanisads, even the doctrine of transmigration is presaged in the doctrine of repeated deaths in the other world It is impossible to explain why the Brahmins became so completely the bearers of the *atman* doctrine if it was not theirs *ex initio* Professor Macdonell has told me that he concurs in this view, which thus gains great weight, and see my notes *J R A S*, 1908, pp 838 863, 1142 The Kavaseyas are cited by Śankara on Śvetāśvatara Upanisad (ed Roer, p 257) as opposed to works, Weber *Ind Stud* II, 418

[11] Cf Jaiminiya Upanisad Brahmana I 2 2, 6

[12] Cf V, 3, 3, Weber, *Indian Literature*, p 49, n 35

[13] Mahidasa, &c. (Anandatirtha) Cf I, 1, 1, n 5, II, 3 5, n 4 Probably the plural is only *majestatis*

ARANYAKA IV

Āśvalāyana (Śrauta Sūtra, VII, 12, 10) gives the following account of the purpose of the Mahānāmnī verses On the fifth day of the *pṛṣṭhya* six day ceremony, at the midday pressing of the Soma, corresponding to the Niṣkevalya Śastra, the Udgātṛs sing sometimes the Śākvara Sāman as one of the Pṛṣṭha Stotras,[1] and then[2] use the Mahānāmnī verses as the basis of the Sāman These number nine, but for the purposes of the Sāman they are made into three, each consisting of three verses These verses are recited *adhyardhakāram*, that is, first one and a half verses are recited, then comes a pause, then the remaining one and a half, followed by the syllable *om* Then are recited the nine *purīṣa padāni*, additional verses These may either be recited simply straight on as they stand in the text, or the first five may be made into two sets of five syllables each, thus

Eva hi eva | eva hi Agna 3u | the *hi* being taken without Sandhi, the last four *purīṣapadāni* being repeated without a pause in the middle See also Śāṅkhāyana Śrauta Sūtra, X, 6, 10 and comm

The Mahānāmnī verses occur in the Āraṇya Saṃhitā and in the Naigeya Śākhā at the end of the Pūrvārcika of the Sāmaveda, and as one of the Khilas of the Ṛgveda, see Peterson, *Second Report*, p 97, Scheftelowitz, *Die Apokryphen des Ṛgveda*, pp 134–136 They are referred to in the Bṛhaddevatā, VIII, 100, Śāṅkhāyana Śrauta Sūtra, X, 6, 10, Ṛgvidhāna, IV, 25 and Śāṅkhāyana Gṛhya Sūtra, II, 11, 12, &c From these sources, and from Baudhāyana, cited in Oldenberg, *Prolegomena* p 509, n it appears that they followed directly upon the verse *tac cham yor*, which, according to the Śāṅkhāyana Gṛhya Sūtra, IV, 5, 9, is the end of the Ṛgveda Saṃhitā (in the Bāṣkala recension), and, according to Nārāyaṇa on Āśvalāyana Gṛhya Sūtra, III, 5, 9, is the end of the Bāṣkala recension[3] It is not, however, quite clear what this means, since *tac cham yor* occurs as the last verse of two Khilas, V, 1 and 3, in Scheftelowitz's edition, viz the *saṃjñānam* and *pradhvaraṇīm* Khilas, and the three Khilas, V, 1–3, the second being the *nairhastyam*, have 5+3+7=15 verses. The view of

---

[1] For these see especially Eggeling, *S B E*, XLI, xx sq

[2] The Śākvara is normally based on Sāmaveda, II 1151–1153 (Sāyaṇa and Mahīdhara cited by Eggeling p xx n 2)

[3] Cf. also Oldenberg's note on Śāṅkhāyana Gṛhya Sūtra, IV, 5, 9 and *Ind Stud*, XV, 150.

Oldenberg, who had not[4] the evidence of the MS of the Khilas before him, was (*Prolegomena*, p 502) that the Samhita ended with the first *tac cham yor*, i e with Khila, V, 1, and Scheftelowitz (pp 11, 132) holds that this is correct Oldenberg, however, held (p 509) that the Mahanamni verses followed directly after *tac cham yor*, and (p 501) expressed the view that the following ten verses were some of them modern But of the direct evidence for the immediate sequence of the Mahānāmni verses, cited by Oldenberg, the Rgvidhana alone fully bears him out, for the Khila MS has the Mahanāmni verses after the *pradhvarānam* Khila, and this is probably the meaning of Brhaddevata, VIII, 94, as interpreted by Prof Macdonell It is an easy conjecture that the Rgvidhana, which has other coincidences with the Brhaddevata[5], followed that work, but misunderstood the word *caturtham*, which most probably must mean 'the fourth of the hymns after X, 190' This fact weakens greatly the force of Oldenberg's argument from the modern character of the last ten verses, and in point of fact it is difficult to deny that the verse *tac cham yor* is modern in appearance, and that it need not be separated in time from the last seven verses For the second *tac cham yor* being the end of the Samhita in the Baṣkala recension, we have the clear evidence of the commentator on the Caranavyuha,[6] who actually cites the verses Dr Scheftelowitz considers that the commentator is untrustworthy, and later than Sayana, but this appears very doubtful We know, he argues, that the commentator explains the eight extra hymns attributed to the Bāṣkala Śakha by the Anuvakanukramani as being seven of the Valakhilyas and the *samjñanam* hymn of fifteen verses but the number should be ten, as the *samjñanam* hymn is really composed of three hymns But it is difficult to maintain that it is impossible that the fifteen verses, despite their difference of contents, were not regarded in early days as one hymn, for several of the Rgvedic hymns are notoriously patchwork, and this applies more strongly still to later Samhitas

Much more important is the question of their antiquity Oldenberg makes the Mahānāmni verses an exception to his general view, that the Khilas are on the whole of later origin, and holds that they are coeval with the Rgveda, and were merely omitted because of some reason of ritual teaching from the ten Mandalas Dr Scheftelowitz who disputes Oldenberg's general position, and accepts Hillebrandt's theory of the purer ritual tradition, assigns the verses (p 3) to the end of the Rgvedic period Further, Oldenberg[7] has suggested that the verses are alluded to as the Śakvarī verses in Rgveda, VII, 33, 4, X 71, 11, and this suggestion is at least plausible They are apparently referred to as Mahanāmnis in the Atharvaveda and Yajurveda (see below) It is borne out to some extent at least by the character of the language, which shows the rare forms *ânulamsisah stuse vide ile, rūjase*, and *samnyase* The metre is also of an archaic type in so far as resolutions are frequently necessary to restore it The Khila Anukramani gives the following note *vida daśa padāś ca pañca Viśvāmitra Indro va Prajapatir Aindram puranam anustubham purisapadany Agneyavaisnavaindrapausnadaivani vairajam dvitiyapañcamyav usnihau caturthi nyankusarini saptami purastadbrhati navamyantye pankti* As a matter of fact as both Weber[1] and Oldenberg recognize, the verses are not preserved in their primitive form but only as modified to suit their supposed sacred character In verses 2, 5, and 8, which were apparently originally *anustubhs*, the fourth *pada* has been omitted for the insertion of a sort of refrain Verses 1, 3 and 6 are in *anustubh* Verse 4 appears to be 8+12+8+8, verse 7, 12+8+8+8, verse 9, 8+8+8+8+8 The rest is in no regular metre Oldenberg (p 33) considers that originally the metre consisted of seven and five sets of eight syllables respectively but this seems hardly borne out by the facts It should be noted that the Khila text manufactures the last four of the nine *purisapadani* into one verse ( ) and in this respect is certainly not old for the *purisapadani* cannot reasonably be held to have ever made up a verse They are referred to, however as five in the Kausitaki Brahmana XXIII 2, and connected with Prajāpati Agni, Indra Pusan and Devah, and in the Brhaddevata VIII, 102, they are connected with the same deities save that Visnu is substituted for the Devāh (so the A version, the B version omits Prajapati, while Mitra s text includes both Prajapati and the Devāh see Macdonell s note) They are also mentioned in the Pañcavimsa Brahmana XIII 4 12, where elaborate directions are given as to their selection to make up the *śakvara saman* Lātyayana Sutra, IV, 10 18 Śankhayana Śrauta Sutra X, 6 13, &c and in the Aitareya Brāhmana, IV, 4, V, 7, VI, 24, Atharvaveda XI 7, 6, Vajasaneyi Samhitā, XXIII, 35 Kathaka Samhitā, X 10, Taittiriya Samhitā, V, 2, 11 1[2]

---

[4] He takes no notice of the new evidence in his review of Scheftelowitz *Gött gel Anz*, 1907, p 217 for which and for other valuable papers I am indebted to his kindness.

[5] Macdonell *Brhaddevata*, I, 147

[6] Oldenberg, *Prolegomena*, pp. 495, 501, 502

[7] *S.B E*, XXIX, 156.

The verses contain several phrases reminiscent of the Rgveda perhaps borrowed from earlier hymns, at least they tend to convey an impression of second hand use *jetaram aparajitam*=RV I, 11, 2, *sá nah parsad ati*=RV, X 187, 1, *Indram dhanasya satáye* is the last *pada* of RV VIII, 3 5[d] (this I owe to Bloom field, *Vedic Concordance*, p 210^{b}); *sam anyéṣu bravavahai*=RV, I, 30, 6, *sakhā suśévo advayah*=RV, I, 187, 3^{1}, *śaviṣṭha vajrinn ṛñjase*=RV., I, 80, 1^{c} (with *ojasā*) These last two cases seem to me strongly in favour of the later date of these verses, for *bravavahai* is not unnatural in RV, I, 30, 6 where it seems to refer to Indra and the speaker who are to agree in other battles, the previous half verse referring to a conflict, but it is distinctly awkward here where the first half verse has no reference to a fight or other occasion of association This only, however, proves that the Mahānāmnī verses are not among the earliest parts of the Rgveda

---

[1] *Ind Stud* XIII 68

[2] For the last four reff I am indebted to Bloomfield *Ved c Concordance* p 696[a] who gives other passages, cf also Weber, *Ind Stud*, XVII, 358, Eggeling *S B E*, XLI, xx, XLIV, 380 n 2

The last four *purīṣapadāni* are made out of the preceding verses, *evā́ hí śakró*, from v. 2, *vaśī hí śakró*, from v 5, *vaśā́ṅ ánu*, from v 4 The Āśvalayana Śrauta Sūtra, VI, 2, 9, shows that other *padas* of the verses were used independently in the ritual, *pracetana pracetayayāhi piba matsva* ı *kratuś chanda ṛtam bṛhat sumna a dhehi no vasan ity anuṣṭup* ı Ibid, 12, has. *ud yad bradhnasya viṣṭapam iti paridhaniyā* ; *eva hy evaiva hindra* 3 ; *evā hi śakro vaśi hi śakra iti japitvā* ı *apah pūrvesam harivah sutanam iti yajati* ; and again the *purīṣapadāni* in VI, 3, 26

For the question of the 'authorship' of this Āranyaka by Āsvalayana, cf. Introd, pp. 18 sq For the view that this forms a sort of Āśvalayana Samhita may be compared the fact that there is an Āpastambīya Mantrapatha, a collection of Gṛhya verses and formulae, to accompany the Āpastamba Gṛhya Sūtra So too, as Oldenberg (*S B E*, XXX, 3-11) has conclusively[10] shown, the Mantra Brahmana was prepared to accompany Gobhila's Gṛhya Sūtra, though it is not apparently ascribed to Gobhila, just as IV is not attributed to Āśvalāyana in the Aranyaka itself Winternitz (*Gesch der indisch Litt*, I, 232) merely repeats Max Müller (*Ancient Sanskrit Literature*, pp 314 sq, 339)

O generous one, show[1] us a path, proclaim the regions, guide us, lord of many mights, wealthy one ‖ 1 ‖

With these aids of thine, wise one, make us wise, for glory and for strength, Indra For thine is strength ‖ 2 ‖

For wealth, for might, thunderer, most powerful, bearer of the bolt, thou movest[1] Thou movest, most generous, bearer of the bolt Come hither, drink, and be glad ‖ 3 ‖

---

[10] I do not consider Winternitz (*Mantrapāṭha*, I, xxxi sq) to have refuted Oldenberg

[1] *vidā́* is rendered *vetsi* by Sayana, and S takes it as a Vedic form of *vida*, i.e imper of the aor of √*vid* (Whitney, *Sanskrit Grammar*, § 851) Possibly this is correct (cf. *vide* in ver 5), and it is from √*vid* in the sense 'find', for which see the examples in Bloomfield, *Vedic Concordance*, pp 866^{b}, 867^{a} But it may perhaps be really *vidah* the subj of the aor of √*vid* (Whitney, § 849) or an injunctive from vi+√*dā*. The accent would then, however, probably have been *vidā́h*, but exceptions are not unknown The same question arises in RV, IX, 40, 3 *vidā́h sahasriṇīr iṣah* For the accent, *pūrvīṇā́m*, cf Whitney, *Sanskrit Grammar*, § 319 For *iśa*, cf Macdonell, *Vedic Mythology*, pp 58, 121, Pischel, *Vedische Studien*, II, 1, n , Oldenberg, *Religion des Veda*, p 239, n 6.

Grant us wealth with good heroes Thou art[2] the lord of might according to thy will. Thou movest, most generous, bearer of the bolt, who art the most powerful of heroes ‖ 4 ‖

Most generous of givers, wise one, guide us aright Indra finds[3] all Him I praise For he has will and strength ‖ 5 ‖

Him we summon to our aid, the conqueror, unconquered. May he convoy us[4] beyond our foes He is strength, resolve, and mighty order ‖ 6 ‖

Indra we summon for the winning of wealth, the conqueror, unconquered May he convoy us beyond our foes May he convoy us beyond our enemies[5] ‖ 7 ‖

---

[1] *ṛñjase* may be regarded as the second singular pres. indic. of a sixth class root *ṛñj*, as Whitney (*Sanskrit Grammar*, § 758 a) takes it here. The exact sense is doubtful. It may conceivably = 'thou art praised', but the sense 'move' is possible, if the root is akin to the Greek ὀρέγω Cf. Delbrück, *Altindisches Verbum*, p. 181, Bartholomae, *Indog Forsch.*, II, 281, Neisser, *Bezz Beitr*, XX, 59, Oldenberg *S B E*, XLVI, 396, 436 ('press on, strive forward'), Pischel (*Vedische Studien* I, 109), however, compares *ṛñj* with ὀρέγω, and Geldner (ibid., III, 29 sq) postulates a √*ṛj* = *lubh* *d pfau* either transitive or intransitive He does not, unhappily, quote or explain this passage In RV, VIII, 9 17 he renders *vāmi tvā Pūṣan ṛñjase* as 'I desire to adorn thee', and possibly the form *ṛñjase* might be an infin. = an imperative (cf Delbrück, *Altindische Syntax*, p 412, Neisser, *Bezz Beitr*, XX, 59; Hopkins, *A J P*, XIII, 21 sq , Speyer, *Vedische und Sanskrit Syntax*, § 216 d) The accentuation *pibā mādrasva* seems most probable, cf *tardme 'ty payate kulo puṣydi* in RV, VII, 32, 9 and other examples given in Delbrück, *Altindische Syntax*, pp. 36 sq , Whitney, *Sanskrit Grammar*, § 594 b Speijer, *Vedische und Sanskrit-Syntax*, p 80, Macdonell, *Vedic Grammar* p 105 *mādasva* is irregularly accented, but there are many parallels, Whitney, § 628, Macdonell, p 99 (foot)

[2] *bhuvaḥ* is according to Whitney (*Sanskrit Grammar*, § 83 b, c, cf Delbrück, l. c., p. 144) either an injunctive of an unaugmented *a* aorist or a subjunctive of the root aorist. But in sense it may be an indicative *svadhā anu* may perhaps be 'according to our will'. *rayāḥ suvīryam* is curious but the variant *rayé* is merely an easy correction Cf. *rāyás poṣam*, RV, IV, 40, 4 The Taittirīya Saṃhitā, III, 1, 9 4 has *vider gaupatyaṃ rayas poṣaṃ suvīryaṃ saṃvatsarīṇaṃ svastim*, where the conjunction of *rayas* and *suvīryam* is different, but where *vider* supports the derivation of *vida* from √*vid*. Cf V 1, 6, n 3

[3] *vide* must be 3rd sing like *śīe*, and may mean 'knows', cf Hopkins *J A O S*, XV, 276, n Sayana renders it as a 2nd sing For *stuṣe* see Whitney, *Sanskrit Grammar*, § 894 d, Delbrück, l c, p 181 If *stuṣé* is read, the accent is somewhat irregular But irregular accents in quasi subordinate clauses are numerous, cf Whitney, *Sanskrit Grammar*, §§ 595-598, Delbrück, *Altindische Syntax*, p. 43 RV, I, 189 3, III, 1, 1, with Oldenberg's notes (*S B E* XLVI, 182 223) *Z D M G.*, LX, 735 sq

[4] Sayana takes *ati parṣad* as 'let him destroy', and the last *pāda* as meaning, 'the sacrifice, the metre used, the fruits of the offering, and all great' The words are clearly not in place here, and make little sense

[5] *sridhaḥ* Sayana explains as those whom we should hate, although they do not hate us The meaning is perhaps 'beyond all failures', cf *áti sridhaḥ* in this sense in RV, I, 36, 7; III, 9, 4, 10 7

Place us in thy favour, ancient one, lord of the thunder, bright one Most powerful, thy rewards are extolled For the strong god bears rule ‖ 8 ‖

Lord of man, slayer of Vṛtra, this new hymn[7] I offer now to thee Among others let us two converse together. The hero who fares for the cows is a kind and guileless friend ‖ 9 ‖

Thus,[8] thus, O Agni Thus, thus, O Indra Thus, thus, O Viṣṇu Thus thus, O Pūṣan Thus, thus, O Gods For he is strong For he has strength and will, according to his will On all sides[9] come hither Show, generous one, show

---

[7] This is doubtful *sudnyase*, the variant of the other texts save SV, is remarkable as being accented, and does not help It looks like an obvious error or correction for *sâmnyase*, which becomes *sânnyase* SV, Naigeya Śākhā, and then by haplography *sânyase*, SV, Āraṇya Saṃhitā, and then *mdnyase* through the frequent mistake of *s* for *m* in Śāradā MSS *mdnyase* makes no good sense, but *samnyase* also is very difficult (even if taken as Oldenberg (*S B E*, XLVI, 404) would take it in RV, V, 17, 2, as a first person) It comes apparently from √*as* Dr Scheftelowitz now agrees with this view (cf my remark in *J R A S* 1907, p 224) For *tam tam* (i e *tad*) can be read (supply *sūktam* or, with *taṃ*, *mantram*) but *navyam* may be from √*nu*, meaning praiseworthy The dual *bravavahai* in the original context refers to the singer and Indra who are in other (contests) to be united Here it must (cf n 7 on I, 1, 2) mean something of the same sort, but *anye u* has no longer any direct antecedent SV *aryâsu* is merely a facile correction like so many SV readings For the loc, *gô u*, cf Delbrück, *Altindische Syntax*, p 122, Speijer, *Vedische und Sanskrit Syntax*, § 81 b, Whitney, *Sanskrit Grammar*, §§ 301, 304, *A J P*, XIII, 264 *Sânyase* as a dat hardly makes sense

[8] Sayana takes *eva* as from √*i* and *a* The sentence is practically a mere exclamation and cannot be translated The words *â yó*, &c, yield no sense as they stand Sayana renders, 'He who comes to think what is to be thought of for our weal, let him come to think what is to be thought of' The variant *âyo* is no help, though it might mean 'Come to the man who deserves favour', cf Taittirīya Saṃhitā, II, 1, 3, 2 For the *pluti*, *a* 3 *i*, see Wackernagel, *Altindische Grammatik* I, 298

[9] Cf Śāṅkhāyana Śrauta Sūtra, XVII, 12, where the sentence runs *ehy evā hindrepehi viśvatha vida maghavan vida iti* from which it may be legitimate to assume that *ehi* should be supplied in the *purīṣapadāni* The last *vida* may point to *vidāh* being the form *viśvadhā* in RV means either (1) everywhere, I, 141 6, (2) always, V 8, 4

The Taittirīya Āraṇyaka, I, 20, has *evā́ hy eva* | *evā́ hy Agne* | *evā́ hí Vāyo* | *evā́ hindra* | *evā́ hi Puṣan* | *evā́ hí devāḥ* | when Sayana renders *eva* as *ayanaśīlādityā* and *eva* as *etajjah prāptavyaḥ kamah*, and supplies *asi*, 'Thou art desires' *kālābdenādityasya sarvakāmahetutva prasiddhir ucyate.* Ibid, 23, has *evā́ hy eva iti* | *evā́ hy Agna iti* | *evā́ hí Vāyo iti* | *evā́ hindreti* | *evā́ hí Pūṣann iti* | *evā́ hí devā iti* | The accents are those of the Ānandāśrama text (I, 88, 89), and may be wrong In the Maitrāyaṇī Saṃhitā, II, 3, 18 (a reference which I owe to Bloomfield's *Vedic Concordance*, p. 305[a]) all the MSS have *evā́* (or *evā́*) *hy Agne* The Kauṣītaki Brāhmaṇa, XXIII, 2, gives two accounts of the Mahānāmnīs or Śakvarīs, and gives as the five *purīṣapadāni* *evā́ hy eva* | *eva hy Agne* | *eva hindra* | *evā́ hi Pūṣan* | *evā́ hi devāḥ* |

It is by no means obvious how these verses came to be considered as an especially fruitful rain spell As such they are clearly recognized in the Gobhila Gṛhya Sūtra, III, 2, and the Khādira Gṛhya Sūtra, II, 5, 22 sq, where the Śakvarīvrata is clearly a rite of sympathetic magic to produce plentiful rain (see Oldenberg, *Religion der Veda*, pp 420-422, with whose remarks I fully concur)

ĀRAṆYAKA V

ADHYÂYA I.

IN the Mahâvrata ceremony there are twenty-five verses to accompany the kindling of the fire[1] In the twenty-one[2] verses (used in the Vishuvant) four are inserted before the second last, beginning, 'With fuel Agni' (RV., VIII, 44, 1) A bull is to be offered to Viśvakarman[3] accompanied by muttering the verses. The Ājya and Praüga Śastras are taken from the Viśvajit[4] The Śastras of the Hotrakas are taken from the Caturviṃśa rite[3] In the morning pressing the Brāhmaṇācchaṃsin should add the verses, beginning, 'The busy moving ones' (RV, X, 153, 1) and at the midday pressing the verses, 'Of this strong youthful one drink' (RV, X, 160, 1)[4] The tristich which forms the strophe begins, 'The buffalo in the bowls, the barley-mixed' (RV, II, 22, 1), the tristich forming the antistrophe consists of the three verses, 'Indra, come hither to us from far away' (RV, I, 130, 1), 'For to Indra heaven, the wise one, bowed' (RV, X, 127, 1), and, 'To him a song excelling' (RV, X, 133, 1)[5] The Marutvatīya Śastra is taken over from the Caturviṃśa and extended by the hymns, 'Fair has been my effort, singer' (RV, X, 27, 1), 'Drink the Soma for which in anger thou breakest' (RV, VI, 17, 1), 'With what splendour' (RV, I, 165, 1), and, 'Indra, with the Maruts' (RV, III, 47, 1)[6] The Marutvatīya Śastra ends with the hymn, 'Thou art born, terrible, for strength, for energy' (RV, X, 53, 1) At the end of the Marutvatīya Śastra, the Hotṛ, leaving his place by the incomplete route,[7] offers three oblations in the Āgnīdh's fire with a ladle of *udumbara* wood (accompanying them with the verses) —

---

[1] Sāyana explains that although the Sāmidhenī verses are not part of the Soma sacrifice itself, yet they are used in the animal sacrifice which forms a part of it and so are in place here He quotes Mīmāṃsā Sūtra, III, 2, 18, 9 *anarthakyāt tad aṅgeṣu*. They are to be said after the anointing of the animal by the Adhvaryu, according to Āpastamba. Cf. also his Yajñaparibhāṣā, 2 and 3 (*S B E*, XXX, 319, 345) For the gen., cf. Caland, *Altindisches Zauberritual*, p. 18, n. 1, Śatapatha Brāhmana, X, 1, 5, 4. III, 1, 1, n 3

[2] There are in the Darśapūrṇamāseṣṭi, see Hillebrandt, *Neu und Vollmondsopfer*, pp 74 sq., fifteen verses beginning with RV, III, 27, 1 (cf Oldenberg, *S B E*, XLVI, 299, Bergaigne, *Recherches sur l'histoire de la liturgie védique*, p. 19), see Taittirīya Brahmana, III, 5, 2, 1 There are only eleven separate verses, but the first and last are each thrice repeated In the Visuvant the fifteen are extended into twenty one by the interpolation of six verses beginning with RV, III, 27, 5 These are inserted before the second last verse, RV, V, 28, 5 Then four more verses, beginning with RV, VIII, 44 1, are added before this verse to make up the twenty-five The Śankhayana here ignores these verses. Aitareya Brahmana, I 2, 14, gives the number as 17 See a list in Āśvalāyana Śrauta Sutra, I, 2, 7 The construction acc. for nom is remarkable and is not a mark of late or careless style, for these irregularities and the use of numerals are found in the Mantras (e g *saptá ṛṣīṇām, śatám pūrbhíḥ*, cited by Whitney, *Sanskrit Grammar*, § 486 c) and in the Aitareya Brahmana, III, 48, 9 *catuḥśatāni kavacāni āsuḥ*, while in VII, 2, 7, *parvatarah sastis trīṇi ca śatāny ahrtya* occurs (see Aufrecht, p 428) Above, II 2 4, 3 8, occurs *sattriṃśatam sahasrāṇi* while Aitareya Brāhmana, VII, 1 has *sattriṃśatam ekapadāḥ* which examples all appear to be transfers of accusative for nominative, though the possibility of their being new stems in *a* cannot be denied (especially as the Aitareya Brahmana actually has *trayastriṃśatya*, a transfer to the *i* declension) Cf Introd, p. 56 The idiom has hardly been adequately noticed in Delbruck, *Altindische Syntax*, p 82

[3] The Śankhayana Āranyaka, I, 1, prescribes a bull for Indra and a goat for Prajapati The Śrauta Sutra, XVII 7, 7, mentions also a *savanīya paśu*, see Hillebrandt *Ritual Litteratur*, pp. 125, 136 Cf also Katyayana Śrauta Sutra, XIII, 2, 17 *Upāṃśu* means not in silence but so as not to be overheard, see Sayana's quotation, *karaṇavad aśabdam manaḥprayogam*, and Apastamba Yajñaparibhāṣā 9 11 and 113 (*S B E*, XXX, 319 and 345), where the Sāmidhenīs are not *upāṃśu* but *antara* (see note on 11)

[4] For the Ājya see I 1, 1 The Praüga consists of seven *tṛcas*, I, 1, 3-4, preceded by the *puroruc*, *Vāyur agregā yajñaprīr*, &c, Śankhayana Śrauta Sutra, VII, 10, 9 The *puroruc* are also given in Scheftelowitz, *Die Apokryphen des Ṛgveda*, as Khila, V, 6

---

[3] The Hotrakas are the Maitravaruṇa, Brāhmaṇācchaṃsin and Acchāvāka In the Agniṣṭoma their Śastras begin with RV, III, 62, 16, VIII, 17, 1, III 12, 1, respectively In the Caturviṃśa they begin with RV, V, 68, 3, I, 4, 1, VIII, 72, 13, respectively

[4] The Mahāvrata differs in these points even from the Caturviṃśa. Sāyaṇa leaves it undecided whether the passages extend to five verses, or only to one verse by the *paribhāṣā*, *ṛcam padagrahaṇe*, for which see Āśvalāyana Śrauta Sūtra, I, 1, 17

[5] These verses are apparently to precede the Śastra of the Brāhmaṇācchaṃsin at the midday pressing The word *stotriya* is used because the verses correspond to those used in the Sāman corresponding to the Śastra, cf Hillebrandt, *Ritual Litteratur*, p 103 The Śāṅkhāyana Śākhā ignores the Śastras of the Hotrakas The reference to the midday pressing is out of order

[6] For the Marutvatīya Śastra of the Hotṛ at the midday pressing, see I, 2, 1 and 2 In the Agniṣṭoma it begins with RV, VIII, 68, 1-3, and VIII, 2, 1-3 The Caturviṃśa contains alterations, and the Mahāvrata adds the hymns enumerated *Ātanaḥ* (found in VS., TS, &c) must mean *vistaraḥ* as Sāyaṇa has it here Cf Aitareya Brāhmaṇa, V, 4 12, where Sāyaṇa renders *śastrakḷptiḥ* Friedlaender, on Śāṅkhāyana Āraṇyaka, I, 3 suggests the sense 'scheme' for it. In RV, II, 1, 10, *ātānaḥ* = 'expander', cf my *Śāṅkhāyana Āraṇyaka*, p. 3, n 6

[7] Sāyaṇa here (cf Ānartīya on Śāṅkhāyana Śrauta Sūtra, VI, 13, 7 VII, 7, 4, Āśvalāyana Śrauta Sūtra, V, 19, 8, VI, 5, 1, and comm) explains that the *saṃsthitasaṃcaraḥ* is when, after the completion of the pressing, the Hotṛ departs from the *sadas* by the west, the *asaṃsthita*° is when, before the pressing is finished, he leaves by the eastern side. The Śāṅkhāyana Śrauta Sūtra XVII, 12 gives eight oblations on the *agnidhrīya* instead of three there and ten in the *marjālīya* The Mantras are quite different. See XVII, 11, 1-4 The first is a long prose Mantra, the second to the seventh *svāhā* Mantras, and the eighth consists of a couple of verses, the first an *anuṣṭubh*, the second a *gāyatrī* in strongly marked iambic metre of an archaic type, neither of which verses has, according to Bloomfield's *Vedic Concordance*, any parallel. After reciting the verses, he puts down the ladle *yathāyatanam*, departs by the way he came, and in front of the *sadas* to the north of the *śruti*, facing the

'Indra, Bṛhaspati, Soma, and the goddess, Vāc, have aided me[11] May Mitra and Varuṇa, Heaven and Earth, aid me when first I call ‖ 1 ‖

'May the Ādityas, the all gods, and the seven anointed Kings,[12] Vāyu, Pūṣan, Varuṇa, Soma, Agni, Sūrya, with the constellations, may they help me ‖ 2 ‖

'May the fathers protect me, and all this universe, and the children of Pṛśni, the Maruts, with their splendour, ye who have Agni as your tongue and are worthy of sacrifice, may ye gods, hearing our cry, protect us ‖ 3 ‖'

He offers ten oblations on the *marjālīya* altar[13] to the south, the last of which he first divides into four and deposits to the north of the fire. In the middle of the day, after the carrying forth of the fire, the *marjālīya* fire is made

---

east, he mutters the *parimadāḥ japaḥ*, *vāg āyur viśvāyur viśvam āyur ehy eva hi idrapeh viśvatha vida maghavan vida iti* (cf above, p. 263) after which he adores the several members of the fire altar conceived in human form (XVII, 12, 6–13 6). For the Parimads themselves, cf. my *Śāṅkhāyana Āraṇyaka*, p. 4, Eggeling *S B E*, XLI, 288, n 2, and for the meaning of √*mad*, Lanman in Whitney's *Translation of Atharvaveda*, p 158. The Hotṛ goes north to the Āgnīdhra fire. (For Āgnīdh, cf Oldenberg, *S B E*, XLVI, 189, and Macdonell, *Vedic Grammar*, p 18 n 6.)

[11] Or 'may they aid me', as Sāyaṇa takes it. He thinks *pūrvahūtau* is an epithet of *Dyāvāpṛthivī* or *Mitrāvaruṇau*.

[12] Sāyaṇa explains this by the list in Taittirīya Āraṇyaka I, 7, *arogo bhrājaḥ paṭaraḥ pataṅgaḥ | svarṇaro jyotiṣīmān vibhāsaḥ | te asmai sarve divam ātapanti |*. This may be right, otherwise one might expect it to mean the seven Ādityas. No doubt the seven Ādityas set the model to the later theory of seven suns, whose names are variously given (cf. seven Ṛṣis, seven Hotṛs, seven sounds &c., Oldenberg, *S B E*, XLVI, 225), see Viṣṇu Purāṇa, VI, 3, Hopkins, *Great Epic of India* p 475. Rajendralala reads in the text *mā ava*, which is certainly wrongly accented and seems not quite as likely as *mānu* in view of the *anu* elsewhere used. The Taittirīya Brāhmaṇa, II, 5, 8, 2 has *ánu tvendro madatv ánu Bṛhaspátiḥ | ánu Sómo ánv Agnír āvīt | ánu tvā víśve devā́ avantu | ánu saptá rā́jāno yá utā́bhiṣiktāḥ | ánu tvā́ Mitrā́váruṇāv ihā́vatam | ánu dyā́vāpṛthivī́ viśvaśambhū́ | sū́ryo áhobhir ánu tvāvatu | candrámā nákṣatrair ánu tvāvatu |*. Note the different reading *utā́ abhiṣiktāḥ*. The text appears from Bloomfield, *Vedic Concordance*, p. 973ᵃ, to occur in Kāṭhaka Saṃhitā, XXXVII, 9 d, which has (9 c) *sū́ryo 'hobhir ánu tvāvatu*, confirming *mānu* against Mitra's *mā ava* (which is followed in the *Concordance*, p 1028ᵇ), and (9 b) *anu Somo anv Agnir avīt*, and (9 a) *anu tvendro madatv anu Bṛhaspatiḥ*, thus presenting only one line as against the two lines of the Āraṇyaka and the Brāhmaṇa. In the next verse *yé agnijihvā́ utá vā yájatrāḥ* is a tag found in RV., VI, 52, 13 c, and in the other Saṃhitās (Bloomfield, p. 795ᵇ), the other three *pādas* seem as yet unparalleled. The series of prose Mantras below is also (see Index II) unique.

[13] In the middle of the *sadas* and the *havirdhānas* there is a space from north to south. The *āgnīdhrīya* altar is at the north, the *mārjālīya* at the south. With *caturgṛhītam*, *ājyam* must be understood, see Āpastamba, Yajñaparibhāṣā 195 (*S B E*, XXX 341); cf *caturgṛhītena juhoti*, Taittirīya Āraṇyaka, V, 2, *caturgṛhītāni vā ājyāni*, Aitareya Brāhmaṇa VIII, 10, 9, °*gṛhītam* VII 32, but the construction is very awkward. Throughout the terms *dakṣiṇa* and *uttara* are ambiguous. For the *sadas*, the priests' tent, cf. Śatapatha Brāhmaṇa, III, 5 3 5, and Eggeling's note.

to kindle.[13] (The offering is made in it) when it is covered up, and either to the east, the north, or the north-east side. (The verses used are as follows):—

'May I become unassailable like fire; may I become firmly rooted like the earth ‖ 1 ‖

'May I become unapproachable[14] like the sky; may I become unassailable like the heaven ‖ 2 ‖

'May I become without a superior like the sun; may I become renewed like the moon ‖ 3 ‖

'May I become renewed like mind; may I be multiplied like the wind[15] ‖ 4 ‖

'May I become one's own like the day[16]; and dear like night ‖ 5 ‖

'May I become born again like kine; may I become glorious[17] like a pair ‖ 6 ‖

'Mine be the flavour of water and the form of plants ‖ 7 ‖

'May I become widespreading[18] like food, and lordly like the sacrifice ‖ 8 ‖

'May I become like the Brahmin in the world, and like the Kṣatriya for prosperity ‖ 9 ‖

'When, O Agni, this assembly is gathered (RV., X, 11, 8)[19] ‖ 10 ‖'

---

[13] The idea seems to be that the fire is kept in from the time it is lighted on the *udryālīya* altar but is now 'wakened' *prabhṛti* in this use is first found in the Śrauta Sutras, Speyer, *Vedische und Sanskrit-Syntax*, § 112.

[14] The attraction of *anāpyam* is curious, but is paralleled in RV., I, 65, 5: *puṣṭir nā raṇvā kṣitir nā pṛthvī girir nā bhujma* (Oldenberg, *S B E.*, XLVI, 56), and below, *mana ivāpurvam, annam iva vibhūḥ, gāva iva punarbhuvaḥ*, and in the case of the verb, RV., V, 25, 8: *dyumanto arcayo grāvevocyate bṛhat*, Oldenberg, *S. B E.*, XLVI, 417 Cf also Taittirīya Āraṇyaka, VIII, 6; Weber, *Ind. Stud.*, II, 221, n. For a series of words with *bhūyāsam*, cf. Jaiminīya Upaniṣad Brāhmaṇa, III, 20 and 21.

[15] *yathā mana uttarottaram abhivṛddhikāṅkṣayā prayatamānaṁ sat tattatphalaprāptyā nānānāṁ rūpaṁ pratipadyate . . . yathā vāyur asaddhadimūśe samudrataṭādideśe vā svajam uttarottarābhivṛddhyā saṅgharūpo bhavati* (Sāyana).

[16] Sāyana renders *svam* as wealth. The day gives wealth by permitting mercantile operations. Emendation to *svar* is easy but improbable. Cf. the curious *svāḥ* in RV., I, 77, 5 (Oldenberg, *S B. E.*, XLVI, 88), *yakṣam iva*, Gobhila Gṛhya Sūtra, III, 4, 28, Geldner, *Vedische Studien*, III, 140 Night gives rest to the weary (Sāyana), note *priyo* not *priyā*

[17] This must be the sense though the expression *mahīyaḥ*, 'glories,' is curious. Kine have offspring yearly, and pairs (e g Umā and Maheśvara, Lakṣmī and Nārāyana) are glorious (Sāyana).

[18] The reading *vibhūr* is certain, but both Rājendralāla and the Ānandāśrama edition read in the commentary *vibhuḥ*, and Sāyana may have so read, but this is not necessary. For a converse case, cf. V, 2, 1, when Rājendralāla reads *tvam* for *tvam*. The next Mantra offers considerable difficulty Sāyana renders as the Brahmin in the world and *kṣatram rājyam gajāśvādiśriyam adhipatiḥ*, apparently taking *śriyām* as a genitive (cf. Whitney, *Sanskrit Grammar*, §§ 349, 351). But the parallelism of the sentence calls urgently for a locative which gives fair sense, 'in point of wealth.' The speaker desires (a) renown, (b) wealth. Only the exact force of the locative varies in the two cases.

[19] The last oblation is accompanied by a RV. verse

(In this stanza) the three words *atra, vibhajatha,* and *vitha* are not in accordance with the Rgveda text.[20]

Standing there he worships the sun,[21] turning so as to keep his right side towards it as it turns, with these verses, omitting the cries of *svāhā*,[22] and with the verse, 'Come hither, this is sweet, this is sweet. Drink this bitter draught. This is sweet, this is sweet.' He then instructs the maidservants,[23] who carry full pitchers, six in front, three behind, (saying), 'Walk three times from left to right round this altar and this pitcher of water, smiting your right thighs with your right hands, and saying, "Come hither, this is sweet, this is sweet."'

---

[20] This must mean that in the rite the RV. verse is to be altered by reading in *pāda* 3 *ratnā atra vibhajatha svadhāvaḥ* for *ratnā ca yad vibhajāsi*, and in *pāda* 4, *bhagam no atra vasumantam vitha* for *vītāt*. Sāyana adds that these alterations are improper, just as the alteration *vṛdheḥ* for *vṛdhātu* in *Bṛhaspatir no haviṣā vṛdhātu*, Taittirīya Saṃhitā, I, 1, 2, 1, VI, 1, 2, 3, Maitrāyaṇī Saṃhitā, I, 2, 2, III, 6, 4. The v. l. is not in Bloomfield. But this is not implied in the Āranyaka. The verse occurs in Atharvaveda, XVIII, 1, 26, and Maitrāyaṇī Saṃhitā, IV, 14, 15, but in neither place so altered. Bloomfield (*Vedic Concordance*, pp. 43^{b}, 749^{b}) also can merely quote Sāyana's view. Perhaps the Bāṣkala Śākhā is meant. A different case occurs in IV. *Indram dhānasya sātaye havāmahe* when *havāmahe* is added (as in Mahānārāyaṇa Upaniṣad 7, cited by Bloomfield, *Vedic Concordance*, p. 210^{d}) to the first three words which are found in RV., VIII, 3, 5 d. But the Mahānāmnī verses are not part of the RV. and their occurrence is not parallel to this remarkable case.

[21] This is done later in the Śāṅkhāyana Āraṇyaka, I, 5, where the words are almost identical, *ātmanā tiṣṭhann ādityam upatiṣṭhate*. The Mantra is quite different, see Śrauta Sūtra, XVII, 13, 9, 10. For the following see my *Śāṅkhāyana Āraṇyaka*, pp. 76 sq.

[22] The offerings are accompanied as usual by the cry *svāhā*. These are omitted. For the rule, cf. Āpastamba Yajñaparibhāṣā 87 (*S. B. E.*, XXX, 339).

[23] Cf. Śāṅkhāyana Śrauta Sūtra, XVII, 14, where apparently deliberately the direction is from right to left (*apradakṣiṇam*), though the words said are alike, *hai mahā 3 idam madhu idam madhu*. The dance is clearly a rain and vegetation spell, cf. Farnell, *Cults of the Greek States* III, 103. These and the other ceremonies are all mentioned in the other parallel passages, Lāṭyāyana Śrauta Sūtra, III, 10-12, IV, 1-3; Tāṇḍya Brāhmaṇa, V, 5, 6; Kāṭhaka, XXXIV, 5; Kātyāyana Śrauta Sūtra, XIII, 3; Taittirīya Saṃhitā VII, 5, 9 and 10; Taittirīya Brāhmaṇa, I, 2, 6, 7. These versions differ in many details, the most important rite which is mentioned in neither of the Rgvedic works is the struggle of an Ārya and a Śūdra for a round skin, which represents the sun (cf. Oldenberg, *Religion des Veda*, pp. 444, 506; Usener, *Archiv f. Religionswissenschaft*, 1904, pp. 297 sq.). It is noteworthy that in Lāṭyāyana, IV, 3, 18, where the words repeated are like those in Śāṅkhāyana the form *vadatyaḥ* also occurs. So Drāhyāyaṇa. Taittirīya Saṃhitā, VII, 5, 10, has *gāyantyaḥ*. The direction there is also *pradakṣiṇam*. After the eight *ājya* libations in the *āgnīdhrīya* fire, according to the Śāṅkhāyana Āraṇyaka, I, 4, come the *parimāds*. They are twenty-five in number and are followed by seven *stotriyas* named *āṅgirasa sāman, bhūtechadāṃ sāman, krośa anukrośa, payas, arka*, and *arkapuṣpa*. The Śatapatha Brāhmaṇa, X, 1, 2, 8, 9, contains a somewhat parallel version, see Eggeling, *S. B. E.*, XLIII, 288, n. 2, and thus again (cf. Introd., p. 36) agrees with the Śāṅkhāyana against the Aitareya. These *sāmans* are called *devacchandasas*, Śāṅkhāyana I, 5 and are followed by *japas*. Then comes an adoration of the members of the fire (see here V, 1, 2), and of the sun, and the Hotṛ declares that the 'great one has united with the great

2. 'When the singing of the *stotra* has been requested, then do ye cast down the water in three places, on the northern altar, on the *mārjālīya* altar, and the rest within the enclosure.'[1] Having gone away so as to keep the *mārjālīya* fire on his right,[2] he stands before the sacrificial post in front of the fire, with face to the west, and worships the head of the fire with the words, 'Honour to the Gāyatra which is thy head:' then, returning by the way he came,[3] with face to the north, he worships the right side of the fire with the words, 'Honour to the Rathantara which is thy right side.' Then passing to the west of the tail of the fire,[4] with face to the east, he worships the left side of the fire with the words, 'Honour to the Bṛhat which is thy left side.' Then on the west[5]

---

one', i. e. Agni with Pṛthivī, 'the god with the goddess,' i. e. Vāyu with Antarikṣa, 'Brahman (neut.) with Brāhmaṇī' (see Introd., p. 68, n. 1), i. e. Āditya with Dyaus. On this follows (I, 6) a Viśvāmitra legend (cf. Aitareya, II, 2, 3) to explain these identifications. For the use of *upa* + √*sthā*, cf. the famous passage in the Mahābhāṣya, I, 3, 25 (Weber, *Ind. Stud.*, XIII, 480, 481), where an ape *upatiṣṭhate* to warm himself, but a man *upatiṣṭhate* in reverence.

[1] For *antarvedi*, cf. Aitareya Brāhmaṇa, VII, 33, 1; *antaḥparidhi*, Bṛhaddevatā, VII, 98; Wackernagel, *Altindische Grammatik*, I, 312. This belongs of course to the end of the preceding Khaṇḍa, and it is difficult to see why it has been separated in Sāyaṇa's text. *uttara mārjālīya* means the *agnīdhrīya* fire, which was used for the same purpose.

[2] This describes the worship of the fire altar in its simplest bird shape, head, two wings, tail, and body. In Śāṅkhāyana Śrauta Sūtra, XVII, 13, the *sāmans* and the order differ, being (1) *pūrvārdha* with Gāyatra, (2) right side with Rathantara, (3) left side with Bṛhat, (4) *madhya* with Vāmadevya, (5) tail with Yajñāyajñīya. Cf. Śatapatha Brāhmaṇa, IX, 1, 2, 35 and 39; X, 1, 2, 8, and Eggeling's summary (based on this passage and Śāṅkhāyana), *S. B. E.*, XLIII, 283, n.; Lāṭyāyana Śrauta Sūtra, III, 12, 3, where as here the body is placed last, but which agrees as to the *sāmans* with Śāṅkhāyana and also with Drāhyāyaṇa, and in which the sprinkling of water in three parts also occurs. The Sāmans referred to will be found as follows, *gāyatram* in *trivṛt stoma*, Sāmaveda, II, 146–148; 263–265; 800–802 (or II, 8, 4, see *S. B. E.*, XLIII, 178); *rathantaram* in *pañcadaśa stoma*, ibid., II, 30, 31; *bṛhat* in *saptadaśa stoma* ibid., II, 159, 160; *yajanam* in *pañcaviṃśa stoma*, ibid., II, 833–835; *bhadra* in *ekaviṃśa stoma*, ibid., II, 460–462. For the Sāmans cf. II, 3, 4. For a drawing of the *agnikṣetra* see Weber, *Ind. Stud.*, XIII, 235.

[3] He had gone from the *mārjālīya* in the south to the east side of the *cityāgni* and he now returns to the south. *Rathantare* is unusual, but it is supported by all the MSS. Lāṭyāyana and Śāṅkhāyana have *rathantaraya*.

[4] It is not clear why he should not go round to the north, but all that is done is to go to the end of the west or tail side, when looking east, along the left side, he utters the Mantra.

[5] *paścāt* may simply mean 'next', or, as Sāyaṇa takes it, refer to the place where the Hotṛ stands. Apparently the difference between this and his former position is that he stands directly behind the tail, instead of going past it. This account of his movements corresponds on the whole with that of the ceremony of the Śatarudriya, which has analogies to the Mahāvrata (Śatapatha Brāhmaṇa, IX, 1, 1, 44). In it, according to the Śatapatha, IX, 1, 2, 35 sq., the Sāmans, (1) *gāyatram*, (2) *rathantaram*, (3) *bṛhat*, (4) *vāmadevyam*, (5) *yajñāyajñīyam*, and (6) *prajāpaterhṛdaya*, correspond to (1) head, (2) right wing, (3) left wing, (4) body, (5) tail, (6) heart; according to Lāṭyāyana, I, 5, 11, which very closely follows the order of

of the fire, with face to the east, he worships the tail with the words, 'Honour to the Bhadra which is thy tail and thy support.' Then on the south of the tail he worships the body with the words, 'Honour to the Rājana which is thy body.'

3. He returns to the seat as he went[1] The swing has already been made ready.[2] Having cleansed the two posts, the ropes, and the cross beam, and having taken them by the road called *tīrtha*,[3] having gone round to the left the Agnīdh's altar,[4] (having brought them within) the seat by the east door (*he places the implements*[5]) to the left of all the altars The planks of the swing are made of *udumbara* or of *palāśa*, or of both There should be three planks worked on both sides, or two, and a like number of sharp-pointed sticks. The

---

movements in this Aitareya passage, the (1) *gayatram*, (2) *rathantaram*, (3) *bṛhat*, (4) *yajñayajñiyam*, (5) *Vamadevya*, and (6) *Prajapatehṛdaya*, correspond to (1) head, (2) right side, (3) left side, (4) tail, (5) right arm pit, and (6) left arm pit. Cf. also the elaborate ceremonial of the *parimadaḥ* at the Mahāvrata as described in Śatapatha, X, 1, 2, 9, Śāṅkhāyana Āranyaka, II, 4 (with Friedlander's note p 37), and the similar use after the beginning of the *pṛṣṭha stotra* of the *parimadaḥ* (*prana*, *apana*, *vratapakṣau*, *Prajapater hṛdaya*, *Vasiṣṭhasya nihava*, *sattrasyardhi*, *śloka* and *anuśloka*, *yama*, *ayus*, *navastobha*, *priyasya saman*) in the worship of the parts of the altar in Tandya Brahmana, V, 4, 1–13, Laṭyayana Śrauta Sutra, III, 9, 1 sq Taittiriya Brahmana, I, 2, 6 5 In the Mahavrata Saman the parts of the bird are head, right wing, left wing, tail, and trunk only (Eggeling *S B E*, XLIII, xxvi) The whole conception is clearly borrowed (cf Introd, p 50) from the altar in the Agnicayana which gave origin to the mystic doctrines of the Adhvaryus (see especially Satapatha Brahmana, VI–X), and of which the Mahavrata is an adaptation by the Hotṛs. In Vajasaneyi Samhita, XII, 4, the *trivṛt* is the head, the *gayatram* the eyes, *bṛhat* and *rathantaram* the wings, the hymn the soul, the *yajuṃṣi* the name, the metres the limbs, the *Vamadevyam* the body, the *yajñayajñiyam* the tail For the relation of *samans* and words, cf Oldenberg, *Z D M G*, XXXVIII, 439 sqq, 464 sq, Winternitz, *Gesch der indisch Litt*, I, 145 sq, and see Eggeling *S B E*, XLIII, 180, n 2, Weber, *Ind Stud*, XIII, 276 sq The Vamadevya is based on Samaveda, II, 32, 33, the Yajñāyajñiya on Samaveda, II, 53 54

[1] He comes back to the seat near the *marjalīya* fire, which he left to worship the *citya* altar The expression occurs several times in the Śrauta Sutra For the eight altars see Eggeling, *S B E*, XXVI, 148, n 4 and the plan on p 475, followed by Caland and Henry, *L'Agniṣṭoma*, Hillebrandt *Neu und Vollmondsopfer*, p 191

[2] By the Adhvaryus Cf Aitareya Brahmana, VII, 32

[3] This is the name of the passage between the *utkara* and *catvala*, Śankhāyana Śrauta Sūtra, V, 15, 1, &c., Maitrayani Saṃhitā, III, 8, 10 The action is rendered intelligible by a glance at the plan in Eggeling

[4] The *pars* of *parivrajya* must refer to circumambulation The meaning of the phrase is probably given by Śāṅkhāyana Śrauta Sutra, XVII, 11, 4 *purvaya dvaragnidhram prapadyottarenagnidhriyam dhiṣṇyam paryetya*, though the *pūrvayā dvara* here is otherwise applied The idea is, he goes round the altar from right to left, probably Cf also ibid, V, 14 The sentence is so elliptical as to be unintelligible without Sayana's *pravrjya* Śaṅkhayana, XVII 7, 11, is much more simple

[5] The verb must be gathered from *atyadadhati* below, strictly speaking the next sentences are parenthetical and this sentence is continuous with *dakṣinottare sthune nikhāya*

swing should be a yard in size from east to west, its cross breadth should be a yard less a hand, the points of its (planks) should be to the north, and they should be fastened together by sticks with their points east Having inserted the posts in the earth to the north and south, around the seat of the Hotr, he spreads the cross beam over them so that it is on a level with the worker's face.[1] Holes are (bored) in the corners of the planks of the swing He fastens the planks above by means of the ropes, the right one on the south, the left on the north[2] The ropes should be of *darbha* grass, and with three strands,[3] one rope to

[1] In the Śankhayana Śrauta Sutra, XVII, 10, 7 and 8, the height is measured by the head of the Hotr, or if he is small his outstretched arms. Ibid, 4, 6, shows that both the planks and the cross beam have the points north. For the construction with *kartuh* dependent on *asya*, cf Whitney, *Sanskrit Grammar*, § 1316 Speyer (*Vedische und Sanskrit Syntax*, § 113) gives many classical examples. For *abhitah* with accus, cf Delbruck, *Altindische Syntax*, p 183 It is found in Mantra, but more often in Brahmana Speyer, *Vedische und Sanskrit-Syntax*, § 88 For *uttarena* with accus, cf Gaedicke, *Der Accusativ im Veda*, pp 207 sq, see Liebich, *Bezz Beitr*, XI, 284 Delbruck and Gaedicke seem right in explaining the use as derived from the accus with *antár* and *antarā́* Whitney, *Sanskrit Grammar*, § 273, offers no explanation In V, 1, 1, we find *uttarato 'gneh*, in V, 1, 1, *daksinatah puchasya* with the more natural adnominal genitive But in V, 1, 2, *aparena* has the accus In Śankhayana Āranyaka, VII, 3, *antarena* has the gen, in the Sutra, the acc The measures are dubious, see Hopkins, *J A O S*, XXIII, 245

[2] The Śankhayana Śrauta Sutra, XVII, 10, 14, 15, explains that the right rope is tied to the north of the south post, the left to the south of the north post, i e inside the posts, just as in a modern swing The point of view is of course facing east, with the south on the right and north on the left

[3] The use of *trigune* and *dvigune* with different senses of *guna* is awkward, but appears clearly so meant Sayana points out that the rope as doubled would be 1½ fathoms in length of which only a yard would be used by the rope passing under the plank (above *isumatrah pran pranhah*) There would thus be plenty of rope available for the tying, as the top was only a man's height or less Sayana takes *savyadaksine* as 'inclining to the left and right', i e the ropes should not go straight up The only obscure point in this description of the tying on of the seat of the swing to the cross beam is *pradaksinam* since it is not at first sight obvious how this applies to the act of fastening ropes It apparently must mean that after the rope has been passed under the seat of the swing the one end is rolled round the cross beam slanting to the right, the other (on the opposite side, of course[a]) also slanting to the right and the ends then are tied across. Provided there was sufficient friction to keep the ropes from slipping this would seem to give a substantial knot (cf *nistarkya*) If this is so, we cannot accept Sayana's theory of *savyadaksine* and must fall back either on the view that the word means merely left (hand) rope and right (hand) rope, or take the epithet

---

[a] It is very unlikely that both ends of the rope should have been brought to the same side of the cross beam In that case *pradaksinam* would be rather less than more in point Speyer (*Vedische und Sanskrit Syntax*, § 106, n) points out that adjective *dvandvas are not* unknown even in Sanskrit (cf his *Sanskrit-Syntax*, § 208), and (p 32, n 1) argues from Pānini, VI, 2, 38 when *ekadaśa* is given as a *dvandva* that the grammarians recognized such types He (§ 107) gives classical examples of distributive *dvandvas*

the left, one to the right, and five fathoms long, and should be folded double. Then folding (each end) thrice (to the right) round the cross beam he makes a knot on the top, which can only be untied by twisting. They support the posts so as to be steady by means of branches and brushwood.[9] The swing should be four fingers or a hand distant from the ground.[10] On the right it may be somewhat higher or level It should be a foot from the altar.

4 When[1] the swing has been put in position, the Hotr taking a lute of *udumbara* wood, with a hundred strings, in both hands, strikes it,[2] beginning from the lower side, as one does an ordinary lute[3] The different notes of the lute he should produce in turn by the seven metres,[4] each with four (syllables)

---

as applying to each rope and as meaning, 'with strands coiled from left to right.' Cf perhaps the equally obscure passage, Āpastamba Yajnaparibhasa, 60, 61 (*S B E*, XXX, 331, where Max Muller says, 'The exact process here intended is not quite clear The ropes seem to have been made of vegetable fibres See Katy, I 3, 15–17') If *savyadaksine* = left and right, cf for the use of the *dvandva*, Wackernagel, *Altindische Grammatik*, II, 1, 160, who cites Atharvaveda, XII, 1, 28 *padbhyām daksinasavyābhyam*, Taittiriya Brahmana, I, 5, 10, 1 *suvarnarajatābhyam kuśibhyam* The different order of words, *savyadaksina*, is in accordance with the usual rule as to number of syllables determining the order of the numbers of their compounds, Wackernagel, II, 1 166.

[9] Sayana explains that they fill up the holes in which are placed the feet of the posts with dust, which is not thrown in by hand but by branches and *brsis* This, however, is quite unnecessary Brushwood would be a much better material for strengthening the hold of a post. He defines *brsi* as *trnavallītalīpatravenudalādibhir nirmitā alpakatavisesah* The swing was obviously shaped like this

[10] The distance according to Śankhayana should be a *pradeśa*, XVII 10 13 Ibid, XVII, 1, discusses the planks, 2, the ropes and *asandī* 3, the lute, 4, the drums, 5, 6, 7, the other accessories and the preliminary steps, in great order and detail Cf Latyayana Śrauta Sūtra, III, 12

[1] There are similar passages in the Tandya Brahmana, V, 5, 4 sq, and Lātyayana Śrauta Sūtra, III, 12, 8, IV, 1, besides in the Śańkhayana Śrauta Sūtra, XVII, 3, 11, 10 sq Sayana points out that the Hotr is now seated to the west of the swing The exact words as to the lute do not occur in Śańkhayana, but it is elaborately described, XVII, 3

[2] Sāyana renders merely, 'he should hold it on his left side like a lute' But the idea is perhaps rather that he strikes one string after another, ascending in the scale, beginning from below and ascending, *uttaratah*, cf *urdhvam* below and Agnisvamin on Latyayana Śrauta Sūtra, IV, 1, 4.

[3] So Sayana on RV., I, 85, 10, where he similarly explains the phrase *vanam dhamantah* used of the Maruts, cf. III 2, 5, n 1, Benfey (*Samaveda, Glossar*, p 169) takes *vana* there as flute, and Zimmer (*Altindisches Leben*, p 289) follows him. Max Muller (*Marut Hymns*, pp 120, 121) preferred to see in it merely 'voice' For *udukam*, cf Wackernagel, *Altindische Grammatik*, I, 92, who considers *u* here an ablaut of *a* Panini restricts its use to Ātmanepada, but Kātyayana allows Parasmaipada with a prefix as here (Liebich, *Panini*, p 84).

[4] i e he plays notes corresponding to verses composed in these metres The four more are, Sayana says *virāj*, *dvipadī*, *atichandas*, and *chando 'ntaram* If this last be omitted ten are got But despite its use elsewhere, e g, Śatapatha Brahmana, X 1, 2, 8, it must surely

over, or with ten (He should say) 'I produce thee with the *gayatri* metre I produce thee with the *anustubh* metre I produce thee with the *usnih* metre I produce thee with the *brhati* metre I produce thee with the *pankti* metre. I produce thee with the *tristubh* metre I produce thee with the *jagati* metre. I produce thee with the *viraj* metre I produce thee with the *dvipada* metre I produce thee with the *atichandas* metre' Having gone through the metres according to the series of notes, he strikes the lute thrice, beginning from the foot with a branch of *udumbara* wood, fresh and still leafy, using the foot of it, (to the words) 'For up breathing I strike thee, for down-breathing I strike thee, for cross breathing I strike thee' But he should not say, 'I strike thee,' for other desires[5] Then he hands over to the Saman singers the lute with the branch[6] He places his two hands on the back plank (with the words), 'For creatures thee (I touch),' and pushes the swing to the east (with the words), 'Swing forward like the breath,' crosswise[7] (with the words), 'Swing crosswise for cross-breathing,' and back to himself (with the words) 'Swing like back breathing' He repeats the words *bhuh*, *bhuvah*, and *svar*[8] He then pushes the swing to the east[9] (with the words), 'For breath I push thee,' crosswise (with the words), 'For cross breathing I push thee,' and back to himself (with the words), 'For down-breathing I push thee' (With the words) 'May the Vasus mount thee with the *gayatri* metre, I mount after them,' he places his elbows on the back plank[10] Then he should touch the front plank with his

---

mean each metre has four more syllables than its predecessor, viz 24, 28, 32, &c., and so Sayana takes it on Aitareya Brahmana, VIII, 6, 6

[5] No doubt, as Sayana says a reference to a practice of other Śakhas, but not to the Śankhayana Aranyaka or Srauta Sutra For the words *audumbarya*, &c, cf *audumbaryardraya sakhaya sapalasaya* in Aitareya Brahmana, VIII, 13 For the construction, of the acc of whole and part, e g AV, V, 8, 9 (cited by Speyer *Vedische und Sanskrit Syntax*, § 20, Delbrück *Vergl Synt* I, 385) *enam marman vidhya* when, however, according to Whitney, *Translation of Atharvaveda* the reading should be *marmani*, loc., though *marman* appears also in the Ajmir edition *samvat* 1957 Somewhat analogous cases appear in Speyer, § 83, Gaedicke, *Der Accusativ* p 268 Or *muladesena* may refer to the lute

[6] In Śankhayana it is the Udgatr who has throughout to deal with the lute

[7] Clearly the *vyana* is a breath at right angles to *prana* and *apana* This is an unusual conception of it, and is not mentioned in Deussen, *Philosophie der Upanishads*, p 251, E T, p. 279

[8] *Sayana says that the repetition of these three words denotes a desire that the three worlds* be established by the threefold moving of the swing They are used in Lâtyâyana IV, 1, 4 in connexion with the playing of the lute Cf also Wackernagel *Altindische Grammatik*, I, 339 Oldenberg, *Religion des Veda*, p 432, n, Winternitz, *Gesch der indisch Litt*, I 161

[9] The *eva* denotes that the action is as before, only the verses being different (Sâyana)

[10] In Śankhayana, XVII, 16 he touches the swing with his breast and then alternately he puts his right and left side over with Mantras almost identical with those here save that *arko 'si* is prefixed and each ends with a dative *rajyaya* &c He then plants his two feet to the east.

hands separately,[11] like a serpent about to creep. He should touch the middle plank with his chin, or if there are two[12] the point of joining of the two. (With the words), 'May the Rudras mount thee with the *triṣṭubh* metre, I mount after them,' he lays his right thigh[13] (over the seat). (With the words), 'May the Ādityas mount thee with the *jagatī* metre, I mount after them,' (he lays) his left thigh. (With the words), 'May the All-gods mount thee with the *anuṣṭubh* metre, I mount after them,' he mounts (the swing).[14] To the west of his own altar he places his right foot pointing to the east, and then his left.[15] If the former is tired, then the latter; if the latter, then the former. But the two together must never be off the ground. The Hotrakas sit down on bundles of grass, and so does the Brahman priest. The Udgātṛ sits on a stool of *udumbara* wood. If he has to leave for any absolutely necessary action, then having set one to guard, he descends towards the east, and having carried out the exact business he

---

Then he sits crosswise on the swing and touches the back of it with the Mantra, *Prajāpatis tvārohatu vāyuḥ preṅkhayatu*. This act is preceded and followed by three expirations and three inspirations. The Mantras of the Udgātṛ in mounting his seat in Lāṭyāyana Śrauta Sūtra, III, 12, 8, are like those in Śāṅkhāyana, omitting *arko 'si*, but Lāṭyāyana, III, 12, 9, permits them to be reduced to simply *gāyatreṇa tvā chandasārohāmi*, &c. In Lāṭyāyana the verses are said by the Udgātṛ. Ibid., 10–12. Gautama adds a fifth stoma with *vairūpeṇa*, Dhanaṃjayya has four, and Śāṇḍilya only three.

[11] The Ānandāśrama edition reads *yatho hi*, which is nonsense. The reading of Rājendralāla is that clearly of Sāyaṇa, who takes the point of comparison to lie in the fact that he raises his hands as a snake about to creep raises its head. *Nānā* must be an adverb meaning 'separately'. It might possibly be suggested that it meant here 'without', a sense ascribed by Pāṇini, II, 3, 32, but even then the comparison with the snake would have little point. For the use of *nānā*, cf. Śāṅkhāyana Śrauta Sūtra, XVI, 7, 8, 10; XVII, 3, 8; Lāṭyāyana Śrauta Sūtra, III, 3, 9 (= Kātyāyana Śrauta Sūtra, XII, 2, 8) *nānā pāpakṛtya*; Āśvalāyana Gṛhya Sūtra, I, 3, 10 *nānāpi sati daivate*; Mānava Gṛhya Sūtra, II, 18, and other passages in Bloomfield, *Vedic Concordance*, p. 545ᵇ. For a similar metaphor, cf. Āśvalāyana Śrauta Sūtra, VI, 6, 5 *yathā śakunir utpatiṣyan*.

[12] There may be two or three, V, 1, 3. They are fastened by the *sūcīs*.

[13] In Śāṅkhāyana Śrauta Sūtra, XVII, 16, 1, occurs, *dakṣiṇam bhāgam ātmano 'tikaran*, where Govinda explains by *hṛdayāt pṛthak kurvan*, but Sāyaṇa here talks of *preṅkhārohaṇam*, and the sense requires the meaning 'lays over', which is probably meant also in the Śāṅkhāyana passage, as pointed out by Friedländer on Śāṅkhāyana Āraṇyaka, I, 7. Cf. Introd., p. 67.

[14] The same series of gods and metres occurs in the Vājasaneyi Saṃhitā, XI, 60, 65; Taittirīya Saṃhitā, IV, 1, 5; Maitrāyaṇī Saṃhitā, II, 7, 6; Tāṇḍya Mahābrāhmaṇa, VII, 6; Śāṅkhāyana Āraṇyaka, XI, 8. Cf. Śatapatha Brāhmaṇa, VI, 5, 3 (*agnicayana*), X, 4, 17, and see Weber, *Ind. Stud.*, XIII, 168, and cf. the Rājasūya verses, Aitareya Brāhmaṇa, VIII, 6, 1–4.

[15] The exact sense of this is taken by Sāyaṇa to be that the feet are to be used alternately, and this seems correct, though it is not said exactly that the two cannot ever be both on the ground at once. They must not be both off the ground, cf. I, 2, 4. For the gen. with *paścāt*, cf. Aitareya Brāhmaṇa, VIII, 10, 9 *etya gṛhān paścād gṛhasyāgner upaviśyānvārabdhāya ṛtvig antataḥ daṇḍena caturgṛhītās tisra ājyāhutīr ahutād prapadeya juhoti*. This corrects Speyer's remark (*Vedische und Sanskrit Syntax*, § 83), followed by Delbrück, *Vergl. Synt.*, I, 743, that *paścāt* is not so found before the Śrauta Sūtras.

should mount again in the manner above set forth, omitting the utterance (of *bhūḥ*, *bhuvaḥ* and *svar*)[14]

5 He instructs the Prastotr, 'In the *pañcavimśa stoma* proclaim the first *pratihāra* when either three verses remain to be said, or two and a half[1] or twelve and a half' Jatūkarnya holds that this should be done when there remain twelve and a half verses When the Prastotr has spoken, he repeats[2] (the verse), 'Thou art a bird with fair wings I shall speak forth this word, which will declare much,[3] fare far, produce much, gain much, effect more than much,

---

[14] Sayana takes *apapaya vrta* as the form It may equally be *apapya avrta avrt* being more usual in this sense, as in Manava Grhya Sutra, II, 4, 2 9, 8, Asvalāyana Śrauta Sutra, V, 11, 4, 5 &c, cf Weber, *Ind Stud*, V, 410 If *avalyakarmane* is read the sense must be, 'If he should go for (to serve) some one who has something he must do on hand At first sight this seems easier, but if °*karmane* had been original it would hardly have been changed to *karmane* a less obvious construction, while the reverse of this process would be not unnatural If °*karmine* is read see for the formation which is rare in early texts, Wackernagel, *Altindische Grammatik*, II, 1, 121, 122 For the dat, cf Gaedicke, *Der Accusativ im Veda*, p 135, Delbruck, *Vergl Synt*, I, 177, 301

[1] So Sayana explains *ardhatrtiyasu* The *pratihara* is repeated five times usually before the last *pada* of the verse, cf Hillebrandt *Ritual Litteratur*, p 100 and reff For the imperative in °*tat*, signifying an action to be carried out after something else, cf Delbruck, *Altindische Syntax* p 363, Whitney, *Sanskrit Grammar*, §§ 570, 571 The dictum of Whitney that the benedictive sense of the imperative in *tat* was not exemplified, can only be supported on a very narrow interpretation of the word 'benedictive', not merely for classical Sanskrit (where it occurs often in Jaina Kavya texts) but also for Vedic E g in RV III, 23, 2 *ágne ví paśya brhatā́bhí rāyéṣā́m no netā́ bhavatād ánu dyū́n* it is surely absurd to take *bhavatat* as imperative as does Oldenberg (*S B E*, XLVI, 288) similarly in Whitney's own example from RV *úd ūrdhvás tiṣṭha dravaneha dhattat* 'mayst' is clearly the sense and 'may' he himself uses in translating the example from the MBh *bhavan prasadam kurutat* Probably, therefore in denying the 'benedictive' sense, Whitney refers to that word in the narrowest sense of a blessing pronounced by some person who in the ordinary view is entitled to bless This is so far borne out by the fact that Panini, III, 1, 50 (*āśisi ca*) is explained by the Siddhāntakaumudi (following the Kasika Vrtti) as *āśih prayoktur dharmah | ākasitah putrader syam ukiah |* In these cases the benedictive is regularly used in Sanskrit e g *tat kim anyad asmake kevalam viraprasuya bhuyah* (Vikramorvaśi), or the king's formal *āśih*, e g *akalpantam ca bhuyat samupacitasukhah samgamo sajjananam* (Ratnavali), or the imperative (e g in the verse from the Ratnavali just cited in fact three imperatives occur), but in the early language at any rate I can find no certain example of -*tat* so used But the distinction between a wish and a blessing is evanescent

[2] The Śankhayana Aranyaka I, 8, and Śrauta Sutra, XVII, 17, give the Mantras in reverse order, and omit the *ukthaviryam* For *suparno 'si garutman* see Vajasaneyi Samhita XII, 4; Śaṅkhayana identifies this with *prana*, but see my *Śaṅkhayana Aranyaka*, p. 77, n 6

[3] Sayana interprets these epithets very inadequately, but it is most probable that they are all genuine including *svar vadisyantim*, which has least MS authority The Ānandāśrama edition considers Sayana's text defective but most probably he regarded some of the epithets as obvious, though perhaps he had not *svar vadisyantim* Latyayana has only after *vadisyami bahu karisyantim bahu karisyan svar gamayisyantim svar gamayisyan mām imān yajamānan*, see IV, 2, 10 So also Drahyayana Śaṅkhayana Āranyaka recognizes *bahu karisyantim bahor bhūyaḥ karisyantim svar gamisyantim svar iman yajamanan vaksyantim* only which resembles

which goes to heaven, which will declare heaven, fare to heaven, produce heaven, gain heaven, carry this sacrifice to heaven, and carry the sacrificer, me, to heaven'[3] The word 'sacrificer' applies only to one who has been consecrated, not to one not consecrated[4] In the case of a friend of his,[5] he should say 'carries N N to heaven', not 'will carry'. He then repeats the *ukthavīryas*,[6] and, 'Breath (is united) with speech, may I be united with speech Eye is united with mind, may I be united with mind Hearing is united with the self, may I be united with the self. May I have greatness, glory, good fortune, enjoyment, the *śloka*[7] and the *stoma* verse, sound, renown, prosperity, fame, and fruition'[8]

Latyayana's version given above The Śrauta Sūtra, XVII, 17, 1, has *premam vacam vadisyami bahu karisyantim bahu karisyan bahor bhuyah svar gamisyantim svar gamisyan* Bloomfield (*Vedic Concordance*, p. 642b) gives Latyayana and Śaṅkhayana as having *svargam*, &c, instead of *svar gam°*, &c but that this is quite wrong may be proved, not only by its inherent improbability but also by Śaṅkhayana Āranyaka I 8 (the Āranyaka unluckily did not come to Bloomfield's notice), where occurs *svar hy esa vag gamisyanti bhavati*, see my note *J R. A S*, 1908, p 404

[4] i e not to the Hotṛ in an *ekaha* or *ahina*, but in a *sattra* Cf V, 3 3, n 1, and III, 2, 4 n 2

[5] This seems to be the same If so this passage recognizes the performance for a friend against Śankhayana Āranyaka, I, 1 the case of an enemy is specially dealt with in that Āranyaka, I, 8 *namum* being said The future is not to be used for the present is to be used to signify the immediate attainment of heaven (Sayana)

[6] The six Mantras, *ghosaya tva, ślokāya tva śrnvate tva upaśrnvate tvā, aśrutyas tva, aśrutaya tva*, says Sayana Though Śaṅkhayana does not mention the *ukthavīryans* here, they are frequently alluded to in the Śrauta Sutra, VII, 9 6, 10, 15, 19 25, 20, 11, &c See Sayana's list Aśvalayana Śrauta Sutra V, 9 21, 10 10, 14 16, 15, 23 18, 13, 20, 8, and cf Eggeling, *S B E* XXVI 327 There is one for each of the Hotṛ's Śastras.

[7] Sayana explains as the fruits of these parts of the Saman The omission of the verb may be compared with V, 2, 2, n. 13 In Taittiriya Āranyaka IV, 21, is *mayi dhayi suviryam* after a series of loc Compare for the list, Śaṅkhayana Śrauta Sutra, V, 1, 10 *bhargam me voco bhadram me voco bhutam me vocah śriyam me voco yaśo me voce mayi bhargo mayi bhadram mayi bhutir mayi śrir mayi yaśah* Scheftelowitz, *Zur Stammbildung in den indogermanischen Sprachen*, takes *bhargas* as equal to 'beauty', quoting RV, I, 141, 1 *báḷ itthā tád vápuse dhāyi darśatám devásya bhárgah sáhaso yáto jáni*, III, 61, 10, AV XIX, 37, 1, VI, 69 2, Śatapatha Brahmana, V, 4 5, 1 and comparing Old Slavonic *bleskati*, &c These sentences it will be noted contain older forms of words and expressions than the ordinary Sūtra form or the mere liturgical direction, cf Bloomfield, *Vedic Concordance* p. viii, and V, 3 2, n 17 So *vag devi somasya trpyatu* and *duham mahat* in V, 3 2 A precise parallel is found in Taittiriya Aranyaka, IV, 11 *sám ahám āyusa | sám prānéna | sám várcasa | sám páyasa | sám gaupatyéna | sám rayás póśena | vy àsau*, &c. Śaṅkhayana Śrauta Sutra, XVII, 17, 1, has *sam vāk pranena sam aham pranena*, and *sam caksur*, &c., as in the Aitareya, but *sam śrotram*, &c, it omits

After *stoma*, *śloka* may well be 'verse', or possibly 'hymn of praise' Elsewhere it means, however, merely 'fame', *e g* Bṛhadaranyaka Upanisad, I, 4, 17 (Kanva), 28 (Madhyandina) *evám kirtim ślókam vindate*, which appears to be the only Upanisadic passage with that sense (Jacob, *Concordance* p 940)

[8] *Bhujabhuktyor bhedo bhogyabhedena drastavyah* (Sayana)

Having called[9] (to the Adhvaryu), he mutters the word 'speech' There are three calls[10] (for the Hotr) at the beginning of the Śastra of the *nivid*, and of the concluding verse The Adhvaryus[11] make sounds On this day one[12] should give much food They cause a warrior[13] to pierce a skin They smite the earth drum and women play lutes[14] There is intercourse of creatures,[15] and a conversation between a student and a courtesan The Udgatrs sing various Samans for the Niskevalya Śastra,[16] the Hotr begins with the strophe of the Rajana Saman[17]

---

[9] In Śankhayana Śrauta Sutra XVII 12 5 the *anujapa* is *vag ayur viśvayur viśvam ayur ehy eva hi tropehi viśvatha veda maghavan vida iti* The call is *adhvaryo śoṁs savom*, Aitareya Brahmana III, 12 &c, Śankhayana Śrauta Sutra, XVII, 17, 14 Garbe, *Ritual Litteratur*, pp 100–102 Caland and Henry, *L Agnistoma* p 232

[10] Not as in the *prakrti* also with the *anurupas* and *dhayyas* (Sayana)

[11] *Kurayanti* is little if any, more than a simple verb Cf epic examples in Holtzmann on Whitney s *Sanskrit Grammar*, §§ 1041, 1068 Speijer *Vedische und Sanskrit Syntax* § 156 *Sanskrit Syntax* § 304 So in Pali and Prakrit Muller *Pali Grammar*, p 107 This is a preliminary to the beginning of the Śastra. Presumably the words, like those mentioned below, are intended to frighten away demons &c Cf. Cook *Journal of Hellenic Studies* 1902, p 21 Farnell *Cults of the Greek States*, III, 31, Crooke, *Northern India*, p 396, my *Śankhayana Aranyaka* p 78

[12] i e the *yajamana*

[13] The ceremony is described at greater length in Śankhayana Śrauta Sutra XVII 15 The king or his representative pierces the skin with three arrows which are not allowed to penetrate through The idea is clearly a rain spell The arrows pierce the sky and bring down the waters the sky imprisons. This idea may explain the archer in the myth of the descent of Soma though the idea appears distorted there (Bloomfield *J A O S* XVI 22 sq) For the acc and instr cf Gaedicke *Der Accusativ im Veda*, pp 275 sq Liebich *Bezz Beitr*, XI, 272 sq, Delbruck *Altindische Syntax* pp 225 226 *Vergl Synt* II 117 118 III 2, 4, n 16

[14] The drumming is performed on a raw hide stretched over a hole dug in the ground outside the *vedi* by means of the tail of the sacrificial animal Śankhayana XVII 5 There are also four or six ordinary drums used The wives used various instruments *ghatakarkarir avaghatarikah kanḍavinaḥ picchora iti* ibid XVII 3 12 Another list partly the same in Latyayana, IV, 2 1 8 Cf Hillebrandt *Ved Myth* II 190 *J A O S* XXIII 309

For similar ceremonies to promote fertility, cf Farnell *Cults of the Greek States*, III 80 103, Frazer *Adonis, Attis, Osiris* pp 21 sq my *Śankhayana Aranyaka* pp 82 sq

[15] Śankhayana Śrauta Sutra XVII 6 1, 2 *atha śudraryau striprmsau parṇakhalais ity upakalpayanti | tad etat puranam utsannam na karyam* | Apastamba cited by Sayana, says *uttarasyam vediśrony im pumścalyas magadhaya ca parisrayanti* (al *parisarpanti*) see XXI, 19 Cf Taittiriya Samhita VII, 5, 9 4 The conversation of the student and courtesan is given in Latyayana IV, 3 9-11, the *mithuna* in 17 cf Kathaka Samhita, XXXIV 5 Katyayana Śrauta Sutra XIII 3 v Schroeder *Mysterium und Mimus* pp 161 sq who overlooks the force of the plural (*caranti*) in the Kathaka, Oldenberg *Gott gel Anz* 1909 p 77 n 1, my note, *J R A S*, 1909 p 205 n 2

[16] Sayana explains that the Udgatrs sing their Samans first of all ending with the *rajana saman* the first tristich of which serves as the commencement of the Niskevalya Śastra of the Hotr On the priests cf. Oldenberg *Religion des Veda*, pp 383 sq Weber, *Ind Stud.*, X, 141 sq 376 sq

[17] The Latyayana Śrauta Sutra, which goes into further detail mentions also as part of the

6. 'That was the oldest in the worlds' (RV, X, 120),[1] 'That fame of thine, O Maghavan, through thy greatness' (RV, X, 54), 'He groweth more for strength' (RV, VI, 30), and the three verses beginning, 'Thee, manliest of men, with songs, with hymns' (RV, III, 51, 4), (are the commencement of the Śastra). Here some say[2] that one should take from the body verses the two quarter-verses, 'Join with the sweet what is sweeter than sweet' (RV, X, 120, 3^c), and 'The sweet with the sweet hast thou conquered' (ibid., 3^d), and replace them with the wing quarter-verses, 'O Maghavan, O Indra, the strong steeds' (RV, VII, 33, 22^c), and 'O Indra, grant a cow, a chariot horse' (RV, VI, 46, 2^c), and put in place of the latter those other two. He thus wins the profit of a cow[3] and

---

ceremonies a fight between an Ārya (Vaiśya) and a Śūdra for a skin which is compared with the sun, and the appointment of persons to praise and criticize the acts of the priests, IV, 3, perhaps in order to avert the evil eye (Farnell, *Cults of the Greek States*, III, 172), cf. the abuse of the Roman triumph. The first ceremony clearly shows the nature of the rite as a sun spell, which has many parallels in different parts of the world (Usener, *Archiv f. Religionswissenschaft*, 1904, pp. 297–313), as Agnisvāmin on IV, 3, 7, points out. It is discussed in Taittirīya Brāhmaṇa, V, 2, 6, 7. For ritual αἰσχρολογία as stimulating vegetation or serving a piacular purpose, cf. Farnell, *Cults of the Greek States*, III, 104; IV, 267; Frazer, *Golden Bough*, I^2, 97; Crooke, *Northern India*, p. 193; v. Schroeder, *Mysterium und Mimus*, pp. 309 sq.

[1] See I, 3, 3–8. This khaṇḍa deals with the body and the *sudadohas* verse following it. It corresponds to Śāṅkhāyana Āraṇyaka, II, 1, and Śrauta Sūtra, XVIII, 1.

[2] Śāṅkhāyana Śrauta Sūtra, XVIII, 24, 7; Āraṇyaka, II, 1, 11, omits the last two *pādas* and does not replace them, but puts them before the *dvipadās*. The stanza RV, VII, 33, 22^c, occurs in the right, the stanza RV, VI, 46, 2^c, in the left wing. The Śatapatha Brāhmaṇa, VIII, 6, 2, 3, seems to agree with Śāṅkhāyana, though not precisely. Eggeling, *S. B. E.*, XLIII, 113, n. Eggeling's explanation of the *ardharcas* in the Śatapatha as referring to RV, X, 120, 3^{cd}, and VIII, 20, 1^{ab}, seems to overlook the fact that in the Śāṅkhāyana the *ardharca*, X, 120, 3^{cd}, carries with it the *ardharca* VIII, 69, 2^{cd}, making up in all *ardharcas*; they are called *tau* in Āraṇyaka, II, 1.

[3] This is practically a defining genitive. Cf. IV, *vayaḥ suvīryam*, and contrast Whitney, *Sanskrit Grammar*, § 295; Speijer, *Vedische und Sanskrit-Syntax*, § 65. Delbrück (*Altindische Syntax*, pp. 153, 154) gives examples of the genitive of material and origin, and see *Vergl. Synt.*, I, 340, 346 sq. The construction *sam pakṣayoḥ patandya* is curious. The *sam* is joined with *patanaya* by Sāyaṇa, and we might compare for this infra, *upa-apite*, V, 3, 3; or *sam* might be taken with *dhatte* (cf. Whitney, *Sanskrit Grammar*, § 1081). The use of the genitive[*] with *patandya* (as with *apyas*, Śāṅkhāyana Āraṇyaka, II, 5, 6, &c.) disentitles it to be ranked as a real genitive; cf. Speijer, *Vedische und Sanskrit-Syntax*, § 48; Whitney, *l. c.*, §§ 287, 982. The easy conjecture *tam*, though rather tempting, is unnecessary. The conjunction of cow and horse is truly Vedic, cf. Indra's hymn, RV, X, 119, 1, *iti vā iti me mano gām aśvam sanuyām iti*; Atharvaveda, XII, 1, 5, *gavām aśvānām*, &c.; Winternitz, *Gesch. der indisch. Litt.*, I, 57; Bloomfield, *Vedic Concordance*, p. 346^b. For *ātman dhatte*, cf. Śāṅkhāyana Śrauta Sūtra, XIV, 28, 9; XV, 6, 7.

---

[*] It is possible to think of *pakṣayoḥ* as a dative (cf. Speijer, *Vedische und Sanskrit-Syntax*, § 12, for the confusion of °*bhyām* and *oḥ* forms), but this is not essential.

a horse, and the wings are made strong to fly He intertwines these hymns with the verse *nadam va odatīnām* (RV, VIII, 69, 2) joining quarter verse with quarter-verse, making them into *bṛhatī* verses, so that the quarter-verses of the *nada* hymn are second He also inserts in the first stanza the syllables of the word *puruṣa*, one in each quarter-verse, at the end, save in the case of the third quarter-verse Thus does he intertwine them We will also set (a verse forth) as an example, thus [4]—

tad id āsa bhuvaneṣu jyeṣṭham pu
nadam va odatīnām |
yato jajña ugras tveṣanṛmṇo ru
nadam yoyuvatīno3m ||
sadyo jajñāno ni riṇāti śatrūn
patim vo aghnyānām |
anu yam viśve madanty ūmāḥ ṣo
dhenūnām iṣudhyaso3m ||

The verse should be thrice repeated[5] Should (the Udgātṛs) sing as the Rājana Sāman other verses which occur (in the hymns enumerated), then (the Hotṛ) recites them in their own[6] place, but here (at the beginning of the Śastra) he recites these verses (i e RV, X, 120 1–3) If the other verses do not occur in these hymns, he should take as many out of the hymns mentioned and recite the (other verses) in their place, but still recite these verses (RV, X, 120, 1–3) here (The verses removed) in this case are to be those before the *sudadohas* verse The Śastra always begins with the verses commencing, 'That was the oldest in the worlds' (RV., X, 120, 1). The reply of the Adhvaryu is not altered.[7] (Then comes) the sūdadohas verse, beginning, 'Of that milk yielder' (RV., VIII, 69, 3).[8]

---

[4] The *pluti* and the *om* after the fourth *pada* are probably meant Cf Śāṅkhāyana, *l c*, and I, 5 1 Rajendralala and the Ānandāśrama edition are both inconsistent For the *pluti*, see Wackernagel *Altindische Grammatik*, I, 297–300 Both *iṣudhyaso3m* and *yuvatīno3m* present curious forms, which may be compared with the rule recognized in Panini, VI, 1, 95, that *om* with a preceding *a* vowel gives *om* and this Sandhi in its turn has early parallels (Macdonell, *Vedic Grammar*, p 64) So in Mānava Gṛhya Sūtra, I, 4 4 *tanom* stands, in my opinion for *tanu+om* (cf II, 7, n 1) See also Caland and Henry, *L'Agniṣṭoma*, pp 112, 166, 178, 232, 237, 238, &c for examples of this Sandhi

[5] To make up twenty five verses, I 3 4, n 6, Śāṅkhāyana Āraṇyaka, II 1 *evam vikṛtām prathamām triḥ śaṃsati parkir uttarāḥ*

[6] Literally, 'in their place' The Udgātṛs may either adopt *tad id āsa* as the beginning or *stotriya* or use other verses of the enumerated hymns, or use quite new verses, but in *all cases the Hotṛ must stick to tad id āsa as a commencement, and must not follow* the strophe of the Rājana Sāman The new verses are to be inserted before the *sudadohas* verse, omitting a corresponding number of those in the ordinary version If the verses occur in the hymns enumerated, then they are simply recited in their own original place, since the whole of the first three hymns is included in the Śastra, and the three verses, 7, 51, 4–6, count presumably as a hymn for this purpose Cf n 3 on V, 2, 1 For the construction, cf. Aitareya Brahmana, V, 7, 1 *mahānāmnīṣu atra stutāsu śakvareṇa sāmnā*

---

[7] The form used in the prakṛti is not altered as it is in the Ṣoḍaśin rite (Sāyaṇa). On the pratigara, see Weber, *Ind Stud.*, X, 36, n 3; Eggeling, *S B E*, XXVI, 326; Sabbathier, *Agniṣṭoma*, pp 55, 56; Hillebrandt, *Ritual Litteratur*, p. 104, n 45.

[8] The verses laid down in Śāṅkhāyana are, after a *tūṣṇīṃśaṃsa* of three verses, RV., X, 120, 1-3; 4-9; X, 29, 1-8; X, 55, 6 8; X, 54 6; X, 55, 2; X, 56, 1, making 23, the first being twice repeated, and the whole interspersed with the *pādas* of the *nada* hymn. In X, 120, 3, however, the third and fourth *pādas* together with the corresponding *pādas* of the *nada* hymn are omitted, and placed before the *dvipadās* (II, 11).

After the body verses the order in Śāṅkhāyana and the Aitareya differs as shown below —

		Sūtra,	Āraṇyaka,
Head verses	Śāṅkhāyana,	XVIII, 2	II, 2
Neck verses (with *skandha*, cervical column, *J R A S*, 1907, pp 1, 2)	,,	,, 3	,, 3

---

* It should be noted, however, that this division, which is that adopted by Dr Friedlander is doubtful as regards the two sides which (Introd., p 10) he divides into shoulder, arm, and hand. For the word *skandha* (really 'cervical column', Hoernle *J R A S*, 1906, p. 918) occurs in the section dealing with the *graiva* verses, and the word *aṃsa* (ṛc) or *aṃsa*, both of which are used in Āraṇyaka II, 3, as regards the part rendered as 'shoulder', seems rather to denote 'collar bone'. At least, so I infer from the fact that *aṃsaka* has this sense in Caraka and Suśruta (Hoernle, *J R A S*, 1907, p. 13), and *aṃsa* this sense in the Śatapatha Brahmaṇa. Possibly the reading should be *aṃsam* in Āraṇyaka, *l c* cf *aṃsa sthavvsthā* (sic) just after, and cf I, 2, 2, n 11, but *aṃsā ṛc* is good sense. The exact divisions are probably (a) collar bone, (b) arm, (c) hand.

ADHYAYA 2

(Then come) the neck verses 'Of Indra,[1] the smiter, the powerful, the earnest, who has the world, are might and strength, great and delightful The mighty[2] overcomes not him who is exceeding strong His vigour is dreadful When aforetime trembling passed from him, Indra's might was dreadful May he give us that wealth, wealth of tawny hue Indra is the lord, the most mighty among men' (Then comes) the *sūdadohas* verse The head verses are in *gāyatrī* metre, beginning, 'The singers call aloud to Indra' (RV, I, 7, 1) If (the Udgātṛs) sing the Sāman with other verses which occur (in the service), then the two sets are to be interchanged in place[3] If the other verses are ones not occurring, or some occur and some not, (then they should be inserted in the place of verses occurring which should be taken out) The last verse of the hymn (should be recited, the insertion being made before it) and then the *sūdadohas* verse Then come

---

[1] These verses occur with many variants in the Atharvaveda, VI, 33 and also in the Paippalada recension, the Naigeya text of the Samaveda, I, 588 which has *ardyo yujas tujé jane vanam svàh* and has not the second two verses, and Śankhayana Śrauta Sutra, XVIII, 3, where they run *yasyedam oja arujas tujo yujo balam sahah* | *Indrasya rantyam brhat* || *ana dhrstam vipanyaya nadhrsa adadharsaya* | *dhrsanam dhrsitam śavah* || *sa no dadātu tam rayim purum pisangasamdrśam* | *Indrah patis tuvistamo janesu* || It should, however, be noted that *balam* is merely a conjecture of Hillebrandt s for *vanam* of all his MSS It is a probable one The AV version is unintelligible, see Whitney's *Translation* p 305 In the version given, which is purely conjectural, I have taken *arujah* as a genitive from Śankhayana (the change of *u* and *a* is easy, the accent is dubious), like *tujo* and *yujo*, presumably also genitives. Sayana as usual gives no help, he takes *arajah* as either (1) *nistevalyam sarvato ranjakam*, or (2) *jagatpalanam sarvato ranjakam* *Tujo tujo* is *yogo rairsnam himsakah* *Vanam* is *bhaktair sanamyam* The AV has *á rdjo yújas tujé jána vánam svàh* | and *nádhrsa á dadhrsate dhrsānd dhrsitáh śávah* | *purā́ yáthā vyathíh śráva índrasya nādhrse śávah* The Paippalada differs greatly

[2] The translation again is purely conjectural Whitney, by reading *adhŕ e* (infin), *dhrsanám dhrsitám*, and *vyathí*, makes it, '(He is) not to be dared against, (his) might, dared, dares daring against (others), as, of old, his fame (was) unwavering, Indra's might (is) not to be dared against.' Taking the Aitareya text as it stands, I think we must resolve *nádharsa* as *ná ádharsa(h)* and take the word as an adjective meaning 'impetuous' I think *nadhŕsa* however, almost certainly right (cf RV, V, 8, 5), 'He is not to be dared against' The editions and Whitney with Sayana read the two words following as *á dadharsa dadhrsanám* This is quite possible, though the change in quantity is remarkable, but it seems to have escaped notice that *á dadharsad adhrsanám* is quite possible and could have the same sense while keeping the prefix *a* in both cases and restoring the metre (*á dadharsad á* | *dhrsanám*) and explaining the Sankhayana text If *nadhrsa* is read I would not take the participle as a neuter nom, but translate, 'He dares against the daring his might is dread' This avoids the inconvenience of the idea of might daring, and the rare use of the present participle as a finite verb The second half of the line is very obscure *Ati vyáthih* occurs also in RV, X, 86, 2 and here as there Sayana explains it as a verbal form which is quite impossible, 'When Indra caused his foe to fall' It might however mean, 'When trembling (cf Naigh, II, 23) passed from Indra, referring to the terrors which so often fell on Indra before he showed his might For a different theory as to *vyáthih* (=track), see RV, IV, 4, 3 (Oldenberg *S B E*, XLVI 331), AV, IV, 21, 3 with Whitney s note, and see Geldner, *Vedische Studien*, II 29 Geldner holds that *vyáthih* originally means 'Falschheit' and thence 'Malice, Zorn Ungnade, Ärger, Hass, Feindschaft', and so has the gen of the subject or object. So he renders RV IV, 4, 3 as, no one approaches thee when angry,' and in AV, VI 33 2 takes *purā́ yáthā vyathíh* (this is the AV accentuation as in AV, IV, 21, 3) *śráva índrasya nā́dhrse śávah*, as 'Like a citadel (cf *pur* and *pura*, Pischel *Vedische Studien*, I, 185) unapproachable, is the anger, the fame, the

---

strength of Indra' Unhappily he does not cite or discuss this passage, where of course *purā* cannot be made by any effort of the imagination to be a noun But accepting the sense 'wrath', then AV, VI, 33, 2 would give the sense 'As aforetime, the anger', &c, and this passage might be rendered, 'As of old (*purā yāt*) his anger is excessive' (*ati*), and on the whole this is perhaps the least unlikely version of a very difficult and probably corrupt text Cf. v Schroeder, *Mysterium und Mimus*, p 316, n 2, whose version of RV, X, 86, 2, suggests 'because of anger

For the form of the verse, cf e g Vajasaneyi Saṃhitā I, 8 *dhūr asi dhūrva dhūrvantam dhūrva tam yo 'sman dhūrvati tam dhūrva yam dhūrvāmaḥ*, and Winternitz, *Gesch der indisch Litt*, I, 159 In the next verse the AV reads *idam* (Ppp *no*) *aruṇam* and *turīstamas* (APr., III, 96 IV, 59) while the Ppp the comm, and one MS have *dadhatu*, and the commentary on the AV and two MSS (out of three) in Śaṅkhayana have °*sadṛśam* One MS of Śaṅkhayana has *purum* the others *purām* *Taviṣtama* occurs in RV, I, 190, 5, II, 33, 3 For the dat inf in *e* cf. Whitney *Sanskrit Grammar*, § 970.

[3] This is Sayana's version The Anandāśrama reads *ubhayāsaṃsthā na viparyayo* with the opposite meaning but this is less probable The apodosis to the last clause is borrowed from the indication in V, 1, 6 As the next clause shows, the insertion of the new verses is to be made before the last verse preceding the *sūdadohas* verse and not directly before that verse The word *samāmnātāsu* refers here to verses occurring in the hymn itself The form *ubhayāsaṃsthānaviparyayaḥ* however presents great difficulty for the use of *ubhayā* in compounds is confined to cases like °*cakra*, °*pāṇi* °*hasta* &c and it is hardly likely that the second member of the compound is *asaṃsthāna* or that the fem is kept because *yā* is fem (Wackernagel, *Altindische Grammatik*, II 1, 49 51) But, further, there is no special meaning in *saṃsthāna* and the conjecture *ubhayāsaṃ sthānaviparyayaḥ* is possible *Ubhayasam* (*ṛcam*) is precisely correct for two sets of three verses (cf RV, I, 26, 9, 189, 7, and regularly later, cf Bloomfield, *Vedic Concordance*, p. 272), and Sayana's version in no way confirms either the reading of Rājendralāla or the Anandāśrama The form would be very rare, the ordinary feminine being *ubhayī* (common in the Aitareya Brahmana) and possibly *ubhayā* is the Vedic adverb It may be noted that R's version of the comm, *tāsām arthe* (R⁴ against R¹ and R²) alone makes sense S's *tāsām madhye* being nonsense Cf Introd, p 9

The Śāṅkhāyana Śrauta Sūtra, XVIII, 2, gives the head verses thus, RV, I 7, 1–3 I, 6, 7–9, I, 84 13–15, VIII, 76, 10 12, VIII, 93, 1–3, any of those used by the Sāman singers Some use I, 50, 1–9, to correspond with the Sāman singers. If the latter use only I, 50, 1–3, then the reciter can take any two of the other *tṛcas* to make up the nine verses As in the Aitareya, the recitation is by half verses, and the *sūdadohas* verse occurs at the end the vertebrae verses 'The Soma is pressed for thee, come to the sacrifice, rejoice in the carouse, rich in gifts, for wealth O Indra, thou art generous and young for us to sing[4] He can overcome his foes in slaying Vrtras, he is skilful and a plunger We magnify our leader, Indra[5] Impetuous, bright, the leader, the dweller on the mountains, hastening towards you, Indra, shouting aloud, with his eternal steeds'[6] (Then comes) the *sūdadohas* verse The three sets of verses neck, head, and vertebrae, are all to be repeated with a pause at the half-verse[7]

2 The (verses of the) right wing are connected with the Rathantara Saman[1] The Rathantara has for its strophe, 'We praise thee, O hero' (RV, VII, 32, 22), and for its antistrophe, 'Thee for the first drink' (RV., VIII, 3, 7), both being

---

[4] These verses contain an unusual number of rare expressions, and the uncertainty as to their accent adds to the difficulty The reading of *vijdrah* is very doubtful R in the commentary, which is followed by Bloomfield, *Vedic Concordance*, S, and the MSS have *vijarah*, while Sayana perhaps read *vidurah*[*] (*vistalokadvarani grnadhya asmadagre kathayitum atra hrste bhava*) I have translated the *vijdrah* (? *vijarah*) of R's text, and taken *grnadhyai* as an infinitive practically equivalent to an imperative, '*Let us sing of*,' cf Delbruck, *Altindische Syntax*, pp. 412 sq, Whitney, *Sanskrit Grammar*, § 982 d, Hopkins, *A J P*, XIII, 21 sq, Speijer, *Vedische und Sanskrit Syntax*, § 216

[5] *Vigahah*, Sayana renders as *sevitum sakyah* Cf RV, III, 3, 5, where it is an epithet of Agni The *sa no netaram* looks like an imitation of older verses, such as RV, II, 6, 5, without much regard to their construction Possibly the reading should be (cf on IV) *sam* (which would become *sau* before *no*) So Maitrayani Samhita IV, 12 6, has *sa dahse karati bhurs udmam*, but in Taittiriya Samhita, III, 3, 11 *sam*, &c *Esah* may be from the root *is* (cf Max Muller's conjecture on RV, IV, 2, 4, *S B E* XLVI, 320) and meaning 'swift' S takes *rasahatur* as one word, but this makes nonsense of Sayana The form is unusual, see Whitney, *Grammar*, § 1161 d

[6] *Sámajah* (for the form, cf Wackernagel, *Altindische Grammatik*, II, 1, 73, 74) apparently means the 'bringer together' *Rjīsí* cannot have the sense which it normally has (see Hillebrandt, *Ved Myth*, I, 135 sq, Bloomfield, *J A O S*, XVI, 39) and which is here ascribed to it by Sāyana, *vyistopalaksitasomarasena* In RV, III, 32, 1, it seems to mean impetuous, and cf *rjīsá*, ibid, I, 32, 6 *Vam* he explains as the husband and wife engaged in the sacrifice, Rājendralala reads *vāsu* which is quite wrong though followed in Bloomfield, *Vedic Concordance*, p 205 It would of course be acc with *sámajah* *Śáśvadbhir evaih* possibly merely means 'as usual', or 'in his eternal courses' Cf *évaih*, 'in due way,' RV, I, 68, 4, 95, 6, *aryah évaih*, IV, 2, 11, *S B E*, XLVI 437 These verses are unparalleled in other texts

[7] This means, as Sayana and Śāṅkhayana show, that there is a pause at the end of the half-verse (and *om* at the end of the verse) The other possibilities are (1) pause at each *pāda*, with *om* at half verse (2) no pause, *om* at end. The Āśvalāyana Śrauta Sūtra contains examples of all kinds, see I, 2 sq

[1] Cf I, 4 2

---

[*] If so it might be taken as two words and translate it 'the giver is to be praised' Cf *vi dur grnīṣe* in RV, VI, 35, 5, and cf. Śāṅkhāyana Aranyaka, XII, 10

pragâtha verses These four *brhatîs* he turns into six[1] (Then come the hymns), 'I shall proclaim the deeds of Indra' (RV, I, 32), 'In thee since our father, Indra' (RV, VII, 18) fifteen verses only, 'Who is sharp horned, terrible like a bull' (RV, VII, 19), 'Dread is he born for strength, the mighty' (RV, VII, 20), 'Ye have uttered glorious prayers (RV, VII, 23), 'For greatness, O dread Indra with thine aid' (RV, VII, 25) five hymns, 'From far or near may Indra be with us' (RV, IV, 20) is the *sampata* hymn 'Thus in the Soma, in the carouse' (RV, I, 80, 1) is a *pankti* verse (Then comes) the *sudadohas* verse (The verses of the) left wing are connected with the Brhat Saman The Brhat has for its strophe, For thee we hail' (RV, VI, 46 1) and for its antistrophe, Come hither to the worship' (RV, VIII, 61, 7), both being *pragatha* verses These four *brhatis* he turns into six (Then come the hymns) 'Praise him who surpasses in strength' (RV, VI, 18), 'Thou art attached to the pressed Soma, Indra (RV VI, 23) three hymns, 'Thou art the only lord of riches, O lord of riches' (RV VI, 31) eight hymns, 'What! whose sacrifice has he increased?' (RV IV, 23), is the *sampata* hymn 'Indra is born for the carouse' (RV, I 81 1) is a *pankti* verse (Then comes) the *sudadohas* verse The right wing is connected with the Rathantara Saman, and so is the *pañcadaśa stoma*[2] There are one hundred and one (verses) in it, and it is called the Vasisthaprâsâha. The left wing is connected with the Brhat Sâman and so is the *saptadaśa stoma* There are one hundred and two verses, and it is called the Bharadvâjaprâsaha The (verses of the) tail, as being *dvipadas* are connected with the Bhadra Sâman There are nine verses from the Samhitâ 'These worlds let us conquer' (RV, X, 157) and Come hither with thy splendour (RV, X, 172) and there are also other verses not from the Samhitâ[4] (These are), 'Ye priests, sing forth a song to Indra who beyond all others slays the foe, that he may rejoice'[5] forth, that dost know indeed all that has been aforetime or that is now.'[11] 'O Mitra and Varuna, grant us strength and food. O Indra, make us strength abounding'[12] '(Grant) prosperity, strength, wealth, to him who seeks gain[13] Soma impels not him who keeps not vows, gain will not come near him' Then come three *dvipadas*,[14] beginning, 'This Brahman' Then comes one *dvipada*,

---

[1] The two *pragâthas* give only four *brhatîs* The six are made up by repeating twice the fourth *pada* of RV, VII 32, 22, and reading with it the first half of RV VII, 32, 23 Then the fourth *pada* of this second *brhatî* is twice repeated and with the second half of RV, VII 32, 23 makes the third *brhatî* By V, 1, 6, for the *pada*, RV, VII, 32, 23ᶜ, is to be substituted RV, X, 120 3ᶜ

[2] The Rathantara Saman is the basis of the *pañcadaśa stoma* or hymn form The term Vasisthaprâsâhah is clearly the technical name of what is called elsewhere (see *St Petersburg Dict*) *Vasisthaprasâham* Similarly in the case of the *saptadaśa stoma* and cf II 2 2, n 11 for the attributions The syntax of RV, VI 31, 1, is curious see Delbrück, *Altindische Syntax*, p 106, *Vergl Synt* I 398, and cf in Latin Lucilius, III 29 *censorem trabeate salutis* For *prâsaha*, cf *Z D M G* XLVIII 548

[4] These are given also in Sâṅkhâyana Srauta Sûtra XVIII 15 where they follow *esa brahma* &c. Some are also in the Samaveda The two RV hymns have five and four verses

[5] Śâṅkhâyana has *juṣo ate* See Samaveda I 446 II, 463 where are *viprya* and *yâm juṣâte* For the form, see Whitney *Sanskrit Grammar*, § 810. B's MS of Samaveda has *juṣo at*

---

[11] This occurs in Samaveda, I, 450, as *víśvasya prá stobha purá vā sán yádi vehá nūnám*, which Benfey renders, 'Vor allem sei gepriesen nun, seist du uns ferne oder nah,' but this passive use of √*stubh* is not probable My rendering is of course very conjectural, and it supposes that *asa* is read.

[12] This verse, as far as the latter part is concerned, agrees with Samaveda I, 455, which runs *ūrjā́ mitró váruṇaḥ pinvatéḍāḥ pī́varīm íṣaṃ kṛṇuhī́ na indra* Here *pinvata* has the three deities as its subject, and its use is therefore regular But in the Āraṇyaka text the plural is quite irregular, cf I, 1, 2, n. 7 The text could be amended, but it is clearly original Cf the strange *ahvibhiḥ* in Jaiminīya Brāhmaṇa, III, 77, on the other hand, *uttarābhyām* = *uttarābhiḥ* in Āpastamba Gṛhya Sūtra, VI, 14, 15 (Oldenberg, *S B E*, XXX, 281, n) For the form *kṛṇuhi*, cf Whitney, *Sanskrit Grammar*, § 704, Macdonell, *Vedic Grammar*, p 62, Wackernagel, *Altindische Grammatik*, I, 310 See also Oldenberg *Prolegomena*, pp 393 sq, Zubaty's articles in *Vienna Oriental Journal*, II and III, and Arnold's *Vedic Metre*, Chap VI, with whose results I regret I cannot on the whole agree (cf *J R A S*, 1906, p 718, and *Vedic Metre*, pp xiii xiv)

[13] In Samaveda, I, 441, this verse runs *ídam padám maghā́ni rayiṣíṇe ná kā́mam avrató hinóti ná spṛśád rayím* (for the form cf Whitney, *Sanskrit Grammar*, § 1297 b), meaning 'Health, a dwelling prosperity to him who seeks wealth The man who pays no vows obtains not his desire, he wins not wealth' Sayana renders *rayiṣáṇe* as *havirlakṣaṇasya dhanasya dhātare*, but this cannot be right. If the Araṇyaka form is correct, it is presumably from √*san*, as in *goṣan*, RV, IX, 2, 10 &c. It may of course also be the acc or nom neut of *rayiṣáni*, compare *goṣáṇim dhíyam*, RV, VI, 53 10. The only probable construction of the text here is 'there is (or "may there be") in the seeker of wealth, prosperity', &c R has *rájaḥ*, which is clearly wrong as probably is *spṛśád* For the omission of the verb in the Sāmaveda version, cf RV, II 6 5 Pischel, *Vedische Studien*, I 19 Geldner, ibid, 166, n 7 on V, 1, 5

[14] These verses (the accents are from the Sāmaveda) are given in Āśvalāyana Śrauta Sūtra, VI, 2 6 *idá brahmā́ yá ṛ́tviya índra nā́ma śrutó gṛṇé* ‖ *ví srutáyo yáthā pathā́ índra tvád yanti rātáyaḥ* ‖ *tvā́m íc chavasas pate yánti gíro ná saṃyátaḥ* ‖ They occur also (with *vi śrutayo* for *vi srutayo*, and *naḥ* for *na* in v 3) in Śāṅkhāyana Śrauta Sūtra, IX, 6, 6, and (with *pathā́* for *patha*) in Sāmaveda, II, 1116 (= I, 435) 1118 (= I, 453), 1117 The first verse also occurs in Taittirīya Brāhmaṇa, II, 4 3, 10 (*pratīka* only), III, 7, 9, 5, and the *pratīka* in Aitareya Brāhmaṇa, IV, 3 See Benfey and Griffiths' translations, and for *gṛṇe*, Whitney, *Sanskrit Grammar*, § 719. Perhaps it may be taken as a passive, cf RV, I, 79, 11 *hótā gṛṇītá ukthyàḥ*, rendered as 'is praised' by Oldenberg (*S B E*, XLVI 106), and see Delbrück, *Altindische Syntax* p 264* On the other hand, cf nn 6 and 11 above, where

---

* So also *stavate* means 'he sings' and 'he is praised' according to Oldenberg, *l c*, p 136, and Neisser, *Bezz. Beitr*, XIII, 295 I am not sure that in any case the passive sense is quite essential. The uncertainty is of course a sign of early date, cf the Middle and Passive in Latin, Lindsay, *Latin Language*, pp. 519–521, Delbrück, *Vergl Synt*, IV, 435

'To the yokes for him' (RV VII, 34, 4),[15] the *sūdadohas* verse, the *dhāyyā* verse, 'What he won' (RV, X, 74 6), and the *sūdadohas* verse

ā stobhata and *prá stobha* must be active, and so here and in RV, I, 79, 12, the activity may be that of the god not of the poet In the RV passage it has just been said *ágne rákṣāṃsi sedhata*, and I see no reason to give a passive sense to *gṛṇīte* The verses may then be rendered, 'The holy season's lord, Indra by name, famous, utters praise Let gifts approach thee, Indra, as paths the way Like songs, to thee, lord of might do men fare eagerly' It should be noted that in I, 438, the Samaveda has *gṛṇé*, but in II 1116 *gṛṇe* The accent on *gṛṇé* is quite unintelligible,[a] and can only be explained by the fact that the Taittiriya Brahmana,[b] *ll cc*, has *gané* In the Aitareya only *esa brahma* (not as Aufrecht's text *eṣā*) is cited, a striking instance of the danger of arguments from the use of *pratīkas* only as a sign of later redaction (cf Bloomfield's proof of the posteriority of the Gopatha Brahmana to the Vaitana Sūtra, Introd, p. 26), since the argument would show that the Aitareya Brahmana was later than the Aśvalayana Śrauta Sutra, cf also Oldenberg's remarks in *Gott gel Anz*, 1907, p 234, n 2

[15] Śaṅkhāyana adds the verses, RV, VIII, 29 4, and VI, 17, 15, but as there are only six instead of nine new verses the total number of *dvipada* verses made up is still only twenty one The Aitareya adds a twenty second verse see I, 4, 2

The passages corresponding to the *pakṣas* are given in Śāṅkhāyana Śrauta Sūtra, XVIII, 4 5 thus the sides are divided into the *aṃsas*, *bāhus* (arms), and *prahastakas* (hand) The *aṃsas* are VI, 47, 8, and a verse not from the RV, *sa sūrye janayan*, &c Then for the right *bāhu*, the strophe of the *rathantara saman* repeated as a *kakubh*, then the *sudadohas* verse Then similarly the antistrophe and a *dhayya* verse Then the *rathantara pragatha* Then the hymn, RV, VI, 22, exchanging for VI, 22, 2, the verse X, 28, 2 For the left *bāhu* precisely the same treatment of the *bṛhat saman*, but no *dhayya* and the hymn X, 28, with VI, 22, 2, as its second verse The *prahastakas* are respectively VIII, 97, 13–15 and VIII, 97, 10–12

Then comes XVIII, 6, the *caturuttarani*, viz RV, VIII, 92 19 21, VIII 12, 22–24, I, 30, 1–3, VIII, 88 3, 4 (a *pragatha*, or 3 5), by half verses, I, 80, 1–3 (*panktiśaṃsani*), VI, 34 1–3, and I, 83 4 6 *pacchas*, then the *sudadohas*

It is worthy of note that, just as the Aitareya refers only to the *esa brahma* verses by the *pratika* of the first verse, so the Śaṅkhayana Śrauta Sūtra, XVIII, 15 4 also uses only the *pratika* It is almost impossible to avoid the conclusion that this book XVIII (and presumably, also XVII) must be not earlier nor later than the main body of the Sutra and this will modify to some extent Hillebrandt's view, *Ritual Litteratur*, p 25 Similarly the Āraṇyaka may be written after the Āśvalayana Śrauta Sūtra. Cf. my note in *J R A S*, 1907, pp 410–412

In the Aitareya Brahmana, VI, 18, 1, it is said that Viśvamitra was the seer of RV, IV, 19, 22 and 23 and that Vāmadeva *asṛjata* them, *tan kṣipram samapatat*, while in IV, 30, 2, RV, IV, 20 and 21, are also declared to be *sampāta* hymns *Vāmadevo vā imāṃl lokan apaśyat tan sampataiḥ samapatat* (Sieg, *Die Sagenstoffe des Ṛgveda*, p 103)

---

[a] It falls under none of the exceptional cases, Macdonell, *Vedic Grammar*, p. 106, Whitney, *Sanskrit Grammar*, §§ 597, 598, Weber, *Ind Stud*, XIII, 70 sq, Delbruck, *Altindische Syntax*, pp 21–29, Oldenberg, *Z D M G*, LX, 707–740, see my note, *J R A S*, 1908, p 202

[b] Also the Āpastamba Śrauta Sutra, VII, 2, 13, cited by Bloomfield, *Vedic Concordance*, p 307[b]

3. (Then come) the eighty *gāyatrī* tristichs[1] He takes out the last three verses of the hymn, 'Great is Indra who by his might' (RV, VIII, 6). (Then come) three verses of the hymn, 'A cake for us' (RV., VIII, 78) Of the verses following, 'Indra indeed is the drinker of Soma beyond others' (RV., VIII, 2, 4), he omits the last three Of the others he omits, 'Sweet are the draughts of Soma, come hither' (ibid, 28), and puts in its place the verse, 'No other mighty one' (RV, VIII, 80, 1) (Then comes) one verse, 'Born with a hundred strengths' (RV, VIII, 77, 1) (Then comes) the remainder (of the hymn, RV, VIII, 92), 'Much invoked, much praised' (ibid, 2) He omits the last verse of the hymn, 'To him that hath renowned treasures' (RV, VIII, 93 1) (Then come the hymns), 'The deeds of the impetuous one' (RV., VIII, 32), 'Those that kindle Agni' (RV, VIII, 45) and 'For us, O Indra, rich in food' (RV, VIII, 81), and the following hymn (Then comes) the *sudadohas* verse

4 (Then come) the eighty *bṛhatī* tristichs[1] There are twenty nine verses

---

[1] They are— RV, VIII, 6, 1-45 = 45 verses
" 78, 1- 3 = 3 "
" 2 4-39 = 36 "
(For verse 28, RV, VIII, 80, 1, is substituted)
" 77, 1 = 1 "
" 92, 2 33 = 32 "
" 93 1-33 = 33 "
" 32 = 30 "
" 45 = 42 "
" 81 = 9 "
" 82 = 9 "
= 240 verses.

In Śankhayana Śrauta Sutra, XVIII, 7, the verses are RV, VIII 6, 1-45, 2, 4 27, 31-39, 45 1-42, 32, 1-30, 92 4 18, 22-33, 93 4 18, 22-33, III, 51, 10-12, VIII, 76, 10-12, 69, 4-6, VI, 45, 1-30, which gives 81 *treas* and not 80 The number is reduced to 80 by the omission of one of the three *treas* III, 51, 10-12, VIII, 76, 10-12, 69 4-6

[1] These are— RV, VIII, 1, 1-29 = 29 verses.
" 3 1-6, 9 20 = 18 "
" 4 1-14 = 14 "
" 33, 1-15 = 15 "
VII, 32, 1, 2, 4-21, 24 7 = 24 "
(For VII, 32 10, is substituted VIII, 99, 1)
6 Vālakhilya hymns = 56 "
VI, 46, 3-14 = 12 "
III, 44 = 5 "
III 45 = 5 "

of the hymn, 'Sing of nought else' (RV., VIII, 1). He omits the seventh and eighth stanzas of the twenty stanzas beginning, 'Drink the fragrant Soma' (RV., VIII, 3, 1). (Then come) fourteen stanzas beginning, 'When, Indra, forward, backward, upward' (RV., VIII, 4, 1). Then fifteen stanzas beginning, 'We with the Soma thee' (RV., VIII, 33, 1). In the hymn, 'May not thee the sacrificers' (RV., VII, 32), he omits the *dvipadā* (ibid., 3), and the *pragātha* connected with the Rathantara Sāman (ibid., 22). Further he omits the *pragātha*, 'No one Sudās' chariot' (ibid., 10), and inserts in its place the *pragātha*, 'Thee men but yesterday' (RV., VIII, 99, 1). (Then) six Vālakhilya hymns beginning, 'Him of good gifts' (RV., VIII, 49, 1). (Then) the rest (of the hymn, RV., VI, 46), beginning, 'Who active ever slays the foe' (ibid., 3). (Then) two hymns beginning, 'May this delightful one for thee' (RV., III, 44, 1). He omits the seventh and eighth stanzas of the hymn, 'Both let him hear' (RV., VIII, 61). He omits the last stanza of the hymn, 'With strength him that finds treasure' (RV., VIII, 66). (Then come) eleven stanzas beginning, 'Who is king of men' (RV., VIII, 70, 1). (Then the hymns), 'Him who works wonders, enduring the onslaught' (RV., VIII, 88), 'To be invoked by us in all' (RV., VIII, 90), and nine verses of the hymn, 'The blessings thou dost bear, Indra' (RV., VIII, 97). (Then comes) the *sūdadohas* verse.

RV., VIII, 61, 1–6, 9–18	= 16 verses
" 66, 1–14	= 14 "
" 70, 1–11	= 11 "
" 88	= 6 "
" 90	= 6 "
" 97, 1–9	= 9 "
	= 240 verses.

Of these, however, no less than 80 are *satobṛhatī* verses. In Śāṅkhāyana Śrauta Sūtra, XVIII, 8. 11, the *aśīti* is given as follows: VIII, 97, 1–9; VIII, 61, 7–9; I, 36, 7, 8; VIII, 70, 7–12, = 20 *pratyakṣabṛhatīs*; then VI, 46, 3–10; VII, 32, 1, 2, 4–9; VII, 32, 12–21; VII, 32, 24–27; VIII, 1, 1–4; *mā u tvā puruvaso*; VIII, 3, 9–12; VIII, 3, 17–20; VIII, 4, 1–14; VIII, 61, 3–6; VIII, 61, 9–18; VIII, 66, 3–14. Hillebrandt in his index gives the references differently, but this is apparently due to a confusion between *pragāthas* and stanzas. There are really 43 *pragāthas*. The one *mā u*, &c., is not apparently from the Saṃhitā; Hillebrandt's indices all ignore it, and it does not appear in Bloomfield's *Vedic Concordance*. Of the last six, three only are selected to make up the 40. Then come 20 more *pratyakṣabṛhatīs*, VIII, 1, 5–24. Then 20 more: VIII, 1, 25–29; VIII, 33, 1–15. Then 40 *pragāthas*, the three over the first 40, VIII, 70, 1–6; VIII, 88, 1, 2; VIII, 90, 1–6; VIII, 99, 1–8; VIII, 49–55 (the Vālakhilyas), omitting VIII, 53, 5, 6; 54, 3, 4. Then I, 175, 2; VI, 42, 4; III, 53, 18; VI, 47, 19; VIII, 78, 10; VIII, 89, 7; VIII, 101, 13; X, 102, 1, 2, 12, making 10 *bṛhatīs*, and III, 44, 45, making up 20 in all. The whole *bārhata aśīti* consists therefore of 80 *bṛhatīs* and 80 (not 160 as Friedlander) *pragāthas*, giving (80 + 80 =) 160 *bṛhatīs* and 80 *satobṛhatīs*, just as in the Aitareya. Cf. Śāṅkhāyana Āraṇyaka, II, 8 and 9, for the *gāyatrī* and *bārhata aśītis*.

5 (Then come) the eighty *uṣṇih* tristichs.[1] There are the two hymns beginning, 'Indra who is the greatest drinker of the Soma' (RV., VIII, 12, 1). He omits the last stanza of the hymn, 'Sing forth to him' (RV., VIII, 15). (Then comes) the hymn, 'To Indra sing the *sāman*' (RV., VIII, 98). He omits the last three stanzas of the hymn, 'Let us utter, O comrades' (RV., VIII,

---

[1] There are— RV., VIII, 12 = 33 stanzas.
„ 13 = 33 „
„ 15, 1-12 = 12 „
„ 98 = 12 „
„ 24, 1-27 = 27 „
I, 84, 7-9 = 3 „
V, 40, 1-3 = 3 „
VI, 43, 1-3 = 3 „
= 126 *uṣṇih* stanzas.

Then *gayatri* stanzas— RV., VIII, 14 = 15 stanzas.
„ 16 = 12 „
„ 17, 1-13 = 13 „
III, 37, 1-10 = 10 „
I, 4 = 10 „
„ 5 = 10 „
„ 6 = 10 „
„ 8 = 10 „
„ 9 = 10 „
VI, 45, 1-30 = 30 „
I, 30, 13-15 = 3 „
= 133 *gayatri* stanzas, or 114 *uṣṇih* stanzas making in all 240 *uṣṇihs*.

According to Śaṅkhāyana Śrauta Sūtra the verses are RV., VIII, 13, 1-33, VIII, 12, 1-21, 25-33, VIII, 15, 1-12, VIII, 24, 1-27, I, 84, 7-9, V, 40, 1-3, = 36 *tṛcas* or 108 *uṣṇih* stanzas, XVIII, 12. Then, XVIII, 13, come RV., IV, 30, 1-6, IV, 30, 9-22, IV, 32, 1-22, I, 30, 1-15, VIII, 14, 1-15, VIII, 16, 1-12, VIII, 64, 1-12, VIII, 82, 1-9 (Hillebrandt's I, 30, 1-5, and VIII, 82, 1-7 are slips), making 104 *gāyatrī* stanzas. Then VIII, 21, 1-16, *kakubh pragāthas*, then VIII, 98, 1-12 in *uṣṇihs*. We thus get 240 stanzas, consisting of 120 (108 + 12) *uṣṇihs*, 104 *gāyatrīs*, 8 *kakubhs*, and 8 *satobṛhatīs* (i. e. VIII, 21, 1-16). The Śaṅkhāyana Āraṇyaka, II, 10, points out that to get 240 *uṣṇihs* it is necessary to take away four syllables from each of the 80 *satobṛhatīs*, which with 160 *bṛhatīs* make up (V, 2, 4) the *bārhata tṛcāśīti*. Then the 8 *kakubhs* give 8 *uṣṇihs*, while the 8 *satobṛhatīs* yield each three, or 24 in all, sets of four syllables. Adding the 80 and the 24 we have 104 sets of four syllables, which added to the *gāyatrīs* give 104 *uṣṇihs*, to which again must be added 120 *uṣṇihs*, 8 *kakubhs*, and 8 *uṣṇihs*, left after the deduction of 24 syllables from each *satobṛhatī*, making a grand total of 240 *uṣṇihs*.

This complicated version, as Dr Friedlander points out, probably arises from an attempt to remedy the apparent inaccuracy of the Aitareya in permitting 80 *satobṛhatīs* in the *bārhatī aśīti*. Its success is not obvious, and that the attempt should be made may fairly be reckoned a sign of lateness.

24, 1) Then three tristichs, 'Who alone bestowed' (RV, I, 84, 7), 'Come hither to what is pressed with stones' (RV, V, 40, 1), and, 'Under whose sway Śambara' (RV, VI, 43, 1) *Gāyatrī* verses become *uṣṇih* verses by equalization Every seven *gāyatrīs* make six *uṣṇihs* (Then come) the hymn beginning, 'If, Indra, I, like thee' (RV, VIII 14, 1) and the two hymns beginning, 'The lord of men' (RV, VIII, 16, 1) He omits the last two stanzas of the second hymn He omits the last stanza of the hymn, 'For the strength that slays Vṛtra' (RV, III, 37) (Then come) three hymns beginning, 'The doer of fair deeds to our aid' (RV, I, 4, 1) Then two hymns beginning, 'Indra, lasting wealth' (RV, I 8, 1) He omits the last stanza of the hymn, 'Who has brought from afar' (RV, VI, 45) Then come three stanzas of the hymn beginning, 'Let splendid feasts be ours' (RV, I, 30, 13) (Then comes) the *sūdadohas* verse In the case of all these three sets of eighty tristichs, there is made a pause after the half stanza The eighty tristichs are the food, and the *vaśa* verses are the stomach (of the bird) The *vaśa* hymn begins,[1] 'Worthy of thee, O wealthy one' (RV, VIII, 46, 1), and ends 'Gainer, gainer of good' (ibid, 20) The verse, 'Giving wealth' (ibid, 15) is a *dvipada*, and, 'Now then' (ibid) an *ekapada* It ends with the verse, 'Of that milk yielder' (RV, VIII, 69, 3) (Then comes) the *sūdadohas* verse

---

[1] Cf I, 5 1 The explanation of the number 21 stanzas given by Sayana there and here is that the passage ends with verse 20 and the *sudadohas* verse makes up the 21 This view may be supported by the fact that the *sudadohas* verse is here set out with its *pratika* It is most probable that we should understand that the 21 stanzas are made up by the inclusion of the *sudadohas* verse and then that there follows again that verse in its usual capacity of separating the different parts of the whole Sayana does not clearly appear thus to have taken it, but it seems most probably so, and the translation is based on this view

Śankhayana in Aranyaka, II 11, and Śrauta Sutra XVIII, 14, takes the whole hymn, VIII 46, as being used The priority of the Aitareya is evident as vv 21 24 contain a *dānastuti* of Pṛthuśravas The same remark applies to the Śatapatha Brahmana, see Eggeling, *S B E*, XLII, 312

It is worthy of note that an annotator in S² considers that Sāyana's explanation of the number 21 is inconsistent (this is not the case) and inaccurate He argues that the 21 stanzas are made up by splitting ver 15 into an *ekapadā* and a *dvipadā* This view is at first sight plausible but the mention here of these divisions is more probably due to an explanation of *yathopapadam* in I 5, 1, and so Sayana there takes it. The other view is, however, accepted by Eggeling, *S B E*, XLIII, 112 n 2, who points out that the version of the Mahaduktha contained in MS Ind Off 1729 D gives ver 15 as an *ekapada* and a *dvipada*, which certainly tells against Sayana.

For *gayatris* and *usnihs*, cf Ṛgveda Prātiśākhya, XVI 10 sq, for *sampada*, Śāṅkhāyana Śrauta Sūtra, XV, 10, 5

Adhyāya 3.

(Then come) the thigh (verses)[1] In the hymn, 'O Indra and Agni, ye two' (RV, VIII, 40), (he recites) the half-stanzas as *gāyatrīs*,[2] but the second half of the second as an *anuṣṭubh*, up to the last stanza The hymn, 'To thee, the mighty, the intoxicated one' (RV, X, 50), has *nivids* inserted. Between the two hymns, 'Who in the forest as it were has been set down' (RV, X, 29), and 'Who first is born, the wise one' (RV, II, 12), are[3] inserted the hymn, 'Come hither standing on thy chariot-seat' (RV, III, 43), and the stanza, 'Wandering alone in the midst of many' (RV, X, 55, 5) As many decades[4] of verses in *triṣṭubh* and *jagatī* addressed to Indra as they insert, after transforming them into *bṛhatīs*, so many years may a man be fain to live beyond the normal life, at the rate of ten verses for a year[5]; or he need not do so (Then come) the hymn, 'That steed impelled by the gods' (RV, X, 178), and the *ekapada*,[6] 'Indra rules all' (Then comes) the *anuṣṭubh* hymn, 'All songs have caused Indra to grow' (RV, I, 11) Having recited the first half stanza of the first stanza of this hymn, he combines[7] the first half-stanza of the second stanza with the second half-stanza (of the first stanza) (joining) quarter-stanza with quarter-stanza so as to make *anuṣṭubhs* Up to the last stanza he combines every succeeding half stanza with the preceding The rest are done in the usual way. (There are) six verses beginning, 'Drink, Indra, the Soma, let it gladden thee' (RV, VII, 23, 1) Having recited four verses of the hymn, 'Thy place, O Indra, is made on thy seat' (RV., VII, 24), and then joining[8] the last stanza, he ends with the second last stanza The Śastra finished,[9] he mutters the *ukthasampad* In the place of the *ukthavirya* the *ukthadoha* is used

---

[1] Cf I, 5, 1 The verses are RV, VIII, 40, 1–10, X, 50, 1–7, X, 29, 1–18; III, 43, 1–8; X, 55, 5, II, 12, 1–15, X, 178, 1–3, an *ekapadā*, I, 11, 1–8; VII, 23, 1–6; VII, 24, 1–4, 6, 5

In Śāṅkhāyana the *vaśa* hymn is followed, XVIII, 15, by the *dvipadās*, I, 2, 2, above; then comes the *Aindrāgna sūkta*, VIII, 40 Then the *dvapana*, RV, X, 167, 1, II, 21, 1–6; I, 84, 10–12, VII, 31, 10–12, VI, 46, 1–3 Then the *anuṣṭubha samāmnāya*, RV, I, 10, 4–12, I, 11, 1–8, I, 84, 1–6, I, 72, 2–5, I, 176, 1–5, V, 35, 1–7, V, 38, 1, 2, V, 39, 1–4; VI, 44, 1–6, VIII, 34, 1–15, VIII, 63, 4, 6, VIII, 89, 5, 6, VIII, 95, X, 152 Then the *triṣṭupchala*, RV, I, 33, VI, 25, II, 12, II, 14, III, 42, III, 46, III, 51, 4–6, IV, 16; VII, 24, VII, 23, VIII, 69, 13–15 See Śrauta Sūtra, XVIII, 16–20, Āranyaka, II, 12–16 These confused masses of verses show distinctly the later character of the Śāṅkhāyana ritual See also Śatapatha Brāhmaṇa, VIII, 6, 2, 3 where RV, X, 50, is called the spine, IX, 1, 1, 44, 3, 3, 19 in the last passage the *vaśa* is given as 35 in Eggeling (*S B E*, XLIII, 223), which must be an error as there are only 33 verses cf. Introd, p. 36

[2] The second verse is a *dvipadā* in *śakvarī* The first three feet make up a *gāyatrī*, that is, they are recited with a pause after the second foot and *om* after the third The second four feet are recited as an *anuṣṭubh*, with a pause after the second and *om* after the fourth The last is a *triṣṭubh*, and it is recited by *pādas*, that is, a pause after the first foot and *om* after the second. The remaining ten verses are in *mahāpaṅkti*, and therefore are each divided into two *gāyatrīs* for recitation It is characteristic of the deliberate differences between Aitareya and Śāṅkhāyana that the latter, XVIII, 16, divides ver 2 into an *anuṣṭubh* and a *gāyatrī*, not *vice versa*.

[3] That is, if one desires life (Sāyaṇa) See n 5 For X, 55, 5, cf Ludwig, *Ṛgveda*, III, 186, Hillebrandt, *Ved Myth*, I, 465

[4] Cf I, 5, 2, n 6 Sāyaṇa here renders *daśatīḥ* as verses produced in the Saṃhitā, which is a collection of ten Maṇḍalas. But the *daśata* below certainly suggests that it means decades as probably in I, 5, 2

[5] This must be the meaning, and so Sāyaṇa takes it He, however, takes *na vā* as meaning that each *bṛhatī* produces a year of life, contradicting the ten *bṛhatī* rule This is not impossible, in which event he points out the insertion of the nine *triṣṭubh* verses gives eleven *bṛhatīs* or eleven years' longer life But it is not natural, and it ignores *triṣṭubjagatīnām*, there being no *jagatīs* in the nine verses, and therefore in accordance with the ordinary use

2. 'Thou art the head of the world,[1] the essence of speech, the fire of breath,

---

of *na ta* in Āśvalayana (e g Śrauta Sūtra, VI, 5 22), Śaunaka's pupil,* I take it to mean that, unless one is *ayuṣkama* one need not insert the verses Cf Sayana's note *yady ayuṣkamaḥ syat tadanim* *prakṣipet*, whence it appears that he did not regard the *avapana* as essential He may be combining two differing previous comments. The idea is curiously inverted

[6] Not in the Ṛgveda See Samaveda I 456, Vajasaneyi Saṃhitā XXXVI 8, Āśvalayana Śrauta Sūtra, VIII, 2, 21, Sāmavidhana Brahmana, II, 6, 7, which all have *viśvasya rajati*

[7] See I 5, 2, n 12 Śaṅkhayana XVIII 20, applies the same combination to the *vidudrahmiya* hymn RV, VII, 23 The first and last half stanzas in both cases are left unaltered The other sets of four *padas* are treated as *anuṣṭubhs*

[8] For a formal definition of *saṃtata* see Āśvalayana Śrauta Sūtra, I, 2 10

[9] In the Agniṣṭoma the *prakṛti* the Niṣkevalya Śastra Eggeling, *S B E*, XXVI, 339 n, ends with a Mantra *ukthaṃ vacindrayopaśrṇvate tva* Āśvalayana Śrauta Sūtra, V, 15 23 of which *uktham vacindraya* forms the *ukthasampad*, and the rest the *ukthavirya* The Hotr here recites the *sampad* but in the place of the *ukthavirya* come the *ukthadoha* i e the verses set out in V 3 2 For the *ukthavirya* cf V, 1 5, n 6 Haug, *Aitareya Brahmana*, p 177 Eggeling *l c*, 327, n Caland and Henry, *L Agniṣṭoma*, p 233 Sayana ascribes the verses and formulae to a *takhaṃ tura* as usual

[1] The rendering of these verses is very doubtful and I have mainly followed Sayana The difficulty is increased by the fact that E has here no accents, and Rājendralala has apparently followed a most corrupt MS or has scattered accents at random They do not occur in Śaṅkhayana Both Rajendralala and the Anandāśrama edition print the verses with stops only at *sárvaṃ vyóma pinvati* and *duhanam* (and in the former case also at *asi*), as if they were prose They seem clearly, however to be intended as verses and I have divided them into *jagatis* with mixed *triṣṭubhs* *Indraḥ* may belong to the first verse, and other divisions are no doubt possible but the original metrical form of e g *ṛtám satyám vijigyanám vi ácanam* is certain For similar cases of verse treated as prose cf Aitareya Brahmana, VIII, 25, 3 and 27 2 and 3 where *ślokas* appear in prose form In VIII, 27, 3 *bhavati* is two syllables only

---

* The Bṛhaddevata IV, 139, in the 'B recension mentions Āśvalayana, and though this may point to the verse being late, it may also be quite correct, since a pupil of Śaunaka appears to have been the author of the Bṛhaddevatā, cf Macdonell I xxiv and Āśvalāyana was evidently one of his oldest pupils

the abode of mind, the entrance of the eye, the source of the ear, the resting place of the heart, thou art all (Thou art) Indra, the undying sacrifice, the ambrosia, the sky, right, truth, conquest, decision, the end of speech, the pervading, that which is beyond all, the light, the udder, the unanswerable, that which was before Thou art all,[2] speech, the water with the lightning that goes thither and returns,[3]

---

as elsewhere A striking example of verse disguised as prose is the inscription on the Piprahva *stupa*, see Fleet, *J R A S*, 1907, pp 111 sq, following, with minor differences, Thomas, *J R A S*, 1906, pp 462 sq In the Aitareya, *ll cc*, we have —

> *kṣatreṇa kṣatram jayati balena balam aśnute |*
> *yasyaivam vidvan brāhmaṇo rāṣṭragopaḥ purohitaḥ ||*
> *tasmai viśaḥ samjānate sammukhā ekamanasaḥ |*
> *yasyaivam vidvan brāhmaṇo rāṣṭragopaḥ purohitaḥ* || 25 || || 2 ||
> *tasya rājā mitram bhavati* (2 syll) *dviṣantam apabādhate |*
> *yasyaivam vidvan brāhmaṇo rāṣṭragopaḥ purohitaḥ |*
> *tasmai viśaḥ*, &c , as above,

and in other places fragments of verse appear, as is only natural since gnomic sayings like them tend in all languages to become verse The old character of these Ślokas appears from their metrical form, and they may be compared with the verse cited from Śatapatha Brāhmaṇa, XI, 5, 4, 3, by Oldenberg (*S B E*, XXX xix) Similar verses composed at later dates are found in the characteristic late metre in the Gṛhya Sūtras, quite freely (Oldenberg, *l c*, xxxv-xxxvii), one being attributed (Āśvalāyana Gṛhya Sūtra, IV, 7, 16) to Śaunaka and Ślokas are recognized in the lists of compositions, e g Bṛhadāraṇyaka Upaniṣad, II, 4, 10, IV, 1, 2, see Sieg, *Die Sagenstoffe des Ṛgveda*, pp 7 sq

[2] Sāyaṇa has *yasya yasya vastuno yad yat pūrvam kāraṇam rūpam tat sarvam rūpam*, and he explains *parāg arvāg* as *uttamādhamarūpā vāk*

[3] *Sāpreti* is so explained by Sāyaṇa, and *parāg* and *arvāg* probably go with *salilam* In the Jaiminīya Upaniṣad Brāhmaṇa, I, 9, 10, this passage from *Indraḥ* *amṛtam duhānam* appears, but in a different connexion and in an inferior perhaps secondary, form, which looks as if it were borrowed from the Āraṇyaka. The parallelism has escaped not only Oertel but also Bloomfield (*Vedic Concordance*) Quite irrelevantly appear the words (the *gāyatrī* as *brahman* is the subject of discourse) *tasyaitāni nāmānīndraḥ karmākṣitir amṛtam vyomānto vācaḥ | bahur bhūyaḥ sarvaṃ sarvasmād uttaraṃ jyotiḥ | ṛtam satyam vijñānam vivācanam aprativācyam | pūrvam sarvam sarvā vāk | sarvam idam eṣā dhenuḥ pinvate parāg arvāk* || 9 || *sā pṛthakṣalilā kāmadughākṣitiḥ prāṇasaṃhitā cakṣuḥśrotraṃ vākprabhūtam manasā vyāptam hṛdayāgram brahmaṇābhaktam annasubham varṣapavitram gobhagam pṛthivyuparam tapastanur varuṇaparivāraṇam indraśreṣṭham sahasrākṣaram ayutadhāram amṛtam duhānā sarvān imānl lokān abhikṣarati* | Oertel renders, 'These are its names Indra, action, imperishableness, the immortal, end of the firmament of speech, the manifold, the numerous, the all, the light higher than the all, righteousness, truth distinction decision which is not to be contradicted, the ancient all, all speech This all also, [like] a cow, fattens hitherward, thitherward She that milks immortality possessing individual oceans (?), possessing wish granting imperishableness, connected with breath possessing sight and hearing, superior by speech, permeated by the mind, having the heart as its point, apportioned to the Brahmans, pleasant through food, having the rain as means of purification (!) cow-protecting higher than the earth, having penance as a body, having Varuna as an enclosure, having Indra as leader, possessing a thousand syllables, possessing ten thousand streams, flows in all directions unto all these worlds' It

which yields milk and fattens[4] (Thou art) the eye, the ear, breath, that which is

---

should be noted that the MSS read *vivyktanam*, a clear error for *vivigvanam*, properly a perf part. middle of √*ju* (cf Whitney, *Sanskrit Grammar*, § 809), a word elsewhere unknown but of interesting function (for *g*, cf Wackernagel, *Altindische Grammatik*, I 146), which is rendered very probable by the metre, *aprakstuvyah* (C), *sa cakṣu srotram*, *hṛdayegram*, *brahmanabhra itram* (a), °*bhratram* (B), °*bhrtram* (C), *Varunaparyatanam*, *duhanah* These readings confirm the *brahmanabhartrkam* of the Āranyaka text *Hṛdayegram* is no doubt a possible and an easy conjecture, but Sayana already had *hṛdayegram*, and its appearance here certainly shows that the tradition hardened to *hṛdayogram* at a very early date *Annasubham* is tempting, but uncertain as Sayana read *annasubha* Cf Śatapatha Brahmana, IX, 5, 1, 12, *sat, anrte vacam* for Maitrayaniya Samhita, III, 7, 3, *satyanrtam* So in Atharvaveda XIV, 1, 11, *śrotra* replaces RV, X, 85, 11, *śrotram* quite wrongly (cf Whitney, *Translation*, p 742) I consider therefore that (especially in view of the accent) it is very likely that *ānnasubham* should be replaced For *hṛdayegram* if it really is = *hṛdayagram* might be compared Maitrāyaṇī Upaniṣad, VI, 35, *dvadharmondham* for °*andham* (Max Muller, *S B E*, XV, lii) But error of text is easy *Vyomanto vacah* must, I think, be divided into *vyōma* and *ānta vācah* The sense ascribed to *Indrasresthum* is possible, and *Indrajyestham* may mean (as in RV, AV, and TS) 'having Indra as its best' *Varunaparyatanam* may perhaps be right, but it is far from certain, and Sayana had *varunam ayatanam*, a more recondite form (see n 12 on II, 4 3) than that of the Brahmana The words *bahur bhuyas* should be *bahor bhuyah* This example answers the query of Speyer, *Vedische und Sanskrit Syntax* § 122, n 2, as to whether the idiom 'ausser als aus' is Vedic as well as classic (his *Sanskrit Syntax*, § 251 3) The same phrase is found in V, 1, 5 in a Mantra passage, and in the parallel passage, Śāṅkhāyana Āranyaka I, 8 Cf also such phrases as *bahu ca me bhuyas ca me*, Taittirīya Samhitā IV, 7 4, 1, *J R A S*, 1909

The accents of the R edition are very incorrect *Vasdumala* is quite impossible In the case of the compounds R has *hṛdayográm*, *brahmaṇābhartrkám* *vārṣapaśītram* *vākprabhūtām*, *prthivyupárām*, *tilpaśānu*, *Indrajyéṣṭham* *ayutākṣáram*, *brāhmaṇavarcasam*. *Varsapasitram* is supported by *varsānirnij* (RV), and *varsámedas* (AV, °*medhas*, AV Paipp), *sahásradharam* by the RV, *ayutāksaram* by analogy with *sahásradharam*, &c, *tilpaśanu* and *brahmanábhartrkam* depend on analogy *Indrajyeṣṭham* has abundant authority *gārhagam* may be compared with *gómagha* (RV), but cf *grbhāq* (RV) *Vākprabhūtam* and *satyasammitam* are supported by usage (Macdonell, *Vedic Grammar* p 96 Wackernagel, *Altindische Grammatik*, II, i, 227 sq), and *hṛdayogram* is probable (Whitney, *Sanskrit Grammar*, § 1287 a, gives several examples of different accents, Wackernagel, pp 238 sq, decides for accent on the first member as usual in determinatives with adjectives at the end (for examples, cf p 233) On this analogy, *prthivyu parám* may be right or possibly we should read *prthivy uparam* as two words, but the gender of *uparam* would be strange if it is a noun (meaning either 'lower Soma stone' (RV, AV, but cf *Ved Stud* I, 108 sq), or 'lower part of sacrificial post' (VS)), since there it is always masc (cf n. 5) The accent on *hṛdayogram* must remain doubtful, but if it is a case of a past part, the accent should be on the first None of these words have found their way into Wackernagel's lists

For similar cases of double accent in MSS, cf Scheftelowitz, *Die Apokryphen des Rgveda*, pp 39, 49 (from *B*), Wackernagel, p 40, points out that in cases of compounds the Atharvaveda, XIX and XX, Śatapatha Brāhmana, Taittirīya Āranyaka and Maitrāyanī Upaniṣad (he ignores this work) are very badly accented His theory of accent (pp 40 sq) lays stress on the fact that determinatives (save those with verbal second parts—other than forms in *ta*, *ti*) originally had the accent on the first part and only later on the second The accents here must depend to some extent on (*a*) the validity of the theory, (*b*) the view as to the age of the Āranyaka.

[4] *Pinvate* as it stands spoils the construction, but may be right. Possibly it was originally

measured by truth, which is produced by speech, and proceeds from the mind, what is truth in the heart, and borne by Brahmins (Thou art) food and prosperity, purified by the rains, rich in cows, that beyond the earth,[5] to which Varuna and Vāyu most resort, that which has for its body penance,[6] has Indra as its mightiest which milks ambrosia, with a thousand streams and countless letters[7] These, O hymn, are thy powers, there are the powers of speech[8] With these for me now milk the great wealth of ambrosia Prajāpati created this prayer, the essence of the Vedas With it may I obtain all; let it win all desires greatly. Thou art *bhūh*, *bhuvah*, and *svar*, the three, thou art the Veda[9] Milk, O prayer,[10] children for me Life and breath milk for me. Cattle and folk milk for me Prosperity and glory milk for me The world (to come), splendour of renown, courage, prosperity in sacrifice, milk for me.' All this he makes the Adhvaryu repeat, if he does not know (the Mantras) Then being urged on to sacrifice (by the Adhvaryu, who says), '*Om*,[11] offer the Soma singer of the hymn,'

---

punati (cf Whitney, *Sanskrit Grammar*, § 716), the nom. of the participle, or *punatu*, reading *dhenuh* The Jaiminiya Upanisad *punvate* may arise from a misreading of *s* or *v*

[5] *Gobhagam* may mean 'prospering cows', and *varsāpavitram*, 'purifying by rains' *Pṛthivyuparām* is *yupasya mūlam* (Sayana) If this is correct (cf n. 3), the next adjective may belong to it or to *tāpastanu*, but it is much more likely to be merely = 'beyond the earth', as in the Jaiminiya Upanisad, which has *Varunaparyatanam* and *annasubham*, 'pleasant through food'

[6] Apparently we must follow Sayana and supply *munisarvajatam* or something similar The verses are late in character, and *tāpastanu* might mean 'lean through penance', but the translation of Oertel 'having penance as a body' is at least as probable (cf the accent) The *uktha* is blindly praised

[7] *Dūhanam* is taken as nom neut Sayana renders it as with *gokulam* *Ayutaksaram* is due, he says, to the fact that there are so many syllables in the *dohanaprakarana*, *vasūnām pavitram asi sahasradhāram* (Taittiriya Samhitā, I, 1, 3 1, Maitrayani Samhitā I, 1, 3) He takes *ayutaksaram* and *sahasradhāram* as accus agreeing with *amrtam* They are perhaps more probably nominative

[8] Or, as Sayana, 'these sounds are thy powers.' Bloomfield (*Vedic Concordance*, p 300ᵃ) reads *ukthabhir tajah* The other seems simpler *uktha* and *vac* are easily identified, or rather the latter lies at the base of the former For *apyasam*, cf Whitney, *Sanskrit Grammar*, §§ 921 925, 573 c, Delbruck *Altindische Syntax*, pp 352, 353

[9] The conjecture *vedas* for *vedā asi* is easy, but unnecessary, cf n 11 on III, 2, 4, RV, II, 6, 7, I 45, 6, II, 3, 6, III, 14, 3, &c. See also Asvalayana Grhya Sutra, I, 15, 3 for *veda 'si* To take *trayo*, &c, as a separate Mantra is wrong

[10] Sāyana takes *brahma* as accusative I prefer to regard it as vocative, despite the apparent parallelism of the next sentences For another neuter voc, cf II 7, n 1 Kātyayana Śrauta Sutra VII, 4 13 has *prajām me dhuksva*, and also *āyur me dhuksva, paśūn me dhuksva* On the other hand Atharvaveda, X, 8, 25 has *adhah—brahma va tapaś ca*

[11] Cf V, 3 3 The Adhvaryu utters the *praisa* twice, see Āsvalāyana Śrauta Sutra, I 5, 3 *ekaikam presito yajati* See Schwab, *Agnistoma*, p 58, for the phrase, and for the gen, Whitney, *Sanskrit Grammar*, § 297 b, Delbruck, *Altindische Syntax*, p 160

uttering the cry, 'We who sacrifice,' he offers sacrifice with the usual[12] (stanza), and holding back as it were his breath, repeats a secondary *vaṣaṭ*[13] The accompaniment of the *vaṣaṭ* is described elsewhere[14] The Adhvaryu brings up the vessel containing the libation and the (three) *atigrāhya* bowls[15] As soon as he perceives the food, the Hotṛ descends from the swing towards the east[16]

---

[12] RV, VII, 23, 1, see Āśvalāyana Śrauta Sūtra, V, 15, 23 *piba somam Indra mandatu tvā* yājyā, and VII, 11, 27 For the *āgur*, see ibid, I, 5, 3, 4 *āgur 3 yyadir annyajavaryani* || 4 || *ye3 yajāmaha ity āgūḥ* See also Hillebrandt, *Ritual Litteratur*, pp 101 sq, *Neu- und Vollmondsopfer*, p 95, Eggeling, *S B E*, XLIV, 31, n 1.

[13] *Anuvaṣaṭkṛ* is freely used as a compound verb in the Aitareya Brāhmaṇa (I, 22, 4, &c), Āśvalāyana Śrauta Sūtra, and Śāṅkhāyana Śrauta Sūtra and should be written as *one word* *Vyānaṃśa* is rendered *uchvasam akṛtva* by Sāyaṇa, who takes *ava* as *ana* The reason for the expression *anuvaṣaṭ* is given in Hillebrandt, *Ritual Litteratur* p 102, Eggeling, *S B E*, XXVI, 351, n 1 After the *yājyā* the Hotṛ says *devā 3 vau 3 ṣaṭ* and *somasyāgne vīhi 3 vau 3 ṣaṭ*, thus making two *vau 3 ṣaṭ* cries For the *vaṣaṭkāra*, cf Āpastamba, Yajñaparibhāṣā, 96 (*S B E*, XXX, 341) The words *somasyāgne vīhi* occur in Aitareya Brāhmaṇa, III, 5, 4, 6 Āśvalāyana Śrauta Sūtra, V, 5, 19, and the brevity of this passage is only explained by the fact (see the following note) that the writer clearly knew the Āśvalāyana Śrauta Sūtra (cf Introd, p 19) cf the relation of Gṛhya Sūtra and Śrauta Sūtra in the case of Āśvalāyana and Śāṅkhāyana Oldenberg, who once thought the evidence was in favour of assigning the two Sūtras of Śāṅkhāyana to different epochs, has now abandoned the attempt and leaves the question open (see *S B E*, XXIX, 5, 6 XXX, xxxix sq), while I am inclined to think that there is no evidence worth counting against the traditional authorship in either case

[14] Cf Āśvalāyana Śrauta Sūtra, I, 5 17 *vāg ojaḥ saha ojo mayi prāṇāpānāv iti vaṣaṭkāram uktvoktvānumantrayate* | This is a direct reference Cf also Aitareya Brāhmaṇa, III, 8, 9 where it reads *tam anumantrayeta vāg oja saha oja mayi prāṇāpānāv ity ātman eva tad hotā vācaṃ ca prāṇāpānau ca sthāpayati sarvāyuḥ sarvāyutvāya* The reference here might be supposed to be to the Brāhmaṇa passage and not to the Śrauta Sūtra, but the use of *anumantraṇam* and the mode of reference are hopelessly opposed to this view The style of reference is reminiscent of Āśvalāyana Gṛhya Sūtra, I, 1, 1 *uktāni vaitānikāni gṛhyāṇi vakṣyāmaḥ* which is a clear reference to the Śrauta Sūtra, and I think an assertion of the identity of authorship It may be noted that, although Oldenberg (*S B E*, XXIX, 158) clearly indicates that he has some novel view on the relations of Śaunaka and Āśvalāyana, he does not (in *S B E*, XXX) carry out his promise of discussing the point, save that (ibid p xxxv n 2) he alludes to the fact that Āśvalāyana Gṛhya Sūtra, IV, 7, 16, quotes a *yajñagāthā* by Śaunaka. This of course in no way contradicts the view of the relation as pupil and teacher reflected in the tradition of the Kathāsaritsāgara and recorded in the most precise terms by Ṣaḍguruśiṣya The B version of the Bṛhaddevatā, which probably was composed by a pupil of Śaunaka s distinctly quotes Āśvalāyana, which suits the tradition admirably (p. 293, note*)

[15] Cf Āśvalāyana Śrauta Sūtra VII, 5 22, Śāṅkhāyana Śrauta Sūtra, XVIII, 21, 10, *[illegible] atigrāhyān* They are drawn 'over and above' (ati), Weber, *Ind Stud*, IX, 235, Eggeling, *S B E*, XXVI, 402, n 4, XLI, 6, n 2

[16] Cf I, 2, 43 Śāṅkhāyana Āraṇyaka, II, 17, Śrauta Sūtra, XVIII, 21, 6, 7 For *yathā na* with fut., cf. Delbrück, *Altindische Syntax* pp 296 sq, Speyer, *Vedische und Sanskrit Syntax*, §§ 197, 277 This case illustrates admirably the origin of the use in its relation of *us* and the 2nd person, see also Maitrāyaṇī Saṃhitā, II 2, 7, IV, 1, 9, Taittirīya Saṃhitā II 2, 2 1, *J A O S*, 1909

Then they tie up the swing to the west that it may not slay the reciter when about to eat. For the Hotr eats seated on the place of the swing. Then the Hotr consumes the (libation in the) vessel with the words uttered in response,[17] 'May speech, the deity, rejoice in the Soma,' 'May Soma, the King, shower life on me for my breath,' 'May my breath milk mightily all life' The third pressing (in this rite) is taken over[18] from the last day of the Abhiplava rite, except as regards the hymn containing *nivids* addressed to the All-gods (RV, I, 89) In its place are inserted forty-one verses of the 'water' hymn of Dirghatamas, 'Of that noble grey sacrificer' (RV, I, 164) and the hymn *ānobhadrīya* (RV, I, 89) The strophe and antistrophe of the Vaisvadeva Śastra are taken over from the one day form[19] (the Visvajit) If the Yajñayajñiya Saman is omitted,[20] then the strophe and antistrophe (in the Āgnimāruta Śastra) consist of the six stanzas beginning, 'O Agni, thy fame, thy strength' (RV, X, 140, 1) when the Ilanda Saman is employed (three stanzas being used) If more (than three) are used in this Sāman, then so many are employed (in the Śastra) as the antistrophe, beginning, 'Agni, for ourselves as it were' (RV., X, 21, 1) Thus is completed the Mahāvrata and this day and the Agniṣṭoma[21] At the proper time they should carry the swing to the bath, and burn together the seats

---

[17] *Upasrutena* is explained by Sayana as *uttaranujñapurvakena*, the word occurs often in Śānkhayana Śrauta Sutra, but not in a parallel passage. Cf, however, XVIII, 1, 12 The verse *vag devi (jusana) somasya trpyatu* is found in Vajasaneyi Samhita, VIII, 37, and elsewhere, Bloomfield, *Vedic Concordance* p. 853ᵇ *Sa me*, &c., is a quasi verse It is tempting to render *ayuh* as if it were a dative, 'may Soma rain on me for life for breath,' and it might possibly be so taken as the sentence is a Mantra and therefore not to be judged by the ordinary rules of prose (cf Bloomfield, *Vedic Concordance*, p viii) In that case *ayuhpranaya* would not be a *tatpurusa* compound, since 'the breath of life' is not in Sanskrit *ayuhprana*, nor yet a *dvandva*, but rather a case in which the mere base is accepted as sufficient to denote the case relation when followed by a case form in a parallel word cf e g RV, I, 26, 9, where Max Muller would so render (see Oldenberg, *S B E*, XLVI, 15) *Amrta martyanam*, and see Pischel, *Vedische Studien* I 60 sq, 225 sq, Jacobi, *Gott gel Anz*, 1880, p. 855, Wackernagel, *Altindische Grammatik*, I, xvii, and II, 1, 157, who accepts this view of RV, I, 26, 9 Cf, however, Aitareya Brahmana *l c* on n. 14 where *sarvayuh sarvayutvaya* occurs. The gen is one of partitive force, cf Delbruck, *Altindische Syntax*, p 160, Monro, *Homeric Grammar*², p. 146 For loc with *ā*, cf Aitareya Brahmana, VI, 3, 10 for acc exx. in *Ind Stud*, IX 295

[18] For the Abhiplava, see Āsvalayana Śrauta Sūtra, VII, 6, Eggeling *S B E*, XXVI, 403 It has six days. The hymn referred to is RV, I, 89, cf Śānkhayana Śrauta Sutra, XVIII, 21, 8 The hymn, RV, I, 164, 1, is called *salila* also in Śānkhayana Aranyaka, II, 18, and Śrauta Sutra, XVIII, 22 7 It is of course derived from v 41, *gaurir mimaya salilani taksati*, cf. also Bṛhaddevata IV, 43

[19] The Vaisvadeva Śastra begins therefore with RV, V, 82, 1-3, 4-6 The contents of it and the Agnimaruta are given in full in I, 5, 3, which explains the brevity with which they are here treated Śānkhayana Śrauta Sutra, XVIII, 22 (cf Śānkhayana Āranyaka, II, 18), gives the Śastra as RV, V, 82, 1-3 4-6, IV, 53, I, 160, I, 161, I, 164 (the whole), and I, 89 with *nivids*, and V, 53 5, as a *paridhaniya* *Anobhadriya* is used as a name of I 89 also in Ṛgvidhana, I, 20, 5, but Bloomfield (*Vedic Concordance* p 169ᵇ) does not cite this passage, which is earlier

[20] The Agnimaruta for the Śānkhayana is given in detail in Śānkhāyana Śrauta Sūtra, XVIII, 23, cf Āranyaka, II, 18 It consists of RV, III, 3, V, 55, the Yajñayajñiya or a substitute, VI, 48, not noted by Bloomfield (*Vedic Concordance*, p. 735ᵃ) who omits also any reference to this passage, I, 141 If the Yajñayajñiya Saman is employed, the Āgnimāruta Śastra constitutes itself in the Aitareya thus RV, III, 2, I, 43 6, V, 55, VI, 48, 1 and 2, VII, 17, 11 and 12, I, 99, 1, X, 9, 1, &c, the rest being as in the *prakrti* (Sāyana) If the Ilanda Saman is

3 No one[1] who has not been initiated should recite the Mahavrata, nor

---

used, then for the two *pragathas*, VI, 48, 1 and 2, and VII, 17, 11 and 12, are substituted X, 140, 1–3, and 4 6 respectively, being the two parts of the Ilanda Saman If, however, all the six stanzas (X, 140, 1–6) are used for the *stotriya*, then X, 21, 1 6, must form the *anurupa* So Śankhayana, who gives further variations For the Ilanda cf Oldenberg *Gott gel Anz*, 1908 p 714

[21] The Mahavrata is a form of the Agnistoma and so in a sense the Agnistoma is finished The utensils and the swing are both cleansed, while the *vedi* and the *ṛsis* are both consumed by fire Śankhayana Śrauta Sūtra XVIII, 24, develops the final close of the ceremony in some detail The Āranyaka, II, 18, has *tad Agnistomah samtisthate* The burning points clearly to an original sun spell The question, however, has recently been raised whether the use of fire is not merely piacular, cf Frazer, *Adonis, Attis, Osiris* p 151, n 4, Westermarck, *Origin and Development of Moral Ideas*, I, 56 n 3 The usual view is that both the burning and the waving of torches in such rites are intended to evoke heat by magic Cf Warde Fowler, *Roman Festivals*, p 84

[1] Sayana as usual, ignores the difficulties of this passage (1) The words *ity eke* most probably refer to the whole passage (cf III 2, 4, n 2), because the very first prohibition contradicts the passage above V, 1, 5 n 5, when the case of an *adiksita* Hotr is deliberately discussed The sense then must be as Eggeling (*S B E*, XLIII, 367, n 1) takes it, that (1) no one but a *diksita* can recite, and even he only (2) if there is a *cityagni*, and (3) a year long *sattra* and (4) not even he for another unless he be father or teacher It may be noted that Śankhayana Aranyaka, I 1, prohibits recitation to another, save in the case of *sattrins* and of a father and a teacher, which corresponds with the rule here, since *sattrins* of course are entitled to recite for one another But ibid, I, 5 and Śrauta Sutra XVII, 13, 6, regard a *cityagni* as optional, perhaps a later idea (cf Weber, *Ind Stud* XIII, 217, n.) The rule of those here cited thus excludes the Mahavrata as anything but a *sattra* Katyayana Śrauta Sutra, XVI, 1, 2, insists on an altar at the Mahavrata (Eggeling *S B E*, XLIII xxv, n 2) But it should be noted that this is inconsistent with the exception of the father and the teacher, for they could only be concerned—being *ex hypothesi* not *sattrins* in an *ekaha* or *ahina* rite Possibly however the view that one can recite for a father or teacher does not contemplate the case of an *ahina* or *ekaha*, but means that in a *sattra* the sacrificer may carry out the sacrifice for the benefit of his father or teacher though they are not initiated and cannot take part themselves, this view I incline to think the most probable, despite Dr Friedlander's view (p 29, n 2) It cannot mean that, the teacher or father being *diksita*, the Hotr recited for them only, for in the Mahāvrata all the *sattrins* equally obtain the benefits of the rite (cf Eggeling, *S B E*, XLIII, xxv sq), and therefore are forbidden to perform for others outside the circle of the initiated,[*] cf Śatapatha

---

[*] *It may be noted that the prohibition of performing sacrifices by other than Brahmins is* ascribed in the Śatapatha Brahmana, II, 3 1, 39 (cf Kātyāyana Śrauta Sūtra, IV, 14 11, Max

should he recite it when there is no altar, nor should one recite it for another, nor if it does not last a year, so say some Only one may recite it for a father or a teacher, for that is recited for oneself[2] (The only[3] utterance (of the

---

Brāhmana, IX, 5, 2, 12 and 13, X, 5, 2, 5 (2) Presumably for this reason Sayana renders the passage as equivalent to 'no one who is not *diksita* should recite the Mahavrata at another's sacrifice (i e an *ahina* or *ekaha*) unless there is a *cityagni*, or unless that other is a father or a teacher His explanation is that the Mahavrata is of three forms, *ekaha*, *ahina*, and *sattra* As in the *sattra*, the *yajamana* and Hotr are identical, then the *diksa* is automatic. In the other two rites the Hotr is not the *yajamana*, and may be either *diksita* or *adiksita* In the Agnistoma, &c, if *svarthe* he is *diksita* as these are Soma sacrifices (cf Hillebrandt, *Ritual Litteratur*, p. 125) If the sacrifice is not a Soma one then he is not Only the *diksita* can perform at a *parakiya mahavratakarman*, and he only if there is a *cityagni* But all this is very difficult and inconsistent The *nasamnatisara ity eke* he takes as a separate prohibition confined to one school But this seems less likely (3) Max Muller, *S B E*, I, 266, 267, takes the passage thus 'No one who is adikshita, uninitiated, should recite it for another person, nor should he do so, when the Mahavrata is performed without (or with) an altar, or if it does not last one year' But this hardly makes sense, since an *adiksita* can never recite if there is a *sattra*, and the construction of the sentence shows that the series of prohibitions is not directed to an *adiksita* but to a priest in general He is not to recite if *adiksita*, nor if there is no fire, &c. Dr Friedlander, on Śankhayana Āranyaka, I, 1, follows Max Muller, without commenting on the difficulties. (4) The only other possibility is to render, 'No one who is not initiated must recite, nor must one recite if there is no fire, nor for another (i e allowing *ahinas* and *ekahas* if by chance the *yajamana* is the Hotr in fact)' Some say, 'nor if it be not a *sattra* One may recite for a father, &c In this case the passage confirms in part the view that there was probably a *cityagni* at the *ekaha* and *ahina* rites, Eggeling *S B E* XLIII, xxv

[2] Śankhayana Āranyaka, I, 1, has *atmane hy asya tac chastam bhavati* The one gives the body, the other learning *Atmano* here is no doubt correct as less easy than *atmane* It is a predicative possessive gen, as in I, 2, 2, n 8 Cf Whitney, *Sanskrit Grammar*, § 298, Speyer, *Vedische und Sanskrit Syntax*, § 64 For *asya*, cf. Caland, *Ueber das rit Sutra des Baudh* pp 44 45

[3] Sayana says *atra kascid vakyantaram adhiyate* This can hardly refer to recitation, and throws grave doubt on Winternitz s interpretation of a similar phrase in Haradatta (*Mantra patha* I, xix) The passage is given in all the MSS., but it cannot be original In addition to being quite out of place, it is almost unintelligible here It is a general description of the *praisa* of the Adhvaryu in the case of Śastras, whether accompanied by *Narasamsabhyacamasas* or not. In the case of the Hotr's Śastras the *praisa* is *uktha a yaja somasya* In the case of the Hotrakas, what it is is disputed Sayana says (1) some supply *ukthasi yaja somanam* (cf Katyayana Śrauta Sutra, IX, 13 33 (*somasya*), 14, 12 (*somanam*), Apastamba Śrauta Sutra, XII, 27, 19 (*somasya*), 28, 14 (*somanam*)) and make this the *praisa*, (2) others, *so 'yam arthah prakrtita eva prapta iti matva*, reject the passage, (3) others repeat *ukthasa yaja somasya*, and assume the mention here is *hotrakanam sastresu vaiseanabhidhanartham* The second alternative is the most probable The words *ukthasa—somanam*, which appear in the text after *hotrakanam*, are certainly spurious and cannot have been read even by Sayana, whose note would be

---

Müller *S B E*, XXX, 321), to the fact that Brahmins only can eat the remains of a sacrifice The reason is no doubt a reflex of the doctrine of the presence of the divinity in the sacrifice (which in certain cases forbids any eating whatever, e g Āśvalayr ḥya Sutra IV, 8, 31), for which see my article in the *J R A S*, 1907, pp 939 sq Robertso *of Sem*, I, 276 sq

Adhvaryu) on the Hotṛ's Śastras, whether accompanied or not by libations for Narāśaṃsa, is 'Offer the Soma with the hymn', and it also occurs in the Hotraka's Śastras) This day one should not teach to one who is not a regular pupil, and has not been so for a year, assuredly not to one who has not been so for a year, nor to one who is not a *brahmacārin* and does not belong to the same school,[4] assuredly not to one who does not belong to the same school, nor to one who has not come to that place[5] There should not be more than one saying or twice, twice only[6] 'One man should tell it to one,' says Jatūkarṇya 'Not to a child or a man in the third stage of life'[7] Nor standing to one standing, nor walking to one walking, nor lying to one lying nor seated on a couch to one so seated, but seated on the ground to one so seated (should the teacher teach) Nor (should the pupil) lean backwards,[8] nor forwards, nor be over clothed, nor adopt postures, but he should raise his knees, without wearing special apparel, and so learn He should not learn when he has eaten flesh, or seen blood, or a dead body, or done what is unlawful, or anointed (his eyes) or oiled or rubbed his body, or had himself shaved, or bathed, or has put on colour, or put on a wreath, or had intercourse, or written,[9] or obliterated

---

unintelligible if he had had them before him The reason for their insertion is obvious For the libations of *L Agnistoma* p 220 The gen is presumably partitive, cf Speijer, *Vedische und Sanskrit Syntax*, § 67 V 3, 2, n 17

[4] Cf Gautama Sutra, XIV, 21, and Buhler's note in his translation (*S B E*, II), where he differentiates it from *sahādhyāya* Here, however, it is perhaps used in that usual sense

[5] Where the teacher lives He is not to go to the pupil's house

[6] Because it is so sacred According to Sayana, Jatukarnya insists on one lecture only to one person at a time, and the same teacher to avoid *sampradayavicheda*

[7] This sentence must also belong to Jatukarnya This seems the proper way to interpret the *iti* which, however Sayana explains as *ityaprayuktanitedharamaptyarthah*, and so Max Muller takes it For the idea cf *Manu*, VIII, 66, &c

[8] I e lean on a *kuḍi* (or a wall), &c, Apastamba Dharma Sutra, I 2, 6, 17), or rest with his hands on a stick (on the ground Āpastamba, l c., 17) The other renderings follow Sayana, who gives *ucchritadyakramana* for *nouratyam akramya*. cf Aśvalayana Śrauta Sūtra XII 8, 19. For *atvaritaḥ*, cf Manu, VIII 23 *samahitanguh* For *napatena karayitva* he has *nakhanikṛnta nadi* cf Śāṅkhāyana Gṛhya Sutra VI, 1 6, and for the syntax, Delbrück, *Altindische Syntax*, pp 224 sq He takes *nakina* as referring to the eyes. *Varnakenanulipya* he refers to sandal or saffron being smeared on, for *varnaka* cf Bohtlingk, *Dict*, VI 24 For *anapaśrita* ibid., I, 41 For these rules, cf Āpastamba, I, 2 6, 23-27

[9] These translations follow Sayana and Max Muller Though they no longer 'seem to be the earliest mention of actual writing in Sanskrit literature', in view of the discoveries of Buhler, *Indische Palaeographie* and *Ind Stud* III (1898), Hoernle, *J A S B*, LXIX, pt i, Rhys Davids, *Buddhist India*, ch VII and others they are interesting Writing on palm leaves may be meant rather than on wood The violent repugnance to writing shown here and elsewhere is certainly in favour of this view, accepted by Macdonell (*Sanskrit Literature*, p 16) and Winternitz (*Gesch der indisch Litt*, I, 29), that writing first came into use on the South Western Coast through commerce and that MSS are later For a different but very improbable view, cf R Shamasastry, *Ind Ant* 1906, *J R A S*, 1907 pp 426, 427

writing. 'He should not finish learning this in one day,' says Jātūkarṇya 'He should do so,' says Gālava 'He should finish all before the sets of eighty tristichs, and resting[10] in another place learn the rest,' says Āgniveśyāyana. Where he learns this, he should learn nothing else, but where he learns something else he may at will learn this there also He who does not study this does[11] not become a *snataka*, even though he study much else, yet if he study not this, he does not become a *snataka* Nor should he forget this, even though he forgets something else, he should not forget this Assuredly[12] never should he forget this If he forget not this, let him know that it is enough for himself[13] Let him know that truly it is enough[14] He who knows this should not communicate[15] nor dine nor amuse himself with one who knows this not

Now[16] we shall set forth the rules of study When the old water about the roots of the trees has been dried up,[17] he should not study, nor in the forenoon,[18] when the shadows meet, nor in the afternoon, nor when a thick cloud has risen; and when rain[19] falls out of season he should stop his study of the Veda[20] *for three nights, nor in this time*[21] *should he tell tales, nor even*

---

[10] *Śamayamanaḥ* is taken as *samapayan* by Sāyana, which is possible I follow Max Muller On the passage as a whole, cf Oldenberg *Prolegomena*, p 393. On the form Āgniveśyāyana, cf Whitney, *Sanskrit Grammar*, § 1219 It occurs as a name of a grammarian in the Taittirīya Prātiśākhya XIV 32 Agniveśya occurs in the Vamśas in Bṛhadaranyaka Upanisad, II 6, 2, and IV, 6, 2 in both Kanva and Madhyandina Śākhas (Max Müller *S B E*, XV, 118, n , 186, n) Jatūkarṇya (the word is found in the *gana*, *gargadi*) occurs in the same passages with Gālava. The spelling seems clearly Jatu° though in Max Muller's translation the two forms Jatu° and Jatū° occur Jatukarnya occurs in Śankhayana Aranyaka VIII, 10 and frequently in the Śānkhayana Śrauta and Gṛhya Sutras (III 10 1) Katyāyana's Śrauta Sutra the Vajasaneyi Prātiśākhya, and in Kausitaki Brahmana, XXVI 5 Galava is known to Nirukta IV, 3, Bṛhadaranyaka, II 6 3 IV, 6 3, Bṛhaddevata, and Panini as a grammarian see Max Muller *Rgveda Prātiśākhya* p 6

[11] 'Should not become' is Sayana's version Literally it must be 'is not a (true) *snataka*'. Cf Āpastamba Dharma Sutra I 2, 8, 27 The exact force of the optative is rather doubtful it may be that it is the indefinite use of which examples undoubtedly occur in Sanskrit (cf Speijer, *Vedische und Sanskrit Syntax*, § 283 also in III 2, 1 n 1 and Introd , p 61) or it may be an opt in protasis with the apod in the indic. to denote the certainty of the result though the rule of similarity of mood is usually strictly observed in the older language see Whitney, *Sanskrit Grammar* § 581 f who enforces his rule partly by alterations in the text of the Maitrayanī Samhita (see his review of v Schroeder's ed., *P A O S* Oct. 1887) *J R A S*, 1909, p 153

[12] Sayana says that this is read by some only It is in all the MSS, but is an easy addition Cf n. 14. As here and above follows a negative sentence and is practically merely an emphatic negative as usual in classical Sanskrit, Speijer *Vedische und Sanskrit-Syntax*, § 240, *Sanskrit Syntax* § 402 R 1, cf Caland, *Ueber das rit Sutra des Baudh.*, p 51

[13] Sayana renders *purusarthaya* and Max Muller gives as possible for acquiring a knowledge of the self For the dat. cf II 4 2 *Atman* however is merely the ordinary reflexive Speijer, *Vedische und Sanskrit Syntax*, § 127, Delbruck *Altindische Syntax*, pp 208 262

[14] This again Sayana says, is read only by some and as it is one of those easy additions it cannot be accepted as genuine Naturally a chapter of this kind lies open beyond others to such interpolations as this.

[15] Sāyana renders *samvādita* as 'study with' (*tasya purata grantham* [illegible]). The sense is probably 'enter into discussion with' *asaṃvādya* and *anevaṃvid* here are clearly compounds cf Wackernagel, *Altindische Grammatik* II, I 68

[16] Then come general rules for all Vedic study not for the Mahāvrata alone These are found both

---

in Gṛhya and Dharma Sūtras (Oldenberg, *S B.E.*, XXX, xxxiv, xxxv); Khādira Gṛhya Sūtra, II, 11; cf Śāṅkhāyana Gṛhya Sūtra, IV, 8, VI, 1; Hillebrandt, *Ritual Litteratur*, p 56 and reff, Gobhila Gṛhya Sūtra, III, 3; Āpastamba Dharma Sūtra, I, 3, 9–11; Gautama Dharma Sūtra, XVI, with Buhler's notes.

[17] The time after the full moon of Pauṣa, i e. January–February is meant, cf. Weber, *Die vedischen Nachrichten von den Naxatra*, II, 321 sq., Oldenberg, *S B E*, XXX, 77, n; Āpastamba Dharma Sūtra, I, 3, 9, 2, with Buhler's note, Manu, IV, 95, Yājñavalkya, I, 142, 143 The four months after the full moon of Āṣāḍha are forbidden in Śāṅkhāyana, VI, 1, 1 The term is five months, beginning in the middle of Śrāvaṇa, Gautama Dharma Sūtra, XVI, 1 sq; of Prauṣṭhapada, Gobhila Gṛhya Sūtra, III, 3, 1; Khādira Gṛhya Sūtra, III, 2, 16. Śrāvaṇa is also given by Āśvalāyana Gṛhya Sūtra, III, 5, 2, 3; Śāṅkhāyana Gṛhya Sūtra, IV, 5, 1; Pāraskara Gṛhya Sūtra, II, 10, 2; Hiraṇyakeśi Gṛhya Sūtra, II, 18, 1. The tmesis *upa mapite* is very unusual, but *upapurāṇe* would be almost equally strange, though not impossible *Kakṣodake* is a curious expression, as explained by Sāyaṇa The separation of prefix and verb is (see Caland, *Ueber das rit Sutra des Baudh*, pp 48, 49) rare in the late Sūtra style and is difficult to assume here, though this may be quoted from an older (? metrical) text *Upapurāṇa* seems elsewhere unknown in the sense 'somewhat (?) old'. Nothing is indeed more characteristic of the Vedic Sanskrit than the separation of particle and verb Holtzmann (*Grammatisches aus dem Mahabharata*, p 48) says that the only example* in the Epic occurs in a pseudo Vedic hymn to the Aśvins, I, 3, 62 *devā adhi vitoe vasaktah* Even the Bṛhaddevatā has no certain case of such separation On Jacobi's theories of the beginning of the year (*Festgruss an Roth*, pp 68–74), see Whitney, *J A. O S*, XVI, lxxxii sq, Buhler, *Ind Ant*, XXIII, 238–249 (dates of the commencement of Vedic study at p 249), Thibaut, ibid, XXIV, 85–100, Oldenberg *Z D M G*, L, 451 sq

[18] When study is permissible (hardly 'at any time' as in Max Muller), he must not so study in the forenoon or afternoon, when shadows are meeting, i e he should begin at sunrise when the shadows first appear, and cease before sunset when they again disappear (Sāyaṇa).

[19] *For the case of a cloud, cf* Āpastamba, I, 3, 11, 31 Rain out of season (ibid, 27, Manu, III, 104, combines the two into a cloud out of the ordinary in the rains) is explained by Sāyaṇa as rain falling in months other than Śrāvaṇa and Bhādrapada, August and September, or according to the Smṛtikāras, under Nakṣatras other than the 13 from Ārdrā to Jyeṣṭhā

[20] The study of Vedāṅgas, like *vyākaraṇa*, is not prohibited (Sāyaṇa) He adds *ārdrādi jyeṣṭhāntasya trayodaśanakṣatraparimitasya kālasya vṛṣṭikālatvam abhyupetya tato 'nyatra vṛṣṭau satyam akālavṛṣṭinimittam trirātrādhyayanavarjanam uchants*

[21] *Asmin* is vague Sāyaṇa gives either *adhīyamāne saṃdhyāye* or *mahāvratādhyayanakāle* The rendering 'at that time' of Max Muller is perhaps intended to refer to the *trirātram*, since the translation continues 'not even during the night, nor should he glory in his knowledge', since *asya* seems to be taken with *rātrau* *Trirātram*, of course, includes days, so that the rendering is quite possible, though probably the first of Sāyaṇa's alternatives is correct For the acc, cf Speijer, *Vedische und Sanskrit Syntax*, § 28 and reff The instr is one of separation, ibid, § 33, Whitney, *Sanskrit Grammar*, § 283 The usual case is the abl, Speijer, § 52, Delbruck, *Altindische Syntax*, p 446, who ignore this passage

---

* But cf. the warning as to Holtzmann's accuracy in Buhler, *Ind Ant*, XXIII, 146, and Winternitz's review there cited. In this case the fact seems substantially correct

at night at this time be fain to set them forth[22] 'This'[23] is the name of this great being He who knows thus 'this' as the name of it, becomes *brahman*

---

[22] The text reads *nasya ratrau ca na ca kirtayiset* Sayana, followed by Max Muller, takes this as consisting of two sentences (1) *nasya ratrau ca*, (2) *na ca kirtayiset* Sayana renders, (1) *kimcasya mahavratasya patham ratrau na kuryat*, (2) *kimca mahavratabhijño 'ham ity evam janamadhye kirtim api necchet* Max Muller's version, which is much more probable, is cited above But 'not even at night' would more properly be *na ratrau cana* than *na ratrau ca* cf III, 1, 3 *naiodyumne cana*. Further *kirtayiset* is quite impossible The form required is *cakirtayiset*, and no easier error than *cana cakirtayiset* being changed to *cana ca kirtayiset* can well be conceived Then the whole must mean I think, 'nor even at night in this time (probably *adhiyamane svadhyaye*) should one be fain to proclaim (tales)' The *adhyayana* takes place during the day (see above) and neither then nor *even* at night, when the *adhyayana* stops, is the telling of tales to be permitted. For the form *cakirtayiset*, an optative from a denominative (cf Whitney, *Sanskrit Grammar*, § 1056), see Whitney, § 1068 Such forms are very rare, hence the non recognition of this case by the commentators. Cf also Aitareya Brahmana III, 30 *vars kalpayisan* where Aufrecht (p 430) proposes to read *cakalpayisan* (presumably by haplography for *vars cakalpayisan*), I, 24, 5 *alulobhayisat* (cf Liebich, *Panini*, p 32 n) Apastamba Srauta Sutra XII, 24 5 *bibhaksayisat*, Kathaka Samhita, XXII 3 *pipayayiset*, *Ind Stud*, IX, 264, Holtzmann, *Grammatisches aus dem Mahabharata*, p 46

[23] Sayana renders followed by Max Muller, 'This, the *krtsnadhyayanakhyam mahavratavakyam va*, thus learned (= *iti*) is the name of the *paramatman*.' He explains that the Veda produces *brahman* and so is identified with it and its sacred character resulting from this power causes the long list of *niyamas* here given This cannot be right. The word *tad* is the name of the *brahman*, see I 3 4 where this is most expressly stated

The end of the section renders it probable that it may be accepted as coming from Śaunaka Otherwise the passage would be suspect since it contains passages whose genuineness was doubted even before Sayana and the possibility of it all being an interpolation cannot be entirely excluded The use of *brahman* is striking especially in the *pred*, and confirms the view that *brahmā* is not to be found save on good grounds in any early texts. For Atharvaveda IV, 35 2, see Weber *Ind Stud* XVIII 140 for Maitrayani Samhita, II, 9 1 see v Schroeder, *Ind Lit*, p. 91, n 1 Muir, *Texts* V, 373 finds him in Śatapatha Brahmana XI 5 6, 9 &c, but needlessly Hopkins *Religion of India* p 193, and Oldenberg *Buddha*⁴, p. 30 n 1, are vague The *St Petersburg Dict*, V, 138, cites Taittiriya Brāhmana, II, 7, 17, 1, as the oldest passage, but Sayana's view may be wrong and none of the passages in Macdonell, *Vedic Mythology*, p 168 are necessarily so taken He occurs, of course in the Taittiriya Aranyaka X, but that is not early, though its lateness has been needlessly exaggerated on insufficient grounds. Eggeling (cf *S B E*, XLIV, 315) finds him nowhere in the comparatively late Śatapatha, though he appears in the Bṛhadāranyaka Upanisad (cf Deussen *Phil of the Upanishads*, pp. 172 sq), and in the later Upanisads and in the earliest Buddhist texts, which however can only be doubtfully dated.

APPENDIX

ŚĀNKHĀYANA ĀRANYAKA VII–XV

THIS Appendix contains the text of Śānkhāyana Āranyaka, VII–XV, edited from the Berlin MS Orient, fol 630 (A)[1] and Bodleian MS Sansk e 2[2] (B) The Bodleian MS, which is at least 200 years old, save for ff 65 and 87 which were replaced in A D 1781, is extremely accurate on the whole, and the text which it presents is in most cases also supported by parallel readings in other Upanisads and Āranyakas In many cases the old method of denoting the *e*, *ai*, *o*, *au* is retained, but not consistently, showing that the MS belongs to the period of transition to the new style. Frequent errors are (1) the reduction of double consonant to single, e g *tare dvisantam*, XII, 20, (2) the insertion of a needless *h*, e g *sapatnahksayanam*, XII, 19 this may be a mere graphical sign as apparently in the Manava Grhya Sūtra[3], (3) haplography, e g *pramiye tare(d)*, XII, 20, hence probably *bhavisyah* for *bhavisyatiti* in IX, 7, (4) the writing of *ī* for *i*, e g *marīcir*, VIII, 7 Many, though not all, of these errors have been corrected in a later hand, or sometimes by the first hand in the margin The most serious source of error is probably omission, see e g VIII, 2, n 7, 4, n 3 As usual *ch* is written for *cch* in all cases,[4] and *l* replaces *l*, I have restored *cch* and *l* Further as the text is attached to the Rgveda, I have treated two verbal prefixes as each separate and accented, as usual in the text of the Rgveda[5] Both MSS agree in several errors, e g the omission of *trayasya* and the reading *sicyet* (for *sicyeta*) in VIII, 2

The following list gives the correspondence between the two texts of the Aitareya and the Śankhayana Aranyakas —

AITAREYA ĀRANYAKA	ŚANKHĀYANA ĀRANYAKA.

The verses in Adhyāya XII sometimes make nonsense, and could be corrected from the parallel texts. But all that can usefully be done is to edit what apparently was the text of the Āraṇyaka, recognizing that it already contained much that in the course of oral tradition had become corrupted. This is the principle on which Winternitz has edited the Mantrapāṭha,[1] and is the only sound method of procedure

[1] See his Preface, pp. xx sq

[1] *nirbhujah°* A B [2] *enam* (*m* for assimilated *n*) B. [3] Add B sec m [4] *evainam* A B pr m *enam* B sec m. [5] *°yanti tam* B. [6] *bhavata* B pr m [7] *na ca* A, B [8] 11 A, B See Aitareya Aranyaka III 1 3 In the latter part *bruvantam* and *para* and *upavadet* for *bruvan param* and *upavadet* seem essential giving the reasonable sense "if one is rebuking one who says the *nirbhuja* the one (the latter) should say 'Thou hast fallen from the two lower (*avara*) places.'" So in the case of the *pratrnna* the two upper places are referred to but in the case of the *ubhayamantarena* rebuke is impossible and no reply is suggested It would really be more natural to put the words of the apodosis in the mouth of the rebuker but besides the difficulty of *avara* and *uttara* it is hardly possible that the section should give directions for cursing persons who recite

Atha khalv ahur nirbhujavaktrah | purvam evaksaram purvarupam uttaram uttararupam yakaravakarav¹ antarena sa samhiteti | sa ya evam etam samhitam veda samdhiyate prajaya pasubhir yasasa brahmavarcasena svargena lokena sarvam ayur eti || 11 ||²

ADHYĀYA XII

Om | hastivarcasam prathatām bṛhadvayaḥ |
yad Adityai[1] *tanvaḥ sambabhūva |*
tan mahyam samaduḥ sarvam[2] *ete |*
Ādityāso Aditya[3] *samvidānāḥ* || 1 ||

yat te varco jātavedaḥ |
bṛhad bhavaty āhitam |
tena mā varcasā tvam |
Agne varcasvinam kuru || 2 ||

yac ca vāca vā puruṣe |
yac ca hastiṣv āhitam |
suvarṇe goṣu yad varcaḥ |
mayi tad hastivarcasam || 3 ||

yad akṣeṣu hiraṇyeṣu |
goṣv aśveṣu yad yaśaḥ |
surāyām pūyamānāyām |
mayi tad hastivarcasam || 4 ||

mayi bhargo mayi mahaḥ |
mayi yajñasya yad yaśaḥ |

tan mayi Prajāpatih |
divi dyām iva dṛṁhatu ||5||[4] ||1||[5]

[1] *ta* B pr m [2] *sarva* A, B sec. m as in Atharvaveda, III, 22, 1; cf Whitney's translation, pp 126, 127 This verse has on the whole better readings than the Atharvaveda. [3] *Adityāh* B [4] I have, for convenience, numbered the verses throughout. The text in the MS is only divided into sections. I have also printed the verses in Pādas without Sandhi [5] For ver 1, cf Atharvaveda, III, 22, 1, ver 2, cf ibid, III, 22, 4 and 3, vers 3, 4, cf ibid., XIV, 1, 35, VI, 69 1, ver 5, cf ibid, VI 69 3 (with *divi dyam iva dṛṁhatu*), Sāmaveda, I, 603 (with *parameṣṭhi* for *tan mayi*) B omits *divi*

Aśvinā saraghena mā |
sam anktām[1] *madhunā payah* |
yathā madhumatīm vācam |
āvadāni janesu ||6||
ghṛtād ulluplo[2] *madhumān payasvān* |
dhanamjayo dharuno dhārayiṣṇuh |
ruJan sapatnān[3] *adharāmś ca kṛnvan* |
ā roha mām mahate saubhagāya ||7||
Prajāpate na tvad etāny anyah |
viśvā jatāni pari tā babhūva |
yatkāmās te juhumas tan no astu |
vayam syāma patayo rayīnām ||8||[4]
ayam sano[5] *nudatām me sapatnān* |
Indra iva Vṛtram pṛtanāsu sālha |
Agnir iva kakṣam vibhṛtah purutra |
vātesu nas tigmajambho 'nu marṣṭi ||9||
ayam sano yo 'nuvādī kila |
Indra[6] *iva Vṛtram vi puro ruroja* |
anenendro vi mṛdho vihatya |
śatruyatām ā bhara bhojanāni ||10||[7] ||2||

[1] *samahan* A, *sammahan* B. Presumably an imperative from √*mah*, trans, *Aśvinā* being voc The parallel, Atharvaveda, VI 69, 2 (= IX, 1 19), has *madhunānktam subhaspati*, and in the last Pāda *avadāni janān anu* which is better metre and syntax. I read °*anktam*, for synt cf *J R A S*, 1908, p 1124 [2] *urlupto* A, B Cf Atharvaveda, V, 28, 14, XIX, 33, 2, 46 6 Scheftelowitz, *Die Apokryphen des Ṛgveda*, p 118, ver 9 a, below, ver 34 [3] *sapat nad* B [4] = RV, X 121 10 and see Bloomfield, *Vedic Concordance*, p 612, below, ver 35 [5] *sa yo* B [6] *kila* (*kīla* A) *iva* only A, B The parallel with *Indra* above seems conclusive In both cases *Indra iva* (or *Indro na*) must be read *metri causa* B has *viduro* corrected to *viro* [7] Last line = RV, V 4, 5, &c

jayendra śatrūn jahi śūra dasyūn |

ma jñātaram asata mā[6] pratiṣṭhām |
mitho vighnanā upa yānti mṛtyum || 14 ||

Agne yaśasvin yaśase sam arpaya |
Indravatīm apacitim iha vaha |
ayam murdhā parameṣṭhī suvarcaḥ |
sajātānām uttamaśloko astu || 15 ||[7] || 3 ||

---

[1] The metre requires °*śena vṛkṣa* [2] *śopat* B the word being no doubt misunderstood [3] *pra vi* A, B, but not only this is bad metre (in no case is the metre good, but *an vṛkṣa* may be read), but the *vi* following renders the double prefix most improbable [4] *amitrāñ chūre* A B, possibly for *sa varsva(n)tam* [5] *viśak* A B [6] So I read The verse is a mutilated version of Atharvaveda, VI, 32, 3 (= VIII, 8, 21) *ma jñātaram ma pratiṣṭhām vindanta | mitho vighnānā upa yantu mṛtyum* See also Āśvalayana Gṛhya Sutra, III, 10, 11 *J A O S*, XXVI 227 B has *tatamdh, pratiṣṭhamako vighnanām yati* A has *sho, vijñātām* The text is merely a conjecture [7] Cf Taittirīya Saṃhitā, V, 7, 4 3ᵃ⁻ᶜ, ending *samānānām uttamaḥ śloko astu* Either *sa ju°* or *sajāt°* is possible, and *uttamaḥ śloko* or *uttamaśloko*

bhadram paśyanta upa sedur agan |
tato dīkṣām ṛṣayaḥ svarvidaḥ |
tataḥ kṣatram balam ojaś ca jātam |
tad asmai devā abhi sam namantu || 16 ||[1]

dhātā vidhātā paramota saṃdṛk |
Prajāpatiḥ parameṣṭhī suvarcaḥ |
stomam chandāṃsi nivido ma āhuḥ |
etasmai rāṣṭram abhi sam namantām || 17 ||[2]

abhy ā vartadhvam upa sevatāgnim |
ayam śāstādhipatir no astu |

asya vijñānam anu sam rabhadhvam |
imam paścād anu jīvatha sarve ‖ 18 ‖[3]

alardo[4] *nāma jāto 'si* |
purā sūryāt purosasaḥ[5] |
tam tvā sapatnakṣayaṇam[6] |

But this is all on f 87, which is a recent restoration and is of no authority The number XV is given in the Berlin MS to the Vamśa, which ends *iti Śamkhayanaranyake pamcadaśo 'dhyayah* || *cha* || *samaptah* || *śubham bhavatu* || *svasti samvat* 1734 *varse asāḍhaśuddha* 13 *śanau abhyamtaravanagaranyātiyarajanagaramadhye* | *Rajapure vastavyam [illegible]* || *pamdyasimhajinrsimhaputrapautrapathanartham* | The Vamśa clearly begins with the author of the Aranyaka i e Gunakhya, why Oldenberg (*S B E* XXIX 4 5) should think the author of the Sutras is meant I cannot understand See also my *Śankhayana Aranyaka*, p. 71

INDEX I

QUOTATIONS FROM RGVEDA.

(The first numbers in brackets denote the reference in the Samhitā The second, the page and column of Bloomfield's *Vedic Concordance* The *pratīkas* are given exactly as in the Samhita text, except that the original forms *in pausa* are restored References marked Ś are to the Sankhāyana Āranyaka)

Agnim naro dīdhitibhir araṇyoḥ (VII, 1, 1^{a}), I, 1, 2 (11^{b}) Ś I, 2
Agnir netā—sa vṛtrahā (III, 20, 4$^{b c}$), I, 2, 1 (15^{b})
Agne tava śravo vayaḥ (X, 140, 1^{a}), V, 3, 2 (23^{b})
adaḥ su madhu madhunābhi yodhīḥ (X, 120, 3^{d}), I, 3 4, V, 2, 6 (49^{b})
Aditir mātā sa pitā sa putraḥ (I, 89, 10^{b}), III, 1, 6 (50^{b}), Ś VII, 15
adya no deva Savitaḥ (V, 82, 4^{a}), I, 5, 3 (53^{a}), Ś II, 18
anaśvo jāto anabhīśur ukthyaḥ (IV, 36 1^{a}), I, 5, 3 (61^{a})
anuṣṭubham anu carcūryamāṇam (X, 124, 9^{c}), II, 3, 5 (67^{a})
anne samasya yad asan manīṣāḥ (X, 29, 4^{c}), I 5, 2 (not in Bloomfield, 75^{a})
apaśyam gopām anipadyamānam (I, 164, 31^{a}), II, 1, 6 (79^{b}) Verse cited in full
apāṅ prāṅ eti svadhayā gṛbhītaḥ (I, 164 38^{a}), II, 1 8 (81^{a}) Verse cited in full
abodhy agniḥ samidhā janānām (V, 1, 1), I, 1, 1 (89^{b})
abhi tvā pūrvapītaye (VIII, 3, 7^{a}), V, 2, 2 (91^{b})
abhi tvā śūra nonumaḥ (VII, 32, 22^{a}), V, 2, 2 (91^{b})
abhi pra vaḥ surādhasam (VIII, 49, 1^{a}), V, 2, 4 (92^{b})
abhūr eko rayipate rayīṇām (VI, 31, 1^{a}), V, 2, 2 (97^{a})
ayam te astu haryataḥ (III, 44, 1^{a}), V, 2, 4 (105^{b}), Ś II, 9
aśvāyanto maghavann Indra vājinaḥ (VII, 32, 23^{c}), V, 1, 6 (128^{a}).
Aśvinā yajvarīr iṣaḥ (I, 3, 1^{a}), I, 1, 4 (129^{a})
asat su me jaritaḥ sābhivegaḥ (X, 27, 1^{a}), I, 2, 2, V, 1, 1 (132^{a}) Ś I, 3
asya vāmasya palitasya hotuḥ (I, 164, 1^{a}), I, 5, 3, V, 3 2 (145^{b}), Ś II, 18

aganma vṛtrahantamam (VIII, 74, 4^{a}), I, 1, 1 (154^{b})
agnim na svavṛktibhir (X, 21, 1^{a}), V, 3, 2 (155^{a})
ā gha ye agnim (VIII, 45 1^{a}), V, 2 3 (155^{b})
ā tu na Indra kṣumantam (VIII, 81, 1^{a}), V, 2, 2 (158^{b})
ā tena yātam manaso javīyasā (X, 39, 12^{a}), II, 3 8 (159^{a})
ā te maha Indroty ugra (VII, 25, 1^{a}), V, 1, 2 (159^{a}).
ā tvā ratham yathotaye (VIII, 68, 1^{a}), I, 2, 1 (161^{a}) Ś I, 3
ād it pratnasya retasaḥ (VIII, 6, 30^{a}), III, 2, 4 (162^{b})
ā dhūrṣv asmai (VII, 34, 4^{a}), V, 2, 2 (167^{b})
ā na Indro dūrād ā na āsāt (IV, 20 1^{a}), V, 2, 2 (167^{b})
ā no bhadrāḥ kratavo yantu viśvataḥ (I, 89, 1^{a}), I, 5, 3. (V, 3, 2 as *ano bhadrīyani*, not in Bloomfield) (169^{b})
ā no viśvāsu havyaḥ (VIII, 90, 1^{a}), V, 2, 4 (170^{b})

a yatam Rudravartani (I, 3, 3^{c}), I, 1, 4 (179^{b})
a yahi vanasa saha (X, 172, 1^{a}), II, 2, 2 (180^{a})
a yahy adribhih sutam (V, 40, 1^{a}), V, 2, 5 (180^{a})
a yahy arvan upa bandhuresthah (RV 222^{c}) (III, 43, 1^{a}), V, 3, 1 (180^{b})
a vrtaso 'vataso na kartrbhih (I, 55, 8^{c}), II, 1, 6 (189^{b})
a sasate prati haryanty ukthā (I, 165, 4^{c}), I, 2, 2 (190^{b})

itthā hi soma in made (I, 80, 1^{a}), V, 2, 2 (198^{a})
idam vaso sutam andhah (VIII, 2, 1^{a}), I, 2, 2 (198^{b}), Ś I, 3
Indra it somapa ekah (VIII, 2, 4^{a}), V, 2, 3 (206^{b})
Indram visva avivrdhan (I, 11, 1^{a}), I, 5, 2, V, 2, 1 (207^{b})
Indra medya ed ihi (VIII, 53 5^{a}), I, 2, 2 (210^{b})
Indram id gāthino brhat (I, 7, 1^{a}), V, 2, 1 (212^{a} RV, I, 7 1–9 are called *arkavat* in V, 4, 1)
Indravayu ime suta (I, 2, 4^{a}), I, 1, 4 (213^{a}) Padas ^{a} and ^{b} are cited
Indrasya nu viryani pra vocam (I, 32, 1^{a}), V, 2, 2 (215^{b})
Indragni yuvam su nah (VIII, 40, 1), I, 5, 2, V, 3, 2 (220^{a})
Indraya sama gayata (VIII, 98, 1^{a}), V, 2, 5 (223^{a}) Ś II, 10
Indraya hi dyaur asuro anamnata (I, 131, 1^{a}), V, 1, 1 (223^{b})
Indra yahi citrabhano (I, 3, 5^{a}), I, 1, 4 (224^{a})
Indra yāhi tūtujana (I, 3, 6^{a}), I, 1, 4 (224^{a})
Indra yahi dhiyesitah (I, 3, 4^{a}, 5, 6), I, 1, 4 (224^{a})
Indro madaya vavrdhe (I, 81, 1^{a}) V, 2, 2 (227^{b})
imam stomam arhate jatavedase (I, 94, 1^{a}), I, 5, 3 (231^{a})
ima nu kam bhuvana sisadhama (I, 157, 1^{a}), V, 1, 2 (234^{a})

inkhayantir apasyuvah (X, 153, 1^{a}), V, 1, 1 (244^{a})

ugro jajñe viryaya svadhavan (VII, 20, 1^{a}), V, 2, 2 (248^{b})
ut tistha Brahmanaspate (I, 40, 1^{a}), I, 2, 2 (256^{b})
ud u brahmany airata sravasya (VII, 23, 1^{a}), V, 2, 2 (261^{a})
ud ghed abhi srutamagham (VIII, 93, 1^{a}), V, 2, 3 (261^{a}).
ud vayam tamasas pari (I, 50, 10^{a}), III, 2, 4 (263^{b})
ubhayam srnavac ca nah (VIII, 61, 1^{a}), V, 2, 4 (272^{b})

ekah suparnah sa samudram a vivesa (X, 114, 4^{a}), III, 1, 6 (296^{a}), Ś VII 18 Verse cited in full.
endra yahy upa nah paravatah (I, 130, 1^{a}), V, 1, 1 (301^{b}).
endra sanasim rayim (I, 8, 1^{a}), II, 2, 5 (302^{b})
esa stomo maha ugraya vahe (VII, 69, 5^{a}), I, 5, 2 (307^{b})

omasah carsanidhrtah (I, 3, 7^{a}), I, 1, 4 (312^{b}).

katara purva katara parayoh (I, 185, 1^{a}), I, 1, 3 (316^{b})
katha mahām avrdhat kasya hotuh (IV, 23, 1^{a}), V, 1, 2 (317^{a}), Ś. I 2
kaya subha savayasah sanilah (I, 165, 1^{a}), I, 2, 2, V, 1, 1 (319^{a})

garbhe nu sann anv esam avedam (IV, 27, 1^{a}), II, 5, 1 (345^{a} the verse is given in full)
gam asvam rathyam Indra sam kira (VI, 46, 2^{c}), V, 1, 6 (346^{b})
gaurir mimaya salilani taksati (I, 164, 41^{a}), I, 5, 2 (355^{a})

citram devanam ud agad anikam (I, 115, 1^{a}), III, 2, 3 (369^{a}), Ś VIII, 4 Verse cited in full.

jajñano nu satakratuh (VIII, 77, 1^{a}), V, 2, 3 (372^{b})
janisthā ugrah sahase turaya (X, 73, 1^{a}), I, 2, 2, V, 1, 1 (371^{b})
jatavedase sunavama somam (I, 99, 1^{a}), I, 5, 3 (376^{b})

tam v abhi pra gayata (VIII, 15, 1^{a}), V, 2, 5 (408^{a}).
tam vodasmam rtisaham (VIII, 88, 1^{a}), V, 2, 4 (387^{a})

tat Savitur vṛṇīmahe (V, 82, 1^{a}), I, 5, 3 (392^{b}), Ś II, 18, IX, 1
tad id āsa bhuvaneṣu jyeṣṭham (X, 120, 1^{a}), I, 3, 4, 7, V, 1, 6 (395^{a}), Ś II, 1
tad devasya Savitur vāryam mahat (IV, 53, 1^{a}), I, 5, 3 (396^{a}), Ś II, 18
tam u ṣṭuhi yo abhibhūtyojāḥ (VI, 18, 1^{a}), V, 2, 2 (406^{b})
tarobhir vo vidadvasum (VIII, 66, 1^{a}), V, 2, 4 (409^{b})
tā asya sūdadohasaḥ (VIII, 69, 3^{a}), V, 1, 6, 2, 5 (second reference omitted in Bloomfield, 419^{b})
tām su te kīrtim maghavan mahitvā (X, 54, 1^{a}), I, 3, 7, V, 1, 6 (420^{a})
tīvrasyābhivayaso asya pāhi (X, 160, 1^{a}), V, 1, 1 (431^{b})
tyam ū ṣu vājinam devajūtam (X, 178, 1^{a}), V, 3, 1 (447^{b})
trikadrukeṣu mahiṣo yavāśiram (II, 22, 1^{a}), V, 1, 1 (448^{b})
tvam soma kratubhiḥ sukratur bhūḥ (I, 91, 2^{a}), I, 2, 1 (455^{a})
tvam hy ehi cerave (VIII, 61, 7^{a}), V, 2, 2 (456^{b})
tvām idā hyo naraḥ (VIII, 99, 1^{b}), V, 2, 4 (466^{a})
tvām id dhi havāmahe (VI, 46, 1^{a}), V, 2, 2 (466^{a})
tvāvataḥ purūvaso (VIII, 46, 1^{a}), V, 2, 5 (466^{b})
tve kratum api vṛñjanti (X, 120, 3), I, 3, 4 (467^{a})
tve ha yat pitaraś cin na Indra (VII, 18, 1), V, 2, 2 (468^{a})

dadī rekṇas (VIII, 46, 15^{a}), V, 2, 5 (470^{b})
dāśvāṃso dāśuṣaḥ sutam (I, 3, 7^{a}), I, 1, 4 (475^{b})

nakiḥ Sudāso ratham (VII, 32, 10^{a}), I, 2, 1, V, 2, 4 (525^{b})
nadam va odatīnām (VIII, 69, 2^{a}), I, 3, 4, 8, V, 1, 6 (528^{b}, where it is not noted that *nada* is used in the Āraṇyaka for this verse) Ś II, 1
na hy anyam baḷākaram (VIII, 80, 1^{a}), V, 2, 3 (544^{b})
nimiṣaś cij javīyasā (VIII, 73, 2^{a}), II, 3, 8 (550^{b})
nūnam atha (VIII, 46, 15^{c}), V, 2, 5 (556^{b})
nṛṇām u tvā nṛtamam gīrbhir ukthair (III, 51, 4^{a}), I, 3, 7, V, 1, 6 (557^{a})

pāvakā naḥ Sarasvatī (I, 3, 10^{a}), I, 1, 4 (581^{b})
pinvanty apaḥ (I, 64, 6^{a}), I, 2, 2 (586^{a})
pibā sutasya rasinaḥ (VIII, 3, 1^{a}), II, 2, 4 (587^{a})
pibā somam abhi yam ugra tardaḥ (VI, 17, 1^{a}), I, 2, 2 (587^{a})
puruhūtam puruṣṭutam (VIII, 92, 2^{a}), V, 2, 3 (595^{b})
puroḷāśam no andhasaḥ (VIII, 78, 1^{a}), V, 2, 5 (596^{a})
prakṛtāny ṛjīṣiṇaḥ (VIII, 32, 1^{a}), V, 2, 3 (607^{a})
prajā ha tisro atyāyam īyuḥ (VIII, 101, 14^{a}), II, 1, 1 (614^{b}). Verse cited in full
pra nūnam brahmaṇas patiḥ (I, 40, 5^{a}), I, 2, 1 (623^{b})
prayajyavo Maruto bhrājadṛṣṭayaḥ (V, 55, 1^{a}), I, 5, 3 (626^{b}), Ś II, 18
pra va Indrāya bṛhate (VIII, 89, 3^{a}), I, 2, 1 (628^{b})
pra vo devāyāgnaye (III, 13, 1^{a}), I, 1, 1 (630^{a})
pra vo mahe mandamānāyāndhasaḥ (X, 50, 1^{a}), I, 5, 2, V, 3, 1 (630^{b})
pra samrājam carṣaṇīnām (VIII, 16, 1^{a}), V, 2, 5 (631^{b})
praitu brahmaṇas patiḥ (I, 40, 3^{a}), I, 2, 1 (643^{a})
pro ṣv asmai puroratham (X, 133, 1^{a}), V, 1, 1 (644^{a})

bṛhad Indrāya gāyata (VIII, 89, 1), I, 2, 1 (649^{b})
Bṛhaspate na paraḥ sāmno viduḥ (II, 23, 16^{d}), III, 1, 8 (654^{a}), Ś VII, 13
Bṛhaspate prathamam vāco agram (X, 71, 1^{a}), I, 3, 8 (654^{a})

bhūya id vāvṛdhe (VI, 30, 1^{a}), I, 3, 7, V, 1, 5 (673^{a})

Marutvāṅ Indro vṛṣabho raṇāya (III, 47, 1^{a}), I, 2, 2, V, 1, 1 (692^{b})
mahāṅ Indro ya ojasā (VIII, 6, 1^{a}), V, 2, 3 (695^{b}), Ś II, 8
mā cid anyad vi śaṃsata (VIII, 1, 1^{a}), V, 2, 4 (702^{a})

Mitraṃ huve pūtadakṣam (I, 2, 7^a), I, 1, 4 (713^b) Padas ^{a} and ^{b} are cited.
mo ṣu tvā vāghataś cana (VII, 32, 1^a), V, 2, 4 (723^b)

ya ānayat parāvataḥ (VI, 45, 1^a), V, 2, 5 (724^a)
ya Indra somapātamaḥ (VIII, 12, 1^a), V, 2, 5 (725^b)
ya eka id vidayate (I, 84, 7^a), V, 2, 5 (726^b)
yaḥ satrāhā vicarṣaṇiḥ (VI, 46, 3), V, 2, 4 (777^b)
yatra brahmā pavamāna (IX, 113, 6^a), III, 2, 4 (741^b)
yad agna eṣā samitir bhavāti (X, 11, 8), V, 1, 1 (749^b)
yad anti yac ca dūrake (IX, 67, 21), III, 2, 4 (751^a)
yad Indra prāg apāg udak (VIII, 4, 1), V, 2, 4 (753^b)
yad Indrāhaṃ yathā tvam (VIII, 14, 1), V, 2, 5 (754^a)
yad vāvāna (X, 74, 6^a), V, 2, 2 (760^b)
yas tigmaśṛṅgo vṛṣabho na bhīmaḥ (VII, 19, 1^a), V, 2, 2 (770^b)
yas tityāja sacividaṃ sakhāyam (X, 71, 6^a), III, 2, 4 (770^b, where the variant in TA is not noted), Ś VIII, 6 Verse cited in full
yasya tyac chambaraṃ made (VI, 43, 1^a), V, 2, 5 (774^b)
ya Indra bhuja ābharaḥ (VIII, 97, 1^a), V, 2, 4 (778^b), Ś II, 9
yāvad dyāvāpṛthivī tāvad it tat (X, 114, 8^b), I, 3, 8 (786^a)
yāvad brahma viṣṭhitaṃ tāvatī vāk (X, 114, 8^d), I, 3, 8 (786^a)
yo jāta eva prathamo manasvān (II, 12, 1^a), I, 5, 2, V, 3, 1 (808^b)
yonis ta Indra sadane akāri (VII, 24, 1^a), V, 3, 5 (810^b).
yo rājā carṣaṇīnām (VIII, 70, 1^a), V, 2, 4 (812^b)
rathaṃtaram ā jabhārā Vasiṣṭhaḥ (X, 181, 1^d), III, 1, 6 (817^b).
rātrīsūkta (X, 127, 1^a), III, 2, 4 (823^b).
revatīr naḥ sadhamādaḥ (I, 30, 13^a), V, 2, 5 (830^b).

vane na vā yo adhāyi cākan (X, 29, 1^a), I, 5, 2, V, 3, 1 (837^a)
vayaṃ gha tvā sutāvantaḥ (VIII, 33, 1), V, 2, 4 (838^a)
vāyav ā yāhi darśata (I, 2, 1^a), I, 1, 4 (860^a) Padas ^{a} and ^{b} are cited.
vārtrahatyāya śavase (III, 37, 1^a), V, 2, 5 (863^a)
vāvṛdhānaḥ śavasā bhūryojāḥ (X, 120, 2^a), I, 3, 4 (863^a), Ś II, 1
vidhuṃ dadrāṇaṃ samane bahūnām (X, 55, 5^a), V, 3, 1 (869^a)
viśo-viśo vo atithim (VIII, 74, 1^a), I, 1, 1 (877^b); Ś II, 2
vaiśvānarāya dhiṣaṇām ṛtāvṛdhe (III, 2, 1^a), I, 5, 3 (906^b)

sakhāya ā śiṣāmahi (VIII, 24, 1^a), V, 2, 5 (951^b)
samitaḥ susaṃdar (VIII, 46, 20^a), V, 2, 5 (966^a)
samidhāgnim (VIII, 44, 1^a), V, 1, 1 (980^b)
sahasradhā pañcadaśāny uktha (X, 114, 8^a), V, 3, 8 (1001^a)
suta it tvaṃ nimiśla Indra some (VI, 23, 1^a), V, 2, 2 (1015^a)
surūpakṛtnum ūtaye (I, 4, 1^a), V, 2, 5 (1021^b)
sūrya ātmā jagatas (I, 115, 1^d), II, 2, 4, III, 2, 3 (1025^b)
svādavaḥ soma ā yāhi (VIII, 2, 28), V, 2, 3 (1054^b).
svādoḥ svādīyaḥ svādunā sṛjā sam (X, 120, 3^a), I, 3, 4, V, 1, 6 (1055^a)

hastacyutī janayanta (VII, 1, 1^b), I, 1, 2 (1065^b)
hotājaniṣṭa cetanaḥ (II, 5, 1^a), I, 1, 1 (1072^b)

In the Śānti verses (see Crit Note on I, 1) also occur[1] —

abhī ṣu ṇaḥ (IV, 31, 3^a), (not in Bloomfield, 96^b)
avadaṃs tvaṃ śakune bhadram ā vada (II, 43, 3^b), (not in Bloomfield 186^b)
kayā naś citra ā bhuvat (IV, 31, 1^a), (319^a)
kas tvā satyo madānām (IV, 31, 2^a), (not in Bloomfield, 322^b)

---

[1] In view of the variants in the MSS I have given only the first Padas. All the verses are assumed to be quoted in full.

tac cakṣur devahitam (VII, 66, 16), (not in Bloomfield, 388^{a})
tvam Agne vratapā asi (VIII, 11, 1), (not in Bloomfield, 450^{b})

bhadram karṇebhiḥ śṛṇuyāma devāḥ (I, 89, 8^{a}), (664^{a}, where only the *pratīka* is given)
bhadram no api vātaya manaḥ (X, 20, 1^{a}), (not in Bloomfield, 664^{a})

śam na Indrāgnī bhavatam avobhiḥ (VII, 35, 1^{a}), (917^{a}, where only the *pratīka* is given)
śam no Mitraḥ śaṃ Varuṇaḥ (I, 90, 9^{a}), (not in Bloomfield, 918^{b})

stuṣe janaṃ suvratam navyasībhiḥ (VI, 49, 1^{a}), (1041^{a}, where only the *pratīka* is given, as in the next)
syonā pṛthivi bhava (I, 22, 15^{a}), (1046^{a})

The following occur in the Śāṅkhāyana Āraṇyaka I, II, VII-XII

Aditir dyaur Aditir antarikṣam (I, 89, 10^{a}), VII, 15 (50^{b}) Verse cited in full
adhvaryavo bharatendrāya somam (II, 14, 1^{a}), II, 16 (59^{a})
astāvy Agniḥ śimīvadbhir arkaiḥ (I, 141, 13^{a}), II, 18 (136^{a})

ā mandrair Indra haribhiḥ (III, 45, 1^{a}), II 9 (176^{b})

Indraḥ suteṣu someṣu (VIII, 13, 1^{a}), II, 10 (218^{a})

uta syā naḥ Sarasvatī juṣāṇā (VII, 95, 4^{a}), I, 2 (251^{b})
ud vayaṃ tamasas pari (I, 50, 10^{a}), VIII, 5 (263^{b}) Verse cited in full
ud vāṃ cakṣur Varuṇa supratīkam (VII, 61, 1^{a}), I, 2 (263^{b})
uruvyacasā mahinī asaścatā (I, 160, 2^{a}), II, 18 (276^{a})

sahīyaso Varuṇa Mitra martāt (IV, 55, 1^{c}), I, 2 (1005^{a})
stotāraṃ in maghavann asya vardhaya (VIII, 97 1^{c}), II, 9 (1041^{b})
stomair Vatsasya vāvṛdhe (VIII, 6, 1^{c}), II, 8 (1043^{a})

INDEX II

QUOTATIONS FROM OTHER SOURCES THAN THE RGVEDA, NIVIDS, PRAISAS, ETC

(All the Padas of metrical passages are given as in Bloomfield's *Vedic Concordance* (*Harvard Oriental Series*, Vol. X, 1906) Metrical passages are marked (v) The references in brackets are to page and column of the *Concordance*)

agner tvanādhṛṣyaḥ pṛthivīva suṣadā bhūyāsam V, 1 1 (14^{a})

atichandasā tvā (chandasedukāmi) V, 1, 4 (348^{b}, under *gāyatreṇa tvā*, &c. The separate Mantras should rather be given separately)

atho tanur iva tanvo astu bheṣajam (v), I, 3 4 (47^{b})

anu dyāvāpṛthivī purvāhutau V, 1, 1 (v) (64^{b})

anu mām Indro anu mām Bṛhaspatiḥ, V, 1, 1 (v) (66^{a})

anu mām Mitrāvaruṇa ihāvatām V, 1, 1 (v) (66^{a})

anu śaṃsuso diśaḥ, IV, 1 (v) (66^{b})

anu somo anu vāg devy āvīt, V, 1, 1 (v) (67^{b})

antarikṣam samaspyam dyaur vṛṣamsadhṛṣyo bhūyāsam V 1, 1 (70^{b}, with the misreading °*dhṛṣto*, which is in no text or MS. and is contradicted by the context)

ante vaco vibhuḥ sarvasmād uttaram, V, 3, 2 (v) (not in Bloomfield)

annam iva vibhu yajña ivo prabhur (v 1 pra bhur) bhūyāsam, V, 1, 1 (74^{a})

annaśubhe varṣāpavitram gobhagam, V, 3, 2 (v) (not in Bloomfield)

apānam antaḥkharva V, 1, 4 (81^{b})

apān iya tvā (ulikhāmi), V, 1, 4 (82^{a})

amṛtasya śriyam mahīm V, 3, 2 (v) (102^{a})

ayutākṣaram amṛtam duhānam, V, 3, 2 (v) (not in Bloomfield)

arcanty arkām devatā(ḥ) svarkāḥ, V, 2, 2 (v) (113^{b})

avratam hanoti nā spṛśad rayiḥ, V, 2, 2 (v) (125^{a}, under *avrato*)

ahar iva svam vītrer iva priyā bhūyāsam, V, 1, 1 (150^{a})

Ādityās tvā jagatena &c., V, 1, 4 (165^{a}, cf 164^{b}), Ś I, 7

anuṣṭubhena tvā (chandasedunhāmi), V, 1, 4 (384^{a})

apa iva rasa oṣadhaya iva rūpam bhūyasam, V, 1, 1 (171^{a})

abhis tvām abhiṣṭibhiḥ (v), IV, 1 (176^{a})

ā yāhi piba mātsva (v) IV, 1 (179^{b})

āyuḥ prāṇam me dhukṣva V, 3 1 (180^{b}, cf Kātyāyana Śrauta Sūtra, III, 4 13, where *prāṇam* is omitted)

ā yo mānyaya manyave (v), IV, 1 (183^{a})

ā stabhate śrutā yuvā sa indrāḥ (v), V, 2, 2 (193^{b})

idam madhu, V, 1, 1 (204^{a})

idam madhū 3 V, 1, 1 (204^{a}, no separate head).

ime vāruṇaḥ sāmayaḥ parvateṣṭhāḥ (v) V, 2, 1 (205^{a}, as *ime vasu* &c)

Indraḥ karmākṣitam amṛtam vyoma (v) V, 3, 1 (207^{a} see also note for parallel)

Indraḥ pātu tavīstamo jāneva ā (v), V, 2, 1 (207^{a})

Indraḥ śarvābhir yohātra kratuḥ (v), V, 2, 1 (214^{a})

Indram dhānasya sātaye (v), IV, 1 (210^{b}, cf. RV, VIII, 3 5^{a})

Índrasya dhṛṣitám sáhaḥ (v) V, 2, 1 (215^b)
Índrasya vīryam bṛhát (v), V, 2, 1 (216^a)
Índro vide tám u stuṣé (v) IV, 1 (226^b)
Índro viśvam virājati (v), V, 3, 1 (228^b)
imaṃ tīvrasutam piba, V, 1, 1 (231^b)
íram na Mitrāvaruṇā kārtanījam (v), V, 2, 2 (239^a)

īse hí Śakr th (v), IV, 1 (246^a)

ukthaśī yaja somasya, V, 3, 2, 3 (*om* is prefixed), (246^b, 313^a)
upa prakṣé mádhumati kṣiyántaḥ (v), V, 2, 2 (266^a as *upaprakṣe*)
upéhi viśvadha (quasi verse), IV, 1 (272^a)
upo mánayaya manyáve (quasi verse), IV, 1 (272^b)

ṛtám satyám vijigyuṣám vivācanam (v), V, 3, 2 (not in Bloomfield)
ṛbhur vigahá etáh (v), V, 2, 1 (216^a as *śatrum* &c , which rather belongs to the end of the preceding Pada)

etā́s ta ukthá bhūtayaḥ (v), V, 3, 1 (300^a as *ukthabhutayah*)
evā́ hí devā́3 h IV, 1 (305^a, no *pluti*)
evā́ hí Pūṣá3 n, IV, 1 (305^a, no *pluti*)
evā́ hí Vasú3 u IV, 1 (305^a, no *pluti*)
evā́ hí śakráḥ IV, 1 (304^a)
evā́ hindrá3 IV, 1 (305^a as *hindram*)
evā́ hy agné3 IV, 1 (305^a, no *pluti*)
evé hy evā́ IV, 1 (303^b)
eṣa brahmā V, 2, 2 (*pratīka* only) (306^b)
ehy eva 3idam madhu, V, 1, 1 (309^a)

oṣṭhāpidhānā nakulī &c (v), III, 2, 5 (316^a gives other citations but not this)

aurṇakena tva (*chandasoduhāmi*), V, 1, 4 (348^a)

krátuś chándā ṛtám bṛhát (v), IV, 1 (336^b)

gāyatreṇa tva (*chandasoduhāmi*), V, 1, 4 (348^a)
gāva iva punarbhuvo mithunam iva marīcayo dhūyasam, V, 1, 1 (348^b)

carū mam iha vadīyet (v) III, 2, 5 (not in Bloomfield)
cikitvo abhí no naya (v) IV, 1 (368^a)

jagatena tva (*chandasoduhāmi*), V, 1, 4 (348^a)

jitaram áparājitam, IV, 1 (382^b)
jyótir ū́dhar ápratiṣadaḥ pū́rvam (v), V, 3, 2 (not in Bloomfield)

tápastanu Índrajyeṣṭham sahásradhāram, V, 3, 2 (not in Bloomfield)
tám vidye havāmahe (v) IV, 1 (406^b)
tábhir ma sahá dhukṣva, V, 3, 1 (424^a)
tāyah pranāsyāyatanam mánasah, V, 3, 2 (not in Bloomfield)
tenaham viśvam āpyāsam V, 3, 1 (440^b)
té no devāḥ sukhavaḥ śárma yacchata, V, 1, 1 (441^b)
traiṣṭubhena tva (*chandasoduhāmi*), V, 1, 4 (348^a)
tvám hy éka īśiṣe (v), V, 2, 2 (456^b, cf RV, IV, 32, 7^a)

dantaih parivṛtā paviḥ (v), III, 2, 5 (not in Bloomfield)
dadhṛṣvā́ṃsam dhṛṣitám śávaḥ (dub read) (v), V, 2, 1 (475^a)
dvaipadena tva (*chandasoduhāmi*), V, 1, 4 (348^a)
dhenu pinvati cákṣuḥ śrótram prāṇáḥ (v), V, 3, 2 (not in Bloomfield)

namas te gāyatrāya, V, 1, 2 (533^a)
namas te bṛhate V, 1, 2 (533^b)
namas te bhadrāya V, 1, 2 (533^b)
namas te rathantarāya V, 1, 2 (533^b)
nádhṛṣa ā́ dadharṣa (dub read) (v) V, 2, 1 (545^b)
nūnám tám návyam sám nyase (v), IV, 1 (556^b)

pañcaviṃśasya stomasya &c , V, 1, 3 (563^a),
paśūn vittam me dhukṣva V, 3, 1 (578^a)
pāṅktena tva (*chandasoduhāmi*), V, 1, 4 (348^a),
pitáro ma vittam vadám ca bhūtám, V, 1, 1 (583^a)
pīvarīm iṣam kṛṇuhí na Indra (v), V, 2, 1 (588^a)
purā́ yád um div vyāthih V, 2, 1 (594^a)
purā́ ca yáds vehā́sa nunám (v) V, 2, 2 (not in Bloomfield as a separate entry)
piśyante rayím dhimahe tám Indra (v), V, 2, 2 (597^b)
purū́ḥ śaviṣṭha śasyate (v) IV, 1 (598^a)
pūrvasya yát te adrivaḥ (v), IV, 1 (598^b)
purūṇā́m puruvaso (v), IV, 1 (598^b)

pṛthivyupārám Vārunavāyvalamam, V, 3, 2 (not in Bloomfield)
pṛ́śnimātaraḥ Marutaḥ svarkā́ḥ (v), V, 1, 1 (605^b)
prácetana prá cetaya (v), IV, 1 (608^a)
Prajā́patir idám bráhma (v), V, 3, 2 (610^b)
prati vāṃ ṛjīti (v), V, 2, 1 (618^a)
prátiṣṭha hṛdayasya sárvam (v), V, 3, 2 (not in Bloomfield)
prábho jánasya Vṛtrahan (v), IV, 1 (625^b).
prá va Índrāya (v), V, 2, 2 (628^b)
prāṇam anuprenkhasva, V, 1, 4 (635^b)
prāṇāya tvā (ullikhāmi), V, 1, 4 (637^a)
premāṃ vācam vadiṣyāmi, &c., V, 1, 5 (642^b, in the parallel passages from Lāṭyāyana and Śānkhāyana Bloomfield reads *svargam ayiṣyan* and *svargam iṣyan* respectively, I think wrongly), Ś I, 8 (with variants)

bārhatena tvā (chandasodukhāmi), V, 1, 4 (348^a).
bráhma prajā́m me dhukṣva, V, 3, 2 (658^b)
brahmeva loke kṣatram iva śriyam bhūyāsam, V, 1, 1 (661^a)

bhuvo vā́janām pátir vā́cā ánu (v), IV, 1 (670^b)
bhūtebhyas tvā, V, 1, 4 (671^b, 672^a)
bhūr bhuvaḥ svar, I, 3, 2, V, 1, 4 (674^a)
bhū́r bhúvaḥ svàr tráyo védo 'si, V, 3, 2 (not separated in Bloomfield)

máṃhiṣṭha Indra vajro (?) gṛṇadbhyas (v), V, 2, 1 (676^b)
máṃhiṣṭha vajriṇn ṛñjase (v), IV, 1 (676^b)
máṃhiṣṭho vā́jasātaye (v), V, 2, 2 (677^a, cf RV, VIII, 4, 18^d, 88, 6^d)
mátsi ā mádam puruvā́ram maghā́ya (v), V, 2, 1 (678^b)
mana svapurvam vāyur iva ślokabhūr bhūyāsam, V, 1, 1 (682^b)
mayi kīrtiḥ, V, 1, 5 (689^a)
mayi ghoṣaḥ V, 1, 5 (689^a)
mayi bhagaḥ, V, 1, 5 (689^b)
mayi bhuktiḥ, V, 1, 5 (689^b).
mayi bhujaḥ, V, 1, 5 (689^b)
mayi mahaḥ, V, 1, 5 (690^a)
mayi yaśaḥ, V, 1, 5 (690^a)
mayi bṛhat, V, 1, 5 (690^a)
mayi ślokaḥ, V, 1, 5 (690^a)
mayi stobhaḥ, V, 1, 5 (690^a)
mayi stomaḥ, V, 1, 5 (690^a)
mūrdhā́ lokā́nām asi (v), V, 3, 2 (719^a, treated apparently as prose)

yáḥ śáviṣṭhaḥ śū́rāṇām (v), IV, 1 (769^b)
yaṃ tvā śáviṣṭham īmahe (v), V, 2, 2 (762^a).
yásyedám ardyat śū́ṣo yújo vánam sáhaḥ (v), V, 2, 1 (two Padas, in 777^a the first Pāda is given, with the remark that the Aranyaka omits *yujaḥ*, but the second Pada is not given under *yujaḥ*).
yújo vánam sáhaḥ, see preceding
yé Agnijihvā́ uta vā yájatrāḥ (v), V, 1, 1 (795^b)
ye 3 yajāmahe, V, 3, 2 (804^a, without *pluti*)
yó máṃhiṣṭho maghónām (v), IV, 1 (811^b)

rayíṃ piśáṅgasaṃdṛśam (v), V, 2, 1 (820^a, cf RV, II, 41, 9^b)
rayé vā́jāya vajrivaḥ (v), IV, 1 (825^b)
Rudrās tvā traiṣṭubhena &c, V, 1, 4 (828^b), Ś I, 7.

lokám brahmavarcasám abhdyaṃ yajñasamṛddhim me dhukṣva, V, 3, 2 (832^b)

vaśī́ hí Śakráḥ, IV, 1 (847^a)
vaśī́ hí Śakró vákaṃ ánu, IV, 1 (847^a)
vasavas tvā gāyatreṇa &c, V, 1, 4 (848^a), Ś I, 7.
vāk, V, 1, 5 (852^a)
vāg devī somasya tṛpyatu, V, 3, 2 (853^a)
Vāyuḥ Pūṣā́ Váruṇaḥ Sómo Agníḥ (v), V, 1, 1 (860^b)
vidā́ maghavan vidā́ gātúm (v), IV, 1 (867^a)
vidā́ maghavan vidā́3m, IV, 1 (867^a)
vidā́ rāyáḥ suvī́ryam (v), IV, 1 (867^a)
vípra gāthā́ṃ gāyata yáj jujoṣat (v), V, 2, 2 (871^a)
vi va asmā́su rājan (v), I, 4, 3 (not in Bloomfield, perhaps as not being considered a Mantra)
viśuddhe dāvan vaśi ato na ā́ bhara (v), V, 2, 2 (879^a)
vilvasya prastobhata vidvā́n (v), V, 2, 2 (881^a, where the whole line with *puro* is given as if one Pada)
viśve tvā devā ānuṣṭubhena &c, V, 1, 4 (886^b)
vyānam anu viṅkhasva, V, 1, 4 (909^b, where the quotation is given as *anu viṅkhasva*)
vyānāya tvollikhāmi, V, 1, 4 (909^b)

śam padam maghaṃ rayiṣāṇe na somaḥ (v), V, 2, 2 (910ª)
śiṣṭhā ṇa ... gṛhṇate (v), IV, 1 (922ª)
śikṣā śacīnām pate (v), IV, 1 (924ª)
śūro yo goṣu gacchati (v), IV, 1 (933ᵇ).
śriyaṃ yaśo me dhukṣva, V, 3, 2 (930ª)

saṃvelaḥ cikkuṇaḥ sīmbhavaḥ śrotrasya, V, 3, 2 (not in Bloomfield)
saṃ śrotram ātmanā sam aham ātmanā, V, 1, 5 (949ᵇ)
sakhā suśevo advayāḥ (v), (dub. read.) IV, 1 (952ᵃ, cf RV., I, 187, 3ᵈ)
saṃ cakṣur manasā sam ahaṃ manasā, V, 1, 5 (936ᵇ), Ś I, 8
satyāsaṃmitaṃ vākprabhūtaṃ manaso vibhūtam (v), V, 3, 2 (not in Bloomfield)
sa naḥ parṣad ati dviṣaḥ (v), IV, 1 (965ª)
sa naḥ parṣad ati sridhaḥ (v), IV, 1 (965ª)
sanād amṛkta ojasā (v), V, 2, 2 (966ª)
sa no dadātu tāṃ rayim (v), IV, 1, 2, 1 (967ª)
sa no netāram mahayema indram (v), V, 2, 1 (967ª)
sapta rājāno ya udabhiṣiktāḥ (v), V, 2, 2 (937ª).
sām anyeṣu bruvāṇaḥ, IV, 1 (973ᵇ)
sa me prāṇaḥ &c. (quasi verse), V, 3, 2 (984ª)

saṃ prāṇo vācā sam ahaṃ vācā, V, 1, 5 (985ª). Cf Ś I, 8
sarvaṃ vāk pūrvag arvāk sadyaś salilam (v), V, 3, 2 (not in Bloomfield)
sarasvatyai vaca sūdana, III, 2, 5
sarvān kāmān duhe mahāt (v), V, 3, 2 (993ª).
sa sāhitur vyāvahāriyeṇa śātrum (v), V, 2, 1 (998ᵇ)
sā suprāṇe śuklamaḥ svarāḍ asi (v), V, 2, 2 (995ᵇ)
sutās te soma ūpa yūthe yajñāya (v), V, 2, 1 (1015ᵇ)
suparṇo 'si garutmān, V, 1, 5 (1017ᵇ), Ś I, 8
sumnam ā dhehi no vaso (v), IV, 1 (1020ᵇ).
sūrya ... candramā iva punar bhūr bhūyāsam, V, 2, 1 (1036ª)
*sūryo nakṣatrair ... * (v), V, 2, 1 (1036ᵇ)
somo me rājyaṃ prāṇāya vartatām, V, 3, 2 (1037ᵇ)
staṃ yat tāvat śaśvatam aśrayata (v), I, 3, 4 (1054ª, cf 1049ᵇ, 1055ᵇ)

hṛdayāgram brahmaṇībhartṛkam (v), V, 3, 2 (not in Bloomfield)

In the Śānti verses occur the following (see note on I, 1) (The accents are not given.)

Agna ṛṣe nama ṛṣibhyo mantrakṛdbhyo mantrapatibhyo (5ª), Ś VII, 1.
adabdham cakṣur asrāmaṃ manas (v) (not in Bloomfield, cf 40ª), Ś VII, 1, IX, 1
anu mām astv indriyam (v) (not in Bloomfield)
anu mā yantu devatāḥ (v) (not in Bloomfield, who, 66ª, gives MS., I, 13, 7ª *anu māyantu* (sic) *devatāḥ*)
anu mā śrīr utiṣṭhatu (v) (not in Bloomfield)
anenādhītenāhorātrān saṃdadhāmi, II, 7 (not in Bloomfield), Ś VII, 1
avatu mām, II, 7 (not in Bloomfield, 118ª)
avatu vaktāram II, 7 (not in Bloomfield, 118ª), Ś. VII, 1

āvir āvīr ma edhi II, 7 (not in Bloomfield)

udīrat śukriyaṃ dadhe (v) (not in Bloomfield, 250ª)

ṛtaṃ vadiṣyāmi satyaṃ vadiṣyāmi, II, 7 (267ª), Ś VII, 1

oṣṭhāpidhānā nakulī (v) (cf supra)

caru mām iha vardayet (v) (cf supra)

tad ahaṃ ātmani dadhe (v) not in Bloomfield)
tad vaktāram avatu II, 7 (not in Bloomfield, 396ª), Ś VII, 1
tan mām avatu II, 7 (not in Bloomfield, 402ª), Ś VII, 1

dīkṣe mā mā hiṃsīḥ (not in Bloomfield, 404ª), Ś VII, 1, IX, 1

nama ṛṣibhyo &c. (see *agna ṛṣe* &c.) (not in Bloomfield, 530ᵇ but in 5ª)
namo 'stu devebhyaḥ (v) (not in Bloomfield, but cf 5ª)

mano me vāci pratiṣṭhitam, II, 7 (not in Bloomfield, 685ᵇ) Ś VII, 1
mayi śrīr mayi yaśaḥ (v) (not in Bloomfield 690ª)
mā te vyoma saṃdṛśi (v), (703ᵇ), Ś VII, 1

vān me prānena &c., II, 7 (not in Bloomfield, 853^{b}) Ś VII, 1

vedasya ma āṇī sthaḥ II, 7 (not in Bloomfield, 903^{b}) Cf Ś VII 1

śivā naḥ śantamā bhava (v) (925^{a}), Ś. VII, 1

śrutam me mā prahāsīḥ, II, 7 (not in Bloomfield, 940^{a})

satyam vadiṣyāmi II, 7 (938^{b}), Ś VII, 1

sarvāḥ sapatnāḥ sabalā uttiṣṭhāms (v) (not in Bloomfield)

sarvasyai vāca īśānā (v) (Cf. supra.)

sumṛḍīkā Sarasvatī (v), (1020^{b}), Ś VII, 1

sūryo jyotiṣām śreṣṭhaḥ (not in Bloomfield, but cf 40^{a}), Ś VII, 1, IX, 1

In II, 3, 8 the following Ślokas occur

tatra devāḥ sarva ekam bhavanti, 1^{a}, 2^{d} (391^{b})
tatra devāḥ sarvayuje bhavanti 3^{d} (391^{b})
tad viprā kavayo 'nvavindan 3^{c} (397^{a})

Prose formulae in Śankhayana Āranyaka I II VII-XIV (Most of these are not in Bloomfield, *Vedic Concordance*)

annam granthiḥ, XI 8
annam iva sthiro vasani vairājena chandasā, XI 8
annavān annādo bhūyāsam XI 6, 8
apāne me vidyutaḥ pratiṣṭhitaḥ svāhā XI 5
apāne me vidyutaḥ pratiṣṭhitā apāno hṛdaye, XI 6
aja iva sthiro vasani traiṣṭubhena chandasā, XI 8
arko 'si Ś I 7 (113^{b})
aśmeva sthiro vasāni jāgatena chandasā XI, 8

ātmani me brahma pratiṣṭhitam svāhā, XI, 5
ātmani me brahma pratiṣṭhitam ātmā hṛdaye, XI, 6

udāne me Parjanyaḥ pratiṣṭhitaḥ svāhā XI 5
udāne me Parjanyaḥ pratiṣṭhita udāno hṛdaye, XI, 6

granthim udgrathāmi, XI, 8

cakṣuṣi ma Ādityaḥ pratiṣṭhitaḥ svāhā XI 5
cakṣuṣi ma Ādityaḥ pratiṣṭhitaś cakṣur hṛdaye, XI 6.

tat satyam devānām XI, 6, 8
tṛptir iva sthiro vasāny ānuṣṭubhena chandasā, XI 8

nākam iva sthiro vasani sāmrājyena chandasā, XI, 8
puruṣo maṇiḥ, XI, 8
Prajāpatir iva sthiro vasany aticchandasena chandasā XI 8
Prajāpatis tvārohatu vāyuḥ preṅkhayatu, I, 7
prāṇaḥ sūtram, XI 8
prāṇe me vāyuḥ pratiṣṭhitaḥ svāhā, XI 5
prāṇe me vāyuḥ pratiṣṭhito vāyur hṛdaye, XI 6

bale ma Indraḥ pratiṣṭhitaḥ svāhā, XI, 5
bale ma Indraḥ pratiṣṭhita balam hṛdaye XI 6
Bṛhaspatir iva sthiro vasani bārhatena chandasā XI, 8
Brahmeva sthiro vasani pāṅktena chandasā XI, 8

manasi me candramāḥ pratiṣṭhitaḥ svāhā XI, 5
manasi me candramāḥ pratiṣṭhito mano hṛdaye, XI 6

manyau ma Īśānaḥ pratiṣṭhitaḥ svāhā XI, 5
manyau ma Īśānaḥ pratiṣṭhito manyur hṛdaye, XI 6

miham ahimo mari yami XI, 6, 8
mūrdhani ma ākāśaḥ pratiṣṭhitaḥ svāhā, XI, 5
mūrdhani ma ākāśaḥ pratiṣṭhito mūrdhā hṛdaye, XI, 6

yat satyasam iha devāḥ, VII, 17 (probably yat is not quoted)
rajatam iva sthiro vasāni svārajyena chandasā, XI, 8
retasi ma āpaḥ pratiṣṭhitāḥ svāhā, XI 5
retasi ma āpaḥ pratiṣṭhitā reto hṛdaye, XI, 6
loham iva sthiro vasāny auṣṇihena chandasā, XI, 8
vāci ma Agniḥ pratiṣṭhitaḥ svāhā, XI 5
vāci ma Agniḥ pratiṣṭhita Agnir hṛdaye, XI, 6
śarīre me pṛthivī pratiṣṭhitā svāhā, XI, 5
śarīre me pṛthivī pratiṣṭhitā śarīraṃ hṛdaye, XI, 6
śrotre me diśaḥ pratiṣṭhitāḥ svāhā, XI, 5
śrotre me diśaḥ pratiṣṭhitāḥ śrotraṃ hṛdaye, XI, 6
sam devo devyadadhāt, I, 5 (Śrauta Sūtra, XVII, 15, 11 daivyā) (970^{a})
sam Prajāpatiḥ paśubhiḥ sam ahaṃ paśubhiḥ, I, 8 (985^{a})
sam brahma brahmaṇya 'dadhāt, I, 5 (985^{b})
saṃ mahān mahatyā 'dadhāt, I, 5 (985^{b})
sarvam āyur asyāyuṣmān, XI, 8 (Cf. Atharvaveda, XIX, 61, 1)
Sāvitrir iva sthiro vasāni sarvatechandasena chandasā, XI, 8
sīsam iva sthiro vasāni triṣṭubhena chandasā, XI, 8
suvarṇam iva sthiro vasāni gāyatreṇa chandasā, XI, 8
hṛdayaṃ hṛdaye, XI, 8
hṛdayam ātmani, XI, 6

Verses other than Ṛgvedic in Śāṅkhāyana Āraṇyaka I, II, VII XIV The references to XII and XIV are to verses (Several not in Bloomfield)

Agnir iva kakṣam vibhṛtaḥ purastra, XII 9^{a}
Agne yaśasvin yaśase sam arpaya, XII 15^{a} (Taittirīya Saṃhitā, V, 7, 4 3^{a}, with the reading °emam Bloomfield, 27^{b})
Agne varcasvinam kuru, XII, 2^{a} (Atharvaveda, III, 22, 5^{a}, Bloomfield 28^{b})
adhītya vedaṃ na vijānāti yo 'rtham XIV, 2^{b} (Nirukta, I, 18^{b} Comm on Saṃhitopaniṣad, p 38 ed Burnell)
anu vṛkṣamadhyāt pra[vi]vṛśoparistāt, XII 12^{a}
anena iva vi mṛdho vihatyā, XII 10^{a}
anenendro Vṛtram ahan XII, 30^{a} (Cf Atharvaveda VIII, 5, 3^{a}, Bloomfield, 68^{b})
antarikṣam mā hiṃsīḥ, IX, 7 (Vājasaneyi Saṃhitā V, 43 Bloomfield 70^{b})
abhi tiṣṭha pṛtanyataḥ XII 31^{a} (91^{a})
abhy ā vartadhvam upa sevatāgnim XII, 18^{a} (Cf Taittirīya Saṃhitā, V, 7 4 4^{a})
amṛtam me manasi satram, XII, 32^{a}
ayam kaśir adhipatir no astu XII 16^{b} (Taittirīya Saṃhitā V, 7 4 4^{b}, with no)
ayam sano ni kṛntati me sapatnān, XII, 9^{a}
ayam sano yo 'mum idi bila XII, 10^{a}
ayam maṇiḥ pratisaraḥ, XII, 30^{a} (Cf Atharvaveda X, 3, 3^{a} 6^{a}, Bloomfield, 107^{b})
ayam mūrdhā parameṣṭhī suvarcāḥ, XII, 15^{a} (Taittirīya Saṃhitā, V, 7, 4 3^{a})
alardo nāma jāto 'si, XII 19^{a}
Aśvinor api nahyatām, XII, 33^{b}
Aśvinā sāragheṇa mā, XII 6^{a} (Atharvaveda, VI, 69, 2^{a}, IX, 1, 19^{a}, with mā)
ayam vyūhanam anu sam rabhadhvam, XII, 18^{a} (Taittirīya Saṃhitā, V, 7, 4, 4^{a}
Ādityāsa Ādityā samm lusaḥ, XII, 1^{d}
ā roha mām mahate saubhagāya XII, 7^{d}, 34^{d} (189^{a})
ā vadāmi janeṣu XII, 6^{d} (Atharvaveda, VI, 69, 2^{d}, IX, 1, 19^{d}, with vadāni janāṁ anu)
Indra iva Vṛtram pṛtanāsu sāhiḥ, XII, 9^{b} (cf 206^{b})
Indra (?) iva Vṛtram vi puro ruroja, XII, 10^{b} (cf 206^{b})
Indram manvata Maruto juṣanta, XII, 13^{b}
Indrāvantam apacitim ihāvaha XII, 15^{b} (Taittirīya Saṃhitā V, 7, 4, 3^{b})
imam paśavo anu tiṣṭhata sarve, XII, 18^{d} (Taittirīya Saṃhitā V 7, 4 4^{d})
irāvantam bhadram yo bibharti, XII, 20^{d}–29^{d}
ṛcām mūrdhānaṃ yajuṣām uttamāṅgam, XIV, 1^{a}
[illegible], XII 30^{d} (Cf Atharvaveda, VIII, 5 8^{b} [illegible])
etam asmai vṛtram abhi sam nayantu XII, 17^{b} (Taittirīya Saṃhitā, V, 7, 4, 4^{d}, with [illegible])
augha (v l ogha) iva [illegible], XII, 11^{a}, 27^{a}
kalpete vikṣu pṛthivyāṃ [illegible], XII, 22^{b}

goṣv akṣeṣu yad yaśaḥ, XII, 4^{b} (Cf. *goṣv akṣeṣu yan madhu* in Atharvaveda, IX, 1, 18^{b})

ghṛtād ullupto madhumān payasvān, XII, 7^{a}, 34^{a} (360^{a})

jayendra śatrūn jahi śūra dasyūn, XII, 11^{c}
jahyāt sapatnān svadhitir vaneva, XII, 11^{d}.
jambo jīvāya badhyate, XII, 30^{b}.

tataḥ kṣatraṃ balam ojaś ca jātam, XII, 16^{c} (389^{a})
tato dīkṣām ṛṣayaḥ svarvidaḥ, XII, 16^{b} (Cf. Taittirīya Saṃhitā, V, 7, 4, 3)
tad asmai devā abhi saṃ namantām, XII, 16^{d} (394^{b} with *namantu*).
tan mayi Prajāpatiḥ, XII, 5^{c} (Cf. Atharvaveda, VI, 69, 3^{a})
tan mahyaṃ sam aduḥ sarvam ete XII, 2^{c}.
taṃ tvā sapatnakṣayaṇam, XII, 19^{c}
taṃ paśyanti kavayaḥ svarvidaḥ, XII 32^{b}
tena mā varcasā tvam, XII, 2^{c} (Cf. Atharvaveda, III, 22, 3)
tvayā praṇuttān maghavann amitrān, XII, 12^{c}
tvaṃ rudrair ketibhiḥ pinvamānaḥ, XII, 13^{a}

divaṃ yāya divaṃ yāya, V, 15 (Cf. RV, VIII, 34, 1^{d}. B reads *jaya*)
divam iva dṛṃhatu, XII, 5^{d} (Cf. Atharvaveda, VI, 69, 3^{d} *devā dyām iva dṛṃhatu*.)
dyāṃ mā leśīḥ, IX, 7 (Cf. Vājasaneyi Saṃhitā, V, 43, which has *lekhīḥ*, Bloomfield, 503^{a})

dhanaṃjayo dharuṇo dhārayiṣṇuḥ, XII, 7^{b}, 34^{b} (Cf. 516^{a})
dhātā vidhātā paramota saṃdṛk, XII, 17^{a} (From Taittirīya Saṃhitā, V, 7, 4, 3^{a}; it occurs also in RV, X, 82, 2^{b}, see Bloomfield, 518^{b})

na jambhako nāpy asuro na yakṣaḥ, XII, 23^{b}
na makaro na graho na śi(m)śumāraḥ, XII, 28^{b}
na māṃsam aśnīta na hanti śāma, XII, 22^{b}.
na vṛścako na tiraścirājī, XII, 28^{a}
na śvāpadaṃ hiṃsati kiṃcanainam XII, 26^{c}
na sampatantyo (?) na viveśa tasmai, XII, 24^{b}
na sa śaptam (?) aśnāti na kilbiṣaṃ kṛtam, XII, 21^{c}
na sat ka tasya gṛheṣu jāyate, XII, 25^{c}.
na saśago 'bhavati na popṛkṣyā, XII, 25^{c}.
na hastinaṃ kruddham upaiti bhītim, XII, 26^{a}
nākam eti jñānavidhi tapasvī, XIV, 2^{d} (Nirukta, I, 18^{d}, Comm. on Saṃhitopaniṣad, p. 38 ed. Burnell)
nāgā iva pūrvapadyābhyām, XIV, 31^{c}
nādhīte 'dhīte vedam āhus tam ajñam, XIV, 1^{c}
nānyan mithas tasya kuleṣu jāyate, XIV, 23^{c}
nāsyedhe pramīyeta tared dviṣantam, XII, 20^{c}
nainam alakṣmīḥ kurute niveśanam, XII, 24^{c}.
nāsya tvacaṃ hiṃsati jātavedāḥ, XII, 22^{a}
nāsya prajā duṣyati jāyamānā, XII, 23^{a}
nāsyāpavādā na pravādakā gṛhe, XII, 24^{a}
nainaṃ rakṣo na piśāco hinasti, XII, 25^{a} (Cf. Atharvaveda, I, 35, 2^{a})
nainaṃ vyāghro na vṛko na dvīpī, XII, 26^{a}.
nainaṃ sarpo na pṛdākur hinasti XII, 27^{a}
nainaṃ kṛṣṇo (°hir) abhi saṃhate, XII, 28^{a}.
nainaṃ kruddhaṃ manyavo 'bhi yanti (?), XII, 21^{a}
nainaṃ devyo varuṇo hanti bhītam, XII, 21^{b}
nainaṃ pramattaṃ Varuṇo hinasti, XIII, 29^{a}

parāvarac chivam asmai kṛṇoti, XII, 28^{c}
purā sūryāt purosasaḥ, XII, 19^{b} (Atharvaveda, X, 7, 31^{b})
puṣpam ivācchinnaṃ sahabandhanena XII, 29^{b}.
Prajāpatiḥ parameṣṭhī suvarcāḥ, XII, 17^{b}. (Cf. 610^{a})
pramāyukaṃ tasya dviṣantam āhuḥ, XII, 20^{c}, 29^{c}

balvaḥ (bastvaḥ) sahasravīryo 'si, XII, 33^{c}.
bṛhad bhavaty āhitam, XII, 2^{b} (Atharvaveda, III, 22, 4^{b}, with *āhutaḥ*)
brahmaṇaitasya maghavan pṛtanyataḥ, XII, 15^{a}

bhadraṃ paśyanta upa sedur agan, XII, 16^{a} (Cf. 664^{b})

mayi tad dhastivarcasam, XII, 3^{d}, 4^{d} (Atharvaveda, III, 22, 5^{c})
mayi bhargo mayi mahaḥ, XII, 5^{a} (Cf. Gopatha Brāhmaṇa, I, 5, 15, 16, 17, Bloomfield, 689^{b}, 690.)
mayi yajñasya yad yaśaḥ, XII, 5^{b}
mahīyatāṃ divi vardhanena, XII, 13^{d}
māho vighnantā upayanti (?) mṛtyum XII 14^{d} (Cf. Atharvaveda, VI, 32, 3^{d}, VIII, 8, 21^{d}.)
mā jīvataṃ śūdra(?) mā pratiṣṭhām, XII, 14^{c} (Cf. Atharvaveda, VI, 32, 3^{c}, VIII, 8, 21^{c})
mā te bhartī syām aham, XII, 33^{d}.

yac ca varco vipruṣe, XII, 3^a (Cf 729^b)
yac ca hastiṣv āhitam, XIII 3^b
yat te varco jātavedaḥ, XII, 2^a (Atharvaveda, III, 22, 4^a)
yathā madhumatīṃ viśam, XII 6^a
yathā sapatnān samare saheyuḥ, XII, 32^d
yad akṣeṣu hiraṇyeṣu, XII 4^a (Cf 729^b)
yad Ādityāt tanvaḥ sambabhūva, XII, 1^b (Cf Atharvaveda III, 22, 1^b)
yo 'rthajña it sakalaṃ bhadram aśnute XIV 2^a (Nirukta, I, 18^a, Comm on Saṃhitopaniṣad, p 38 ed Burnell)

rujan sapatnān adharāṃś ca kṛṇvan XII, 7^a, 34^a
rohobhyam rohobhyam abhyaruham (?) X, 8

vanaspate śatavalśo vi roha, IX, 7 (Vājasaneyi Saṃhitā, V, 43, also in RV III, 8 11^a, &c)
vi teṣu nas tigmajambho 'nu mṛṣṭi XII 9^d
vi vṛśca pakṣāt prati śūra vṛśca, XII 12^b, (Cf 899^b)
viṣvag Indra bhaṅgaḥ patantu, XII 15^b (Cf 894^b, 895^a)
Vṛtraṃ hatveva kuliśena [vi] vṛśca, XII, 12^b
vedītko viṣṭambhajambhanam, XII, 19^d

śatāyur asmāñ jaradaṣṭaḥ praiti XII, 22^a
śatrī yatam ā bharā bhojanāni, XII 10^d (RV, V, 4, 5^d, Bloomfield, 916^b)
śiraś chittvāsau kurute kabandham XIV 1^d
śūra (?) *vasantam Maruto 'nu yāntu*, XII, 12^d

sapatnānām uttamaśloko astu, XII 15^d
sapatnakṣayaṇo vṛṣā, XII 32^b (970^b)
sam aṅktam (?) *madhunā payaḥ*, XII 6^a
sahasva pṛtanāyataḥ, XII 31^b (1004^a)
sahendra dūtalaḥ sahasvarātiḥ, XII 31^a
sāmnāṃ śiro 'tharvaṇām uttamāṅgam XIV 1^b
suparṇāḥ kaṅkāḥ pramṛśantv enān XII 14^c
sūryāṃ puṣyamāṇāyām, XII, 4^a (Cf Atharvaveda XIV, 1, 35^b)
suvarṇe goṣu yad varcaḥ XII 3^a
stomaṃ chandāṃsi nivido ma āhuḥ XII, 17^a (Taittirīya Saṃhitā V, 7, 4 4^a with *sto i il*, which perhaps should be *stoma c*, but see *J R A S*, 1909 p 430)
sthāṇur ayaṃ bhārahāraḥ kilābhūt, XIV, 2^a (Nirukta I 18^a Comm on Saṃhitopaniṣad, p 38 ed Burnell)

hastivarcasaṃ prathatāṃ bṛhad vayaḥ XII, 1^a (Atharvaveda, III, 22, 1^a, with *bṛhad yaśaḥ*)

Śvetaketum, III, 1.

Satyakāmo Jābālah, IX, 7
Satvanmatsyeṣu (so Max Müller and Cowell, *S B E.*, 1, lxxvii for *satvanmatsyeṣu*; more probably *savaśa°*, as Oldenberg), VI, 1.
Sakamaśvah, XV; (abl) XV.
Saumāyah, XV; (abl) XV.
Sūryadattah, VII, 5
Somapah, XV, (abl) XV.
Saumah Prātīvelyah, XV; (abl) XV.

INDEX IV

WORDS OCCURRING IN VERSES OTHER THAN RGVEDIC, NIVIDS, PRAISAS, ETC

(When the case or gender is ambiguous, it is nom or masc. unless otherwise specified Words are given in their forms *in pausa* Prefixes are connected with the verb, unless words intervene)

A In Aitareya Āranyaka and parallel passages in Śāṅkhāyana Āranyaka.

ákṣitam, V, 3, 2
agníḥ, V, 1, 1, *agnā́ 3 i*, IV, 1
agnyādhéḥ, V, 1 1
áti (with acc.) IV, 1, V, 2, 1
atichandasa V, 1, 4
adrivaḥ IV, 1
ádvayāḥ, IV, 1
ádhṛṣaḥ, V, 2, 1 (prob w r for *ádhṛṣe*)
ánu (with acc.), IV, 1, V, 1, 1
ántaḥ V, 3, 2
antarikṣam V, 1, 1
annam, V, 1, 1
ánnaśubhe (?), V, 3 2
anyéṣu IV, 1
áparājitam (acc), IV 1
apānam V, 1, 4, *apānaya*, V, 1, 4
apūrvam V, 1, 1
ápratīvādaḥ, V, 3, 2
abhayam (acc neut.) V, 3, 2
abhiṣṭibhiḥ IV, 1
amum, V, 1, 5
ámṛktaḥ V, 2, 2
amṛ́tam, V, 3, 2, (acc) ib (gen) ib.
ayutākṣaram (nom or acc. neut.), V, 3 2
arkám, V, 2 2, *árkaḥ*, V, 2, 2 (perhaps w r for *svarkā́ḥ*)
√*arc* *árcanti*, V, 2, 2
arvā́k V, 3 2
√*av* *avatu*, *avatām*, *avantu*, V, 1, 1, *avīt*, V, 1, 1
avratám (acc. masc.) V, 1, 1
√*as* *asi*, V, 1, 5, 2 2, 3, 2, *ā́sa*, V, 2, 2, *astu*, I, 3 4
√*aś* *áśnuyase* (? *áśnyase*), IV, 1
ahám, V, 1, 1, 5, Ś I, 7, *asmāsu*, I, 4, 3
ahar, V, 1, 1
ā́, IV, 1, (with loc.) V, 2, 1
ātmā, V, 1, 2, (instr) V, 1, 5
ādityā́ḥ, V, 1, 1, 4, Ś I, 7
ānuṣṭubhena, V, 1, 4, Ś I 7
√*āp* *āpyāsam*, V, 3, 2 (the ref to √*pyai* is corrected in Whitney, *Roots*, &c , pp. 248, 249), *anāpyam*, V, 1, 1
āpaḥ, V, 1, 1
ābhiḥ, IV, 1
āyatanam V, 3, 2
ā́yuḥ (acc.), V, 3 2
ardyas(?), V, 2, 1 (perhaps w r for *ardyās* (?))
√*i* *īmahe*, V, 2, 2, *ehi*, V, 1, 1, *upehi*, IV, 1
itam, V, 2, 2
idám, V, 1, 1, 2 1, (acc) V, 1, 1, 3, 2
idā́ḥ, V, 2 1
índraḥ, IV, 1, V, 1, 1, 2, 1, 2, 3 1, 2, (acc) IV, 1, V, 2, 1, (dat.) V, 2, 2, (gen) V, 2, 1, (voc) V, 2, 2, with *pluti* IV, 1
índrajyeṣṭham, V, 3, 2 (accent dubious)
imam, V, 1, 1, 5, *imām*, V, 1, 5
iva V, 1, 1
iṣam, V, 2, 2, *iṣe* IV, 1
ihá, III, 2 5, V, 2, 2, 3 2
√*īṅkh* *anupreṅkhasva*, *anvīṅkhasva*, *anu vīṅkhasva*, V, 1, 4
īm, V, 2, 1
√*ir* *āsrayata* I, 3, 4
√*īś* *īśe*, IV, 1, *ī́śate*, V, 2, 2, *ī́śāna*, III, 2, 5

u, IV, 1
uktha (voc), V, 3, 2
ukthaśaḥ, V, 3, 2
utá vā, V, 1, 1
uttaraḥ, V, 1, 2, *uttaram* (nom neut), V, 3, 2
udā́bhiruktiḥ, V, 1, 1 (dubious accent).
úpa (with loc.), V, 2, 2, *upo*, IV, 1.

ūtáye, IV, 1
ū́dhaḥ, V, 3, 2
√*ūh* *ūduhāma*, V, 1, 4

√*ṛj* *ṛñjase*, IV, 1.
ṛjīṣī, V, 2, 1
ṛtám, IV, 1, V, 3, 2
ṛbhúḥ, V, 2, 1

ékaḥ, V, 1, 2
etā́ḥ, V, 3, 2
evā́, IV, 1, V, 1, 1, *eva*, I, 5, 4
évaiḥ, V, 2, 1
eṣā́ḥ, V, 2, 1

ójasā, V, 2, 2
oṣadhayaḥ, V, 1, 1
oṣṭhāpidhānā, III, 2, 5

auṣṇihena, V, 1, 4, Ś I, 7

kárma, V, 3, 2
kā́man, V, 3, 2
kīrtiḥ V, 1, 5
kulīdantaḥ (so comm, but see *nakulī*) III 2 5
√*kṛ* *kṛṇuhí kártana*, V, 2, 1, *kariṣyantam*, V, 1, 5, Ś I, 8
kṛdhuḥ, IV, 1
kṣatram, V, 1, 1
√*kṣi* *kṣiyántaḥ*, V, 2, 2
√*kṣi* *akṣitam*, V, 2, 2

√*gam* *gácchati*, IV, 1, *gachantam*, V, 1, 5
garutmān V, 1 5 Ś I 8
√*gā* *prá gāyata*, V, 2, 2
gṛtám, IV, 1
gāthā́m, V, 2, 1
gāyatreṇa, V, 1, 4, Ś I, 8, (dat) V, 1, 2
gāvaḥ, V, 1, 1
√*gṛ* *gṛṇā́dhyai*, V, 2, 1
góbhagam, V, 3 2
gó u, IV, 1
grāvṇaḥ (acc), I, 4 3
ghoṣaḥ, V, 1, 5

ca, V, 1, 5
cákṣuḥ, V, 1, 5, 3, 2, (gen) V, 3 2
candramāḥ, V, 1, 1
√*cit* *cikitvaḥ*, IV, 1, *prá cetaya*, IV, 1

chandā́ḥ, IV, 1, (instr) V, 1, 4, Ś I, 7, (in SV, *chāndaḥ* is read)

jánasya, IV, 1, (loc plur) V, 2, 1
√*juṣ* *jújoṣat*, V, 2, 2
jaritā́ram, IV, 1
jakā́traḥ, V, 2, 1
jyótiḥ, V, 3, 2.

tanúḥ, I, 3, 4, *tanū́m*, I, 3, 4, *tanvàḥ* (gen), I, 3 4, *tanvā̀m*, I, 3 4
tám, IV, 1; V, 2, 1, 2; *téna* (neut) V, 3 2, *te*, Ś I, 7, *tau*, V, 1, 4, Ś I, 7, *tābhiḥ*, V, 3 2
tṛpastanu, V, 3, 2
tavástamaḥ, V, 2, 1
tīvrasutam (acc masc), V, 1, 1.
tíṣyaḥ (gen. ?), V, 2, 1
√*tṛp* *tṛpyatu*, V, 3, 2
téjaḥ, V, 3 2
tráyaḥ, V, 3, 2
traiṣṭubhena (n), V, 1, 4, Ś I, 7
tvám, IV, 1, V, 2, 2, *tvā*, V, 1, 4 2, 2, Ś I, 7, *te* (dat), V, 2, 1, (gen) IV, 1, V, 1, 2, 3 2

dakṣiṇaḥ, V, 1, 2
dantāḥ, III, 2, 5
√*dā* *dadātu* V, 2, 1, ? *vidaḥ*, IV, 1
dítaḥ (acc) IV, 1
√*duh* *duhām*, V, 3, 2, *dhukṣva*, V, 3, 2, *duhānām* V, 3, 2
devitāta V, 2, 2 (perhaps w r for *devā́tiḥ sv°*)
devā́ḥ, V, 1, 1, 4, *devā́saḥ*, IV, 1
devī́, V, 1, 1, 3, 2
dyā́vāpṛthivī́, V, 1, 1
dyumnā́ya, IV, 1
dyauḥ, V, 1, 1
dviṣáḥ (acc), IV, 1
dvāpadena (n), V, 1, 4

dhánasya, IV, 1
√*dhā* *ā́dhehi*, IV, 1, *dhīmahe*, V, 2, 2.
√*dhṛ* *dhārayati*, I, 4 3
√*dhṛṣ* *ā́dadharṣa* (?), V, 2, 1 *dadhṛṣāṇā́m* V, 2, 1, *dhṛṣitā́m* V, 2, 1, *anādhṛṣyaḥ*, *apratidhṛṣyaḥ*, V, 1, 1
dhenā́, V, 3, 2

na, V, 2, 1; 2, (of comparison) III, 2, 5 (dub., see *nakuli*)
nah (acc.), IV, 1; (dat.) V, 1, 1, 2, 1, 2; (gen.) IV, 1, V, 2, 1.
nakuli (?), III, 2, 5.
nakṣatraih, V, 1, 1.
namah, V, 1, 2
navyam (m. or n.), IV, 1
√*nī* *abhi naya*, IV, 1, *supraṇaite*, V, 2, 2 (dubious use and accent)
nūnám, IV, 1, V, 2, 2
nṛtamah, V, 2, 2
netāram, V, 2, 1.

pakṣah, V, 1, 2
√*pat* *patiṣyantam*, V, 1, 5
pátih, V, 2, 1, (voc.) IV, 1.
padām, V, 2, 2
payah, V, 3, 2
parvateṣṭhāh, V, 2, 1
pavih, III, 2, 5
paśūn, V, 2, 2
pāṅktena, V, 1, 4
pitárah, V, 1, 1
√*pinv* *pinvate*, V, 3, 2 (accent dubious)
√*pib* *piba*, IV, 1, *pibā*, V, 1, 1
piśaṅgasaṃdṛśam, V, 2, 1 (v. l. °*sadṛśam*)
pīvarīm, V, 2, 2
puccham, V, 1, 2
punarbhūh, V, 1, 1, °*bhuvah*, V, 1, 1.
purā, V, 2, 1, 2
puruvāram, V, 2, 2
puruvaso, IV, 1
√*puṣ* *puṣyantah*, V, 2, 2
puṣṭih, IV, 1
pūrvam (nom. neut.), V, 3, 2, (gen. masc.) IV, 1
pūrvīnām, IV, 1
pūrvahūtau, V, 1, 1
Pūṣā, V, 1, 1, *Pūṣan*, IV, 1
√*pṛ* *pārayat*, IV, 1.
pṛthivī, V, 1, 1
pṛthivyupardám, V, 3, 2 (accent and reading dubious)
Pṛśnimātarah, V, 1, 1
prakṣe, V, 2, 2 (v. l. *upaprakṣe*)
prácetana, IV, 1
prajām, V, 3, 2
Prajāpatih, V, 3, 2
prati (with acc.), V, 2, 1.
prátiṣṭhā, V, 1, 2; 3, 2
prabhuh, V, 1, 1 (v. l. *prabhūh*); (voc.) IV, 1.
prabhūh (v. l. *prabhuh*), V, 2, 1.
prastobha, V, 2, 2 (more prob. *pra* + √*stubh*).
prāṇah, V, 1, 5, 3, 2; (acc.) V, 1, 4, 3, 2, (dat.) V, 1, 4, 3, 2, (gen.) V, 3, 2
priyah, V, 1, 1

bahu (acc.), V, 1, 5; (abl.) V, 1, 5, Ś I, 8
bārhatena, V, 1, 4
bṛhát, IV, 1, V, 2, 1; *bṛhat* (name of Sāman), V, 1, 2
Bṛhaspátih, V, 1, 1.
bráhma, V, 1, 1, (acc.) V, 3, 2, (voc.) V, 3, 2.
brahmavarcasám (acc.), V, 3, 2
brāhmaṇābhartṛkam (nom. neut.), V, 3, 2 (accent dubious)
√*brū* *sam-bravāvahai*, IV, 1.

bhagah, V, 1, 5
bhadrīya (name of Sāman), V, 1, 2
bhargah, V, 1, 5
bhuktah, V, 1, 5
bhujah, V, 1, 5
bhuvah (indecl.), V, 1, 4, 3, 2
√*bhū* *bhuvah*, IV, 1, *bhūyāsam*, V, 2, 1, *bhūtám* (acc. neut.), V, 1, 1, *bhūtebhyah* (dat.), V, 2, 4, *vibhūtam* (nom. neut.), V, 3, 2
bhūtayah, V, 3, 2
bhūyah (acc.), V, 1, 5, Ś I, 8
bhūh (indecl.), V, 1, 4, 3, 2
√*bhṛ* *ābhara*, V, 2, 2
bheṣajam, I, 3, 4

maṃhiṣṭhah, IV, 1, V, 2, 1; 2, (voc.) IV, 1
maghám, V, 2, 2, (dat.) V, 2, 1
maghavan, IV, 1, *maghónam*, IV, 1.
√*mad* *matsva*, IV, 1, *matsva*, V, 2, 1.
madam, V, 2, 1.
madhu, V, 1, 1
madhumati, V, 2, 2
√*man* *manyaya*, IV, 1 (accent dubious)
mánah, V, 1, 1, (gen.) 3, 2, (instr.) V, 1, 5, (abl.) 3, 2
manyáve, IV, 1.
marīcayah, V, 1, 1
Marutah, V, 1, 1
√*mah* *mahāyāmah*, V, 2, 1
mahān, V, 1, 5, *mahat*, V, 3, 2, *mahīm*, V, 3, 2

mā́m, III, 2, 5; V, 1, 1, 5, *me*, V, 1, 1, *me* (dat.), V, 3, 2, *mayā*, V, 1, 5.
Mitrā́varuṇau V, 1, 1, 2, 2
mithunam, V, 1, 1
mūrdhā́, V, 3, 2.
√*mṛj* *ámṛktaḥ*, V, 2, 2

yáḥ IV, 1; V, 1, 2, *yā́*, V, 1, 2, *yád*, IV, 1, V, 1, 2, *yám*, V, 2, 3, *yásya* (masc.), V, 2, 1, *yé*, V, 1, 1; 3, 2
√*yaj* *yajāmahe*, V, 3, 2, *yaja*, V, 3, 2, 3, *yajamānam*, V, 1, 5
yājatrā́ḥ, V, 1, 2
yajñā́ḥ, V, 2, 1, (acc.) V, 1, 5, 2, 1
yajñasamṛddhím, V, 3, 2 (accent dubious)
yadā́ (when), I, 3, 4, V, 2, 1, (so that) V, 2, 2
yádi, V, 2, 2
√*yam* *yachatu*, V, 1, 1
yaśā́ḥ, V, 1, 5, (acc.) V, 3, 2
√*yā* *ayā́hi*, IV, 1; *upayā́hi*, V, 2, 1
yújaḥ, V, 2, 1.
yuvā́, V, 2, 2

raṇíyam, V, 1, 1
rayím, V, 2, 1, 2, (nom.) 2
rayisā́nā, V, 2, 2 (reading dubious)
rásaḥ, V, 1, 1, 3, 2, (acc.) V, 3, 2
√*rāj* *virājati*, V, 3, 1, *vi-rājasi*, I, 4, 3
rājanya (name of Sāman), V, 1, 2
rājā, V, 3, 2, *rā́jānaḥ*, V, 1, 1
rātríḥ, V, 1, 1
rathantarāya, V, 1, 4
rāye, IV, 1, (gen.) IV, 1
Rudráḥ, IV, 1, 4
√*ruh* *anvavarohāmi*, V, 1, 4, Ś I, 7, *avarohantu* V, 1, 4, Ś I, 7
rūpam, V, 1, 1

√*likh* *vilikhāmi*, V, 1, 4
lokám, V, 3, 2, (loc.) V, 1, 1, (gen. plur.) V, 3, 1

vaḥ, V, 2, 2
√*vac* *vakṣyāmi*, V, 1, 5, Ś I, 8
vajram, IV, 1
vajrivaḥ, IV, 1
√*vad* *pra-vadiṣyāmi*, V, 1, 5, Ś I, 8, *vadiṣyantam*, V, 1, 5, *vadayet*, III, 2, 5
vánam (?), V, 2, 1

Váruṇaḥ, V, 1, 1
Vā́ruṇavaiṣṭutam, V, 3, 2 (accent and reading dubious)
varṣāpavitram, V, 3, 2.
vaśāḥ, IV, 1
vaśī́, IV, 1.
vásuḥ, V, 2, 1, *vaso*, IV, 1, *Vasavaḥ*, V, 1, 4.
√*vah*, cf. √*ūh* *udūhāmi*, V, 1, 4
vā-vā́, V, 2, 3
vā́kprabhūtam, V, 3, 2 (accent dubious)
vā́k, V, 1, 1, 5, 3, 2, (acc.) V, 1, 5, (instr.) V, 1, 5, (gen.) III, 2, 5, V, 3, 2
vā́jāya, IV, 1, *vājasātim*, IV, 1.
vājasutaye, V, 2, 2
vā́m, V, 2, 1.
vāyúḥ, V, 1, 1
vigāhā́ḥ, V, 2, 1
vijárah (?), V, 2, 1.
vijigyuṣā́m (accent dubious) V, 3, 2
√*vid* *vidā́*, IV, 1 (or *vidúḥ*), *vide*, IV, 1, *vividā́n* V, 2, 2
víprāḥ, V, 2, 2
vibhūḥ, V, 3, 2, *vibhā́ḥ*, V, 1, 1

apavadiḥ, XII, 24
apsumah, XI, 6, (loc) XI, 5
amitrān, XII, 12
amṛtam, XII, 31
ayaḥ, XI, 8
ayam, XIV, 2, *anena* XII, 1, XII, 10, 30, A. II, 7, *asmai*, XII, 28*, *asya*, XII, 29, &c, *asmin*, XII, 24
aratiḥ, XII, 31
arkaḥ, I, 7.
artham, XIV, 2
arthayitah XIV, 2
ardhi, XII, 20

alaksmih, XII, 24
alardah, XII, 19 (of doubtful form and meaning, cf perhaps *aratu* (Lex), *aradu* (AV) but perhaps it may be from √*r* (cf *alarti*, RV , VIII, 48, 8), for *alar ta* (like *vavā ta*, Whitney, *Sanskrit Grammar*, p 442 Macdonell, *Vedic Grammar*, p 120, n 5), the tenuis becoming a media (cf Macdonell, p 32) and meaning 'active one' Or *alaya*?)
√*av* *avatu*, VII, 1, A II, 7.
√*aś* *aśnotu*, XII, 21, XIV, 2
√*aś* *aśiya* XI, 8, *aśata*, XII, 14 (doubtful, the MS reading is *majhitaram śatamah prati sthah*, and I amend to *a śata* to give sense and metre)
aśma, XI, 8
aśvesu, XII, 4
Aśvinau XII, 33
√*as* *asi*, XII 33; *astu* VII, 1, XII, 15; A II, 7, *sthah*, A II 7
asau XIV, 1, *imam*, XII, 18
asurah, XII 25
aham, XII 33
ahoratrān, VII, 1, A II, 7.

ākāśah XI, 5, 6, *ani*, A II 7
aticchandasena XI, 8
ātmā, XI, 6 (loc) XI, 5, 6

inkh *prenkhayatu* I, 7
Iśanah, XI, 5, 6

uttama lokah, XII, 15.
uttamangam (acc.), XIV, 1
udaram, XI, 6, (loc.) XI, 5, 6
uparistat, XII, 12
usasah (abl), XII, 29

rtām, XIV, 1
rtam (acc.), VII, 1, A II, 7, (? nom) VII, 1, A II, 7
rsinā, XII, 30, *rsayah*, XII, 16

oghah, XII, 11; 29. (The *older* form is *anghah*, and thus may best be read here)
ojah, XII, 16

ausnihena, XI, 8

kaksam, XII, 9.
kankah, XII, 14 Cf *Ind Stud*, XIII, 264, n
kabandham (acc.), XIV, 1
kavayah, XII, 32
kakubhena, XI 8
kila, XII, 10, XIV, 2
kilbisam XII 21
kulisena, XII 11
kulesu, XII, 23
√*kr* *kurute*, XII, 29, XIV, 1, *krnoti*, XII, 28, *kuru*, XII, 2, *krnvan* XII, 7, 34; *krtam*, XII, 26
krsnah (*ahih*), XII, 28
√*klp* *kalpata*, XII, 20
√*krudh* *kruddham*, XII, 21, 26.
ksatram XII, 16

√*ga* *agan* (MSS °*an*), presumably a plural form of the imperfect of *ga* as a second class verb (cf Whitney *Sanskrit Grammar*, §§ 855, 621, but if so a late form The other texts have *agre*), XII, 16 *agat*, XII, 32 (in both cases probably with true aorist effect)
gayatrena XI, 8
grhe, XII 24 *grhesu*, XII, 25
gosu XII, 3 4
√*grath* *udgrathami* XI 8
granthas, XI, 8, (acc.) XI, 8
grahah, XII, 28

ghrtat, XII, 7, 34.

caksuh, VII, 1, IX, 1, A II, 7, XI, 6, (loc) XI, 5, 6 *candramāḥ*, XI, 5; 6

chandāṃsi (acc.), XII, 17; *chandasā*, XI, 8.
√*chid* *chittvā*, XIV, 1; *chinnam*, XII, 29

√*jan* *jāyate*, XII, 23; 25; *jāyamānā*, XII, 23, *jātaḥ*, XII, 19, *jātam*, XII, 26 (neut. nom.).
janeṣu, XII, 6
jambhakaḥ, XII, 25 (cf. Vājasaneyi Saṃhitā, XXX, 6, &c.)
jaradaṣṭiḥ, XII, 2.
jagatena, XI, 8.
jātavedaḥ, XII, 22, °*vedaḥ*, XII, 2
jambaḥ, XII, 30 (cf. Uṇādi Sūtra, IV, 95; 96 presumably it denotes some special shrub or tree)
√*ji* *jaya*, XII, 11, and II, 17 (?)
jīvitya, XII, 30
√*jīv* *anu jīvatha*, XII, 18.
√*juṣ* *juṣanta*, XII, 13.
√*jñā* *vijānāti*, XIV, 2.
jñānavidhulapūrṇa, XIV, 2.
jyotiṣām, VII, 1, IX, 1, A. II, 7

tam, XII, 19, *tad* (nom.), XII, 3; 4, (acc.) XII, 4, *tasya* (masc.), XII, 20; 29.
tanvaḥ (abl.), XII, 2.
tigmajambhaḥ, XII, 9
tiraścinarājī, XII, 28 (reading doubtful the MS B has *tir ścı na rāja* which would easily give *tiraści na rājī* if *tiraści* could mean 'animal' and if *rājā* were naturally introduced here (cf. p. 161) But *tiraścinarāji* = snake occurs several times in the Atharvaveda (e.g. III, 27, 2), and the temptation to read °*rājiḥ* or *rājī* (as a parallel form) is very great)
tṛptiḥ, XI, 8.
√*tṝ* *taret*, XII, 20
trastubhena, XI, 8.
tvacam, XII, 22
tvam, XII, 13, *tvā*, XII, 19; *te*, XII, 33

daṃṣṭrī, XII, 13 (The usual form is *daṃṣṭra*, Pāṇini, III, 2, 182, and Gaṇa.)
√*dabh* *adabdham*, VII, 1; IX, 1, A. II, 7.
dasyun, XII, 11.
√*dā* *samadah*, XII, 1.
devyaḥ, XII, 21.
diśaḥ, XI, 5; 6.
dīkṣitam, XII, 16; *dīkṣe*, VII, 1, IX, 1; A. II, 7
duraḥ, XII, 10 (v. l. = 'giver'; cf. RV., I, 53, 3: VI, 35, 5, where occurs *vi durō gṛṇīṣe*, and Aitareya Āraṇyaka, V, 2, 1, n. 4).
√*duṣ*: *duṣyati*, XII, 23.
√*dṛh*: *dṛṃhatu*, XII, 5
devaḥ, I, 5; (nom. plur.) VII, 17; (gen.) XI, 8; (dat.) VII, 1; A. II, 7.
devyā, I, 5.
dyām, IX, 7; *divam*, XI, 18, XII, 5, (loc.) ib.
√*dviṣ*: *dviṣantam*, XII, 20, 29, *dviṣataḥ* (acc.), XII, 31.
dvipī, XII, 26.

dhanaṃjayaḥ, XII, 7. 34
dharuṇaḥ, XII, 7; 34
√*dhā*: *sam adadhāma*, A. II, 7, *sam adadhat*, I, 5 (here it means 'has united', not a mere past The use is remarkable cf. *samadhat-tam* in VII, 3, where the Aitareya version has the correct aorist), *ahitam*, XII, 2; 3
dhītī, XII, 17.
dhruvayonih, XII, 7. 34.

na, see *sampat*.
naḥ, XII, 9
√*nam* *abhisaṃnamantam*, XII, 16, 17.
namaḥ, VII, 1, A. II, 7
√*naś* *apinaśyatam*, XII, 33
nakam (acc.), XIV, 1.

VIII. INDEX TO INTRODUCTION AND NOTES

(Only the more important points are here referred to. References to the Introduction are to pages, to the Notes to the Āranyakas.)

Abuse, employment of, in ritual, V, 1, 5, n. 17.
Āgnimāruta Śastra, 28.
Agnistoma, 17, 33
Aitareya Āranyaka, MSS of, 1–11, commentaries on, 11–18, divisions of, 18–26, the Mahāvrata in, 26–39, the Upanisads of, 36–51, style and grammar, 51–74; relation of I and V, I, 2, 3, n. 5, date of III, III, 2, 1, n. 2.
Aitareya Brāhmana, 16 sq., relation to Kausitaki Brāhmana, 30–33, style and grammar, 52, 66, 67
Ānandatirtha, *ṭīkā* on Śankara's *Bhāsya*, 11, 12, *bhāsya*, 12.
Āpastamba, knows Vedānta (?), 26
Āranyaka, meaning of, 15, III, 2, 6, n. 11
Āśvalāyana, 'author' of Āranyaka IV (?), 18, 19, Śrauta Sūtra quoted in Āranyaka, V, 3, 2, n. 14, relation to Śaunaka, ibid.
Atharvaśiras Upanisad, known to Gautama, 26
Ātman, doctrine of, 40 sq

Bahvṛca Brāhmana Upanisad, 38
Bṛhadāranyaka Upanisad, relation to Aitareya Āranyaka II, III, 41, 44–46
Bṛhaddevatā, comparison of grammar of, with Aitareya Āranyaka, 72
Buddhism, relation to Aitareya Āranyaka II, III, 47–49

Chāndogya Upanisad, relation to Aitareya Āranyaka II, III, 41, 44–46

Chariots (*tricakra*), I, 5, 3, n. 6.

Deussen, discussion of theory of significance of Upanisads, 41 sq.

Epic, date of, 50; I, 5, 2, n. 19

Fire, significance of use of, in ritual, V, 3, 1, n. 21.
Fire altar, bird form of, 30 sq., V, 1, 2, notes 2 and 5

Gautama, knows Atharvaśiras Upanisad, 26
Gavāmayana, 17, 26.
Gopatha Brāhmana, date of, 25, 26, cf. *V.O.J.*, XVIII, 191 sq.
Grammar (including Accidence, Syntax, and Vocabulary[1])

a. English Index.

Cases, 58, 59, 68, 69, Accus. with √*man* alternating with nom., III, 1, 4, n. 3, with *brū* (two accus.), III, 1, 3, n. 6, *J.A.O.S.*, XXVIII, 378 sq., 398 sq.; Instr. with *antar* + √*i*, V, 3, 3, n. 21, with causative of √*bhuj*, III, 2, 4, n. 16; Dat. with *sam*, V, 1, 6, n. 3; Gen. predicative, I, 2, 2, n. 8, 3, 4, n. 10, II, 1, 4, n. 7, V, 3, 3, n. 2, partitive, with positive adj., I, 2, 3, n. 6, with verb (*yaja*), V, 3, 3, n. 3; absolutely, II, 3, 1, n. 6, defining, IV, 1, n. 3, V, 1, 6, n. 3, construction of whole and part, V, 1, 4, n. 5, nom., II, 3, 8, n. 11

---

[1] What is given in the Introduction is not repeated in the Index

Compounds, disjunctive adjectival Dvandva, I, 3, 3, n 4
Concord, attraction of predicate, V, 1, 1, n 14, plural for dual (?), I, 1, 2, n 7; V, 2, 2, n 12, superlative agrees with subject, I, 2, 4, n 6, masc after masc and neut, II, 1, 7, n 1, neut adj pred, III, 1, 2, n 4
Metrical lengthening of vowels, II, 3, 8, n 9 V, 2, 2, n 12, in prose, III, 1, 2, n 2
Moods, 62–63, Conditional, III, 1, 4, n 8, Imperative in *-tat*, V, 1, 5, n 1, Optative of characteristic, II, 1, 2, n 2, III, 2, 3, n 3, indefinite, III, 2, 1, n 1, V, 3, 3, n 11 *J R A S*, 1909, p 151, Injunctive, I, 5, 2, n 8
Numerals, use of acc for nom, II, 2, 4, 3, 8, V, 1, 1, n 2.
Particles, 65, 66, use of *iva*, I, 1, 2, n 3, use of *nu*, V, 3, 3, n 12, use of *cana*, III, 2, 3, n 6, use of *yat*, II, 1, 2, n 10, 5, n 5
Prepositions 59, *adhi* with acc, II, 3, 1, n 6, *abhi* with acc, I 4 2 n 7, *api* with acc, II, 2, 5, n 8, *abhitah* with acc, V, 3, 1, n 6, *uttarena* with acc, V, 3, 1, n 6, *pari* with acc, I, 5, 1, n 13, *paścat* with gen, V, 1, 4, n 15
Pronouns, 58, *enam* III, 1 4, n 3
Sandhi, 55, irregular contraction of vowels, III 1, 3, n 2, 1 4 n 11, V, 3 2, n 9, of *om*, V, 1, 6, n 4
Tenses, 59–62, Perfect and Imperfect, I, 2, 2, n 6, cf *J R A S*, 1909, p 150, Perfect, original force of, II, 1, 8, n 8
Verbal Nouns and Participles, 64, 65, infin in *tah*, I, 1, 1, n 4, gerund and partic. with √*man*, III, 1, 4, n 3, 2, 4, n 7, gerund (time of), I, 3, 1, n 1
Voice, use of middle as passive in perfect forms, III, 1, 1, n 3, in present and imperfect V, 2, 2, n 14; in participle, I, 2 2, n 5

b SANSKRIT INDEX.

anuphalakam, I, 2, 2, n 11
aksah, I, 2 2, n 11, V, 1, 6,
atithi, I, 1, 1, n. 6
annalamam, I, 4, 1, n 11
anyo 'nyam, III, 1, 6, n 7.
abhivy ākarsan (?), III, 1, 6, n 5
avir edhi, II, 7, n 1.
akṣpā bharayan, III, 2, 3, n 4
kaksau I, 2, 2, n 11
kaksodake, V, 3, 3, n 17
cakirtayiset, V, 3 3, n 22.
dutah, I, 4, 1, n 9
nakula (?), III, 2, 5
nana, V, 1, 4, n 11
paran II, 4, 3, n 3 Cf *Ind Stud*, XVII, 190
brahma, III, 2, 3. 304, 367
rathantaroja, V, 1, 2, n 3
lipi, 23
vana, V, 1, 4, n 3
vyathis, V, 2, 1, n 2
sambaphalanah, I, 4 1, n 10
smasu (?) III, 1, 2, n 4

Jaiminiya Upanisad Brahmana 46, V, 3, 2, n 3

Katyayana, grammarian date of, 22, 24
Katyayana, author of Sarvanukramani, 21, 24
Kausitaki *Brahmana, relation to Aitareya* Brahmana, 31 33, 39
Kausitaki Upanisad, relation to Aitareya Āranyaka II, III, 4, n 2, 46
